**Pedagogy:** Chalk and Talk, PPT, Group discussion, Seminar, Interaction, virtual lab, Lab visit

<b>Formative Assessment</b>	
<b>Assessment Occasion</b>	<b>Weightage in Marks</b>
<b>House Examination/Test</b>	<b>20</b>
<b>Written Assignment/Presentation/Project / Term Papers/Seminar</b>	<b>20</b>
<b>Total</b>	<b>40</b>

## Skill Enhancement Course Content

Semester: II Zoology

<b>Course Title:</b> Sericulture <b>Course Code:</b> VEC5ZOOP2	<b>Course Credits:</b> 2
<b>Total Contact Hours:</b> 56 Hours	<b>Duration of ESA:</b> 3 Hrs.
<b>Formative Assessment Marks:</b> 20	<b>Summative Assessment Marks:</b> 30

### Course Outcomes (COs):

At the end of the course the student acquires the following knowledge:

**COs1-** Sericulture is an agro-based industry which gives economic empowerment to the students.

**COs2-** Sericulture may be taken up as a small scale industry by the small farmers and unemployed youth.

**COs3-** Get jobs in teaching profession, silk board and other Govt. institutions as technicians. Student can be self-employed after successful completion of the course

### Course Content

<b>List of Lab to be conducted</b>		<b>42 Hrs</b>
<b>1</b>	Morphology and taxonomy of mulberry.	
<b>2</b>	Raising of saplings – cutting preparation, planting and maintenance of nursery.	
<b>3</b>	Agronomical practices in mulberry cultivation-weeding, manuring, irrigation and harvesting.	
<b>4</b>	Diseases and pests of mulberry.	
<b>5</b>	Silk producing insects – non mulberry and mulberry silk worms.	
<b>6</b>	Life cycle and morphology of <i>Bombyxmori</i> .	
<b>7</b>	Dissection of digestive system and silk glands of <i>Bombyxmori</i> .	
<b>8</b>	Silk worm rearing equipments.	
<b>9</b>	Rearing process – incubation, chawki rearing, late age worm rearing, mounting and harvesting of cocoons.	
<b>10</b>	Silk worm diseases and pests – Grasserie, Flacherie, Muscardine, Pebrine, Uzi fly and Beetles.	
<b>11</b>	Grainages – production of silk worm eggs.	
<b>12</b>	Physical and commercial characteristics of cocoons.	
<b>13</b>	Reeling and weaving process – stiffling , cooking , brushing, reeling and re-reeling, different types of looms.	
<b>14</b>	Visit to mulberry farm and sericulture centre.	
<b>15</b>	Economics of silk production (Project)

# **Model Curriculum Structure for Degree Program B.Sc., Hons in Zoology**

**Name of the Degree Program:** B. Sc., Hons

**Discipline Core:** Zoology

**Total Credits for the Program:** 50/100/142/184/268

**Starting year of implementation:** 2021-22 (I & II sem) ,2022-23 (III & IV sem)

## **PROGRAM OBJECTIVES (POs)**

**POs1-** The Program offers both classical as well as modern concepts of Zoology in higher education.

**POs2-** It enables the students to study animal diversity in both local and global environments.

**POs3-** To make the study of animals more interesting and relevant to human studies more emphasis is given to branches like behavioral biology, evolutionary biology and economic Zoology.

**POs4-** More of upcoming areas in cell biology, genetics, molecular biology, biochemistry, genetic engineering and bioinformatics have also been included.

**POs5-** Equal importance is given to practical learning and presentation skills of students.

**POs6-** The lab courses provide the students necessary skills required for their employability.

**POs7-** Skill enhancement courses in classical and applied branches of Zoology enhance enterprising skills of students.

**POs8-** The global practices in terms of academic standards and evaluation strategies.

**POs9-** Provides opportunity for the mobility of the student both within and across the world.

**POs10-** The uniform grading system will benefit the students to move across institutions within India to begin with and across countries.

**POs11-** It will also enable potential employers in assessing the performance of the candidates across the world.

**Semester III- Zoology Core Course Content**  
**Zoology: Paper-III: Molecular Biology,**  
**Bioinstrumentation & Techniques in Biology**

<b>Course Title/Code: Molecular Biology, Bioinstrumentation &amp; Techniques in Biology</b>	<b>Course Credits: 4</b>
<b>Course Code: FSC470</b>	<b>L-T-P per week: 4-0-0</b>
<b>Total Contact Hours: 56</b>	<b>Duration of ESA: 3 Hours</b>
<b>Formative Assessment Marks: 40</b>	<b>Summative Assessment Marks: 60</b>

**Course Outcomes (COs):**

At the end of the course the student should be able to understand:

**CO1-** After successful accomplishment of the course, the learners will be able to acquire better understanding and comprehensive knowledge regarding most of the essential aspects of Molecular Biology subject which in turn will provide a fantastic opportunity to develop professional skill related to the field of molecular biology.

**CO2-** The course will mainly focus on the study of principal molecular events of cell incorporating DNA Replication, Transcription and Translation in prokaryotic as well as eukaryotic organisms.

**CO3-** Acquiring knowledge on instrumentation and techniques in biology.

Content	Hours
<b>Unit I</b>	<b>14</b>
<b>Chapter 1: Process of Replication and Transcription</b> <ul style="list-style-type: none"> <li>• Fine structure of gene (Cistron, Recon, Muton)</li> <li>• DNA polymerase types and function.</li> <li>• Semiconservative model of replication.</li> <li>• Replication in Prokaryotes (Initiation, Elongation, Termination)</li> <li>• RNA polymerases - types and functions</li> <li>• Transcription in prokaryotes and eukaryotes</li> </ul>	8
<b>Chapter 2: Process of Translation</b> <ul style="list-style-type: none"> <li>• Genetic code and its salient features</li> <li>• Translation in prokaryotes and eukaryotes</li> </ul>	6
<b>Unit II</b>	<b>14</b>
<b>Chapter 3. Regulation of gene expression-I</b> <ul style="list-style-type: none"> <li>• Regulation of gene expression in prokaryotes- lac operon (inducible) and trp operon(repressible) in <i>E. coli</i></li> <li>• Regulation of gene expression in eukaryotes - Role of chromatin (euchromatin andheterochromatin) in gene expression</li> <li>• Post-transcriptional modification: capping, splicing, polyadenylation</li> <li>• Concept of RNA editing (mRNA), gene silencing, and, RNAi</li> </ul>	9
<b>Chapter 4. Regulation of gene expression-II</b> <ul style="list-style-type: none"> <li>• Post-translational modifications: purpose, advantages, and significance; glycosylation, methylation, phosphorylation, and acetylation.</li> <li>• Intracellular protein degradation (lysosomal autophagy and ubiquitin proteosome pathway).</li> </ul>	5
<b>Unit III</b>	<b>14</b>
<b>Chapter 5: Microscopy</b> <ul style="list-style-type: none"> <li>• Principles and applications of Light microscopy, Dark field microscopy, Phase contrast microscopy, Fluorescence microscopy, Confocal microscopy and Electron microscopy (SEM and TEM).</li> </ul>	9
<b>Chapter 6: Centrifugation and Chromatography</b> <ul style="list-style-type: none"> <li>• Centrifugation: Principles, types, and applications (High speed and Ultracentrifugation)</li> <li>• Chromatography : Principle and applications of: TLC, HPLC and GC</li> </ul>	5
<b>Unit IV</b>	<b>14</b>
<b>Chapter 7: Biochemical Instrumentation</b> <ul style="list-style-type: none"> <li>• Colorimetry and Spectrophotometry: Beer-Lambert's law, Absorption spectrum, UV-VL Spectrophotometer.</li> <li>• pH meter, measurement of pH</li> <li>• Principle, applications and safety measures of Radio-tracer techniques - Autoradiography.</li> </ul>	6

<p><b>Chapter 8: Molecular Techniques</b></p> <ul style="list-style-type: none"> <li>• Principle and applications of Agarose gel-electrophoresis, SDS-PAGE, DNA Sequencing (Sanger's Dideoxy method)</li> <li>• PCR, DNA Fingerprinting, ELISA, Southern &amp; Northern Blotting and Western Blotting.</li> </ul>	8
---	---

**Semester III- Zoology Core Course I Content:**  
**Zoology: Paper-III: Molecular Biology, Bioinstrumentation and Techniques in Biology**

<b>Course Title: Molecular Biology, Bioinstrumentation and Techniques in Biology</b>	<b>Course Credits: 2</b>
<b>Course Code: FSC470</b>	<b>L-T-P per week: 0-0-4</b>
<b>Total Contact Hours: 56</b>	<b>Duration of ESA: 3 Hours</b>
<b>Formative Assessment Marks: 25</b>	<b>Summative Assessment Marks: 25</b>

**Course Outcomes (COs):**

At the end of the course the student should be able to:

**COs1-**At the end of the course, students will be able to understand the applications of biophysics and principle involved in bio-instruments.

**COs2-**Understand the methodology involved in bio techniques.

**COs3-** Students can demonstrate knowledge and practical skills of using instruments in biology and medical field.

**COs4-** They can perform techniques involved in molecular biology and diagnosis of diseases.

## Lab Course Content

List of experiments	14 units (1unit- 4hrs)
1. To study the principle and applications of simple, compound and binocular microscopes.	1
2. To study the principle and applications of various lab equipments- Ph meter Electronic balance, Vortex mixer, use of glass pipette and micropipettes, Laminar air flow Incubator, shaker, Water bath and centrifuge	2
3. To prepare Buffer solutions (Phosphate, Citrate, Tris-HCl buffer)	1
4. To estimate amount of RNA by Orcinol method.	2
5. Demonstration of differential centrifugation to fractionate components in a given mixture.	1
6. To estimate amount of protein by Lowry's method.	2
7. To identify different unknown amino acids using ascending paper chromatography.	1
8. Extraction of DNA from the given animal tissue sample.	2
9. To estimate amount of DNA by di-phenyl amine (DPA) method.	2

### Suggested Readings:

### Semester: III

Course Title: <b>ENDOCRINOLOGY</b> Course Code: FSC920	Course Credits: <b>3</b>
Total Contact Hours: <b>42</b>	Duration of ESA: 3 Hours
Formative Assessment Marks: <b>40</b>	Summative Assessment Marks: <b>60</b>

#### Course Outcomes (Cos):

##### At the end of the course the student should be able to:

Differentiate among endocrine, paracrine and autocrine systems.

**COs 1-** Describe the different classes and chemical structures of hormones.

**COs 2-** Identify the glands, organs, tissues and cells that synthesize and secrete hormones, hormone precursors and ass

**COs 3-** Identify and discuss the integration of the endocrine system in general with focus on specific interactions.

**COs 4-** Explain the consequences of under- and overproduction of hormones.

## Course Content

Content	Hrs.
<b>Unit I</b>	<b>14</b>
<p><b>Chapter 1. About Endocrine glands</b></p> <ul style="list-style-type: none"> <li>• Endocrine glands and classifications of hormones.</li> <li>• Characteristics and Transport of Hormones.</li> </ul> <p><b>Chapter 2. Hypothalamus-Hypophysis</b></p> <ul style="list-style-type: none"> <li>• Hypothalamus as a neuroendocrine organ</li> <li>• Pituitary – Structure and functions</li> <li>• Chemical nature, mode of action, and functions of pituitary hormones.</li> <li>• Pituitary disorders</li> </ul> <p><b>Chapter 3. Pineal gland</b></p> <ul style="list-style-type: none"> <li>• Structure and functions of Pineal gland.</li> <li>• Hypo- and hyperactive states of the gland.</li> </ul>	
<b>Unit II</b>	<b>14</b>
<p><b>Chapter 4. Thyroid and parathyroid</b></p> <ul style="list-style-type: none"> <li>• Histological structure of the glands.</li> <li>• Chemical nature, mode of action, and functions of the hormones.</li> <li>• Hypo- and hyperactive states of the glands.</li> </ul> <p><b>Chapter 5.: Adrenal cortex and medulla –</b></p> <ul style="list-style-type: none"> <li>• Histological structure of the gland. Chemical nature, and functions of hormones</li> <li>• Hypo- and hyperactive states of the gland.</li> </ul> <p><b>Chapter 6. Prostaglandins and their function</b></p>	
<b>Unit – III</b>	<b>14</b>
<p><b>Chapter 7: Pancreas:</b></p> <ul style="list-style-type: none"> <li>• Pancreatic islets - histological structure.</li> <li>• Chemical nature, and function of pancreatic hormones. Hormonal control of blood sugar.</li> <li>• Hyperinsulinism and diabetes mellitus.</li> </ul> <p><b>Chapter 8: Gastro-intestinal hormones –</b> Functions and regulation of secretion.</p> <p><b>Chapter 9: Different types of Rhythms –</b></p> <ul style="list-style-type: none"> <li>• Ultradian, circadian, infradian. different zeitgebers and their relation with circadian clock</li> <li>• Neural basis of biological clock and role of suprachiasmatic nuclei. Sleep- wakefulness cycle. Time keeping genes. Jet-lag and shift work.</li> </ul>

<b>Unit – 1</b>	
<p><b>Chapter 1.: Introduction to Animal Behaviour</b></p> <ul style="list-style-type: none"> <li>• Brief contributions of Karl Von Frisch, Ivan Pavlov, Konrad Lorenz, Niko Tinbergen.</li> <li>• Proximate and ultimate causes of behaviour.</li> </ul> <p><b>Chapter 2. Patterns of Behaviour</b></p> <ul style="list-style-type: none"> <li>• Stereotyped Behaviors - Orientation and Reflex.</li> <li>• Individual Behavioural patterns: Instinct and Learned Behaviour</li> <li>• Associative learning, classical and operant conditioning, Habituation, Imprinting.</li> </ul>	<b>14</b>
<b>Unit – 2</b>	
<p><b>Chapter 3. Social Behaviour:</b></p> <ul style="list-style-type: none"> <li>• Social organization in termites and honey bees.</li> <li>• Social behaviour: Altruism.</li> <li>• Conflict behaviour.</li> </ul> <p><b>Chapter 4. Sexual Behaviour</b></p> <ul style="list-style-type: none"> <li>• Sexual dimorphism, Mate choice in peacock.</li> <li>• Intra-sexual selection (male rivalry in red deer).</li> <li>• Kinship theory: Relatedness &amp; inclusive fitness.</li> <li>• Parental care in fishes (Nest Building &amp; cost benefit)</li> </ul>	<b>14</b>
<b>Unit – 3</b>	
<p><b>Chapter 5. Chronobiology</b></p> <ul style="list-style-type: none"> <li>• Brief historical developments in chronobiology.</li> <li>• Adaptive significance of biological clocks.</li> <li>• Biological Rhythms</li> </ul> <p><b>Chapter 6: Communications in animals</b></p> <ul style="list-style-type: none"> <li>• Bioluminescence in deep sea fishes and insects</li> <li>• Territoriality in Monkeys and Dogs</li> <li>• Role of pheromones in animal communication- Insects and Vertebrates,</li> <li>• Communication in Honey bees (Waggle Dance)</li> </ul>	<b>14</b>

### Suggested Readings:

1. Animal Behaviour by Drickamar.
2. John Alcock, Animal Behaviour, Sinauer Associate Inc., USA.
3. Paul W. Sherman and John Alcock, Exploring Animal Behaviour, Sinauer Associate Inc., Massachusetts, USA.
4. Chronobiology Biological Timekeeping: Jay. C. Dunlap, Jennifer. J. Loros, Patricia J. DeCoursey(ed). 2004, Sinauer Associates, Inc. Publishers, Sunderland, MA, USA
5. Insect Clocks D.S. Saunders, C.G.H. Steel, X., Afopoulou (ed.) R.D. Lewis. (3rdEd) 2002 Barends and Noble Inc. New York, USA
6. Biological Rhythms: Vinod Kumar (2002) Narosa Publishing House, Delhi/ Springer-Verlag, Germany.

**Pedagogy:** Chalk and Talk, PPT, Group discussion, Seminar, Interaction, virtual lab, Lab visit

<b>Formative Assessment</b>	
<b>Assessment Occasion</b>	<b>Weightage in Marks</b>
Class Test	10
Attendance and Assignments	05
Visit to Mulberry Farm and Sericulture centre.	05
<b>Total</b>	<b>20</b>

# Choice Based Credit System (CBCS) Syllabus for Undergraduate Zoology subject 2022-23

## DISCIPLINE CENTRIC ELECTIVE COURSE

### V SEMESTER ZOOLOGY

#### APPLIED ZOOLOGY

##### THEORY

(CREDITS 4)

#### Unit I

12 hrs

##### Introduction to Host-parasite Relationship

Host, Definitive host, Intermediate host, Parasitism, Symbiosis, Commensalism, Reservoir, Zoonosis

##### Epidemiology of Diseases

Transmission, Prevention and control of diseases: Tuberculosis, typhoid

##### Rickettsiae and Spirochaetes

Brief account of *Rickettsia prowazekii*, *Borrelia recurrentis* and *Treponema pallidum*

#### Unit II

12 hrs

##### Parasitic Protozoa

Life history, pathogenicity and preventive measures of *Entamoeba histolytica*, *Plasmodium vivax*, *Trypanosoma gambiense* and *Leishmania donovani*

##### Parasitic Helminthes

Life history and pathogenicity of *Ancylostoma duodenale*, *Wuchereria bancrofti*, Tape worm and *Liver fluke*.

#### Unit III

12 hrs

##### Insects of Economic Importance

Biology, Control and damage caused by *Helicoverpa armigera* (cotton boll worm), *Pyrilla perpusilla* (sugar cane leaf hopper), *Papilio demoleus* (lime butterfly), *Callosobruchus chinensis* (beetle), and *Tribolium castaneum* (red flour beetle) Lac insect.

**Sericulture**- Types of silks and distribution.

**Apiculture**- Types of honey bees, products, byproducts and their usage. Pollination and insects with examples.

#### Unit IV

12 hrs

##### Animal Husbandry

Preservation and artificial insemination in cattle; Induction of early puberty and synchronization of estrus in cattle

##### Poultry Farming

Principles of poultry breeding, Management of breeding stock and broilers, processing and preservation of eggs

##### Fish Technology

Genetic improvements in aquaculture industry; Induced breeding and transportation of fish seed.

#### Unit V

12 hrs

##### A. Insect Vector Biology

Introduction to vector biology, economic importance and control of fleas, lice, bugs, mosquitoes, flies and parasitoids. Vector-parasite interaction; host-pathogen interaction.

**B. Medical Zoology:**

Infectious/ communicable diseases: small pox, hepatitis, AIDS, influenza, SARS, Ebola, tuberculosis, plague, cholera, amoebiasis, malaria, dengue, chikungunya, trypanosomiasis, and elephantiasis.(pathogen. Vector, transmission, symptoms and prevention)

## V SEMESTER ZOOLOGY

### PRACTICAL –V

### APPLIED ZOOLOGY

#### PRACTICAL

(CREDITS 2)

1. Study of *Plasmodium vivax*, *Entamoeba histolytica*, *Trypanosoma gambiense*, and *Wuchereria bancrofti* and their life stages through permanent slides/photomicrographs or specimens.
2. Study of arthropod vectors associated with human diseases: *Pediculus*, *Culex*, *Anopheles*, *Aedes* and *Xenopsylla*.
3. Study of insect damage to different plant parts/stored grains through damaged products/photographs.
4. Identifying feature and economic importance of *Helicoverpa (Heliothis) armigera*, *Papilio demoleus*
5. Demonstration of Plastination techniques by using some dead insects.
6. Maintenance of freshwater aquarium.
7. Collection and mounting of Ants.
8. Animal associations: - Mutualism – Termites and *Trichonympha*.
9. Commensalism – Echenies and shark.  
Protocooperation – Hermit crab and Sea anemone.
10. Predation – Snake and Frog. Parasitism – Head louse, Bed bug, Mosquito, Ticks, Mites.
11. Identification of mulberry and non mulberry silkworms. Identification of different larvae of silk worm- Using specimens / pictures
12. Identification of food fishes of Karnataka.
13. Field visits to a Vermiculture / Sericulture / fisheries / apiculture / poultry / dairy farm- submission of any 1 Report.
14. Repetition.

#### SUGGESTED READINGS

1. Arora, D. R and Arora, B. (2001). Medical Parasitology. II Edition. CBS Publications
2. Atwal, A.S. (1986). Agricultural Pests of India and South East Asia, Kalyani  
CBCS Undergraduate Program in Zoology
4. Dennis, H. (2009). Agricultural Entomology. Timber Press (OR).
5. Dunham R.A. (2004). Aquaculture and Fisheries Biotechnology Genetic  
Approaches.CABI publications, U.K.
6. Hafez, E. S. E. (1962). Reproduction in Farm Animals. Lea & Fabiger Publisher
7. Kumar and Corton. Pathological Basis of Diseases.
8. Park, K. (2007). Preventive and Social Medicine. XVI Edition. B.B Publishers.
9. Pedigo, L.P. (2002). Entomology and Pest Management, Prentice Hall.

## **V SEMESTER ZOOLOGY**

### **PRACTICAL –V**

### **APPLIED ZOOLOGY**

#### **Scheme of Practical Examination**

Duration 3 Hours

Max Marks: 70

- |   |          |
|---|----------|
| 1. Identification of parasites A to F (6x4)<br>(3 from I and II, 3 from III and IV) | 24 Marks |
| 2. Identify and comment upon animal association G & H(5X2)                          | 10 Marks |
| 3. Identification of mulberry and non mulberry silkworms I&J(3X2)                   | 06 Marks |
| 4. Identification of food fishes of Karnataka K&L(3X2)                              | 06 Marks |
| 5. Identification of different larvae of silk worm-<br>Using specimens / pictures   | 04 Marks |
| 1. Report submission  | 10 Marks |
| 2. Class record.  | 10 Marks |

#### **SCHEME OF VALUATION FOR PRACTICAL -V**

1. Identification –01, Classification-01,Diagram – 01,Comment–01
2. Identification – 01,Diagram – 02, Comment-02
3. Identification –01, Diagram – 01, Comment- 01
4. Identification – 01, Diagram – 01, Comment- 01
5. Identification – 01, Diagram – 01, Comment- 02

# DISCIPLINE SPECIFIC ELECTIVE COURSE

## V SEMESTER ZOOLOGY

### INSECT, VECTORS AND DISEASES

**THEORY**

**(Credits 4)**

#### **Unit I**

##### **Introduction to Insects**

General Features of Insects, Morphological features, Head – Eyes, Types of antennae, Mouth parts w.r.t. feeding habits

**Concept of Vectors :** Brief introduction of Carrier and Vectors (mechanical and biological vector),

Reservoirs, Host-vector relationship, Vectorial capacity, Adaptations as vectors, Host Specificity

#### **Unit II**

##### **Insects as Vectors**

Classification of insects up to orders, detailed features of orders with insects as vectors – Diptera, Siphonaptera, Siphunculata, Hemiptera

#### **Unit III**

##### **Dipteran as Disease Vectors**

Dipterans as important insect vectors – Mosquitoes, Sand fly, Houseflies;

Study of mosquito-borne diseases – Malaria, Dengue, Chikungunya, Viral encephalitis, Filariasis; Control of mosquitoes

Study of sand fly-borne diseases – Visceral Leishmaniasis, Cutaneous Leishmaniasis, Phlebotomus fever; Control of Sand fly

Study of house fly as important mechanical vector, Myiasis, Control of house fly

#### **Unit IV**

##### **Siphonaptera as Disease Vectors**

Fleas as important insect vectors; Host-specificity, Study of Flea-borne diseases –Plague, Typhus fever; Control of fleas

#### **Unit V**

##### **Siphunculata as Disease Vectors**

Human louse (Head, Body and Pubic louse) as important insect vectors; Study of louse-borne diseases –Typhus fever, Relapsing fever, Trench fever, Vagabond's disease, Phthiriasis; Control of human louse

#### **Unit VI**

##### **Hemiptera as Disease Vectors**

Bugs as insect vectors; Blood-sucking bugs; Chagas disease, Bed bugs as mechanical vectors, Control and prevention measures

## V SEMESTER ZOOLOGY

### PRACTICAL –V

#### INSECT VECTORS AND DISEASES PRACTICAL (CREDITS 2)

1. Study of different kinds of mouth parts of insects
  2. Study of following insect vectors through permanent slides/ photographs:  
*Aedes, Culex, Anopheles, Pediculus humanus capitis, Pediculus humanus corporis, Phthirus pubis, Xenopsylla cheopis, Cimex lectularius, Phlebotomus argentipes, Musca domestica*, through permanent slides/ photographs
  3. Study of different diseases transmitted by above insect vectors
- Submission of a project report on any one of the insect vectors and disease transmitted**

#### SUGGESTED READINGS

1. Imms, A.D. (1977). *A General Text Book of Entomology*. Chapman & Hall, UK
2. Chapman, R.F. (1998). *The Insects: Structure and Function*. IV Edition, Cambridge University Press, UK
3. Pedigo L.P. (2002). *Entomology and Pest Management*. Prentice Hall Publication
4. Mathews, G. (2011). *Integrated Vector Management: Controlling Vectors of Malaria and Other Insect Vector Borne Diseases*. Wiley-Blackwell

# DISCIPLINE SPECIFIC ELECTIVE COURSE

## VI SEMESTER ZOOLOGY

### AQUATIC BIOLOGY

**THEORY**

**(Credits 4)**

#### **UNIT I**

**12 hrs**

##### **Aquatic Biomes**

**Ecosystems:** Concept, types and structure of ecosystem

**Hydrosphere :** (Water) Physical and chemical properties.

**Brief**

**introduction of the aquatic biomes:** Freshwater ecosystem (lakes, wetlands, streams and rivers), estuaries, intertidal zones, oceanic pelagic zone, marine benthic zone and coral reefs

#### **UNIT II**

**12 hrs**

##### **Freshwater Biology**

**Physico-**

**chemical Characteristics:** Light, Temperature, Thermal stratification, Dissolved Solids, Carbonate, Bicarbonates, Phosphates and Nitrates, Turbidity; dissolved gases (Oxygen, Carbon dioxide).

