### **Details of Remedial Classes**

Students who face difficulty grasping topics in a classroom are given different educational strategies like refined practice, repetition of content, and clarification. Whereas, in some cases, individual attention is provided so that the topic is easily picked up by the student. Remedial educators use the necessary instructional techniques to help students overcome any learning obstacles and achieve their full potential.

A remedial educator can assist the students by teaching the fundamentals of reading, written language, math, and study/organizational skills using innovative, multisensory approaches and practices. It has been demonstrated that using these strategies can improve student learning. If they are taught using such plans and techniques, students are taught to make use of their strengths, talents, and abilities while also overcoming their weaknesses.

#### **The following activities are taken in the remedial classes:**

1. Remedial Reading Methods
2. Encouraging Daily Reading
3. Concentrating on Comprehension
4. The remedial class includes short and long term instructional goals learning steps, exercises, and evaluations to ensure that the curriculum is implemented.
5. Special classes are taken
6. Provided extra assignments
7. Moral support to students

#### **Identification of slow learners**

- Low level of comprehension
- Poor memorization potential
- Failure to understand instructions and implement them
- Lack of motivation towards learning
- Need additional time to complete certain task(s)
- Inability to understand complex concepts
- Difficulties in problem-solving
- Low self-assurance with minimum self-expectations