**Pond:** The pond as an ecosystem – Origin and classification, flora and fauna of pond ecosystem. Freshwater adaptations.

**Lakes:** Origin and

classification, Lake as an Ecosystem.

#### **UNIT III**

**12hrs**

##### **Marine Biology**

**Physico-chemical Characteristics:** Light, Temperature, pressure, stratification, Salinity and density of Sea water, biotic community of Continental shelf open sea, Adaptations of deep sea organisms, Coral reefs, Sea weeds.

#### **UNIT IV**

**12 hrs**

##### **Management of Aquatic Resources**

**Water pollution:** Definition, sources Types and classification of pollutants. Effects of Water Pollution, Oxygen sag curves and Eutrophication Drinking water: Collection, purification and distribution. Wastewater treatment: Primary, secondary and tertiary treatment

**Causes of pollution:** Agricultural, Industrial, Sewage, Thermal and Oil spills, Management and conservation (legislations), Sewage treatment, Water quality assessment- BOD and COD.

#### **UNIT V: Aquaculture**

**12 hrs**

**Aquaculture in India:** an overview – nutritional value and food security - Site selection and preparation of culture ponds

**Fish**

**culture:** carps, marine fishes and ornamental fishes.

**Prawn culture:** Freshwater prawns and marine shrimps. Fattening of crabs. Crayfish and Lobster

**Pearl culture:** Types of pearls, composition, Biology of pearl oyster, pearl formation, culture of pearls .

## **SUGGESTED READINGS**

1. B. Das, (2012). Parasitology, Books & Allied Pvt. Ltd-II
2. S.Bhattacharya (2011). Environmental toxicology, Books & Allied Pvt. Ltd
3. S.Bhattacharya (2011). Environmental toxicology, Books & Allied Pvt. Ltd
4. T. K. Saha. (2012). Ecology and Environmental Biology. Books & Allied Pvt.

## **PRACTICAL VI**

### **AQUATIC BIOLOGY**

#### **PRACTICAL**

**(Credits 2)**

- 1&2. Identify the important macrophytes, phytoplanktons and zooplanktons present in a lake ecosystem/ photographs.
- 3 Estimation of dissolved oxygen in different water samples.
- 4 Estimation of dissolved carbon dioxide in different water samples.
- 5 Estimation of chlorides in different water samples.
- 6 Estimation of hardness in different water samples.
- 7 Measurement of pH, using pH-meter, pH paper.
- 8 Study of pond ecosystem.
- 9 Study of aquarium ecosystem.
- 10 Morphometric measurement of locally available freshwater fish and marine water fish.
- 11 Identification of fish(any six).
- 12&13. Fish by products.
- 14 . Project Report on a visit to a Sewage treatment plant/Marine bioreserve/  
Fisheries Institutes.
15. Repetition.

## **PRACTICAL VI**

# AQUATIC BIOLOGY

## Scheme of Practical Examination

Duration 3 Hours

Max Marks: 70 Marks

1.	Estimation of any 2 parameters – by lots	10Marks
2.	Estimation of any 2 parameters – by lots	10Marks
3.	Morphometric measurement of freshwater fish and marine water fish.	10Marks
4.	Identification of fish. (A&B)	08 Marks
5.	Identification of phyto and zooplanktons (C&D)	08 Marks
6.	Fish by products	04 Marks
7.	Report	10 Marks
8.	Record	10 Marks

## SCHEME OF VALUATION FOR PRACTICAL -V

1. Procedure - 04, Experiment- 04, Result - 02
2. Procedure - 04, Experiment- 04, Result - 02,
3. Procedure - 04, Experiment- 04 , Result - 02,
4. Identification -01, Classification-01,Diagram –01,Comment- 01
5. Identification -01, Classification-01,Diagram –01,Comment- 01
6. Identification -01, Classification-01,Diagram –01,Comment- 01

## DISCIPLINE SPECIFIC ELECTIVE COURSE

### VI SEMESTER ZOOLOGY

#### IMMUNOLOGY

##### THEORY

(CREDITS 4)

##### Unit 1: Overview of the Immune System 12Hrs

Introduction to basic concepts in immunology, components of immune system, principles of innate and adaptive immune system

##### Unit 2: Cells and Organs of the Immune System 12Hrs

Haematopoeisis, Cells of immune system and organs (primary and secondary lymphoid

organs) of the immune system

**Antigens:** Basic properties of antigens, B and T cell epitopes, haptens and adjuvants

**Unit 3: Antibodies** **12Hrs**

Structure, classes and function of antibodies, monoclonal antibodies, antigen antibody interactions as tools for research and diagnosis

**Unit 4: Working of the immune system** **12Hrs**

Structure and functions of MHC, exogenous and endogenous pathways of antigen presentation and processing, Basic properties and functions of cytokines, Complement system: Components and pathways.

**Unit 5: Immune system in health and disease** **12Hrs**

Gell and Coombs' classification and brief description of various types of hypersensitivities, Introduction to concepts of autoimmunity and immunodeficiency,

**Unit 6: Vaccines** **12Hrs**

General introduction to vaccines, Various types of vaccines

*CBCS Undergraduate Program in Zoology*

## **PRACTICAL VI**

### **IMMUNOLOGY**

#### **PRACTICAL**

**(CREDITS 2)**

1. Demonstration of lymphoid organs
2. Histological study of spleen, thymus and lymph nodes through slides/ photographs
3. Preparation of stained blood film to study various types of blood cells.
4. Ouchterlony's double immuno-diffusion method.
5. ABO blood group determination.
6. Cell counting and viability test from splenocytes of farm bred animals/cell lines.
7. Demonstration of
  - a) ELISA
  - b) Immunoelectrophoresis

#### **SUGGESTED READINGS**

1. Kindt, T. J., Goldsby, R.A., Osborne, B. A. and Kuby, J (2006). *Immunology*, VI Edition. W.H. Freeman and Company.
- 2, David, M., Jonathan, B., David, R. B. and Ivan R. (2006). *Immunology*, VII Edition, Mosby, Elsevier Publication.
3. Abbas, K. Abul and Lechtman H. Andrew (2003.) *Cellular and Molecular Immunology*. V Edition. Saunders Publication.

## **SKILL ENHANCEMENT COURSE**

## MEDICAL DIAGNOSTICS

THEORY

(Credits 2)

### Unit I

10 hrs

#### Introduction to Medical Diagnostics and its Importance

#### Diagnostics Methods Used for Analysis of Blood

Blood composition, Preparation of blood smear and Differential Leucocyte Count (D.L.C) using Leishman's stain, Platelet count using haemocytometer, Erythrocyte Sedimentary Rate (E.S.R), Packed Cell Volume (P.C.V.)

### Unit II

10 hrs

#### Non-infectious Diseases

Causes, types, symptoms, complications, diagnosis and prevention of Diabetes (Type I and Type II), Hypertension (Primary and secondary), Testing of blood glucose using Glucometer/Kit

#### Infectious Diseases

Causes, types, symptoms, diagnosis and prevention of Tuberculosis and Hepatitis

### Unit III:

10 hrs

#### Diagnostic Methods Used for Urine Analysis

Urine Analysis: Physical characteristics; Abnormal constituents

#### Tumours

Types (Benign/Malignant), Detection and metastasis; Medical imaging: X-Ray of Bone fracture, PET, MRI and CT Scan (using photographs).

### SUGGESTED READINGS

## **Program Outcome:**

After completing the graduation in Software Development, the students are able to:

- PO1. Contribute to the design of software products and applications
- PO2. Develop software code to specification
- PO3. Provide data/information in standard formats
- PO4. Develop their knowledge, skills and competence
- PO5. Create documents for Knowledge Sharing
- PO6. Develop media content and graphic designs for software products and applications
- PO7. Appreciate the engineering nature of software development
- PO8. Describe key activities in software development and the role of modelling
- PO9. Explain key concepts in software development such as risk and quality
- PO10. Explain the basics of an object-oriented approach to software development

## **Program Specific Outcome:**

After completing the graduation in Software Development, the students are able to:

- PSO1. Apply standard Software Engineering practices and strategies in real-time software project development
- PSO2. Acquaint with the contemporary trends in industrial/research settings and thereby innovate novel solutions to existing problems
- PSO3. Understand, analyze and develop computer programs of varying complexity
- PSO4. Apply standard Software Engineering practices and strategies in software project development
- PSO5. Acquaint with the contemporary issues, latest trends in technological development
- PSO6. Develop software code to specification
- PSO7. Manage their work to meet requirements
- PSO8. Develop their skills and competence

# **GeneralComponentSyllabus**

SL no.	<b>BASICSOFT (PRACTICAL)</b>	Hrs
	<b>UNIT1:INTRODUCTIONTOSOFTWARECONSTRUCTIONANDTESTING</b>	
1.	Settingupadevelopmentenvironment(e.g.,IDE) Writing and running a simple program Exploring basic programming concepts (variables, loops) Introductiontosoftwaretestingandexecutingtestcases	8
	<b>UNIT2:SOFTWAREDEVELOPMENTPROCESS</b>	
2.	Understandingsoftwarerequirements Creating a simple software design Implementingandintegratingsoftwarecomponents Basictroubleshootinganddebuggingtechniques	6
	<b>UNIT3:PROGRAMMINGFUNDAMENTALSANDSOFTWARECONSTRUCTION TECHNIQUES</b>	
3.	Fundamentalsofprogramminglanguages(e.g.,variables,conditions) Organizing code and using functions Errorhandlingandexception handlingbasics Applyingcodingstandardsandbestpractices	8
	<b>UNIT 4:SOFTWARETESTINGFUNDAMENTALSANDTESTAUTOMATION</b>	
4.	Introduction to software testing and its importance Creating and executing manual test cases Introductiontotestautomationtools(e.g.,Selenium) Basic automation script creation and execution	8
	<b>TotalPractical</b>	<b>30</b>
SL.no.	<b>(THEORY)</b>	Hrs
1.	Overviewofsoftwareconstructionandtesting Importanceofsoftwarequalityandtestinginthedevelopmentprocess	9
2.	Softwaredevelopmentlifecycle(SDLC) Agile vs. Waterfall methodologies	7
3.	Introductiontoobject-orientedprogramming Basic software quality assurance concepts Unit4:SoftwareTestingFundamentalsandTestAutomation	8
4.	Fundamentalsofsoftwaretesting Typesoftesting(e.g.,unittesting,integrationtesting)	6

SLno.	<b>WORK EFFICIENCY (PRACTICAL)</b>	Hrs
<b>UNIT 1: INTRODUCTION TO WORK EFFICIENCY</b>		
1.	Conducting a self-assessment of current work habits and identifying areas for improvement. Setting personal goals for enhancing work efficiency. Practicing time management techniques, such as prioritization and scheduling.	8
<b>UNIT 2: ORGANIZATION AND PLANNING</b>		
2.	Creating a clutter-free and ergonomic workspace. Developing a personal organization system for files, documents, and digital resources. Practicing effective planning techniques, such as creating to-do lists and setting deadlines.	6
<b>UNIT 3: TIME MANAGEMENT</b>		
3.	Applying time-blocking techniques to allocate specific time slots for different tasks. Using productivity apps or tools to track and manage time effectively. Practicing strategies for minimizing distractions and maintaining focus during work hours.	8
<b>UNIT 4: COMMUNICATION AND COLLABORATION</b>		
4.	Practicing active listening and clear communication in professional interactions. Exploring collaboration tools and techniques to streamline teamwork and project management. Participating in group exercises or projects to enhance communication and collaboration skills.	8
<b>Total Practical</b>		<b>30</b>
SL.no.	<b>(THEORY)</b>	Hrs
1.	Understanding the concept of work efficiency and its importance in productivity. Exploring the benefits of improving work efficiency. Identifying common productivity challenges faced in the workplace.	9
2.	Learning effective organizational strategies for the workspace. Understanding the importance of planning and goal-setting for work efficiency. Exploring different tools and technologies to aid in organization and planning.	7
3.	Understanding the principles of time management and its impact on work efficiency. Exploring different time management frameworks and methodologies. Learning to identify and eliminate time-wasting activities.	8
4.	Understanding the role of communication in enhancing work efficiency. Exploring effective communication techniques for different modes (e.g., email, meetings, phone calls). Learning collaborative strategies to improve teamwork and productivity.	6
<b>Total Theory</b>		<b>30</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 30 hours L:T:P=2:0:2</b>		

**Reference Books:**

1. "Getting Things Done" by David Allen
2. "Deep Work: Rules for Focused Success in a Distracted World" by Cal Newport
3. "Atomic Habits" by James Clear
4. "The 7 Habits of Highly Effective People" by Stephen R. Covey
5. "Make Time: How to Focus on What Matters Every Day" by Jake Knapp and John Zeratsky
6. "Essentialism: The Disciplined Pursuit of Less" by Greg McKeown
7. "Mindset: The New Psychology of Success" by Carol S. Dweck
8. "The Power of Habit: Why We Do What We Do in Life and Business" by Charles Duhigg

SL no.	MAINTAIN A HEALTHY, SAFE, AND SECURE WORKING ENVIRONMENT (PRACTICAL)	Hrs
<b>UNIT 1: INTRODUCTION TO WORKPLACE HEALTH AND SAFETY</b>		
1.	Conducting a workplace hazard assessment Identifying and reporting potential hazards to supervisors Participating in safety training and drills Understanding emergency evacuation procedures Demonstrating basic first aid skills and knowledge	8
<b>UNIT 2: MAINTAINING PHYSICAL HEALTH IN THE WORKPLACE</b>		
2.	Practicing proper posture and body mechanics during work tasks Setting up an ergonomic workstation Implementing strategies to manage stress in the workplace Incorporating physical activity and stretching exercises into daily routine Promoting healthy eating and hydration habits at work Unit 3: Ensuring a Safe and Secure Work Environment	6
<b>UNIT 3: ENSURING A SAFE AND SECURE WORK ENVIRONMENT</b>		
3.	Reporting suspicious activities or security breaches Familiarizing with access control systems and procedures Participating in emergency response drills Handling and protecting sensitive information appropriately Implementing cybersecurity best practices (e.g., strong passwords, secure browsing)	8
<b>UNIT 4: PROMOTING MENTAL HEALTH AND WELL-BEING</b>		
4.	Encouraging open communication and promoting a stigma-free environment Identifying and addressing signs of mental health issues in oneself and others Utilizing available mental health resources and support services Implementing strategies for work-life balance and stress reduction Promoting team-building activities and positive relationships in the workplace	8
<b>Total Practical</b>		<b>30</b>
SL.no.	(THEORY)	Hrs
1.	Overview of workplace health, safety, and security Importance of maintaining a healthy, safe, and secure working environment Legal and regulatory frameworks related to workplace safety Identifying common workplace hazards and risks Understanding the roles and responsibilities of employees and employers in ensuring a safe workplace	9
2.	Importance of physical health in the workplace Ergonomics and proper body mechanics for injury prevention Promoting a healthy work-life balance Preventing and managing stress in the workplace Proper nutrition and hydration for optimal productivity	7

3.	Importance of maintaining security in the workplace Identifying potential security threats and risks Implementing access control measures Responding to emergencies and security incidents Maintaining data privacy and information security	8
4	Understanding mental health in the workplace Identifying signs of mental health issues Creating a supportive work environment Accessing available mental health resources and support Promoting work-life balance and stress management	6

<b>Total Practical Hours: 30 hours Total Theory Hours: 30 hours L:T:P=2:0:2</b>		

## Reference Books

“Introduction to health and Safety at work: The Handbook for students on NEBOSH and Other Introductory H&S Courses” by Phil Huges and Ed Ferrett.

SL no.	PROBLEMSOLVING AND PROGRAM DESIGN FOR BEGINNERS (PRACTICAL)	Hrs
	<b>UNIT 1: INTRODUCTION TO PROBLEMSOLVING AND PROGRAMMING BASICS</b>	
1.	Setting up the development environment (e.g., installing a programming IDE) Writing and executing simple programs in a chosen programming language Performing basic arithmetic and logical operations in programs Handling user input and displaying output	8
	<b>UNIT 2: CONTROL FLOW AND DECISION MAKING</b>	
2.	Writing programs using conditional statements to make decisions Implementing loops to solve repetitive tasks and iterate over data Applying Boolean expressions for decision-making in programs Creating and calling user-defined functions	6
	<b>UNIT 3: ARRAYS AND PROBLEMSOLVING TECHNIQUES</b>	
3.	Implementing arrays and manipulating array elements in programs Applying problem-solving strategies to break down problems into manageable steps Implementing searching and sorting algorithms for arrays Solving small-scale problems using arrays and problem decomposition	8
	<b>UNIT 4: MODULAR PROGRAMMING AND BASIC SOFTWARE DEVELOPMENT</b>	
4.	Designing modular programs using functions to organize code Applying coding conventions for improved readability and maintainability Reusing code through function libraries in programs Identifying and fixing common errors using basic debugging techniques	8
	<b>Total Practical</b>	<b>30</b>
SL.no.	(THEORY)	Hrs
1.	Introduction to problem-solving methodologies Overview of algorithms and their role in programming Understanding variables, data types, and operators Basic input/output operations in programming	9
2.	Conditional statements (e.g., if-else) Looping statements (e.g., for, while) Understanding Boolean logic and expressions Introduction to functions and their usage in programs	7

3.	Introduction to arrays and their significance in programming Overview of problem-solving strategies (e.g., step-by-step approach) Searching and sorting algorithms for arrays (e.g., linear search, selection sort) Introduction to problem decomposition and solving small-scale problems	8
4	Introduction to modular programming and its benefits Basics of code organization and readability Understanding the importance of code reusability Introduction to basic debugging techniques	6
	<b>Total Theory</b>	<b>30</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 30 hours L:T:P=2:0:2</b>

## Semester II

SL no.	<b>DATAMANAGEMENTINWORKPLACE (PRACTICAL)</b>	Hrs
<b>UNIT1:INTRODUCTIONTODATAMANAGEMENT</b>		
1.	Introduction to common data management tools and software Data entry and validation techniques Data cleaning and pre-processing exercises Creating basic data visualizations using spreadsheet software	8
<b>UNIT2:DATABASE FUNDAMENTALS</b>		
2.	Installing and setting up a DBMS (e.g., MySQL, Microsoft Access) Creating a simple relational database schema Writing SQL queries to retrieve and modify data Importing and exporting data into/from a database	6
<b>UNIT3: DATASECURITYAND PRIVACY</b>		
3.	Setting up user access controls and permissions in a database Encrypting sensitive data and backups Implementing data anonymization techniques Conducting a basic data security audit	8
<b>UNIT4: DATAANALYSISANDVISUALIZATION</b>		
4.	Performing basic data analysis using spreadsheet software Creating various data visualizations (e.g., bar charts, pie charts, line graphs) Using data visualization tools (e.g., Tableau, Power BI) for interactive visuals Preparing a data-driven presentation using analyzed data	8
	<b>Total Practical</b>	<b>30</b>
<b>SL.no.</b>	<b>(THEORY)</b>	<b>Hrs</b>

1.	What is data management and its importance in the workplace? Types of data: structured, semi-structured, and unstructured Data lifecycle: data collection, storage, processing, analysis, and archiving Data quality and data governance principles	9
2.	Understanding databases and database management systems (DBMS) relational database concepts: tables, records, fields, and keys Database design principles: entity-relationship model Database basics: querying and manipulating data	7
3.	Importance of data security in the workplace Common data security threats and vulnerabilities Data privacy regulations (e.g., GDPR, HIPAA) and compliance Best practices for securing sensitive data	8
4.	Introduction to data analysis and its significance in decision-making Descriptive vs. inferential statistics Data visualization techniques and best practices Interpreting and presenting data analysis results	6
<b>Total Theory</b>		<b>30</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 30 hours L:T:P=2:0:2</b>

SL no.	BASICS OF OPERATING SYSTEM (PRACTICAL)	Hrs
<b>UNIT 1: INTRODUCTION TO OPERATING SYSTEMS</b>		
1.	Familiarization with different operating systems (Windows, macOS, or Linux) Basic navigation of the operating system interface Working with files and directories using the file manager or command-line interface Customizing system settings (e.g., desktop background, screen resolution)	8
<b>UNIT 2: PROCESSES AND MEMORY MANAGEMENT</b>		
2.	Task Manager/Activity Monitor usage for process monitoring Starting, managing, and terminating processes Implementing simple multithreading programs Investigating memory usage and monitoring with system tools	6
<b>UNIT 3: FILE SYSTEMS AND STORAGE MANAGEMENT</b>		
3.	Creating, modifying, and deleting files and directories File permissions and access control Disk management using disk utility tools Working with external storage devices (e.g., USB drives)	8
<b>UNIT 4: SYSTEM SECURITY AND MAINTENANCE</b>		

4.	Managing user accounts and access rights Configuring password policies and authentication methods Backup and restoration using built-in tools Applying system updates and software installations	8
	<b>Total Practical</b>	<b>30</b>
<b>SL.no.</b>	<b>(THEORY)</b>	<b>Hrs</b>
1.	Definition and purpose of an operating system History and evolution of operating systems Types of operating systems (e.g., Windows, macOS, Linux) Functions and responsibilities of an operating system Operating system architecture: kernel, shell, and user space	9
2.	Understanding processes and threads Process states: running, ready, blocked Process scheduling algorithms Memory management techniques: segmentation and paging Virtual memory and its importance	7
3.	File system concepts and organization File operations: create, read, write, delete Directory structure and path handling Disk management: partitioning and formatting Storage types: HDD, SSD, and others	8
4.	Overview of computer security principles User accounts and privileges Password management and authentication Basic principles of data backup and recovery System updates and software patches	6

**SDB520**

## **ALGORITHMS AND DATA STRUCTURES**

**Credits: 3(45Hours)**

(2HoursofTheoryand1HourofPracticalperWeek)

### **Course Outcome:**

After completion of the course, the students are able to:

CO1. Deliberate in details with examples Algorithms and Data Structures CO2.

Learn in depth Arrays

CO3. Learn in details with examples Binary Search Trees CO4.

Deliberate the characteristics of Heaps

CO5. Specify the characteristics of Sorting Algorithms

CO6. Learn the details of Shortest Path

### **Unit1:**

**15Hours**

Algorithms and Data Structures: Asymptotic and Algorithm Analysis, Properties of data, Asymptotic Analysis, Algorithm Analysis.

Abstract Lists and Implementations: Linked lists and arrays, Stacks, Queues, De-queues.

Abstract Sorted Lists and Implementations: General trees, binary (including binary and complete trees), N-array trees and tree traversals, Abstract Sorted Lists, Binary search trees, Balanced search trees, AVL trees, B-Trees.

### **Unit2:**

**15Hours**

Abstract Priority Queues: Heaps.

Abstract Sets/Maps: Chained Hash Tables, Linear Probing, Double Hashing.

Sorting Algorithms: Insertion and bubble sort, Heap, merge and quick sort, Bucket and radix sort

Graph and Direct Acyclic Graph Algorithms: Topological sort, Minimum spanning trees and shortest path.

### **Practicals**

(1 Hour per week X 15 Weeks = 15Hours)

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

## **SDB 550**

### **INTRODUCTION TO MICROCONTROLLERS AND EMBEDDED SYSTEMS**

**Credits: 3(45Hours)**

(2Hours of Theory and 1Hour of Practical per Week)

#### **Course Outcome:**

After completion of the course, the students are able to:

- CO1. Understand the architecture of 8051 microcontroller
- CO2. Write down the instruction set and simple programs of 8051 microcontroller
- CO3. Learn the details of 8051 microcontrollers
- CO4. Specify the characteristics of embedded system

#### **Unit 1: Microcontrollers**

**15Hours**

Microcontroller 8051 - Introduction, block diagram of microprocessor, block diagram of microcontroller, comparison between microprocessor & microcontroller, Architecture of 8051 and pin out diagram of 8051.

**Addressing modes** - Data moves, Types of addressing modes - register addressing, immediate addressing, direct addressing, indirect addressing mode.

**Instructions set** - Data transfer instructions, arithmetic instructions, jump and call instructions.

**PIC microcontroller**- Core feature and overview of series.

#### **Unit 2: Embedded Systems**

**15 Hours**

**Introduction to Embedded Systems** - Definition of Embedded System, Embedded Systems Vs General Computing Systems, History of Embedded Systems, Classification, Major Application Areas, Purpose of Embedded Systems, Characteristics and Quality Attributes of Embedded Systems.

**Hardware Side** - introduction, The Core Level, Representing Information, Understanding Numbers, Addresses, Instructions, Registers. An Instruction Set View, Embedded Systems- A Register View, Register View of a Microprocessor

**The Hardware Side:** Storage Elements and Finite-State Machines- Theoretical model.

#### **Reference:**

- Microcontroller– KJ Ayala.
- Introduction to Embedded Systems- Shibu K.V, McGraw Hill.
- Microcontroller– Mazadi.

#### **Practicals**

(1 Hour per week X 15 Weeks = 15Hours)

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

**SEMESTER III**  
**ADVANCED CALCULUS**

**Credits: 3(45Hours)**  
(3HoursofTheoryperWeek)

**Course Outcome:**

After completion of the course, the students are able to:

- CO1. Learn in depth Sequences
- CO2. Specify the details of Series
- CO3. Understand in details with examples Rolle's Theorem
- CO4. Deliberate in details with examples Taylor's Theorem
- CO5. Identify the details of Partial derivatives

**Unit 1: Sequences and Series:**

**15 Hours**

Sequences- Bounded and monotonic sequences- convergent, divergent and oscillatory sequences- standard results and simple problems  
Infinite series- nth partial sum- geometric series- convergence of  $\sum_{n=1}^{\infty} \frac{1}{n^p}$ - comparison test and ratio test- simple problems- alternating series

**Unit 2: Calculus**

**15 Hours**

Mean value theorems- Rolle's theorem, Lagrange's mean value theorem, Cauchy's mean value theorems (Statements and Geometrical interpretations)- Taylor's theorem – Maclaurin's expansion (Statement) and problems.

**Unit 3: Partial derivatives**

**15 Hours**

Limit and continuity of functions of two and three variables, Partial differentiation, Change of variables, Partial derivation and differentiability of real-valued functions of two and three variables, Euler's theorem on homogeneous functions. Taylor's theorem for functions of two and three variables - Jacobians

**Reference:**

1. A First Course in Real Analysis – Asharani Singhal.
2. Real Analysis – S.C. Malik.
3. Principles of Mathematical Analysis – Shanthinarayan
4. Calculus, Volume-1 and Volume-2

SDC 520

## DIFFERENTIAL EQUATIONS

Credits: 3(45Hours)

(3HoursofTheoryperWeek)

### Course Outcome:

After completion of the course, the students are able to:

- CO1. Specify in details with examples linear differential equations
- CO2. Write down in details with examples nonlinear differential equations
- CO3. Understand in details with examples Homogeneous linear differential equations
- CO4. Learn the details of Non homogeneous linear differential equations
- CO5. Specify the details of Partial differential equations

### Unit 1: Linear and nonlinear differential equations

15 Hours

Elimination of arbitrary constant - solutions of linear differential equations - separation of variables - Homogeneous equations - exact equations - equations of the form  $\frac{dy}{dx} + Py = Q$  - Integrating factor, Equations solvable for x, y, p. Clairaut's form and singular solutions

### Unit 2: Homogeneous and non homogeneous linear differential equations 15 Hours

Homogeneous Linear differential equations with constant coefficients. - non homogeneous linear differential equations - inverse differential operators - Cauchy's homogeneous linear differential equations - Second order linear differential equations - variation of parameters and exact equations.

### Unit 3: Partial differential equations

15 Hours

Total differential equations - simultaneous equations - partial differential equations - Lagrange's form of linear partial differential equations - Charpit's method.

### Reference:

1. A short course in differential equations - Rainville and Bedient
2. Advanced Engineering Mathematics - Kreyszig
3. Higher Engineering Mathematics - Grewal
4. Laplace Transform - Murry R Spiegel
5. Applications of Differential equations - Martin Brown

**SDC530**

## **SOFTWARE ARCHITECTURE AND SDLC & PROCESSES**

**Credits: 3(45Hours)**

(2HoursofTheoryand1HourofPracticalperweek)

### **Course Outcome:**

After completion of the course, the students are able to: CO1.

Specify in depth Software Process

CO2. Deliberate in details with examples SDLC CO3.

Learn in depth Data Modeling

CO4. Understand the details of UML and ER Models CO5.

Specify the details of Loose Coupling

### **Unit1:**

**15 Hours**

**SDLC & Processes:** Software Process, Software Development Life Cycle, Object-Oriented Concepts: connections between design and implementation, Software Testing, Object-Oriented Architecture and Design, Requirements analysis, Safety Critical Software.

### **Unit2:**

**15 Hours**

**Software Architecture:** Introduction to enterprise software architecture, the role of middleware, Cloud computing = SaaS + Utility Computing, Data Modeling, UML and E-R models. XML, Schemas, XML Schemas, Data Processing. Strategies for data processing, introduction to XQuery. JSON and JAXB, Domain-Driven Architecture. Domain-driven, design (DDD), Object-relational mapping (ORM), Service-oriented Architecture (SOA), Standardized service contract, Loose coupling, Service abstraction, Service-oriented Architecture (SOA),

### **Practicals**

(1 Hour per week X 15 Weeks = 15 Hours)

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

**SDC 550**

## **INDIAN CONSTITUTION**

**Credits: 3(45Hours)**

(3HoursofTheoryperweek)

### **Course Outcome:**

After completion of the course, the students are able to:

- CO1. Learn the details of Features of Indian Constitution
- CO2. Understand the details of Fundamentals Rights
- CO3. Identify the details of Role of Prime Minister
- CO4. Learn the details of Power and Functions of Lok Sabha
- CO5. Specify the details of Power and Functions of Chief Minister

### **Unit1** **08 Hours**

- a) Preamble of the Indian Constitution
- b) Salient features of Indian Constitution

### **Unit2** **10Hours**

- a) Fundamental Rights
- b) Fundamental Duties
- c) Directive principles of State Policy

### **Unit3** **14Hours**

- a) President – Election Method, Powers and Functions
- b) The Role of the Prime Minister
- c) The Parliament – Structure, Power and Functions (Lok Sabha and Rajya Sabha)
- d) Supreme Court – Organization and Jurisdiction

### **Unit4** **13 Hours**

- a) The Role of Governor in the Administration of State
- b) Powers and Functions of the Chief Minister
- c) Composition, Powers and Functions of both the Houses of State Legislature
- d) High Court – Organization and Jurisdiction

### **Reference:**

**SDD510**

**SEMESTER IV**  
**NUMERICAL ANALYSIS AND STATISTICS**  
**Credits: 3(45Hours)**  
(3HoursofTheoryperWeek)

**Course Outcome:**

After completion of the course, the students are able to: CO1.

Understand the details of Bisection Method

CO2. Identify in details with examples Range Kutta IV Order Method CO3.

Learn the details of Finite differences

CO4. Understand in depth Numerical Integration

CO5. Identify in details with examples Linear programming

**Unit 1: Numerical techniques**

**15 Hours**

Numerical solutions of algebraic equations - Bisection method - Newton Raphson method, Regula Falsi method - iteration method - Euler method, Range kutta IV order methods

**Unit 2: Finite differences and Numerical integration**

**15 Hours**

Finite differences - Interpolation - Newton Gregory forward interpolation formula - Lagrange's interpolation formula - Numerical integration: Trapezoidal rule, Simpson's  $1/3^{\text{rd}}$  and  $3/8^{\text{th}}$  rule Weddle's rule.

**Unit 3: Linear programming**

**15 Hours**

Linear programming - Requirements for a linear programming problem, Examples on the Applications of linear programming, Formulation of a linear programming, Standardization, Solving LPP by Graphical Method, Simplex Method (up to two variables)

**Reference:**

1. Numerical methods: S.S. Sastry.
2. Probability and statistics for engineers and Scientists - Ronald E. Walpole and Raymond H Mayers.
3. Mathematical Statistics - John Freund (Prentice Hall India PVT. Ltd)

**OPERATIONRESEARCH**

**Credits: 3(45Hours)**  
(3HoursofTheoryperWeek)

**CourseOutcome:**

Aftercompletionofthecourse,thestudentsareableto:

- CO1.UnderstandthedetailsofDifferent phasesofoperationresearch
- CO2. Deliberate in depth Simplex method
- CO3.Identifyin depthDualitytheorems
- CO4.UnderstandthedetailsofSequencingproblems
- CO5. Learn in depth Transportation model problems
- CO6.UnderstandthedetailsofAssignmentproblems

**Unit1:**

**15 Hours**

Definition of the term Operation Research -Different phases of operation research  
Advantages and limitations of O.R. Linear programming –Requirements for a linear programming problem ,Examples ontheApplicationsoflinear programming  
,Formulation of a linear programming , Standardization ,SolvingLPPby GraphicalMethod  
,SimplexMethod(up to two variables)

**Unit2:**

**15 Hours**

Big M method revised simplex method, Dual simplex method, Duality theorems.  
**Sequencingproblems:**Processing ‘n’jobsthroughtwo machines–Travellingsalesman problems as an application of sequencing

**Unit3:**

**15 Hours**

**TransportationModelproblems**– Formulating, Solution–NorthWest Corner Rule, Least Cost method, Row Minima method, Column minima method and Vogel’s approximation.  
**Assignmentproblem:** formulating, methodoffinding initialbasic feasiblesolutionto Assignment problem using Hungarian method.

## **SDD 530**

### **SOFTWARE MODELING AND SOFTWARE QUALITY ASSURANCE**

**Credits: 3(45Hours)**

(2HoursofTheoryand1HourofPracticalperweek)

#### **Course Outcome:**

After completion of the course, the students are able to:

CO1. Deliberate in details with examples Classes and Relationships CO2.

Specify the details of State diagrams

CO3. Identify in details with examples Events

CO4. Deliberate in details with examples Software quality assurance CO5.

Understand the details of Software quality assurance

#### **Unit1:**

**15Hours**

**Software Modeling:** What is Modeling?, Classes, Relationships, Common Mechanisms, Diagrams, Class Diagrams, Advanced Relationships, Instances, Object Diagrams, Use Cases, Interaction/Activity Diagrams, Events, State Machines, Time, Space, State Diagrams and Events

#### **Unit2:**

**15Hours**

**Software Quality Assurance:** Software Quality, Quality Assurance, Testing Concepts and Issues, Testing Activities, Testing Techniques. Other Techniques, Defect Prevention/Process Improvement, Inspection, Refactoring, CRC, Software Reliability Engineering, Quality Models and Measurements

#### **Reference:**

1. Modeling for Software Quality Assurance (English, Paperback, Srivyshnavi Pagadala)
2. Modeling for Software Quality Assurance Paperback – Import, 16 Nov 2013 by Srivyshnavi Pagadala

#### **Practicals**

(1 Hour per week X 15 Weeks = 15 Hours)

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

**SDD560**

## **ENVIRONMENTAL STUDIES**

**Credits:3 (45Hours)**

(3HoursofTheoryperweek)

### **Course Outcome:**

After completion of the course, the students are able to:

CO1. Deliberate the details of Components of environment CO2.

Specify the details of Ecology and Ecosystems

CO3. Identify in details with examples Natural resources CO4.

Learn the details of Biodiversity

CO5. Specify in details with examples Environmental pollution CO6.

Identify the details of Environmental issues and policies

### **Unit 1: Environment and natural systems**

**4Hours**

- Introduction to Environment and Environmental Studies
- Definition and Components of Environment, Relationship between the different components of Environment
- Man and Environment relationship
- Impact of technology on Environment, Environmental Degradation
- Multidisciplinary nature of the Environment studies
- Its scope and importance in the present day Education System

### **Unit 2: Ecology and Ecosystems**

**5Hours**

- Introduction: Ecology- Objectives and Classification
- Concept of an ecosystem- structure and functions of ecosystem
- Components of ecosystem- Producers, Consumers, Decomposers
- Bio-Geo-Chemical Cycles- Hydrologic Cycle, Carbon cycle, Energy Flow in Ecosystem, Food Chains, Food webs, Ecological Pyramids
- Major Ecosystems: Forest Ecosystem, Grassland Ecosystem, Desert Ecosystem, Aquatic Ecosystem, Estuarine Ecosystem.

### **Unit 3: Natural Resources**

**6 Hours**

Renewable and Non-renewable resources, exploitation and conservation,

- Water resources: Surface and Groundwater sources, Indian and Global scenario.
- Land as a resource, land use change and land degradation
- Forest resources: Definition and Classification of Forests  
Ecological and Economic importance and benefits of forest, Indian scenario  
Deforestation: causes and effects, case studies remedial measures
- Food resources: Sources of food, Global and Indian food demand scenario  
Limits of food production, Environmental effects of Agriculture
- Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs, case studies
- Mineral resources: Definition and Classification of minerals, mining issues  
Case studies
- Role of individual in conservation of natural resources.

**Unit4:Biodiversity and its Conservation****7 Hours**

- Biodiversity: Definition, Levels of biological diversity: genetic, species and ecosystem diversity
- Biogeographic zones of India
- Hotspots of biodiversity
- Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational values
- Biodiversity patterns
- India as a mega-biodiversity nation
- Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions.
- Endangered and endemic species of India
- Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

**Unit5: Environmental pollution****6 Hours**

- Types of Environmental Pollution:
- Water Pollution: Introduction – Water Quality Standards, Sources of Water Pollution: Industrial Agricultural, Municipal; Classification of water pollutants, Effects of water pollutants, Eutrophication.
- Marine pollution: Causes, effects and control.
- Air Pollution: Composition of air, Structure of atmosphere, Ambient Air Quality Standards, Classification of air pollutants, Sources of common air pollutants like PM, SO<sub>2</sub>, NO<sub>x</sub>, Natural & Anthropogenic Sources, Effects of common air pollutants
- Soil Pollution: causes, effects and control.
- Noise Pollution: Introduction, Sound and Noise, Noise measurements, Causes and Effects
- Thermal Pollution: Causes, effects and control.
- Nuclear hazards and human health risks.
- Solid waste management: Control measures of urban and industrial waste.
- Role of individual in the prevention of pollution, Pollution case studies.

**Unit6: Sustainable development and Environmental issues and Policies****7 Hours**

- Sustainable development: Meaning, changes in resource utilization.
- Water conservation: watershed management and Rainwater harvesting.
- Environmental issues: Climate change, global warming, acid rain, ozone layer depletion.
- Disaster management: floods, drought, earthquake, cyclones and landslides.
- Wasteland reclamation.
- Environment Protection Act: Air, Water, Wildlife (Prevention and Control of Pollution)
- Forest Conservation Act.
- Issues involved in enforcement of environmental legislation.
- Environment: rights and duties.

**Unit 7: Human Population and the Environment****5 Hours**

- Population growth, Explosion, demographic variation among nations.
- Family welfare Program.
- Environment, human health and welfare; infectious and lifestyle diseases in contemporary world.
- Value Education: Environmental ethics.
- HIV/AIDS
- Women and Child welfare.
- Role of information technology in Environment and human health

**Unit 8: Field visit****5 Hours**

- Field work Visit to an area to document environmental assets river/forest/ grassland/ hill/ mountain
- Visit to a local polluted site - Urban/Rural/Industrial/Agricultural.
- Visit to the solid waste treatment plant and water treatment plant.
- Video: The one degree (Equal to 5 lectures)

**ExperimentsarebasedontopicsmentioninthePaperdesignedbyconcernedFaculty**

**SDE520**

## **CONFIGURATION MANAGEMENT**

**Credits: 4(60Hours)**

(3 Hour of Theory and 1 Hour of Practical per Week)

### **Course Outcome:**

After completion of the course, the students are able to: CO1.

Specify in depth Configuration management

CO2. Understand the details of Configuration management planning

CO3. Deliberate the details of Configuration control

CO4. Learn in details with examples Configuration status accounting

CO5. Identify the details of Configuration audits

### **Unit1:**

**15 Hours**

**DEFINING CONFIGURATION MANAGEMENT:** CM principles and standards, the recent growth of CM

**CM PLANNING:** Program phasing and milestones, Creating the CM organization, Defining CM system requirements, CM job classifications

**CONFIGURATION IDENTIFICATION:** First tasks of CM, Configurations & Baselines, Requirements traceability, Item identification and numbering

### **Unit2:**

**15 Hours**

**ENGINEERING RELEASE:** Control of technical data, the document control process, Development vs. formal release

**CONFIGURATION CONTROL:** Defining a closed-loop process, Change classifications, Review boards and CCBs, Processing changes and RDWs

**INTRODUCTION TO SOFTWARE CONFIGURATION MANAGEMENT:** Specific software CM tasks, SEI evaluation criteria

### **Unit3:**

**15 Hours**

**CONFIGURATION STATUS ACCOUNTING:** Defining CS A tasks and tailoring, Status accounting elements, Understanding the impact

**CM PLANS:** CMP preparation techniques, Software CMPs, Assessments and Plans

General procedures and work flow

**CONFIGURATION AUDITS:** Internal and informal audits, developing the audit plan, The Functional and Physical Audits

### **Practicals**

(1 Hour per week X 15 Weeks = 15 Hours)

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

**SDE530**

## **HUMAN COMPUTER INTERACTION**

**Credits: 4(60Hours)**

(3 HoursofTheoryand1HourofPracticalperWeek)

### **Course Outcome:**

After completion of the course, the students are able to:

- CO1. Learn the details of Introduction of human computer interface
- CO2. Understand the details of Human consideration in screen design
- CO3. Identify in details with examples Windows
- CO4. Deliberate in depth Multimedia and coloring
- CO5. Specify in details with examples Hypermedia

### **Unit1:**

**20 Hours**

Introduction-Importance-Human-Computer interface-characteristics of graphics interface-Direct manipulation graphical system - web user interface-popularity-characteristic & principles. User interface design process- obstacles-usability-human characteristics in design -Human interaction speed-business functions-requirement analysis-Direct-Indirect methods-basic business functions-Design standards-system timings - Human consideration in screen design- structures of menus - functions of menus-content of menu-formatting -phrasing the menu - selecting menu choice-navigating menus-graphical menus.

### **Unit2:**

**13 Hours**

Windows-Characteristics-components-presentation-styles-types-managements-organizations-operations-web systems-device-based controls: characteristics-Screen -based controls: operate control- text boxes-selection control-combination control-custom control-presentation control.

### **Unit3:**

**12 Hours**

Text for web pages - effective feedback-guidance & assistance-Internationalization-accessibility-Icons-Image-Multimedia -coloring, Windows layout-test: prototypes - kinds of tests- retest - Information search - visualization - Hypermedia - www - Software tools.

### **Practicals**

(1 Hour per week X 15 Weeks = 15 Hours)

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

**SDF510**

**SEMESTER VI**

**OPERATING SYSTEM**

**Credits: 4(60Hours)**

(3HoursofTheoryand1HourofPracticalperWeek)

**Course Outcome:**

After completion of the course, the students are able to:

- CO1. Identify the Characteristics of operating system
- CO2. Deliberate in depth Scheduling algorithms
- CO3. Learn in depth Semaphores
- CO4. Specify the details of Message passing
- CO5. Understand the details of Deadlock
- CO6. Identify in details with examples File organisation

**Unit1:**

**15 Hours**

Overview of operating systems, functionalities and characteristics of OS

Hardware concepts related to OS, CPU states, I/O channels, memory hierarchy and microprogramming

The concept of a process, operations on processes, process states, concurrent processes, process control block, process context

UNIX process control and management, PCB, signals, forks and pipes

Interrupt processing, operating system organisation, OS kernel FLI and dispatcher. Job and processor scheduling, scheduling algorithms, process hierarchies.

Problems of concurrent processes, critical sections, mutual exclusion, synchronisation, deadlock.

**Unit2:**

**15 Hours**

Mutual exclusion, process co-operation, producer and consumer processes.

Semaphores: definition, init, wait, signal operations.

Use of semaphores to implement mutex, process synchronisation etc., implementation of semaphores, Critical regions, Conditional Critical Regions, Monitors, Ada Tasks

Interprocess Communication (IPC), Message Passing, Direct and Indirect

**Unit3:**

**15 Hours**

Deadlock: prevention, detection, avoidance, banker's algorithm.

Memory organisation and management, storage allocation

Virtual memory concepts, paging and segmentation, address mapping.

Virtual storage management, page replacement strategies

File organisation: blocking and buffering, file descriptor, directory structure, File and Directory structures, blocks and fragments, directory tree, inodes, file descriptors, UNIX file structure.

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

**SDF520**

## **COMPUTER NETWORKS & SECURITY FUNDAMENTALS**

**Credits: 4 (60 Hours)**

(3 Hours of Theory and 1 Hour of Practical per Week)

### **Course Outcome:**

After completion of the course, the students are able to:

CO1. Deliberate the details of OSI model

CO2. Learn the details of Switches

CO3. Understand the details of Protocols and services CO4.

Identify in depth Security

CO5. Learn in depth Encryption

CO6. Specify the details of E-mail and server protection

### **Unit1**

**15 Hours**

#### **COMPUTER NETWORKS**

Network Infrastructure- Internet, intranet, and extranet.

Understand the OSI model.

TCP/IP

Local area networks (LANs), Wide area networks (WANs).

Network topologies and access methods

Network Hardware- switches.

### **Unit2**

**15 Hours**

Routers, media types

Protocols and Services

Understand IPv4 & IPv6.

Addressing names resolution & networking services.

#### **SECURITY**

Understanding Security Layers Principles, Physical, Wireless, Internet & Operating System Security

### **Unit3**

**15 Hours**

User authentication, permissions, password, audit policies, encryption, malware,

Network Security & dedicated firewalls.

Network Access Protection (NAP), network isolation, Protocol security, client, e-mail & server protection

### **Reference:**

**Experiments are based on topics mentioned in the Paper designed by concerned Faculty**

**QUESTIONPAPERScheme**

JSS MAHAVIDYAPEETHA  
JSS College of Arts, Commerce & Science (Autonomous)  
Ooty Road, Mysore - 570  
025 Title of the paper with code

**Time: 3 Hours**

**Max Marks: 70**

**Part- A**

- I Answer any five Questions (out of six) 2x5=10
- a)
  - b)
  - c)
  - d)
  - e)
  - f)

**Part- B**

Answer any two questions from each main

- II a) 2x5=10
- b)
  - c)
- III a) 2x5=10
- b)
  - c)
- IV a) 2x5=10
- b)
  - c)

### Part– C

Answer any one question from each main

V a) 1x10=10

Or

b)

VI a) 1x10=10

Or

b)

VII a) 1x10=10

Or

b)

Question numbers V, VI and VII internal split-up (5+5, 7+3, 2+8 etc.)

## QUESTIONPAPERScheme

**TIME:3Hrs**

**MAXMARKS:70**

InstructionstoStudents:Allsectionsarecompulsory.

### SECTION A

- I Fill in the blanks with correct form of verbs 5X1=05 a)  
b)  
c)  
d)  
e)
- II Change the voice of the following sentences 5X1=05 a)  
b)  
c)  
d)  
e)
- III Fill in the blanks with suitable article 5X1=05 a)  
b)  
c)  
d)  
e)
- IV Change the speech of the following 5X1=05 a)  
b)  
c)  
d)  
e)
- V Add question tag to the following 5X1=05 a)  
b)  
c)  
d)  
e)
- VI Framequestionsso astogettheunderlinedwordsasanswers 5X1=05 a)  
b)  
c)  
d)  
e)

## SECTION B

- VII 10X1=10
1. Write a letter of application
  - Or
  2. Prepare a Resume.
- VIII Read the following essay carefully and answer the questions. 10X1=10 a)
- b)
  - c)
  - d)
  - e)
- IX Write an essay on one of the following: 10X1=10 a)
- b)
  - c)
- X Answer the following (Dialogue writing) 5X2=10
- 1)
  - 2)

# QUESTIONPAPERPATTERN

## SectionA

Q1:Six questions of two marks each .Five questions to be answered  $5 \times 2 = 10$

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.

## SectionB

Answeranyfour questionsfromeachmain.Eachmaincarries20marks3X 20=60

# Junior Software Developer

## CURRICULUM/SYLLABUS

This program is aimed at training candidates for the job of **Junior Software Developer** in the **IT-ITeS Sector/Industry** and aims at building the following key competencies in the learner.

<b>Program Name</b>	<b>Junior Software Developer</b>		
<b>Qualification Pack Name &amp; Reference ID.</b>	Junior Software Developer SSC/Q0508, version 1.0		
<b>Version No.</b>	1.0	<b>Version Update Date</b>	31/12/2015
<b>Pre-requisite to Training</b>	10 <sup>th</sup> Standard		
<b>Training Outcomes</b>	<p><b>After completing this programme, participants will be able to:</b></p> <ul style="list-style-type: none"> <li>• assist in performing software construction and software testing entry-level tasks in the IT Services industry</li> <li>• manage work to meet requirements</li> <li>• maintain a healthy, safe and secure working environment</li> </ul>		

The Course encompasses all six National Occupational Standards (NOS) of **Junior Software Developer SSC/Q0508**

Qualification Pack issued by **IT-ITeS Sector Skills Council NASSCOM**.

Sr. No.	Module	Theory Duration (hh:mm)	Practical Duration (hh:mm)	Key Learning Outcomes	Corresponding NOS Code	Equipment Required
1	Basics of IT	05:00	15:00	Candidates will be able to: <ul style="list-style-type: none"> <li>• Demonstrate basic computer and internet literacy including operating a computer, describing its major components and how they work, using Windows and Linux OS, operating a browser, searching the internet, managing mails and using social internet media.</li> </ul>	SSC/N0506	Refer to Unique Equipment Required section
2	Problem Solving and Program Design	30:00	60:00	Candidates will be able to: <ul style="list-style-type: none"> <li>• Demonstrate aptitude for analysing information and making logical conclusions.</li> </ul>	SSC/N0506	Refer to Unique Equipment Required section

Sr. No.	Module	Theory Duration (hh:mm)	Practical Duration (hh:mm)	Key Learning Outcomes	Corresponding NOS Code	Equipment Required
				<ul style="list-style-type: none"> <li>Demonstrate knowledge of the foundational mathematical concepts in computing.</li> </ul>		
3	Basic Algorithms and Application Development	30:00	60:00	<p>Candidates will be able to:</p> <ul style="list-style-type: none"> <li>Design algorithms to solve problems and convert them into code using the appropriate programming language constructs.</li> <li>Read and execute a test case and record the outcome in the appropriate template.</li> <li>Communicate effectively with appropriate people w.r.t. assigned roles in simple English – both oral and written.</li> </ul>	SSC/N0506	Refer to Unique Equipment Required section
4	Self and work Management	30:00	70:00	<p>Candidates will be able to:</p> <ul style="list-style-type: none"> <li>Establish and agree work requirements with appropriate people</li> <li>Keep immediate work area clean and tidy</li> <li>Utilize time effectively</li> <li>Use resources correctly and efficiently</li> <li>Treat confidential information correctly</li> <li>Work in line with organization's policies and procedures</li> <li>Work within the limits of job role</li> <li>Obtain guidance from appropriate people, where necessary</li> <li>Ensure work meets the agreed requirements</li> </ul>	SSC/N9001	Refer to Unique Equipment Required section

5	Team Work and Communication	12:00	38:00	<p>Candidates will be able to:</p> <ul style="list-style-type: none"> <li>• Obtain guidance from appropriate people to agree the analysis to be performed on the data</li> <li>• Obtain advice and guidance from appropriate people on issues with data analysis</li> </ul>	SSC/N9002	Refer to Unique Equipment Required Section
---	-----------------------------	-------	-------	---	-----------	--

Sr. No.	Module	Theory Duration (hh:mm)	Practical Duration (hh:mm)	Key Learning Outcomes	Corresponding NOS Code	Equipment Required
				<p>outside their area of competence or</p> <ul style="list-style-type: none"> <li>• Review the results of their analysis with appropriate people</li> <li>• Undertake modifications to your analysis based on inputs from appropriate people</li> <li>• Communicate with colleagues clearly, concisely and accurately</li> <li>• Work with colleagues to integrate their work effectively with them</li> <li>• Pass on essential information to colleagues in line with organizational requirements</li> <li>• Work in ways that show respect for colleagues</li> <li>• Carry out commitments they have made to colleagues</li> <li>• Let colleagues know in good time if they cannot carry out your commitments, explaining the reasons</li> <li>• Identify any problems they have working with colleagues and take the initiative to solve these problems</li> <li>• Follow the organization's policies and procedures for working with colleagues</li> </ul>		
6	Managing Health and Safety	12:00	38:00	<p>Candidates will be able to:</p> <ul style="list-style-type: none"> <li>• Comply with organization's current health, safety and security policies and procedures</li> <li>• Report any identified breaches in health, safety, and security policies and procedures to the designated person</li> <li>• Identify and correct any hazards that can deal with</li> </ul>	SSC/N9003	Refer to Unique Equipment Required section

Sr. No.	Module	Theory Duration (hh:mm)	Practical Duration (hh:mm)	Key Learning Outcomes	Corresponding NOS Code	Equipment Required
				safely, competently and within the limits of authority <ul style="list-style-type: none"> <li>• Report any hazards that one is not competent to deal with to the relevant person in line with organizational procedures and warn other people who may be affected</li> <li>• Follow their organization's emergency procedures promptly, calmly, and efficiently</li> <li>• Identify and recommend opportunities for improving health, safety, and security to the designated person</li> <li>• Complete any health and safety records legibly and accurately</li> </ul>		
7	Data and Information Management	15:00	35:00	Candidates will be able to: <ul style="list-style-type: none"> <li>• Establish and agree with appropriate people the data/information they need to provide, the formats in which you need to provide it, and when they need to provide it</li> <li>• Obtain the data/information from reliable sources</li> <li>• Check that the data/information is accurate, complete and up-to-date</li> <li>• Obtain advice or guidance from appropriate people where there are problems with the data/information</li> <li>• Carry out rule-based analysis of the data/information, if required</li> <li>• Insert the data/information into the agreed formats</li> <li>• Check the accuracy of work, involving colleagues where required</li> <li>• Report any unresolved anomalies in the</li> </ul>	SSC/N9004	Refer to Unique Equipment Required Section

Sr. No.	Module	Theory Duration (hh:mm)	Practical Duration (hh:mm)	Key Learning Outcomes	Corresponding NOS Code	Equipment Required
				<p>data/information to appropriate people</p> <ul style="list-style-type: none"> <li>• Provide complete, accurate and up-to-date data/information to the appropriate people in the required formats on time</li> </ul>		
8	Learning and Self Development	05:00	20:00	<p>Candidates will be able to:</p> <ul style="list-style-type: none"> <li>• Obtain advice and guidance from appropriate people to develop your knowledge, skills and competence</li> <li>• Identify accurately the knowledge and skills they need for your job role</li> <li>• Identify accurately their current level of knowledge, skills and competence and any learning and development needs</li> <li>• Agree with appropriate people a plan of learning and development activities to address their learning needs</li> <li>• Undertake learning and development activities in line with their plan</li> <li>• Apply new knowledge and skills in the workplace, under supervision</li> <li>• Obtain feedback from appropriate people on their knowledge and skills and how effectively you apply them</li> <li>• Review their knowledge, skills and competence regularly and take appropriate action</li> </ul>	SSC/N9005	Refer to Unique Equipment Required Section

<b>Total Duration :</b>	<b><u>114:00</u></b>	<b><u>286:00</u></b>	<b>UniqueEquipmentRequired:</b> Training room should be fully furnished with the following equipment / tools / accessories. Additional / specific resources, wherever applicable (e.g. Hardware, software) are indicated in the main text corresponding to relevant learning outcome.
-------------------------	----------------------	----------------------	--

Format:ModCur\_2015\_1\_0

### Notes from IT-ITeS Sector Skills Council NASSCOM

1. This document outlines the broad scope of coverage. This should be linked with OBF and training delivery plan. OBF (Outcome based framework) reflects the pedagogy used to ensure an expected outcome. Training delivery plan focuses on the sequence of delivery.
2. Though many NOS have some seemingly common outcomes, notably core/generic, professional and technical skills, it is imperative to understand the contextual difference between them. For example, writing skills required to document program structure and code (in SSC/N0506) are different from the writing skills required to prepare a time plan (in SSC/N9001). Training providers are advised to,
  - a. Embed such skills development in the learning pedagogy for each expected outcome
  - b. Prepare a detailed session plan for training delivery with focus on sequence and duration of training
  - c. Run a diagnostic test to assess prior learning of students and help trainers/students identify the need for gap training, optimal duration and suitable training methodology. Accordingly, more introductory level sessions may be included in guided or self-paced mode of learning. E.g. adding some sessions on Functional English or Use of Internet and MS Office.

Annexure 1: Assessment Criteria

<b>Assessment Criteria for Junior Software Developer</b>	
<b>Job Role</b>	<b>Junior Software Developer</b>
<b>Qualification Pack</b>	<b>SSC/Q0508</b>
<b>Sector Skill Council</b>	<b>IT-ITeS</b>

Sr. No.	Guidelines for Assessment
1	Criteria for assessment for each Qualification Pack (QP) will be created by the Sector Skill Council (SSC). Each performance criteria (PC) will be assigned Theory and Skill/Practical marks proportional to its importance in NOS.
2	The assessment will be conducted online through assessment providers authorised by SSC.
3	Format of questions will include a variety of styles suitable to the PC being tested such as multiple choice questions, fill in the blanks, situational judgment test, simulation and programming test.
4	To pass a QP, a trainee should pass each individual NOS. Standard passing criteria for each NOS is 70%.
5	For latest details on the assessment criteria, please visit <a href="http://www.sscnasscom.com">www.sscnasscom.com</a> .

ASSESSMENT OUTCOME (NOS CODE AND DESCRIPTION)	Assessment criteria (PC)	Total Marks	Out Of	MARKS ALLOCATION	
				Theory	Skills Practical
<b>1.SSC/N0506(Deal remotely with customer queries- Domestic)</b>	PC1. greet customers and verify details, following your organization's procedures	<b>120</b>	12.5	2.5	10
	PC2. read carefully, summarize, and obtain customer confirmation of your understanding of queries		12.5	2.5	10
	PC3. express your concern for any difficulties caused and your commitment to resolving queries		15	0	15
	PC4. record and categorize queries accurately using your organization's query management tool		5	0	5
	PC5. refer queries outside your area of competence or authority promptly to appropriate people		2.5	0	2.5
	PC6. access your organization's knowledge base for solutions to queries, where available		2.5	0	2.5
	PC7. resolve queries within your area of competence or authority in line with organizational guidelines and service level agreements (SLAs)		15	0	15
	PC8. obtain advice and guidance from appropriate people, where necessary		2.5	0	2.5
	PC9. obtain confirmation from customers that queries have been resolved to satisfaction		10	0	10

	PC10. record the resolution of queries accurately using your organization's query management tool		35	15	20
	PC11. comply with relevant standards, policies, procedures and guidelines when dealing remotely with customer queries		7.5	0	7.5
		<b>NOS Total</b>	<b>120</b>	<b>20</b>	<b>100</b>
<b>2.SSC/N9001 (Manage your work to meet requirements)</b>	PC1. establish and agree your work requirements with appropriate people	<b>40</b>	10	5	5

# Web Developer

## CURRICULUM/SYLLABUS

This program is aimed at training candidates for the job of **Web Developer** in the **IT-ITeS Sector/Industry** and aims at building the following key competencies in the learner.

<b>Program Name</b>	<b>Web Developer</b>		
<b>Qualification Pack Name &amp; Reference ID.</b>	Web Developer SSC/Q0503, version 1.0		
<b>Version No.</b>	1.0	<b>Version Update Date</b>	31/12/2015
<b>Pre-requisites to Training</b>	Graduate degree/ diploma in web design/ media design or any other related field		
<b>Training Outcomes</b>	<p><b>After completing this programme, participants will be able to:</b></p> <ul style="list-style-type: none"> <li>• Contribute to the design of software products and applications</li> <li>• Develop media content and graphic designs for software products and Applications</li> <li>• Manage their work to meet requirements</li> <li>• Work effectively with colleagues</li> <li>• Maintain a healthy, safe and secure working environment</li> <li>• Provide data/information in standard formats</li> <li>• Develop their knowledge, skills and competence</li> </ul>		

The Course encompasses all seven National Occupational Standards (NOS) of **Web Developer SSC/Q0503** Qualification Pack issued by **IT-ITeS Sector Skills Council NASSCOM**.

Sr. No.	Module	Theory Duration (hh:mm)	Practical Duration (hh:mm)	Key Learning Outcomes	Corresponding NOS Code	Equipment Required
1	Programming for the Web	20:00	30:00	Candidates will be able to: <ul style="list-style-type: none"> <li>• Design basic programming structures to implement functionality in line with requirements defined in BRS/URS, SRS and HLD</li> </ul>	SSC/N0501	Refer to Unique Equipment Required Section

2	Analysis and Design of Web based Applications	20:00	30:00	<p>Candidates will be able to:</p> <ul style="list-style-type: none"> <li>• Check their understanding of the Business Requirements Specification (BRS)/User</li> </ul>	SSC/N0501	Refer to Unique Equipment Required Section

### Notes from IT-ITeS Sector Skills Council

1. This document outlines the broad scope of coverage. This should be linked with OBF and training delivery plan. OBF (Outcome based framework) reflects the pedagogy used to ensure an expected outcome. Training delivery plan focuses on the sequence of delivery.
2. Though many NOSs have some seemingly common outcomes, notably core/generic, professional and technical skills, it is imperative to understand the contextual difference between them. For example, writing skills required to write design specifications (in SSC/N0501) are different from the writing skills required to prepare a time plan (in SSC/N9001). Training providers are advised to,
  - a. Embed such skills development in the learning pedagogy for each expected outcome
  - b. Prepare a detailed session plan for training delivery with focus on sequence and duration of training
  - c. Run a diagnostic test to assess prior learning of students and help trainers / students identify the need for gap training, optimal duration, and suitable training methodology. Accordingly, more introductory level sessions may be included in guided or self-paced mode of learning. E.g. adding some sessions on Functional English or Use of Internet and MS Office.

Annexure 1: Assessment Criteria

Assessment Criteria for Web Developer	
<b>Job Role</b>	<b>Web Developer</b>
<b>Qualification Pack</b>	<b>SSC/Q0503</b>
<b>Sector Skill Council</b>	<b>IT-ITeS</b>

Sr. No.	Guidelines for Assessment
1	Criteria for assessment for each Qualification Pack (QP) will be created by the Sector Skill Council (SSC). Each performance criteria (PC) will be assigned Theory and Skill/Practical marks proportional to its importance in NOS.
2	The assessment will be conducted online through assessment providers authorised by SSC.
3	Format of questions will include a variety of styles suitable to the PC being tested such as multiple choice questions, fill in the blanks, situational judgment test, simulation and programming test.
4	To pass a QP, a trainee should pass each individual NOS. Standard passing criteria for each NOS is 70%.
5	For latest details on the assessment criteria, please visit <a href="http://www.sscnasscom.com">www.sscnasscom.com</a> .

ASSESSMENT OUTCOME (NOS  CODE AND DESCRIPTION)	ASSESSMENT CRITERIA (PC)	TOTAL MARKS	OUT OF	MARKS ALLOCATION	
				THEORY	SKILLS PRACTICAL
<b>1. SSC/N0501 (Contribute to the design of software products and applications)</b>	PC1. check their understanding of the Business Requirements Specification (BRS)/User Requirements Specification (URS) with appropriate people	<b>100</b>	10	10	0
	PC2. check their understanding of the Software Requirements Specification (SRS) with appropriate people		10	10	0
	PC3. check their understanding of High Level Design (HLD) with appropriate people		10	10	0
	PC4. design basic programming structures to implement functionality in line with requirements defined in BRS/URS, SRS and HLD		30	0	30
	PC5. review their designs with appropriate people		5	5	0
	PC6. analyze inputs from appropriate people to identify, resolve and record design defects and inform future designs		15	5	10
	PC7. document their designs using standard templates and tools		10	0	10
	PC8. comply with their organization's policies, procedures and guidelines when contributing to the design of software products and applications		10	0	10

		<b>Total</b>	100	40	60
<b>2. SSC/N0503 (Develop media</b>	PC1. check their understanding of the Business RequirementsSpecification(BRS),Software	<b>100</b>	10	10	0

content an dgraphic designs for software products and Applications)	Requirements Specification (SRS), High Level Design (HLD) and Low Level Design (LLD) with appropriate people				
	PC2.access reusable components, media and graphical packages and tools from their organization's knowledge base		10	0	10
	PC3.convert requirements into media content and graphic designs, leveraging reusable components where available		20	0	20
	PC4.review media content and graphic designs with appropriate people and analyze their feedback		10	5	5
	PC5. record any defects and corrective actions taken to inform future work		10	0	10
	PC6.rework media content and graphic designs, incorporating feedback		10	5	5
	PC7. submit media content and graphic designs for approval by appropriate people		10	0	10
	PC8.update their organization's knowledge base with their experiences of the media content and graphic designs developed		10	0	10
	PC9.comply with their organization's policies, procedures and guidelines when developing media content and graphic designs for software products and applications		10	0	10
	<b>Total</b>	100	20	80	
3.SSC/N9001 (Manage their work to meet requirements)	PC1. establish and agree their work requirements with appropriate people	<b>100</b>	7.5	0	7.5
	PC2. keep their immediate work area clean and tidy		15	7.5	7.5

<b>3. Annexure: Assessment Criteria</b>	<b>08</b>

# Software Developer

## CURRICULUM/SYLLABUS

This program is aimed at training candidates for the job of **Software Developer** in the **IT-ITeS** Sector/Industry and aims at building the following key competencies in the learner.

<b>Program Name</b>	<b>Software Developer</b>		
<b>Qualification Pack Name &amp; Reference ID.</b>	Software Developer SSC/Q0501, version 1.0		
<b>Version No.</b>	1.0	<b>Version Update Date</b>	31/12/2015
<b>Pre-requisites to Training</b>	BSc (Stat, Math, Physics, Chemistry, Geology) or BE/BTech		
<b>Training Outcomes</b>	<b>After completing this programme, participants will be able to:</b> <ul style="list-style-type: none"><li>• Contribute to the design of software products and applications</li><li>• Develop software code to specification</li><li>• Manage their work to meet requirements</li><li>• Work effectively with colleagues</li><li>• Maintain a healthy, safe and secure working environment</li><li>• Provide data/information in standard formats</li><li>• Develop their knowledge, skills and competence</li></ul>		

The Course encompasses all seven National Occupational Standards (NOS) of Software Developer SSC/Q0501 Qualification Pack issued by IT-ITeS Sector Skills Council NASSCOM.

Sr. No.	Module	Key Learning Outcomes	Equipment Required
1	<b>Programming and Algorithms</b>  <b>Theory Duration</b> (hh:mm) 20:00  <b>Practical Duration</b> (hh:mm) 30:00  <b>Corresponding NOS Code</b> SSC/N0501	Candidates will be able to: <ul style="list-style-type: none"><li>Design basic programming structures to implement functionality in line with requirements defined in BRS/URS, SRS and HLD</li></ul>	Refer to Unique Equipment Required Section
2	<b>Analysis and Design of Software Applications</b>  <b>Theory Duration</b> (hh:mm) 20:00  <b>Practical Duration</b> (hh:mm) 30:00  <b>Corresponding NOS Code</b> SSC/N0501	Candidates will be able to: <ul style="list-style-type: none"><li>Check their understanding of the Business Requirements Specification (BRS)/User Requirements Specification (URS) with appropriate people</li><li>Check their understanding of the Software Requirements Specification (SRS) with appropriate people</li><li>Check their understanding of High Level Design (HLD) with appropriate people</li><li>Review their designs with appropriate people</li><li>Analyse inputs from appropriate people to identify, resolve and record design defects and inform future designs</li><li>Document designs using standard templates and tools</li><li>Comply with organization's policies, procedures and guidelines when contributing to the design of software products and applications</li></ul>	Refer to Unique Equipment Required Section
3	<b>Application Development</b>  <b>Theory Duration</b> (hh:mm) 20:00  <b>Practical Duration</b> (hh:mm) 80:00  <b>Corresponding NOS Code</b> SSC/N0502	Candidates will be able to: <ul style="list-style-type: none"><li>Check their understanding of the Business Requirements Specification (BRS), Software Requirements Specification (SRS), High Level Design (HLD) and Low Level Design (LLD) with appropriate people</li><li>Access reusable components, code generation tools and unit testing tools from their organization's knowledge base</li><li>Convert technical specifications into code to meet the requirements, leveraging reusable components, where available</li><li>Create appropriate unit test cases (UTCs)</li><li>Review codes and UTCs with appropriate people</li><li>Execute UTCs and document results</li><li>Rework the code and UTCs to fix identified defects</li></ul>	Refer to Unique Equipment Required Section

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<ul style="list-style-type: none"><li>Analyse inputs from appropriate people to inform future designs</li><li>Record corrective actions for identified defects to inform future designs</li><li>Submit tested code timely for approval by appropriate people</li><li>Update their organization's knowledge base with their experiences of the code developed</li><li>Comply with their organization's policies, procedures and guidelines when developing software code to specification</li></ul>	
4	<b>Self and work Management</b>  <b>Theory Duration</b> (hh:mm) 12:00  <b>Practical Duration</b> (hh:mm) 38:00  <b>Corresponding NOS Code</b> SSC/N9001	Candidates will be able to: <ul style="list-style-type: none"><li>Establish and agree their work requirements with appropriate people</li><li>Keep their immediate work area clean and tidy</li><li>utilize their time effectively</li><li>User resources correctly and efficiently</li><li>Treat confidential information correctly</li><li>Work in line with organization's policies and procedures</li><li>Work within the limits of their job role</li><li>Obtain guidance from appropriate people, where necessary</li><li>Ensure their work meets the agreed requirements</li></ul>	Refer to Unique Equipment Required Section
5	<b>Team Work and Communication</b>  <b>Theory Duration</b> (hh:mm) 12:00  <b>Practical Duration</b> (hh:mm) 38:00  <b>Corresponding NOS Code</b> SSC/N9002	Candidates will be able to: <ul style="list-style-type: none"><li>Communicate with colleagues clearly, concisely and accurately</li><li>Work with colleagues to integrate their work effectively with them</li><li>Pass on essential information to colleagues in line with organizational requirements</li><li>Work in ways that show respect for colleagues</li><li>carry out commitments they have made to colleagues</li><li>Let colleagues know in good time if they cannot carry out their commitments, explaining the reasons</li><li>Identify any problems they have working with colleagues and take the initiative to solve these problems</li><li>Follow the organization's policies and procedures for working with colleagues</li></ul>	Refer to Unique Equipment Required Section
6	<b>Managing Health and Safety</b> <b>Theory Duration</b> (hh:mm) 05:00	Candidates will be able to: <ul style="list-style-type: none"><li>Comply with their organization's current health, safety and security policies and procedures</li><li>Report any identified breaches in health, safety, and security policies and procedures to the designated person</li><li>Identify and correct any hazards that they can deal</li></ul>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<b>Practical Duration</b> (hh:mm) 20:00  <b>Corresponding NOS Code</b> SSC/N9003	with safely, competently and within the limits of their authority <ul style="list-style-type: none"><li>• Report any hazards that they are not competent to deal with to the relevant person in line with organizational procedures and warn other people who may be affected</li><li>• Follow their organization's emergency procedures promptly, calmly, and efficiently</li><li>• Identify and recommend opportunities for improving health, safety, and security to the designated person</li><li>• Complete any health and safety</li></ul>	
7	<b>Data and Information Management</b>  <b>Theory Duration</b> (hh:mm) 15:00  <b>Practical Duration</b> (hh:mm) 35:00  <b>Corresponding NOS Code</b> SSC/N9004	Candidates will be able to: <ul style="list-style-type: none"><li>• Establish and agree with appropriate people the data/information they need to provide, the formats in which they need to provide it, and when they need to provide it</li><li>• Obtain the data/information from reliable sources</li><li>• Check that the data/information is accurate, complete and up-to-date</li><li>• Obtain advice or guidance from appropriate people where there are problems with the data/information</li><li>• Carry out rule-based analysis of the data/information, if required</li><li>• Insert the data/information into the agreed formats</li><li>• Check the accuracy of their work, involving colleagues where required</li><li>• Report any unresolved anomalies in the data/information to appropriate people</li><li>• Provide complete, accurate and up-to-date data/information to the appropriate people in the required format on time</li></ul>	Refer to Unique Equipment Required Section
8	<b>Learning and Self Development</b>  <b>Theory Duration</b> (hh:mm) 05:00  <b>Practical Duration</b> (hh:mm) 20:00  <b>Corresponding NOS Code</b> SSC/N9005	Candidates will be able to: <ul style="list-style-type: none"><li>• Obtain advice and guidance from appropriate people to develop their knowledge, skills and competence</li><li>• Identify accurately the knowledge and skills they need for their job role</li><li>• Identify accurately their current level of knowledge, skills and competence and any learning and development needs</li><li>• Agree with appropriate people a plan of learning and development activities to address their learning needs</li><li>• Undertake learning and development activities in line with their plan</li><li>• Apply their new knowledge and skills in the workplace, under supervision</li><li>• Obtain feedback from appropriate people on their</li></ul>	Refer to Unique Equipment Required Section

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		knowledge and skills and how effectively they apply them <ul style="list-style-type: none"> <li>Review their knowledge, skills and competence regularly and take appropriate action</li> </ul>	
	<b>Total Duration</b>  <b>Theory Duration</b> <b>109:00</b>  <b>Practical Duration</b> <b>291:00</b>	<b>Unique Equipment Required:</b> Training rooms should be fully furnished with the following equipment/tools/accessories. Additional/specific resources, wherever applicable (e.g. Hardware, software) are indicated in the main text corresponding to relevant learning outcome.  <b>For Domain NOSs:</b> <ul style="list-style-type: none"> <li>For NOSSSC/N0501: C/C++, UML toolssuchas Rational suite</li> <li>For NOSSSC/N0502: JDK/Eclipse</li> </ul> <b>General:</b> <ul style="list-style-type: none"> <li>Comfortable seats with adequate lighting, controlled temperature and acoustics for training and learning</li> <li>White Board, Markers and Eraser</li> <li>Projector with screen</li> <li>Flipchart with markers</li> <li>Faculty's PC/Laptop with latest configuration and internet connection</li> <li>Supporting software/applications for projecting audio, video, recording,</li> <li><b>Presentation Tools to support learning activities:</b> <ul style="list-style-type: none"> <li>Intranet</li> <li>Email</li> <li>IMs</li> </ul> </li> <li>Learning management systems e.g. Moodle, Blackboard to enable blended learning</li> <li>Microphone/voice system for lecture and class activities</li> <li>Handy Camera</li> <li>Stationery kit – Staples, Glue, Chart Paper, Sketch Pens, Paint Box, Scale, A4 Sheets</li> <li>For IT Lab sessions: Computer Lab with 1:1 PC: trainee ratio and having internet connection, MS Office/Open office, Browser, Outlook/other Email Clients</li> <li>Assessment and Test Tools for day today online Tests and Assessments</li> <li>For team discussions: Adequate seating arrangement in full/half circle format for one or more teams as per planned team composition.</li> <li>Reading Resources: Access to relevant sample documents and learning forums to enable self-study before and after each training session.</li> </ul>	

**Grand Total Course Duration: 400 Hours 0 Minutes**

**(This Syllabus/Curriculum has been approved by IT-ITeS Sector Skills Council NASSCOM.)**

## Notes from IT-ITeS Sector Skills Council

1. This document outlines the broad scope of coverage. This should be linked with OBF and training delivery plan. OBF (Outcome based framework) reflects the pedagogy used to ensure an expected outcome. Training delivery plan focuses on the sequence of delivery.
2. Though many NOSs have some seemingly common outcomes, notably core/generic, professional and technical skills, it is imperative to understand the contextual difference between them. For example, writing skills required to communicate results of testing (in SSC/N0501) are different from the writing skills required to prepare a time plan (in SSC/N9001). Training providers are advised to,
  - a. Embed such skills development in the learning pedagogy for each expected outcome
  - b. Prepare a detailed session plan for training delivery with focus on sequence and duration of training
  - c. Run a diagnostic test to assess prior learning of students and help trainers/students identify the need for gap training, optimal duration, and suitable training methodology. Accordingly, more introductory level sessions may be included in guided or self-paced mode of learning. E.g. adding some sessions on Functional English or Use of Internet and MS Office.

## Trainer Prerequisites for Job role: Software Developer mapped to Qualification Pack: SSC/Q0501

Sr. No.	Area	Details
1	<b>Job Description</b>	To deliver accredited training service, mapping to the curriculum detailed above, in accordance with the Qualification Pack SSC/Q0501.
2	<b>Personal Attributes</b>	Aptitude for conducting training, and pre/ post work to ensure competent, employable candidates at the end of the training. Strong communication skills, interpersonal skills, ability to work as part of a team; a passion for quality and for developing others; well-organised and focused, eager to learn and keep oneself updated with the latest in this field.
3	<b>Minimum Educational Qualifications</b>	Minimum Bachelor's Degree in Computer Science or any related field; Preferred Master's Degree in Computer Science
4a	<b>Domain Certification</b>	Minimum accepted score in SSC Assessment is 90% per NOS being taught in QP SSC/Q0501.  Certification in relevant software competencies: Software Development Certifications in C++, Embedded, C#, C, Java etc., is an added advantage.
4b	<b>Platform Certification</b>	Recommended that the Trainer is certified for the Job Role: "Trainer" mapped to the Qualification Pack: "SSC/Q1402". Minimum accepted score is 70%.
5	<b>Experience</b>	Field experience: Minimum 2 years' experience in the same domain Training experience: 1 year preferred

## Annexure: Assessment Criteria

<b>Assessment Criteria for Software Developer</b>	
<b>Job Role</b>	<b>Software Developer</b>
<b>Qualification Pack</b>	<b>SSC/Q0501</b>
<b>Sector Skill Council</b>	<b>IT-ITeS</b>

<b>Sr.No.</b>	<b>Guidelines for Assessment</b>
1	Criteria for assessment for each Qualification Pack (QP) will be created by the Sector Skill Council (SSC). Each performance criteria (PC) will be assigned Theory and Skill/Practical marks proportional to its importance in NOS.
2	The assessment will be conducted online through assessment providers authorised by SSC.
3	Format of questions will include a variety of styles suitable to the PC being tested such as multiple choice questions, fill in the blanks, situational judgment test, simulation and programming test.
4	To pass a QP, a trainee should pass each individual NOS. Standard passing criteria for each NOS is 70%.
5	For latest details on the assessment criteria, please visit <a href="http://www.sscnasscom.com">www.sscnasscom.com</a> .

Grand Total Course Duration: **400 Hours 0 Minutes**

*(This syllabus/curriculum has been approved IT-ITeS Sector Skills Council NASSCOM.)*

**Notes from IT-ITeS Sector Skills Council NASSCOM**

1. This document outlines the broad scope of coverage. This should be linked with OBF and training delivery plan. OBF (Outcome based framework) reflects the pedagogy used to ensure an expected outcome. Training delivery plan focuses on the sequence of delivery.
2. Though many NOSs have some seemingly common outcomes, notably core/generic, professional and technical skills, it is imperative to understand the contextual difference between them. Training providers are advised to,
  - a. Embed such skills development in the learning pedagogy for each expected outcome
  - b. Prepare a detailed session plan for training delivery with focus on sequence and duration of training
3. Run a diagnostic test to assess prior learning of students and help trainers / students identify the need for gap training and suitable training methodology. Accordingly, more introductory level sessions may be included in guided or self-paced mode of learning. E.g. adding some sessions on Functional English or Use of Internet and MS Office.

### Annexure 1: Assessment Criteria

Assessment Criteria for <QP Name>	
Job Role	User Interface (UI) Developer
Qualification Pack	SSC/Q0502
Sector Skill Council	IT-ITeS

Sr. No.	Guidelines for Assessment
1	Criteria for assessment for each Qualification Pack (QP) will be created by the Sector Skill Council (SSC). Each performance criteria (PC) will be assigned Theory and Skill/Practical marks proportional to its importance in NOS.
2	The assessment will be conducted online through assessment providers authorised by SSC.
3	Format of questions will include a variety of styles suitable to the PC being tested such as multiple choice questions, fill in the blanks, situational judgment test, simulation and programming test.
4	To pass a QP, a trainee should pass each individual NOS. Standard passing criteria for each NOS is 70%.
5	For latest details on the assessment criteria, please visit <a href="http://www.sscnasscom.com">www.sscnasscom.com</a> .

Assessable Outcomes	Assessment criteria for the outcome	Total Mark	Out of	Theory	Skills Practical
<b>1. SSC/N0501 (Contribute to the design of software products and applications)</b>	PC1. check your understanding of the Business Requirements Specification (BRS)/User Requirements Specification (URS) with appropriate people	<b>100</b>	10	10	0
	PC2. check your understanding of the Software Requirements Specification (SRS) with appropriate people		10	10	0
	PC3. check your understanding of High Level Design (HLD) with appropriate people		10	10	0
	PC4. design basic programming structures to implement functionality in line with requirements defined in BRS/URS, SRS and HLD		30	0	30
	PC5. review your designs with appropriate people		5	5	0
	PC6. analyze inputs from appropriate people to identify, resolve and record design defects and inform future designs		15	0	15
	PC7. document your designs using standard templates and tools		10	0	10
	PC8. comply with your organization's policies, procedures and guidelines when contributing to the design of software products and applications		10	0	10
	<b>Total</b>		100	35	65
<b>2. SSC/N0502 (Develop software code to specification)</b>	PC1. check your understanding of the Business Requirements Specification (BRS), Software Requirements Specification (SRS), High Level Design (HLD) and Low Level Design (LLD) with appropriate people	<b>100</b>	5	5	0
	PC2. access reusable components, code generation tools and unit testing tools from your organization's knowledge base		10	0	10

Assessable Outcomes	Assessment criteria for the outcome	Total Mark	Out of	Theory	Skills Practical
	PC3. convert technical specifications into code to meet the requirements, leveraging reusable components, where available		10	0	10
	PC4. create appropriate unit test cases (UTCs)		10	0	10
	PC5. review codes and UTCs with appropriate people		5	5	0
	PC6. execute UTCs and document results		10	0	10
	PC7. rework the code and UTCs to fix identified defects		10	0	10
	PC8. analyze inputs from appropriate people to inform future designs		5	5	0
	PC9. record corrective actions for identified defects to inform future designs		10	0	10
	PC10. submit tested code for approval by appropriate people		5	5	0
	PC11. update your organization's knowledge base with your experiences of the code developed		10	0	10
	PC12. comply with your organization's policies, procedures and guidelines when developing software code to specification		10	0	10
			<b>Total</b>	100	20
<b>3.SSC/N0503 (Develop media content and graphic designs for software products and Applications)</b>	PC1. check your understanding of the Business Requirements Specification (BRS), Software Requirements Specification (SRS), High Level Design (HLD) and Low Level Design (LLD) with appropriate people	<b>100</b>	10	10	0
	PC2. access reusable components, media and graphical packages and tools from your organization's knowledge base		10	0	10
	PC3. convert requirements into media content and graphic designs, leveraging reusable components where available		25	0	25
	PC4. review media content and graphic designs with appropriate people and analyze their feedback		10	10	0
	PC5. record any defects and corrective action taken to inform future work		10	0	10
	PC6. rework media content and graphic designs, incorporating feedback		10	0	10
	PC7. submit media content and graphic designs for approval by appropriate people		5	5	0
	PC8. update your organization's knowledge base with your experiences of the media content and graphic designs developed		10	0	10
	PC9. comply with your organization's policies, procedures and guidelines when developing media content and graphic designs for software products and applications		10	0	10
	<b>Total</b>	100	25	75	
<b>4.SSC/N9001 (Manage your work to meet requirements)</b>	PC1. establish and agree your work requirements with appropriate people	<b>100</b>	6.25	0	6.25
	PC2. keep your immediate work area clean and tidy		12.5	6.25	6.25
	PC3. utilize your time effectively		12.5	6.25	6.25
	PC4. use resources correctly and efficiently		18.75	6.25	12.5

Assessable Outcomes	Assessment criteria for the outcome	Total Mark	Out of	Theory	Skills Practical	
	PC5. treat confidential information correctly		6.25	0	6.25	
	PC6. work in line with your organization's policies and procedures		12.5	0	12.5	
	PC7. work within the limits of your job role		6.25	0	6.25	
	PC8. obtain guidance from appropriate people, where necessary		6.25	0	6.25	
	PC9. ensure your work meets the agreed requirements		18.75	6.25	12.5	
		<b>Total</b>	<b>100</b>	<b>25</b>	<b>75</b>	
<b>5.SSC/N9002 (Work effectively with colleagues)</b>	<b>(Work with</b>	PC1. communicate with colleagues clearly, concisely and accurately	<b>100</b>	20	0	20
		PC2. work with colleagues to integrate your work effectively with theirs		10	0	10
		PC3. pass on essential information to colleagues in line with organizational requirements		10	10	0
		PC4. work in ways that show respect for colleagues		20	0	20
	PC5. carry out commitments you have made to colleagues		10	0	10	
	PC6. let colleagues know in good time if you cannot carry out your commitments, explaining the reasons		10	10	0	
	PC7. identify any problems you have working with colleagues and take the initiative to solve these problems		10	0	10	
	PC8. follow the organization's policies and procedures for working with colleagues		10	0	10	
		<b>Total</b>	<b>100</b>	<b>20</b>	<b>80</b>	
<b>6.SSC/N9003 (Maintain a healthy, safe and secure working environment)</b>	<b>(Maintain a healthy, safe and secure working environment)</b>	PC1. comply with your organization's current health, safety and security policies and procedures	<b>100</b>	20	10	10
		PC2. report any identified breaches in health, safety, and security policies and procedures to the designated person		10	0	10
		PC3. identify and correct any hazards that you can deal with safely, competently and within the limits of your authority		20	10	10
		PC4. report any hazards that you are not competent to deal with to the relevant person in line with organizational procedures and warn other people who may be affected		10	0	10
		PC5. follow your organization's emergency procedures promptly, calmly, and efficiently		20	10	10
		PC6. identify and recommend opportunities for improving health, safety, and security to the designated person		10	0	10
		PC7. complete any health and safety records legibly and accurately		10	0	10
				<b>Total</b>	<b>100</b>	<b>30</b>
	PC1. establish and agree with appropriate people the data/information you need to provide, the formats	<b>100</b>	12.5	12.5	0	

Assessable Outcomes	Assessment criteria for the outcome	Total Mark	Out of	Theory	Skills Practical
<b>7.SSC/N9004 (Provide data/information in standard formats)</b>	in which you need to provide it, and when you need to provide it				
	PC2. obtain the data/information from reliable sources		12.5	0	12.5
	PC3. check that the data/information is accurate, complete and up-to-date		12.5	6.25	6.25
	PC4. obtain advice or guidance from appropriate people where there are problems with the data/information		6.25	0	6.25
	PC5. carry out rule-based analysis of the data/information, if required		25	0	25
	PC6. insert the data/information into the agreed formats		12.5	0	12.5
	PC7. check the accuracy of your work, involving colleagues where required		6.25	0	6.25
	PC8. report any unresolved anomalies in the data/information to appropriate people		6.25	6.25	0
	PC9. provide complete, accurate and up-to-date data/information to the appropriate people in the required formats on time		6.25	0	6.25
			<b>Total</b>	<b>100</b>	<b>25</b>
<b>8.SSC/N9005 (Develop your knowledge, skills and competence)</b>	PC1. obtain advice and guidance from appropriate people to develop your knowledge, skills and competence	<b>100</b>	10	0	10
	PC2. identify accurately the knowledge and skills you need for your job role		10	0	10
	PC3. identify accurately your current level of knowledge, skills and competence and any learning and development needs		20	10	10
	PC4. agree with appropriate people a plan of learning and development activities to address your learning needs		10	0	10
	PC5. undertake learning and development activities in line with your plan		20	10	10
	PC6. apply your new knowledge and skills in the workplace, under supervision		10	0	10
	PC7. obtain feedback from appropriate people on your knowledge and skills and how effectively you apply them		10	0	10
	PC8. review your knowledge, skills and competence regularly and take appropriate action		10	0	10
			<b>Total</b>	<b>100</b>	<b>20</b>

**Annexure 2: Trainer Prerequisites for Job role: User Interface (UI) Developer mapped to Qualification Pack: SSC/Q0502**

Sr. No.	Area	Details
1	<b>Job Description</b>	To deliver accredited training service, mapping to the curriculum detailed above, in accordance with the Qualification Pack SSC/Q0502.
2	<b>Personal Attributes</b>	<p>Aptitude to conduct training, and pre/ post work to ensure competent, employable candidates at the end of the training. Strong communication skills, interpersonal skills, ability to work as part of a team; a passion for quality and for developing others; well-organised and focused, eager to learn and keep oneself updated with the latest in the mentioned field.</p> <p>The individual should be result oriented. The individual should also be able to demonstrate skills for communication, creative and logical thinking.</p>
3	<b>Minimum Educational Qualifications</b>	Bachelor's Degree in Science/Technology/Computers or any graduate course
4a	<b>Domain Certification</b>	<p>Minimum accepted score in SSC Assessment is 90% per NOS being taught in SSC/Q0502.</p> <p>Additional certification in computers/technology/animation/graphics</p>
4b	<b>Platform Certification</b>	<p>Recommended that the Trainer is certified for the Job Role: "Trainer" mapped to the Qualification Pack: "SSC/Q1402".</p> <p>Minimum accepted score is 70% per NOS.</p>
5	<b>Experience</b>	<p>Field experience: Minimum 2 years' experience in the same domain</p> <p>Training experience: 1 year preferred</p>

EXIT OPTION WITH CERTIFICATION - **with ability to solve well defined problems**

**Notes:**

- **One Hour of Lecture is equal to 1 Credit.**
- **One Hour of Tutorial is equal to 1 Credit (Except Languages).**
- **Two Hours of Practical is equal to 1 Credit**

**Acronyms Expanded**

- **AECC** : **Ability Enhancement Compulsory Course**
- **DSC ©** : **Discipline Specific Core (Course)**
- **SEC-SB/VB** : **Skill Enhancement Course-Skill Based/Value Based**
- **OEC** : **Open Elective Course**
- **DSE** : **Discipline Specific Elective**
- **SEE** : **Semester End Examination**
- **CIE** : **Continuous Internal Evaluation**
- **L+T+P** : **Lecture+Tutorial+Practical(s)**

**Note: Practical Classes may be conducted in the Business Lab or in Computer Lab or in Class room depending on the requirement. One batch of students should not exceed half (i.e., 30 or less than 30 students) of the number of students in each class/section. 2 Hours of Practical Class is equal to 1 Hour of Teaching, however, whenever it is conducted for the entire class (i.e., more than 30 students) 2 Hours of Practical Class is equal to 2 Hours of Teaching.**

# Revised Syllabus for 1<sup>st</sup> And 2<sup>nd</sup> Semester BBA Degree as Per NEP Regulations to be implemented From the Academic Year 2023-2024

## **I. OBJECTIVES OF THE COURSE:**

1. To develop the skills required for the application of business concepts and techniques learned in the classroom at the workplace.
2. To provide competent and technical skills personnel to the industry in the area of Marketing, Finance, Human Resource, Data Analytics, Retailing and Logistics And Supply Chain Management. To enhance the employability skills of the management students.
3. To enhance the capability of the students improve their decision-making skills.
4. To encourage entrepreneurship among students pursuing education in the field of Business Administration.
5. To empower students for pursuing professional courses like MBA, Chartered Accountancy, Company Secretary, etc.,
6. To ensure holistic development of Business administration students.

## **II. ELIGIBILITY FOR ADMISSION:**

Candidates who have passed Two Year Pre University Course of Karnataka State in any discipline or its equivalent (viz., 10+2 of other states, ITI, Diploma etc.) are eligible for admission into this program.

## **III. DURATION OF THE PROGRAM:**

The program of study is Four years of Eight Semesters. A candidate shall complete his/her degree within eight academic years from the date of his/her admission to the first semester. The NEP 2020 provides multiple exit options for students as specified below:

### **EXIT OPTION:**

- a. The students who successfully complete ONE year/ 2 Semesters and leave the program, will be awarded Certificate in Business Administration.
- b. The students who successfully complete TWO years/ 4 Semesters and leave the program, will be awarded Diploma in Business Administration.
- c. The students who successfully complete THREE years/ 6 Semesters and leave the program, will be awarded Bachelors Degree in Business Administration (BBA)

## **IV. MEDIUM OF INSTRUCTION**

The medium of instruction shall be English.

## **V. ATTENDANCE**

- a. For the purpose of calculating attendance, each semester shall be taken as a Unit.
- b. A student shall be considered to have satisfied the requirement of attendance for the semester, if he/she has attended not less than 75% in aggregate of the number of working periods in each of the subjects compulsorily.

- c. A student who fails to complete the course in the manner stated above shall not be permitted totake the University Examination.

## VI. TEACHING AND EVALUATION

MBA graduates with BBM/BBA, B.Com and BBS as basic degree from a recognized University are only eligible to teach and to evaluate all the Business Administration courses except Languages, Constitution of India, Environmental Studies, Health Wellness/Social and Emotional learning, Sports/NCC/NSS/Other)

## VII. SKILL DEVELOPMENT / RECORD MAINTENANCE

- Every college is required to establish a dedicated business lab for the purpose of conducting practical/ assignments to be written in the record.
- In every semester, the student should maintain a record book in which a minimum of 5exercise or activities per course are to be recorded.

## VIII. SCHEME OF EXAMINATION

- There shall be an University examination at the end of each semester. The maximum marks for the university examination in each paper shall be 60 marks for DSC, DSE, Vocational,SEC and OEC.
- Internal Assessment 40 marks for DSC, DSE, Vocational, SEC and OEC.

## IX. GUIDELINES FOR CONTINUOUS INTERNAL EVALUATION AND SEMESTER END EXAMINATION:

The CIE and SEE will carry 40% and 60% weightage each, to enable the course to be evaluated for a total of 100 marks, irrespective of its credits. The evaluation system of the course is comprehensive & continuous during the entire period of the Semester. For a course, the CIE and SEE evaluation will be on the following parameters:

SI No.	Parameters for the Evaluation	Marks
	<b>Continuous Internal Evaluation (CIE)</b>	
1	Continuous and Comprehensive Evaluation (CCE) – (A)	20 Marks
2	Internal Assessment test (IAT) – (B)	20 Marks
	<b>Total of CIE (A+B)</b>	<b>40 Marks</b>
3	Semester End Examination (SEE) – (C)	60 Marks
	<b>Total of CIE and SEE (A+B+C)</b>	<b>100 Marks</b>

### Continuous Internal Evaluation (CIE)

- Continuous & Comprehensive Evaluation (CCE):** The CCE will carry a maximum of 20% weightage (20 marks) of total marks of a course. Before the start of the academic session in each semester, a faculty membershould choose for his/her course, minimum of the following assessment methods with 5markse each ( 4x5=20 marks)
  - Individual Assignments
  - Seminars/Class room Presentations/Quizzes

- iii. Group Discussions/Class Discussion / group assignments
- iv. Casestudies/ Caselets
- v. Participatory & Industry-Integrated Learning/Industrial visits
- vi. Practical Activities / Problem Solving Exercises
- vii. Participation in seminars/ academic events /symposia
- viii. Mini project / Capstone projects

**b. Internal Assessment Test (IAT):**

The IAT will carry a maximum of 20% weightage (20 marks) of total marks of a course. Under this component, two tests will have to be conducted in a semester for 30 marks each and the same is to be scaled down to 10 marks each.

**c. Semester End Examination (SEE):**

The semester end examination for all the students for which students who get registered during the semester shall be conducted for 60 marks. SEE of the course shall be conducted subject to their fulfillment of minimum attendance requirement as per the university norms. The BOS of the university shall prepare the SEE framework and the question paper pattern.

**d. Minimum marks for a Pass:**

Candidates who have obtained 35% marks in semester end examination i.e., 21 marks out of 60 marks of theory examination and 40% in aggregate i.e., total 40 marks out of 100 marks of semester end examination marks and continuous internal evaluation marks.

- The Understanding of the basic concepts of business maths and apply them to create solve and interpret application problems in business
- Ability to solve problems on various types of equation.
- Ability to solve problems on Matrices and execute the laws of indices, law of logarithm and evaluate them.
- Ability to apply the concept of simple interest and compound interest bills discounted etc. and apply them in day-to-day life.
- Ability to solve problems on Arithmetic progression, Geometric progression and construct logical application of these concepts.

**Syllabus:**

**Hours**

**Module No. 1: NUMBER SYSTEM**

**04**

Introduction – Natural Numbers - Even Numbers – Odd Numbers – Integers – Prime Numbers – Rational and Irrational numbers, Real Numbers, HCF and LCM (Simple problems).

**Module No. 2: THEORY OF EQUATIONS**

**10**

Introduction – Meaning - Types of Equations – Simple/ Linear Equations and Simultaneous Equations (only two variables), Elimination and Substitution Methods only. Quadratic Equation - Factorization and Formula Method ( $ax^2 + bx + c = 0$  form only). Simple problems.

**Module No.3: INDICIES, MATRICES AND LOGARITHMS**

**16**

Meaning – types – operation on matrices – additions – subtractions and multiplication of two matrices – transpose – determinants – minor of an element – co-factor of an element – inverse – crammers rule in two variables – problems.

Indices and Logarithms: Meaning- Basic Laws of Indices and their application for simplification. Laws of Logarithms –Common Logarithm, Application of Log Table for Simplification.

**Module No. 4: COMMERCIAL ARITHMETIC**

**16**

Simple Interest, Compound Interest including yearly and half yearly calculations, Annuities, Percentages, Bills Discounting, Ratios and proportions, duplicate-triplicate and sub-duplicate of a ratio. Proportions: third, fourth and inverse proportion - problems.

**Module No. 5: PROGRESSIONS**

**10**

PROGRESSIONS: Arithmetic Progression - Finding the 'n<sup>th</sup>' term of AP and Sum to nth term of AP. Insertion of Arithmetic Mean Geometric Progression – Finding the 'n<sup>th</sup>' term of GP and sum to 'n<sup>th</sup>' term of GP and insertion of Geometric Mean.

**Skill Developments Activities:**

1. Develop an Amortization Table for Loan Amount – EMI Calculation.
2. Secondary overhead distribution summary using Simultaneous Equations Method.
3. Application of Matrix In Business Problems

- a. Every college is required to establish a dedicated business lab for the purpose of conducting practical/ assignments to be written in the record.
- b. In every semester, the student should maintain a record book in which a minimum of 10 exercise or activities per course are to be recorded.

**VIII. SCHEME OF EXAMINATION**

- a. There shall be an University examination at the end of each semester. The maximum marks for the university examination in each paper shall be 60 marks for DSC, DSE, Vocational, SEC and OEC.
- b. Internal Assessment 40 marks for DSC, DSE, Vocational, SEC and OEC.

**Guidelines for Continuous Internal Evaluation and Semester End Examination:**

**The CIE and SEE will carry 40% and 60% weightage each, to enable the student to be evaluated at a total of 100 marks, irrespective of its credits. The evaluation system of the course & continuous during the entire period of the Semester. The CIE and SEE evaluation will be on the following parameters:**

Sl. No	Parameters for the Evaluation	Marks
	Continuous Internal Evaluation (CIE)	
1	Continuous & Comprehensive Evaluation (CCE) – (A)	20 Marks
2	Internal Assessment Tests (IAT) – (B)	20 Marks

	Total of CIE (A+B)	40 Marks
3	Semester End Examination (SEE) – (C)	60 Marks
	Total of CIE and SEE (A+B+C)	100 Marks

**Continuous Internal Evaluation:**

**a. Continuous & Comprehensive Evaluation (CCE):** The CCE will carry a maximum of 20% weightage (20 marks) of total marks of a course. Before the start of the academic session in each semester, a faculty member should choose for his/her course, minimum of four of the following assessment methods with 5 marks each (4x5=20 marks)

- i. Individual Assignments
- ii. Seminars/Class Room Presentations/Quizzes
- iii. Group Discussions/Class Discussion/Group Assignments
- iv. Case studies/Caselets
- v. Participatory & Industry-Integrated Learning/ n
- vi. Practical activities/Problem Solving Exercises s
- vii. Participation in Seminars/Academic Events/S n
- viii. Mini Projects/Capstone Projects

**b. Internal Assessment Tests (IAT):** The IAT will carry a maximum of 20% weightage (20 marks) of total marks of a course. Under this component, two tests will have to be conducted in a semester for 30 marks each and the same is to be scaled down to 10 marks each.

**Internal Assessment Test**

Course Code:

Name of the Course:

Duration: 1 Hour

Total Marks: 30

**PART-A**

Answer any one of the following questions (5 marks)

1. ....

2. ....

**PART-B**

Answer any one of the following questions (10 marks)

3. ....

4.....

**SECTION-C**

Answer any one of the following questions (x 15 = 15) marks

5.....

6.....

**SEMESTER END EXAMINATION (SEE):**

**The Semester End Examination for all the courses for which in these semesters shall be conducted. SEE of the courses shall be in a minimum attendance requirement as per the University. No has prepared the SEE framework and the questions presented below for 60 marks.**

**PATTERN OF QUESTION PAPER**

**TIME : 3 HOURS**

**MARKS: 60**

**PART - A**

Answer any FIVE of the following questions. Each question carries 2 marks.

**(5x2= 10)**

1. ....
2. ....
3. ....
4. ....
5. ....
6. ....
7. ....

**PART - B**

Answer any TWO of the following questions. Each question carries 10 Marks.

**(2x10 =20)**

8. ....
9. ....
10. ....
11. ....

**PART - C**

Answer any TWO of the following questions. Each question carries 15 Marks

**(2x15=30)**

12. ....
13. ....
14. ....
15. ....

### Minimum Marks for a Pass:

Candidates who have obtained a minimum of 35% marks out of 60 marks of theory examination and 40% marks of Semester End Examination marks and Continuous

### BBA PROGRAM

#### Proposed Scheme of Teaching & Evaluation for BBA (Basic/Hons) with Business Administration as Core subject

Semester I

**Course Code:**BBA 2.3

**Name of the Course:** Business Mathematics

<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>5 Hrs</b>	<b>70 Hrs</b>

**Pedagogy:** Classroom's lecture, tutorials, Problem solving.

**Course Outcomes: On successful completion of the course, the students will demonstrate**

- The Understanding of the basic concepts of business maths and apply them to create solve and interpret application problems in business
- Ability to solve problems on various types of equation.
- Ability to solve problems on Matrices and execute the laws of indices, law of logarithm and evaluate them.
- Ability to apply the concept of simple interest and compound interest bills discounted etc. and apply them in day-to-day life.
- Ability to solve problems on Arithmetic progression, Geometric progression and construct logical application of these concepts.

<b>Syllabus:</b>	<b>Hours</b>
<b>Module No. 1: NUMBER SYSTEM</b>	<b>06</b>

roduction – Natural Numbers - Even Numbers – Odd Numbers – Integers – Prime Numbers – Rational and Irrational numbers, Real Numbers, HCF and LCM (Simple problems).

<b>Module No. 2: THEORY OF EQUATIONS</b>	<b>14</b>
--	-----------

Introduction – Meaning - Types of Equations – Simple/ Linear Equations and Simultaneous Equations (only two variables), Elimination and Substitution Methods only. Quadratic Equation - Factorization and Formula Method ( $ax^2 + bx + c = 0$  form only). Simple problems.

<b>Module No.3: INDICIES, MATRICES AND LOGARITHMS</b>	<b>18</b>
---	-----------

eaning – types – operation on matrices – additions – subtractions and multiplication of two matrices – transpose – determinants – minor of an element – co-factor of an element –inverse – crammers rule in two variables – problems.

Indices and Logarithms: Meaning- Basic Laws of Indices and their application for simplification. Laws of Logarithms –Common Logarithm, Application of Log Table for Simplification.

<b>Module No. 4:COMMERCIAL ARITHMETIC</b>	<b>18</b>
---	-----------

imple Interest, Compound Interest including yearly and half yearly calculations, Annuities, Percentages, Bills Discounting, Ratios and proportions, duplicate-triplicate and sub-duplicate of a ratio. Proportions: third, fourth and inverse proportion - problems.

<b>Module No. 5: PROGRESSIONS</b>	<b>14</b>
-----------------------------------	-----------

ROGRESSIONS: Arithmetic Progression - Finding the 'n<sup>th</sup>' term of AP and Sum to nth term of AP. Insertion of Arithmetic Mean Geometric Progression – Finding the 'n<sup>th</sup>' term of GP and sum to 'n<sup>th</sup>' term of GP and insertion of Geometric Mean.

**Skill Developments Activities:**

- Develop an Amortization Table for Loan Amount – EMI Calculation.
- Secondary overhead distribution summary using Simultaneous Equations

Method.

3. Application of Matrix In Business Problems

**Text Books:**

EXIT OPTION WITH DIPLOMA – Ability to solve broadly defined problems.

<b>Name of the Program: BBA</b>		
<b>Course Code: BBA 3.1</b>		
<b>Name of the Course: COST ACCOUNTING</b>		
<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>4 Hrs</b>	<b>56 Hrs</b>
<b>Pedagogy:</b> Classrooms lecture, tutorials, and Problem Solving.		
<b>Course Outcomes: On successful completion of the course, the Students will demonstrate.</b>		
<ul style="list-style-type: none"> <li>• Understand the elements of costing and preparation of cost sheet.</li> <li>• The ability to prepare material requisitions and management of store.</li> <li>• The ability to compare and contrast labour cost techniques.</li> <li>• Ability to differentiate kinds of overhead costing.</li> <li>• Ability to reconcile the cost.</li> </ul>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No. 1: INTRODUCTION TO COST ACCOUNTING</b>		<b>12</b>
Introduction: Meaning, Objectives, Importance and Uses of Cost Accounting, Functions of Cost Accounting Department in an Organization, Difference between Cost Accounting and Financial Accounting; Various elements of Cost and Classification of Cost; Cost Object, Cost Unit; Cost Reduction and Cost Control; Limitations of Cost Accounting; Cost Sheet: Meaning and Cost Heads in a Cost Sheet, Presentation of Cost information in Cost Sheet/Statement- Problems on Cost Sheet, Tenders and Quotations.		
<b>Module No. 2: MATERIALS COST</b>		<b>12</b>
<b>Materials:</b> Meaning, Importance and Types of Materials - Direct and Indirect Material.		
<b>Materials Procurement:</b> Procedure for procurement of materials and documentation involved in procurement of materials- (Bill of materials, Material requisition note, Purchase requisition note,, Purchase order, Goods received note); <b>Material Storage and Records:</b> Duties of Store keeper, Store records- (Bin cards, Stores Ledger, Stock Control Cards); <b>Material Issues and Valuation:</b> Procedure for material issues, Documents used in material issues- (Material Requisition Note, Material Transfer Note, Materials Return		

Note); Valuation of material issues- preparation of Stores Ledger/ Account - FIFO, LIFO, - problems.

**Inventory Control:** Inventory control techniques and determination of various stock levels- Problems on Level Setting and Computation of EOQ; ABC Analysis, FSN Inventory, VED Inventory, HML Inventory, (Concepts only).

**Module No. 3: EMPLOYEE COST**

**10**

**Employee Cost:** Meaning, Components, Classification and Importance of Employee (Labour) Cost in Organisations; Attendance Procedure- Time keeping and Time Booking, Idle Time- Causes and treatment of Normal and Abnormal Idle Time, Overtime- Causes and treatment (Theory only);

**Methods of Remuneration** (Payment of Wages and Incentives) Problems on calculation of earnings under Time Rate (Straight time rate, Halsey and Rowan Methods) and Piece rate systems (Straight piece rate and Taylor's differential piece rate); Employee Turnover- Meaning, Reasons and Effects of LTO/ETO.

**Module No. 4: OVERHEADS**

**12**

Overheads: Meaning and Classification of Overheads; Accounting and Control of Manufacturing Overheads: Estimation and Collection, Cost allocation, Apportionment, Re-apportionment and Absorption of Manufacturing Overheads; Problems on Primary and Secondary distribution and Secondary distribution using Reciprocal Service Methods only; Absorption of overheads: Meaning and Methods of Absorption of overheads; Problems on Machine hour rate

**Module No. 5: RECONCILIATION OF COST AND FINANCIAL ACCOUNTS**

**10**

Reasons for differences in Profits under Financial and Cost Accounts; Procedure for Reconciliation –Ascertainment of Profits as per Financial Accounts and Cost Accounts and Reconciliation of Profits of both sets of Accounts – Preparation of Reconciliation Statement – Problems.

**Skill Developments Activities:**

- Prepare a Cost Sheet with imaginary figures.
- List the documents required in Inventory Management.
- Demonstrate the valuation of inventory using any one method of pricing material issues.
- Calculate the amount of Wages under Halsey / Rowan Plans, using imaginary data.

<b>Name of the Program: BBA</b> <b>Course Code: BBA 3.2</b> <b>Name of the Course: ORGANIZATIONAL BEHAVIOR</b>		
<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>4 Hrs</b>	<b>56 Hrs</b>
<b>Pedagogy:</b> Classrooms lecture, tutorials, and Problem Solving.		
<b>Course Outcomes: On successful completion of the course, the Students will demonstrate:</b> <ul style="list-style-type: none"> <li>• To recall role of OB in business organization.</li> <li>• Able to understand group dynamics in an organization.</li> <li>• Able to understand the change management.</li> <li>• Able to construct the process of organizational development.</li> <li>• Ability to understand the kinds of Interventions in OB.</li> </ul>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No. 1: ORGANIZATIONAL BEHAVIOUR AND FOUNDATIONS OF INDIVIDUAL BEHAVIOUR</b>		<b>10</b>
Organization Behavior– Meaning, Definition of OB, Importance of OB, Foundations of OB. Individual Behavior - Personal Factors, Environmental Factors, organization systems and resources Personality-Meaning, Nature, Determinants and Traits of Personality Perception- Meaning, Factors influencing perception, Perceptual Process, Perceptual Errors, Managing Perceptions.		
<b>Module No. 2: GROUP AND TEAM DYNAMICS</b>		<b>8</b>
Group Dynamics-meaning, Types of Group, Development of Groups- Stages of Group Development, Determinants of Group Behavior, Team Dynamics- meaning, Types of Teams: Conflict-sources of conflict and ways of resolving conflict, managing interpersonal relationships		
<b>Module No. 3: CHANGE MANAGEMENT</b>		<b>10</b>
Introduction to Change Management: OD and Change, Importance and Nature of Planned Change; Theories of Planned Change - Action Research Model, Kurt Lewin’s Change Model <b>Introducing Change Effectively:</b> Basic steps, Factors Influencing Change - Resistance to Change, Overcoming Resistance to Change; Empowering People to Manage Change, Activities Contributing to Effective Change Management		

<b>Module No. 4: ORGANIZATIONAL DEVELOPMENT</b>	<b>12</b>
<p>OD: Meaning and Nature of Organizational Development (OD), Competencies of an OD Practitioner, Ethical Guidelines for OD Practitioners Process of Organizational Development: Overview of Entering and Contracting Diagnosing: Meaning of Diagnosing, Comprehensive Model for Diagnosing Organizational Systems (Organizational Level, Group Level and Individual Level)</p>	
<b>Module No. 5: OD INTERVENTIONS</b>	<b>16</b>
<p>Designing Effective OD Interventions: How to Design Effective Interventions, Overview of OD interventions - Human Process Interventions, Techno Structural Interventions, HRM Interventions and Strategic Change Interventions, Conditions for optimal success of OD</p> <p><b>(a) Human Process Interventions</b></p> <p>T-Groups, Process Consultation, Third-party Intervention; Team building; Organization Confrontation Meeting, Inter-group relation Intervention: Microcosm Group; Large Group Intervention: Open -Systems Method, and Open-Space Method(in brief)</p> <p><b>(b) Techno Structural Interventions</b></p> <p>Restructuring Organization: Structural Design: Functional structures, Divisional structure - Product structure, Geographic and Market structure, Metrics structure, Network structure, Boundary less organization; (in brief)</p> <p><b>(c) Human Resource Management Interventions</b></p> <p>Overview of Performance Management Interventions: Performance Management Model, Goal Setting, Performance Appraisal Process, Reward Systems. (in brief)</p>	
<p><b>Skill Developments Activities:</b></p> <ul style="list-style-type: none"> <li>• Two cases on the above syllabus should be analyzed and record in the skill development</li> <li>• Draw Blake and Mouton managerial grid</li> <li>• List the determinants of personality</li> </ul>	

**Text Books:**

1. Fred Luthans, Organizational Behaviour. McGraw Hill
2. Robbins, Organizational Behaviour, International Book House.
3. K. Aswathappa, Organizational Behaviour, HPH.

5. Sharma R.K and Gupta S.K, Management and Behaviour Process, Kalyani Publishers.

<b>Name of the Program: BBA</b>		
<b>Course Code: BBA 3.3</b>		
<b>Name of the Course: Statistics for Business Decisions</b>		
<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>4 Hrs</b>	<b>56 Hrs</b>
<b>Pedagogy:</b> Classrooms lecture, tutorials, and Problem Solving.		
<b>Course Outcomes: On successful completion of the course, the Students will demonstrate</b>		
<ul style="list-style-type: none"> <li>• To understand the requirements of statistical framework</li> <li>• To construct and visualize the data.</li> <li>• To determine the data adequacy for analysis.</li> <li>• To Review the data by using various tools.</li> <li>• To understand and analyze the impact of probability.</li> </ul>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No. 1: INTRODUCTION TO STATISTICS</b>		<b>12</b>
Introduction – Meaning, Functions and Uses of Statistics; Collection of Data - Techniques of Data Collection – Census Technique and Sampling Technique (Concepts). Classification: Meaning, and Methods of Classification of Data, Tabulation: Meaning, Parts of a Table – Simple problems on Tabulation; Diagrammatic Presentation: Bar Diagrams – Simple Bars, Multiple Bars, Percentage Sub-divided Bar Diagram; Two Dimensional Diagrams – Pie Diagram.		
<b>Module No. 2: MEASURES OF CENTRAL TENDENCY AND DISPERSION</b>		<b>14</b>
Measures of Central Tendency: Calculation of Arithmetic Mean, Median and Mode for Individual, Discrete and Continuous Series – Problems; Empirical relation between Mean, Median and Mode.		
Measures of Dispersion: Absolute and Relative measures of Range, Quartile deviation, Standard Deviation in Individual, Discrete and Continuous Series – Problems		
Measures of Skewness: Calculation of Karl Pearson’s (Uni-modal) and Bowley’s Co-efficient of Skewness		
<b>Module No. 3: CORRELATION AND REGRESSION ANALYSIS</b>		<b>10</b>

**Correlation Analysis** - Meaning, Types of Correlation, Calculation of Karl Pearson's Coefficient of Correlation, Computation of Probable Error, Spearman's Rank Coefficient of correlation-problems. Regression Analysis – Concept of Regression, Regression equations- Problems.

**TIME SERIES ANALYSIS:** Meaning, Components, fitting a straight-line trend using Least Square Method (Problems where  $\Sigma X=0$  only), calculation and estimation of trend values.

**Module No. 4: TIME SERIES ANALYSIS**

**10**

Meaning, Components, fitting a straight-line trend using Least Square Method (Problems where  $\Sigma X=0$  only), calculation and estimation of trend values.

**Module No. 5: INDEX NUMBERS**

**10**

Index number, Construction of Index number, Methods of Index number - simple aggregate method, Weighted method (Laspeyres, Paashes, Marshal - Edgeworth and Fishers Ideal Index number). Tests of Adequacy (Unit test, TRT, FRT, Circular test). Consumer Price Index number

**Skill Developments Activities:**

- a) Data Visualization practical session Using Tableau/Power BI.
- b) Execute Average, Variance, Standard Deviation, CV, Covariance using Excel.
- c) Execute and Analyse Regression Model using Excel,
- d) Practical session on Time series models using GRETL
- e) Collect past years' Indian consumer price index data (as of the current base year) and analyse its impact on any macroeconomic indicator.

<p><b>Course Outcomes: On successful completion of the course, the Students will demonstrate:</b></p> <ul style="list-style-type: none"> <li>• Able to understand the concept of Management Accounting.</li> <li>• To Understand and recall ratios and apply the same on given case.</li> <li>• To construct cash flow statement.</li> <li>• Should be able to apply Marginal cost ratios to make business decisions.</li> <li>• Student should be able to analyze business problems through applications.</li> </ul>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No. 1: INTRODUCTION TO MANAGEMENT ACCOUNTING</b>		<b>8</b>
Introduction- Meaning and Definition – Objectives – Nature and Scope–Functions- Role of Management Accountant, Relationship between Financial Accounting and Management Accounting, Relationship between Cost Accounting and Management Accounting, advantages and limitations of Management Accounting.		
<b>Module No. 2: RATIO ANALYSIS</b>		<b>14</b>
Introduction-Meaning and Definition of ratio, Meaning of Accounting ratio, and Ratio Analysis – Uses and Limitations –Classification of ratios- Liquidity ratios, Profitability ratios and Solvency ratios. Problems on conversion of financial statements into ratios and ratios into financial statements.		
<b>Module No. 3: CASH FLOW ANALYSIS</b>		<b>12</b>
Meaning and Definition of Cash Flow Statement – Concept of Cash and Cash Equivalents - Uses of Cash Flow Statement – Limitations of Cash Flow Statement– Differences between Cash Flow Statement and Fund Flow Statement – Provisions of Ind. AS-7. Procedure for preparation of Cash Flow Statement – Cash Flow from Operating Activities – Cash Flow from Investing Activities and Cash Flow from Financing Activities – Preparation of Cash Flow Statement according to Ind. AS- 7		
<b>Module No. 4: MARGINAL COSTING</b>		<b>12</b>

Introduction-Meaning and definition of marginal cost, marginal costing, features of marginal costing- terms used in marginal costing – P/V ratio, BEP, Margin of Safety, Angle of Incidence and Break-Even Chart. Break Even Analysis- assumption and uses- problems.

Decision Making-Make or Buy, -problems on decision making.

**Module No. 5: STANDARD COSTING**

**10**

Historical costing - Introduction – Meaning & Definition of Standard Cost and Standard Costing - Advantages & Disadvantages of Standard Costing –preliminaries in establishing system of standard costing – Variance Analysis – Material Variance, Labour Variance and Overheads Variance – Problems on Material Variances and Labor Variances only.

**Skill Developments Activities:**

- Collect the financial statement of a company and calculate important ratios.
- Collect the annual report of a company and prepare a cash flow statement.
- Prepare a Break-even-chart with imaginary figures.
- Prepare a flexible budget using imaginary figures of at least three levels.
- Draft the chart of various total cost variances.

<b>Pedagogy:</b> Classrooms lecture, tutorials, and Problem Solving.		
<b>Course Outcomes: On successful completion of the course, the Students will demonstrate</b>		
<ul style="list-style-type: none"> <li>• Able to understand Data Types and storage of Data.</li> <li>• To understand types of analytics and data models.</li> <li>• To demonstrate visualization of data.</li> <li>• To recall the data mining and processing of data.</li> <li>• Able to understand concepts of different analytics model.</li> </ul>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No. 1: INTRODUCTION TO BUSINESS ANALYTICS</b>		<b>12</b>
Business Analytics, Terminologies used in Analytics: Business Analytics, Business Intelligence, Meaning, Importance, Scope, Uses of Business Analytics, Architecture of Business Analytics, Types of Analytics: Descriptive, Diagnostics, Predictive, Prescriptive, Application of Business analytics, Introduction to Data Science and Big Data.		
<b>Module No. 2: ROLE OF DATA IN THE ORGANIZATION</b>		<b>10</b>
Sources of data, Use of Data in Decision making, Importance of data quality, dealing with missing or incomplete data, Types of Digital Data- Structured, Semi Structured, Unstructured Data. Data warehouse, Data mining, Data Integration – What, need, advantages, approaches of Data integration, Data profiling.		
<b>Module No. 3: TOOLS USED FOR DATA ANALYTICS</b>		<b>12</b>
Introduction to data analytics software – Types of data analytics software – open source and proprietary software.		
<b>Lab sessions:</b>		
R, JAMOVI, GRETL, Python: Installation of software –Installation of packages / library - Importing of data – Saving of data – Run descriptive Statistics – Interpret result – plotting of charts – inferences of chart. (Using all the four specified softwares).		
<b>Module No. 4: DATABASE ORIENTATION</b>		<b>12</b>

Database definition, types of structures, DBMs, RDBMS, Relational Database Language , Introduction to SQL, Features of SQL, SQL Languages, DDL commands - Create, Add, Drop, Constraints in SQL, DML Commands – Insert, Delete, Update, Data Query Language – Where clause, Order by, Group by, DCL commands – Grant, Revoke, TCL Commands – Commit, Roll Back, Save point. Aggregate Functions, Relational Algebra.

**Module No. 5: DATA VISUALIZATION USING TABLEAU (PUBLIC VERSION)**

**10**

Introduction to Dimensions and measures, Types of Charts, (Pie Chart, Column Chart, Line Chart, Bar Chart, Area Chart, Scatter Chart, Bubble Chart, Stock Chart), Basic understanding in dashboard and storyboard. (Explain using practical examples and students executes the examples using tableau.)

**Skill Developments Activities:**

1. Prepare tree map chart using Tableau.
2. Run a descriptive statistic using R and Python software.
3. Execute a summary chart in JAMOVI.
4. Execute DCL and TCL Command in SQL.

**Text Books:**

1. Business Analytics: Text and Cases, Tanushri Banerjee, Arvindram Banerjee, Publisher: Sage Publication

Viva - 20 Marks

Valuation of Report – 50 Marks

**Course Outcome:**

On successful completion of the project work the students are able to:

CO1: Understand in depth the gap between theory and practical through internship

CO2: Understand in detail with examples the procedure and able to write a report on the various issues of an organisation

CO3: Specify the details in depth and able to communicate effectively

CO4: Learn in detail and able to absorb as an employee by the employer

CO5: Specify and analyse the components of project report and prepare the report effectively

**CDF26401**

**VI SEMESTER**  
**MARKETING MANAGEMENT– DSE -3**  
**Elective III – Advertising**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand the objectives, Scope and Growth of Modern Advertising

CO2: Understand and identify types of Advertising

CO3: Understand in detail the concept of Elements of Advertisement

CO4: Learn in depth the essentials of good advertisement copy

CO5: Understand and identify the Factors influencing the choice of an Advertising agency –  
Types of agencies

CO6: Understand in detail the Advertising ethics

**CDF27401**

**VI SEMESTER**  
**HUMAN RESOURCE MANAGEMENT– DSE -3**  
**Elective III –Performance Appraisal and Compensation Management**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand and identify the objectives, principles, factors influencing wage and salary  
Administration

CO2: Understand the concept of wage policy in India

CO3: Learn in depth the objectives of fringe benefits.

CO4: Learn in depth the Methods of performance appraisal

CO5: Understand and identify the essentials of an effective appraisal system

CO6: Understand in detail the concept of **motivation**

**CDF28401**

**VI SEMESTER**  
**FINANCIAL MANAGEMENT– DSE -3**  
**Elective III – Financial Services**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand and identify the features, importance, contribution of financial service in promoting industry and service

CO2: Understand the concept of money market and capital market.

CO3: Learn in depth the growth of merchant banking in India

CO4: Learn in depth the Scope of merchant banking services

CO5: Understand the concept of Mutual Funds

CO6: Understand in detail the concept of Factoring

**CDF29401**

**VI SEMESTER**  
**BANKING AND INSURANCE– DSE -3**  
**Elective III –Principles of Insurance**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand and identify the nature of business risk, causes of business risk, types of business risk and methods of handling risk,

CO2: Understand and identify the characteristics, purpose, need and benefits of insurance

CO3: Learn in depth the principles of insurance

CO4: Understand the concept of Life insurance

CO5: Understand the concept of Structure and operation of insurance business

CO6: Understand in detail the concept of Life Insurance Agency

**CDF30401**

**VI SEMESTER**

**TOURISM MANAGEMENT– DSE -3**

**Elective III –Tourism Management**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand the concept of Managing of Services in tourism

CO2: Understand the concept of Front Office organization structure

CO3: Learn in depth the Role of State Tourism Development Corporation in the development of tourism in Karnataka.

CO4: Understand the concept of increasing competitiveness for globalization

CO5: Understand and identify the National Parks and Wildlife sanctuaries,

CO6: Understand and identify the types of Accommodation

**CDF26601**

**VI SEMESTER**

**MARKETING MANAGEMENT– DSE -4**

**Elective VI –Retail and Supply Chain Management**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand the concept of evolution of Retailing in India

CO2: Understand the concept of Emerging Trends in Retailing,

CO3: Learn in depth the Role of Design & Layout, Location Planning and its importance,

CO4: Understand the concept of Floor Space Management

CO5: Understand and identify the Elements/Components of Retail Store Operation

CO6: Understand the Concepts and importance of a Supply Chain

**CDF27601**

**VI SEMESTER**

**Human Resource Management– DSE -4**

**Elective VI – Employee Empowerment and Industrial Relations**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand and identify conditions necessary for employee empowerment

CO2: Understand the concept of Quality circles

CO3: Learn in depth the types of social Security

CO4: Understand the concept of trade unions and problems of Trade Union.

CO5: Understand and identify the measures to strengthen trade Union movement in India

CO6: Understand the concept of Strategic HRM

**CDF28601**

**VI SEMESTER**

**FINANCIAL MANAGEMENT– DSE -4**

**Elective IV – Investment Analysis and Portfolio Management**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand the concept of Investment

CO2: Understand the concept of Portfolio Management Process- Approaches to Investment Decision making  
Portfolio Management Process- Approaches to Investment Decision making

CO3: Learn in depth the Capital Market instruments

CO4: Understand the concept of Risk and Return

CO5: Understand the concept of Portfolio Return and Risk-Measurement

CO6: Understand the concept of Markowitz model.

**CDF29601**

**VI SEMESTER**  
**BANKING AND INSURANCE– DSE -4**  
**Elective IV – General Insurance**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand the concept of General Insurance business in India

CO2: Understand the concept of GIC of India and its subsidiaries

CO3: Learn in depth the Classification of General Insurance

CO4: Understand the concept of Marine Insurance

CO5: Understand and identify the Types of marine insurance policies

CO6: Understand the concept of Health insurance

**CDF30601**

**VI SEMESTER**  
**TOURISM MANAGEMENT– DSE -4**  
**Elective IV – TOURISM MARKETING**

**L:T:P - 4:1:0**

**Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand the concept of Tourism Marketing

CO2: Understand the concept of State tourism offices and Local Bodies, Private Organizations, Non-Governmental Organizations in Tourism

CO3: Learn in depth the Tourism Marketing Environment

CO4: Understand the concept of Tourism Pricing and Promotion

CO5: Understand and identify the factors influencing Tourism Pricing, Methods of Price fixation, Pricing Strategies

CO6: Understand and identify the Promotional Tools in Tourism

**JSS COLLEGE OF ARTS, COMMERCE AND SCIENCE**  
(Autonomous)

Ooty Road, Mysuru-570025

**Model Curriculum Structure for  
Bachelor of Computer Applications (BCA) Programme  
(Basic and Honours degree),  
Model Syllabus for I and II Semesters  
and  
Open Elective Courses in Computer Applications**

**As per  
NATIONAL EDUCATION POLICY - 2020  
(NEP-2020)**

**2021-22 & 2022-23 on words  
(Revised)**

**DEPARTMENT OF COMPUTER SCIENCE**

## **The objectives of the BCA Program**

1. The primary objective of this program is to provide a foundation of computing principles and business practices for effectively using/managing information systems and enterprise software
2. It helps students analyze the requirements for system development and exposes students to business software and information systems
3. This course provides students with options to specialize in legacy application software, system software or mobile applications
4. To produce outstanding IT professionals who can apply the theoretical knowledge into practice in the real world and develop standalone live projects themselves
5. To provide opportunity for the study of modern methods of information processing and its applications.
6. To develop among students the programming techniques and the problem- solving skills through programming
7. To prepare students who wish to go on to further studies in computer science and related subjects.
8. To acquaint students to Work effectively with a range of current, standard, Office Productivity software applications

## Program Outcomes: BCA (3 Years) Degree

1. **Discipline knowledge:** Acquiring knowledge on basics of Computer Science and ability to apply to design principles in the development of solutions for problems of varying complexity
2. **Problem Solving:** Improved reasoning with strong mathematical ability to Identify, formulate and analyze problems related to computer science and exhibiting a sound knowledge on data structures and algorithms.
3. **Design and Development of Solutions:** Ability to design and development of algorithmic solutions to real world problems and acquiring a minimum knowledge on statistics and optimization problems. Establishing excellent skills in applying various design strategies for solving complex problems.
4. **Programming a computer:** Exhibiting strong skills required to program a computer for various issues and problems of day-to-day applications with thorough knowledge on programming languages of various levels.
5. **Application Systems Knowledge:** Possessing a sound knowledge on computer application software and ability to design and develop app for applicative problems.
6. **Modern Tool Usage:** Identify, select and use a modern scientific and IT tool or technique for modeling, prediction, data analysis and solving problems in the area of Computer Science and making them mobile based application software.
7. **Communication:** Must have a reasonably good communication knowledge both in oral and writing.
8. **Project Management:** Practicing of existing projects and becoming independent to launch own project by identifying a gap in solutions.
9. **Ethics on Profession, Environment and Society:** Exhibiting professional ethics to maintain the integrity in a working environment and also have concern on societal impacts due to computer-based solutions for problems.
10. **Lifelong Learning:** Should become an independent learner. So, learn to learn ability.
11. **Motivation to take up Higher Studies:** Inspiration to continue educations towards advanced studies on Computer Science.

## **Additional Program Outcomes: BCA Degree (Hons)**

The Bachelor of Computer Application (BCA (Hons)) program enables students to attain following additional attributes besides the afore-mentioned attributes, by the time of graduation:

1. Apply standard Software Engineering practices and strategies in real -time software project development
2. Design and develop computer programs/computer -based systems in the areas related to AI, algorithms, networking, web design, cloud computing, IoT and data analytics.
3. Acquaint with the contemporary trends in industrial/research settings and thereby innovate novel solutions to existing problems
4. The ability to apply the knowledge and understanding noted above to the analysis of a given information handling problem.
5. The ability to work independently on a substantial software project and as an effective team member.

**I-C. Model Program Structures for the Under-Graduate Programs in Universities and Colleges in Karnataka**  
**Bachelor of Computer Applications (Basic/Hons.) with Computer Applications as core subject**

Sem.	Discipline Core (DSC) (Credits) (L+T+P)	Discipline Elective (DSE) / Open Elective (OE) (Credits) (L+T+P)	Ability Enhancement Compulsory Courses (AECC),		Skill Enhancement Courses (SEC)			Total Credits
					Skill based credits (L+T+P)	Value based (Credits) (L+T+P)		
I	CA C-1 (3+2) CA C-2 (3+2) CA C-3 (3)	OE-1 (3)	L1-1(3), L2-1(3) (4 hrs. each)	Environmental Studies (3)		Physical Education for fitness (1) (0+0+2)	Health & Wellness (1) (0+0+2)	26
II	CA C-4 (3+2) CA C-5 (3+2) CA C-6 (3)	OE-2 (3)	L1-2(3), L2-2(3) (4 hrs. each)		SEC-1: Alternative SEC in place of digital Fluency (2) (1+0+2)	Physical Education - Yoga (1) (0+0+2)	NCC/NSS/R&R(S &G) / Cultural (1) (0+0+2)	26

## NEP2020 Model Course Content for BCA, Semesters I and II

### Semester: I

Course Code: <b>CAC01 [FAA410]</b>	Course Title: <b>Fundamentals of Computers</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

#### Course Outcomes (COs):

- Introduction to computers, classification of computers, anatomy of computer, constituents and architecture, microcontrollers
- Operating systems, functions of operating systems, classification of operating systems, kernel, shell, basics of Unix, shell programming, booting
- Databases, why databases are used, users, SQL, data types in SQL, introduction of queries - select, alter, update, delete, truncate, using where, and or in not in
- Internet basics, features, applications, services, internet service providers, domain name system, browsing, email, searching
- Web Programming basics, introduction of HTML and CSS programming
- Introduction of computers, classification of computers, anatomy of computer, constituents and architecture, microcontrollers.

Course Content	Hours
<b>Unit - 1</b>	
<p><b>Fundamentals of Computers:</b> Introduction to Computers - Computer Definition, Characteristics of Computers, Evolution and History of Computers, Types of Computers, Basic Organisation of a Digital Computer; Number Systems – different types, conversion from one number system to another; Computer Codes – BCD, Gray Code, ASCII and Unicode; Boolean Algebra – Boolean Operators with Truth Tables; Types of Software – System Software and Utility Software; Computer Languages - Machine Level, Assembly Level &amp; High Level Languages, Translator Programs – Assembler, Interpreter and Compiler; Planning a Computer Program - Algorithm, Flowchart and Pseudo code with Examples.</p> <p><b>Introduction to computers:</b> Characteristics of computers, Classification of Digital Computer Systems: Microcomputers, Minicomputers, Mainframes, Super computers.</p>	14
<b>Unit-2</b>	
<p>Anatomy of Computer: Introduction, Functions &amp; Components of a Computer, Central Processing Unit, Microprocessor, Storage units, Input and output Devices. How CPU and memory works. Program execution with illustrative examples. Introduction to microcontrollers.</p> <p><b>Operating System Fundamentals:</b> Operating Systems: Introduction, Functions of an operating System, Classification of Operating Systems, System programs, Application programs, Utilities, The Unix Operating System, Basic Unix commands, Microkernel Based Operating System, Booting.</p>	14
<b>Unit-3</b>	
<p><b>Introduction to Database Management Systems:</b> Database, DBMS, Why Database -File system vs DBMS, Database applications, Database users, Introduction to SQL, Data types, Classification of SQL-DDL with constraints, DML, DCL, TCL</p> <p><b>Internet Basics:</b> Introduction, Features of Internet, Internet application, Services of Internet, Logical and physical addresses, Internet Service Providers, Domain Name System.</p> <p><b>Web Basics:</b> Introduction to web, web browsers, http/https, URL, HTML5, CSS</p>	14

Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

**Part A: Hardware**

1. Identification of the peripherals of a computer, components in a CPU and their functions.
2. Assembling and disassembling the system hardware components of personal computer.
3. Basic Computer Hardware Trouble shooting.
4. LAN and WiFi Basics.
5. Operating System Installation – Windows OS, UNIX/LINUX, Dual Booting.
6. Installation and Uninstallation of Software – Office Tools, Utility Software (like Anti-Virus, System Maintenance tools); Application Software - Like Photo/Image Editors, Audio Recorders/Editors, Video Editors ...); Freeware, Shareware, Payware and Trialware; Internet Browsers, Programming IDEs,
7. System Configuration – BIOS Settings, Registry Editor, MS Config, Task Manager, System Maintenance, Third-party System Maintenance Tools (Similar to CCleaner and Jv16 PowerTools ...)

**Part B: Software**

1. Activities using Word Processor Software
2. Activities using Spreadsheets Software
3. Activities using Presentation Software
4. Activities involving Multimedia Editing (Images, Video, Audio ...)
5. Tasks involving Internet Browsing
6. Flow charts: Installation and using of flowgraphs software for different arithmetic tasks like sum, average, product, difference, quotient and remainder of given numbers, calculate area of Shapes (Square, Rectangle, Circle and Triangle), arrays and recursion.

NOTE: In addition to the ones listed above, universities can include other activities so as for the student to become proficient in using personal computers for multiple purposes for which modern computers can be put to use.

Course Code: <b>CAC02 [FAA420]</b>	Course Title: <b>Programming in C</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

After completing this course satisfactorily, a student will be able to:

- Confidently operate Desktop Computers to carry out computational tasks
- Understand working of Hardware and Software and the importance of operating systems
- Understand programming languages, number systems, peripheral devices, networking, multimedia and internet concepts
- Read, understand and trace the execution of programs written in C language
- Write the C code for a given problem
- Perform input and output operations using programs in C
- Write programs that perform operations on arrays

Course Content	Hours
<b>Unit - 1</b>	
<p><b>Introduction to C Programming:</b> Overview of C; History and Features of C; Structure of a C Program with Examples; Creating and Executing a C Program; Compilation process in C.</p> <p><b>C Programming Basic Concepts:</b> C Character Set; C tokens - keywords, identifiers, constants, and variables; Data types; Declaration &amp; initialization of variables; Symbolic constants.</p> <p><b>Input and output with C:</b> Formatted I/O functions - <i>printf</i> and <i>scanf</i>, control stings and escape sequences, output specifications with <i>printf</i> functions; Unformatted I/O functions to read and display single character and a string - <i>getchar</i>, <i>putchar</i>, <i>gets</i> and <i>puts</i> functions.</p> <p><b>C Operators &amp; Expressions:</b> Arithmetic operators; Relational operators; Logical operators; Assignment operators; Increment &amp; Decrement operators; Bitwise operators; Conditional operator; Special operators; Operator Precedence and Associativity; Evaluation of arithmetic expressions; Type conversion.</p>	14
<b>Unit - 2</b>	
<p><b>Control Structures:</b> Decision making Statements - <i>Simple if, if_else, nested if_else, else_if ladder, Switch Case, goto, break &amp; continue</i> statements; Looping Statements - Entry controlled and exit controlled statements, <i>while, do-while, for</i> loops, Nested loops.</p> <p><b>Derived data types in C:</b> Arrays: One Dimensional arrays - Declaration, Initialization and Memory representation; Two Dimensional arrays - Declaration, Initialization and Memory representation.</p> <p><b>Strings:</b> Declaring &amp; Initializing string variables; String handling functions - <i>strlen, strcmp, strcpy and strcat</i>; Character handling functions - <i>toascii, toupper, tolower, isalpha, isnumeric</i> etc.</p>	14
<b>Unit - 3</b>	
<p><b>Pointers in C:</b> Understanding pointers - Declaring and initializing pointers, accessing address and value of variables using pointers; Pointers and Arrays; Pointer Arithmetic; Advantages and disadvantages of using pointers;</p> <p><b>User Defined Functions:</b> Need for user defined functions; Format of C user defined functions; Components of user defined functions - return type, name, parameter list, function body, return statement and function call; Categories of user defined functions - With and without parameters and return type.</p> <p><b>User defined data types:</b> Structures - Structure Definition, Advantages of Structure, declaring structure variables, accessing structure members, Structure members initialization, comparing structure variables, Array of Structures; Unions - Union definition; difference between Structures and Unions.</p>	14

2. E. Balaguruswamy: Programming in ANSI C (TMH)
3. Kamthane: Programming with ANSI and TURBO C (Pearson Education)
4. V. Rajaraman: Programming in C (PHI – EEE)
5. S. Byron Gottfried: Programming with C (TMH)
6. Yashwant Kanitkar: Let us C
7. P.B. Kottur: Programming in C (Sapna Book House)

Course Code: <b>CAC02P [FAA420]</b>	Course Title: <b>C Programming Lab</b>
Course Credits: <b>02</b>	Hour of Teaching / Week: <b>04 Hours</b>
Formative Assessment Marks: <b>25</b>	Total Contact Hours: <b>52 Hours</b>
Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

**Programming Lab****Part A:**

1. Program to read radius of a circle and to find area and circumference
2. Program to read three numbers and find the biggest of three
3. Program to demonstrate library functions in math.h
4. Program to check for prime
5. Program to generate n primes
6. Program to read a number, find the sum of the digits, reverse the number and check it for palindrome
7. Program to read numbers from keyboard continuously till the user presses 999 and to find the sum of only positive numbers
8. Program to read percentage of marks and to display appropriate message (Demonstration of else-if ladder)
9. Program to find the roots of quadratic equation (demonstration of switch Case statement)
10. Program to read marks scored by n students and find the average of marks (Demonstration of single dimensional array)
11. Program to remove Duplicate Element in a single dimensional Array
12. Program to perform addition and subtraction of Matrices

**Part B:**

1. Program to find the length of a string without using built in function
2. Program to demonstrate string functions.
3. Program to demonstrate pointers in C
4. Program to check a number for prime by defining isprime() function
5. Program to read, display and to find the trace of a square matrix
6. Program to read, display and add two m x n matrices using functions
7. Program to read, display and multiply two m x n matrices using functions
8. Program to read a string and to find the number of alphabets, digits, vowels, consonants, spaces and special characters.
9. Program to Reverse a String using Pointer
10. Program to Swap Two Numbers using Pointers
11. Program to demonstrate student structure to read & display records of n students.
12. Program to demonstrate the difference between structure & union.

Note: Student has to execute a minimum of 10 programs in each part to complete the Lab course

**Evaluation Scheme for Lab Examination**

<b>Assessment Criteria</b>		<b>Marks</b>
Program – 1 from Part A	Flowchart / Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Program -2 from Part B	Flowchart/Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Viva Voice based on Lab Activities		05
<b>Total</b>		<b>25</b>

Course Code: <b>CAC03(A) [FAA430]</b>	Course Title: <b>Mathematical Foundation</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

**Course Outcomes (COs):**

- Study and solve problems related to connectives, predicates and quantifiers under different situations.
- Develop basic knowledge of matrices and to solve equations using Cramer’s rule.
- Know the concept of Eigen values.
- To develop the knowledge about derivatives and know various applications of differentiation.
- Understand the basic concepts of Mathematical reasoning, set and functions

Course Content	Hours
<b>Unit - 1</b>	
<b>Basic concepts of set theory:</b> Mathematical logic introduction-statements Connectives-negation, conjunction, disjunction- statement formulas and truth tables- conditional and bi Conditional statements- tautology contradiction- equivalence of formulas-duality law-Predicates and Quantifiers, Arguments.	14
<b>Unit - 2</b>	
<b>Operations on sets:</b> power set- Venn diagram Cartesian product-relations - functions- types of functions - composition of functions. <b>Matrix algebra:</b> Introduction-Types of matrices-matrix operations- transpose of a matrix -determinant of matrix - inverse of a matrix- Cramer’s rule	14
<b>Unit - 3</b>	
<b>Matrix:</b> finding rank of a matrix - normal form-echelon form cayley Hamilton theorem-Eigen values <b>Differential calculus:</b> Functions and limits - Simple Differentiation of Algebraic Functions – Evaluation of First and Second Order Derivatives – Maxima and Minima	14

Course Code: <b>CAC03(B) [FAA440]</b>	Course Title: <b>Accountancy</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

**Course Outcomes (COs):**

- Study and understand Accounting, systems of Book, Branches of accounting advantage and limitations
- Know the concept of accounting, financial accounting process and Journalization
- Maintenance different account book and reconciliations
- Preparations of different bills, and trial balance.
- Understand the basic concepts of Mathematical reasoning, set and functions

Course Content	Hours
<b>Unit - 1</b>	
<p><b>Introduction:</b> History and Development of Accounting, Meaning, Objectives and functions of Accounting, Book keeping V/s Accounting, Users of accounting data, systems of book keeping and accounting, branches of accounting, advantages and limitations of accounting</p> <p><b>Accounting Concepts and Convention:</b> Meaning, need and classification, accounting standards meaning, need and classification of Indian accounting standards. Accounting principles V/s accounting standard</p>	14
<b>Unit - 2</b>	
<p><b>Financial Accounting Process:</b> Classification of accounting transactions and accounts, rules of debit and credit as per Double Entry System. Journalization and Ledger posting.</p> <p><b>Preparation of Different Subsidiary Books:</b> Purchase Day book Sales Day Book, Purchase Returns Day Book, Sales Returns Day Book, Cash Book.</p> <p>Bank Reconciliation Statement: Meaning, Causes of Difference, Advantages, Preparation of Bank Reconciliation Statements.</p>	14
<b>Unit - 3</b>	
<p><b>Account Procedure:</b> Honor of the Bill, Dishonor of the Dill, Endorsement, Discounting, Renewal, Bill for collection, Retirement of the Bill, Accommodation Bills, Bill Receivable Book and Payable Book.</p> <p>Preparation of Trial Balance: Rectification of errors and Journal Proper</p> <p><b>Preparation of Final Accounts:</b> Meaning, need and classification, Preparation of Manufacturing, Trading, Profit and loss account and Balance – Sheet of sale-traders and partnership firms.</p>	14

**Text Books:**

1. S. Ramesh, B.S. Chandrashekar, A Text Book of Accountancy.
2. V.A. Patil and J.S. Korihalli, Book – keeping and accounting, (R. Chand and Co. Delhi).

**Semester: II**

Course Code: <b>CAC04 [FAB410]</b>	Course Title: <b>Data Structures using C</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

**Course Outcomes (COs):**

After completing this course satisfactorily, a student will be able to:

- Describe how arrays, records, linked structures, stacks, queues, trees, and graphs are represented in memory and used by algorithms
- Describe common applications for arrays, records, linked structures, stacks, queues, trees, and graphs
- Write programs that use arrays, records, linked structures, stacks, queues, trees, and graphs
- Demonstrate different methods for traversing trees
- Compare alternative implementations of data structures with respect to performance
- Describe the concept of recursion, give examples of its use
- Discuss the computational efficiency of the principal algorithms for sorting, searching, and hashing

Course Content	Hours
<b>Unit - 1</b>	
<p><b>Introduction to data structures:</b> Definition; Types of data structures - Primitive &amp; Non-primitive, Linear and Non-linear; Operations on data structures.</p> <p>Dynamic memory allocation: Static &amp; Dynamic memory allocation; Memory allocation and de-allocation functions - <i>malloc</i>, <i>calloc</i>, <i>realloc</i> and <i>free</i>.</p> <p>Algorithm Specification, Performance Analysis, Performance Measurement</p> <p>Recursion: Definition; Types of recursions; Recursion Technique Examples - GCD, Binomial coefficient <math>nCr</math>, Towers of Hanoi; Comparison between iterative and recursive functions.</p> <p><b>Arrays:</b> Basic Concepts – Definition, Declaration, Initialisation, Operations on arrays; Types of arrays; Arrays as abstract data types (ADT); Representation of Linear Arrays in memory;</p>	14
<b>Unit - 2</b>	
<p><b>Traversing linear arrays;</b> Inserting and deleting elements; Sorting – Selection sort, Bubble sort, Quick sort, Selection sort, Insertion sort; Searching - Sequential Search, Binary search; Iterative and Recursive searching; Multidimensional arrays; Representation of multidimensional arrays; Sparse matrices.</p> <p><b>Linked list:</b> Basic Concepts – Definition and Representation of linked list, Types of linked lists - Singly linked list, Doubly linked list, Header linked list, Circular linked list; Representation of Linked list in Memory;</p> <p>Operations on Singly linked lists – Traversing, Searching, Insertion, Deletion; Memory allocation; Garbage collection,</p>	14
<b>Unit - 3</b>	
<p><b>Stacks:</b> Basic Concepts – Definition and Representation of stacks; Operations on stacks; Applications of stacks; Infix, postfix and prefix notations; Conversion from infix to postfix using stack; Evaluation of postfix expression using stack; Application of stack in function calls.</p> <p><b>Queues:</b> Basic Concepts – Definition and Representation of queues; Types of queues - Simple queues, Circular queues, Double ended queues, Priority queues; Operations on Simple queues;</p> <p><b>Trees:</b> Definition; Tree terminologies –node, root node, parent node, ancestors of a node, siblings, terminal &amp; non-terminal nodes, degree of a node, level, edge, path, depth;</p> <p><b>Binary tree:</b> Type of binary trees - strict binary tree, complete binary tree, binary search</p>	14

tree and heap tree; Array representation of binary tree. Traversal of binary tree; preorder, inorder and postorder traversal;	
---	--

Formative Assessment Marks: <b>25</b>	Total Contact Hours: <b>52 Hours</b>
Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

### Programming Lab

#### Part A:

1. Program to find GCD using recursive function
2. Program to display Pascal Triangle using binomial function
3. Program to generate n Fibonacci numbers using recursive function.
4. Program to implement Towers of Hanoi.
5. Program to implement dynamic array, find smallest and largest element of the array.
6. Program to create two files to store even and odd numbers.
7. Program to create a file to store student records.
8. Program to read the names of cities and arrange them alphabetically.
9. Program to sort the given list using selection sort technique.
10. Program to sort the given list using bubble sort technique.

#### Part B:

1. Program to sort the given list using insertion sort technique.
2. Program to sort the given list using quick sort technique.
3. Program to sort the given list using merge sort technique.
4. Program to search an element using linear search technique.
5. Program to search an element using recursive binary search technique.
6. Program to implement Stack.
7. Program to convert an infix expression to postfix.
8. Program to implement simple queue.
9. Program to implement linear linked list.
10. Program to display traversal of a tree.

### Evaluation Scheme for Lab Examination

Assessment Criteria		Marks
Program – 1 from Part A	Flowchart / Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Program -2 from Part B	Flowchart/Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Viva Voice based on C Programming		05
<b>Total</b>		<b>25</b>

Course Code: <b>CAC05 [FAB420]</b>	Course Title: <b>Object Oriented Concepts using JAVA</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

After completing this course satisfactorily, a student will be able to:

- Understand the features of Java and the architecture of JVM
- Write, compile, and execute Java programs that may include basic data types and control flow constructs and how type casting is done
- Identify classes, objects, members of a class and relationships among them needed for a specific problem and demonstrate the concepts of polymorphism and inheritance
- The students will be able to demonstrate programs based on interfaces and threads and explain the benefits of JAVA's Exceptional handling mechanism compared to other Programming Language
- Write, compile, execute Java programs that include GUIs and event driven programming and also programs based on files

Course Content	Hours
<b>Unit - 1</b>	
<b>Introduction to Java:</b> Basics of Java programming, Data types, Variables, Operators, Control structures including selection, Looping, Java methods, Overloading, Math class, Arrays in java. <b>Objects and Classes:</b> Basics of objects and classes in java, Constructors, Finalizer, Visibility modifiers, Methods and objects, Inbuilt classes like String, Character, String Buffer, File, this reference.	14
<b>Unit - 2</b>	
<b>Inheritance and Polymorphism:</b> Inheritance in java, Super and sub class, Overriding, Object class, Polymorphism, Dynamic binding, Generic programming, Casting objects, Instance of operator, Abstract class, Interface in java, Package in java, UTIL package. <b>Event and GUI programming:</b> Event handling in java, Event types, Mouse and key events, GUI Basics, Panels, Frames, Layout Managers: Flow Layout, Border Layout, Grid Layout, GUI components like Buttons, Check Boxes, Radio Buttons, Labels, Text Fields, Text Areas, Combo Boxes, Lists, Scroll Bars, Sliders, Windows, Menus, Dialog Box, Applet and its life cycle, Introduction to swing, Exceptional handling mechanism.	14
<b>Unit - 3</b>	
<b>I/O programming:</b> Text and Binary I/O, Binary I/O classes, Object I/O, Random Access Files. <b>Multithreading in java:</b> Thread life cycle and methods, Runnable interface, Thread synchronization, Exception handling with try catch-finally, Collections in java, Introduction to JavaBeans and Network Programming.	14

### Text Books

1. Programming with Java, By E Balagurusamy – A Primer, Fourth Edition, Tata McGraw Hill Education Private Limited.
2. Core Java Volume I – Fundamentals, By Cay S. Horstmann, Prentice Hall
3. Object Oriented Programming with Java: Somashekara, M.T., Guru, D.S., Manjunatha, K.S

### Reference Books:

1. Java 2 - The Complete Reference – McGraw Hill publication.
2. Java - The Complete Reference, 7th Edition, By Herbert Schildt– McGraw Hill publication.

Course Code: <b>CAC05P [FAB410]</b>	Course Title: <b>JAVA Lab</b>
Course Credits: <b>02</b>	Hour of Teaching / Week: <b>04 Hours</b>
Formative Assessment Marks: <b>25</b>	Total Contact Hours: <b>52 Hours</b>
Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

### Course Outcomes (COs):

After completing this course satisfactorily, a student will be able to:

- Implement Object Oriented programming concept using basic syntaxes of control Structures
- Identify classes, objects, members of a class and the relationships among them needed for a finding the solution to specific problem
- Demonstrates how to achieve reusability using inheritance
- Demonstrate understanding and use of interfaces, packages, different exception handling mechanisms and concept of multithreading for robust faster and efficient application development.
- Identify and describe common user interface components to design GUI in Java using Applet & AWT along with response to events

### Practice Lab

1. Program to print the following triangle of numbers

```

1
1 2
1 2 3
1 2 3 4
1 2 3 4 5

```

2. Program to simple java application, to print the message, "Welcome to java"

3. Program to display the month of a year. Months of the year should be held in an array.

4. Program to find the area of rectangle.

5. program to demonstrate a division by zero exception

6. Program to create a user defined exception say Pay Out of Bounds.

### Programming Lab

#### PART A: Java Fundamentals OOPs in Java

1. Program to assign two integer values to X and Y. Using the 'if' statement the output of the program should display a message whether X is greater than Y.

2. Program to list the factorial of the numbers 1 to 10. To calculate the factorial value, use while loop. (Hint Fact of 4 = 4\*3\*2\*1)

3. Program to add two integers and two float numbers. When no arguments are supplied, give a default value to calculate the sum. Use function overloading.

4. Program to perform mathematical operations. Create a class called AddSub with methods to add and subtract. Create another class called MulDiv that extends from AddSub class to use the member data of the super class. MulDiv should have methods to multiply and divide A main function should access the methods and perform the mathematical operations.

5. Program with class variable that is available for all instances of a class. Use static variable declaration. Observe the changes that occur in the object's member variable values.

6. Program

a. To find the area and circumference of the circle by accepting the radius from the user.

b. To accept a number and find whether the number is Prime or not

7. Program to create a student class with following attributes;

Enrollment No: Name, Mark of sub1, Mark of sub2, mark of sub3, Total Marks. Total of the three marks must be calculated only when the student passes in all three subjects. The

pass mark for each subject is 50. If a candidate fails in any one of the subjects his total mark must be declared as zero. Using this condition write a constructor for this class. Write separate functions for accepting and displaying student details. In the main method create an array of three student objects and display the details.

8. In a college first year class are having the following attributes Name of the class (BCA, BCom, BSc), Name of the staff No of the students in the class, Array of students in the class

9. Define a class called first year with above attributes and define a suitable constructor. Also write a method called best Student () which process a first-year object and return the student with the highest total mark. In the main method define a first-year object and find the best student of this class

10. Program to define a class called employee with the name and date of appointment. Create ten employee objects as an array and sort them as per their date of appointment. ie, print them as per their seniority.

11. Create a package 'student. Fulltime. BCA 'in your current working directory

a. Create a default class student in the above package with the following attributes: Name, age, sex.

b. Have methods for storing as well as displaying

### **PART B: Exception Handling & GUI Programming**

1. Program to catch Negative Array Size Exception. This exception is caused when the array is initialized to negative values.

2. Program to handle Null Pointer Exception and use the "finally" method to display a message to the user.

3. Program which create and displays a message on the window

4. Program to draw several shapes in the created window

5. Program to create an applet and draw grid lines

6. Program which creates a frame with two buttons father and mother. When we click the father button the name of the father, his age and designation must appear. When we click mother similar details of mother also appear.

7. Create a frame which displays your personal details with respect to a button click

8. Create a simple applet which reveals the personal information of yours.

9. Program to move different shapes according to the arrow key pressed.

10. Program to create a window when we press M or m the window displays Good Morning, A or a the window displays Good After Noon E or e the window displays Good Evening, N or n the window displays Good Night

11. Demonstrate the various mouse handling events using suitable example.

12. Program to create menu bar and pull-down menus.

Note: Student has to execute a minimum of 10 programs in each part to complete the Lab course

### **Evaluation Scheme for Lab Examination**

<b>Assessment Criteria</b>		<b>Marks</b>
Program – 1 from Part A	Flowchart / Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Program -2 from Part B	Flowchart/Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Viva Voice based on <b>Object Oriented Programming with JAVA</b>		05

Course Code: <b>CAC06 [FAA430]</b>	Course Title: <b>Discrete Mathematical Structures</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

After completing this course satisfactorily, a student will be able to:

- To understand the basic concepts of Mathematical reasoning, set and functions.
- To understand various counting techniques and principle of inclusion and exclusions.
- Understand the concepts of various types of relations, partial ordering and equivalence relations.
- Apply the concepts of generating functions to solve the recurrence relations.
- Familiarize the fundamental concepts of graph theory and shortest path algorithm

Course Content	Hours
<b>Unit - 1</b>	
<b>The Foundations:</b> Logic and proofs: Propositional Logic, Applications of Propositional Logic, Propositional Equivalences, Predicates and Quantifiers, Nested Quantifiers, Rules of Inference, Introduction to Proofs, Proof Methods and Strategy. <b>Basic Structures:</b> Sets, Functions, Sequences, Sums, and Matrices: Sets, set operations, Functions, Sequences and Summations, matrices.	14
<b>Unit - 2</b>	
<b>Counting:</b> Basics of counting, Pigeonhole principle, Permutation and combination, Binomial Coefficient and Combination, Generating Permutation and Combination. <b>Advanced Counting Techniques:</b> Applications of Recurrence Relations, Solving Linear Recurrence, Relations, Divide and Conquer Algorithms and Recurrence Relations, Generating functions, Inclusion-Exclusion, Applications of Inclusion-exclusion. <b>Induction and Recursion:</b> Mathematical Induction, Strong Induction and Well-Ordering, Recursive Definitions and Structural Induction, Recursive Algorithms, Program Corrections.	14
<b>Unit - 3</b>	
<b>Relation:</b> Properties of relation, Composition of relation, Closer operation on relation, Equivalence relation and partition. Operation on relation, Representing relation. <b>Graphs:</b> Graphs and Graph models, Graph Terminology and Special Types of Graphs, Representing Graphs and Graph Isomorphism, Connectivity, Euler and Hamilton Paths, Shortest-Path Problems, Planar Graphs, Graph Coloring.	14

Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

**Course outcomes:**

- gain knowledge of Business Intelligence
- build business projects
- generate and manage BI reports
- do BI Deployment, Administration & Security.

Course Content	Hours
<b>Unit - 1</b>	
<b>Introduction to Business Intelligence:</b> Understanding the scope of today's BI solutions and how they fit into existing infrastructure Assessing new options such as SaaS and cloud-based technology. Describe BI, its components & architecture, previewing the future of BI Crafting a better experience for all business users, End User Assumptions, setting up Data for BI, The Functional Area of BI Tools, Query Tools and Reporting, OLAP and Advanced Analytics, Supporting the requirements of senior executives, including performance management.	14
<b>Unit - 2</b>	
<b>Elements of Business Intelligence Solutions:</b> Reports & ad hoc queries; Analyze OLAP data; Dashboards & Scorecards development, Metadata Models; Automated tasks & events; Mobile & disconnected BI; Collaboration capabilities; Real time monitoring capabilities; Software development kit; Consume BI through portals, web applications, Desktop applications. <b>Building the BI Project:</b> Planning the BI project, Project Resources; Project Tasks, Risk Management and Mitigation, Cost-justifying BI solutions and measuring success, Collecting User Requirements, Requirements-Gathering Techniques; Prioritizing & Validating BI Requirements, Changing Requirements; BI Design and Development, Best Practices for BI Design; Post-Implementation Evaluations, Maintaining Your BI Environment.	14
<b>Unit - 3</b>	
<b>Reporting authoring:</b> Building reports with relational vs Multidimensional data models; Types of Reports Data Grouping & Sorting, Filtering Reports, Adding Calculations to Reports, Conditional formatting, Adding Summary Lines to Reports. Drill up, drill- down, drill-through capabilities. Run or schedule report, different output forms. <b>BI Deployment, Administration &amp; Security:</b> Centralized Versus Decentralized Architecture, BI Architecture Alternatives, phased & incremental BI roadmap, System Sizing, Measurements and Dependencies, System Sizing, Measurements, and Dependencies. Setting Early Expectations and Measuring the Results. End-User Provisos. OLAP Implementations. Expanding BI Authentication Authorization, Access Permissions, Groups and Roles, Single-sign on Server Administration, Manage Status & Monitoring, Audit, Mail server & Portal integration, Back Up and Restore.	14

TEXT BOOKS

1. Business Intelligence (IBM ICE Publication).

REFERENCE BOOKS

1. [http://en.wikipedia.org/wiki/Business\\_intelligence](http://en.wikipedia.org/wiki/Business_intelligence).
2. [http://www.webopedia.com/TERM/B/Business\\_Intelligence.html](http://www.webopedia.com/TERM/B/Business_Intelligence.html).
3. [http://www.cio.com/article/40296/Business\\_Intelligence\\_Definition\\_and\\_Solutions](http://www.cio.com/article/40296/Business_Intelligence_Definition_and_Solutions).

Course Code: <b>OE 02</b>	<b>Course Title: Big Data Analytics</b>
Course Credits: <b>03</b>	<b>Hour of Teaching / Week: 03 Hours</b>
Formative Assessment Marks: <b>40</b>	<b>Total Contact Hours: 42 Hours</b>
Exam Marks: <b>60</b>	<b>Exam Duration: 2½ Hours</b>

### Course outcomes:

- Explain the importance of data and data analysis.
- Interpret the probabilistic models for data.
- Illustrate hypothesis, uncertainty principle.
- Demonstrate the regression analysis

Course Content	Hours
<b>Unit - 1</b>	
<b>Overview Of Big Data:</b> History of big data, its elements, career related knowledge, advantages, disadvantages. Using Big Data in Businesses: Focus on the application perspective of Big Data covering, using big data in marketing, analytics, retail, hospitality, consumer good, defense etc. Technologies for Handling Big Data: Introduction to Hadoop, functioning of Hadoop, Cloud computing (features, advantages, applications) etc	14
<b>Unit - 2</b>	
<b>Understanding Hadoop Ecosystem:</b> Hadoop and its ecosystem which includes HDFS, Map Reduce, YARN, HBase, Hive, Pig, Sqoop, Zookeeper, Flume, Oozie etc. Dig Deep to understand the fundamental of Map Reduce and HBase: framework of Map Reduce and uses of map reduce. Understanding Big Data Technology Foundations: big data stack i.e. data source layer, ingestion layer, source layer, security layer, visualization layer, visualization approaches etc.	14
<b>Unit - 3</b>	
Databases And Data Warehouses: Databases, polygot persistence and their related introductory knowledge. Using Hadoop to store data: Module of HDFS, HBase and ways to store and manage data along with their commands. Learn to Process Data using Map Reduce: Emphasizes on developing simple map reduce framework and the concept applied.	14

### Text Books:

1. Big Data Now: 2014 Edition by “Raymond I Morrison”
2. [Analytics in a Big Data World: The essential guide to data science and its application](#)

### References:

1. Hadoop For Dummies, Dirk deRoos, For Dummies, 2014
2. Big Data Analytics, Introduction to Hadoop, Spark, and Machine-Learning by Raj Kamal Preeti Saxena.
3. Big Data Analytics: A Hands-On Approach Paperback – 7 Sep 2018, by Arshdeep Bahga, Vijay Madiseti.

## NEP2020 Model Course Content for BCA, Semesters III and IV

### Semester: III

Course Code: <b>CAC07 [FAC410]</b>	Course Title: <b>Database Management Systems</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

At the end of the course, students will be able to:

- Explain the various database concepts and the need for database systems.
- Identify and define database objects, enforce integrity constraints on a database using DBMS.
- Demonstrate a Data model and Schemas in RDBMS.
- Identify entities and relationships and draw ER diagram for a given real-world problem.
- Convert an ER diagram to a database schema and deduce it to the desired normal form.
- Formulate queries in Relational Algebra, Structured Query Language (SQL) for database manipulation.
- Explain the transaction processing and concurrency control techniques.

Course Content	Hours
<b>Unit - 1</b>	
Database Architecture: Introduction to Database system applications. Characteristics and Purpose of database approach. People associated with Database system. Data models. Database schema. Database architecture. Data independence. Database languages, interfaces, and classification of DBMS. E-R Model: Entity-Relationship modeling: E – R Model Concepts: Entity, Entity types, Entity sets, Attributes, Types of attributes, key attribute, and domain of an attribute. Relationships between the entities. Relationship types, roles and structural constraints, degree and cardinality ratio of a relationship. Weak entity types, E -R diagram.	14
<b>Unit – 2</b>	
Relational Data Model: Relational model concepts. Characteristics of relations. Relational model constraints: Domain constrains, key constraints, primary & foreign key constraints, integrity constraints and null values Relational Algebra: Basic Relational Algebra operations. Set theoretical operations on relations. JOIN operations Aggregate Functions and Grouping. Nested Sub Queries-Views.	14
<b>Unit – 3</b>	
Data Normalization: Anomalies in relational database design. Decomposition. Functional dependencies – Axioms, minima and maxima cover. Normalization. First normal form, Second normal form, Third normal form. Boyce-Codd normal form. Query Processing Transaction Management: Introduction Transaction Processing. Single user & multiuser systems. Transactions: read & write operations. Need of concurrency control: The lost update problem, Dirty read problem. Types of failures. Transaction states. Desirable properties (ACID properties) of Transactions.	14

Course Code: <b>CAC07P [FAC410]</b>	Course Title: <b>DBMS Lab</b>
Course Credits: <b>02</b>	Hour of Teaching / Week: <b>04 Hours</b>
Formative Assessment Marks: <b>25</b>	Total Contact Hours: <b>52 Hours</b>
Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

**Course Outcomes (COs):**

Student would be able to create tables, execute queries

- Execute a single line query and group functions.
- Execute DDL Commands.
- Execute DML Commands
- Execute DCL and TCL Commands.
- Implement the Nested Queries.
- Implement Join operations in SQL
- Create views for a particular table
- Implement Locks for a particular table

**Activity 1:**

**Database: Student (DDL, DML Statements)**

**Table: Student**

Name	RegNo	Class	Major
Smith	17	1	CS
Brown	8	2	CS

**Table: Course**

CourseName	CourseNumber	CreditHours	Department
Introduction to Computer Science	CS1310	4	CS
Data Structure	CS3320	4	CS
Discrete Mathematics	MATH2410	3	MATH
Database Management Systems	CS3380	3	CS

**Table: Section**

Section_Identifier	CourseNumber	Year	Instructor
85	MATH2410	98	King
92	CS1310	98	Andreson
102	CS3320	99	Knuth
112	MATH2410	99	Chang
119	CS1310	99	Andreson
135	CS3380	99	Stone

**Table: Grade\_Report**

RegNo	Section_Identifier	Grade
17	112	B
17	119	C
8	85	A
8	92	A
8	102	B
8	135	A

- Create Tables using create statement
- Insert rows to individual tables using insert statement
- Alter table section add new field section and update the records Delete brown's grade report
- Drop the table section

**Activity 2: (Select clause, Arithmetic Operators)**

**Database: Employee**

Create Following **tables** and insert **tuples** with suitable constraints

**Table: Employee**

Emp_Id	First_Name	Last_Name	Hire_Date	Address	City
1001	George	Smith	11-May-06	83 first street	Paris
1002	Mary	Jones	25-Feb-08	842 Vine Ave	Losantiville
1012	Sam	Tones	12-Sep-05	33 Elm St.	Paris
1015	Peter	Thompson	19-Dec-06	11 Red Road	Paris
1016	Sarath	Sharma	22-Aug-07	440 MG Road	New Delhi
1020	Monika	Gupta	07-Jun-08	9 Bandra	Mumbai

**Table: Empsalary**

Emp_Id	Salary	Benefits	Designation
1001	10000	3000	Manager
1002	8000	1200	Salesman
1012	20000	5000	Director
1015	6500	1300	Clerk
1016	6000	1000	Clerk
1020	8000	1200	Salesman

**Write queries for the following**

1. To display FIRSTNAME, LASTNAME, ADDRESS AND CITY of all employees living in PARIS.
2. To display the content of employee table in descending order of FIRSTNAME
3. Select FIRSTNAME and SALARY of salesman
4. To display the FIRSTNAME, LASTNAME, AND TOTAL SALARY of all employees from the table EMPLOYEE and EMPSALARY. Where TOTAL SALARY is calculated as SALARY+BENEFITS
5. List the Names of employees, who are more than 1 year old in the organization
6. Count number of distinct DESIGNATION from EMPSALARY
7. List the employees whose names have exactly 6 characters
8. Add new column PHONE\_NO to EMPLOYEE and update the records
9. List employee names, who have joined before 15-Jun-08 and after 16-Jun-07
10. Generate Salary slip with Name, Salary, Benefits, HRA-50%, DA-30%, PF-12%, Calculate gross. Order the result in descending order of the gross.

### Activity 3: (Logical, Relational Operators)

#### Database: Library

Create Following tables and insert tuples with suitable constraints

**Table: Books**

Book_Id	Book_Name	Author_Name	Publishers	Price	Type	Quantity
C0001	The Klone	Lata Kappor	EPP	355	Novel	5
F0001	The Tears	William Hopkins	First Publ	650	Fiction	20
T0001	My First	Brain & Brooke	ERP	350	Text	10
T0002	C++	A.W.Rossaine	TDH	350	Text	15
F0002	Thunderbolts	Ana Roberts	First Publ.	750	Fiction	50

**Table: Issued**

Book_Id	Quantity_Issued
T0001	4
C0001	5
F0001	2
T0002	5
F0002	8

#### Write queries for the following

1. To show Book name, Author name and price of books of **First Publ.** publisher
2. Display Book id, Book name and publisher of books having quantity more than 8 and price less than 500
3. Select Book id, book name, author name of books which is published by other than ERP publishers and price between 300 to 700
4. Generate a Bill with Book\_id, Book\_name, Publisher, Price, Quantity, 4% of VAT "Total"
5. Display book details with book id's C0001, F0001, T0002, F0002 (Hint: use IN operator)
6. Display Book list other than, type Novel and Fiction
7. Display book details with author name starts with letter "A"
8. Display book details with author name starts with letter "T" and ends with "S"
9. Select Book\_Id, Book\_Name, Author Name , Quantity Issued where Books.Books\_Id = Issued.Book\_Id
10. List the book\_name, Author\_name, Price. In ascending order of Book\_name and then on descending order of price

### Activity 4: (Date Functions)

#### Database: Lab

Create Following table and insert tuples with suitable constraints

**Table: Equipment\_Details**

No.	ItemName	Costperitem	Quantity	Dateofpurchase	Warranty	Operational
1	Computer	30000	9	21/5/07	2	7
2	Printer	5000	3	21/5/06	4	2
3	Scanner	8000	1	29/8/08	3	1
4	Camera	7000	2	13/6/05	1	2
5	UPS	15000	5	21/5/08	1	4
6	Hub	8000	1	31/10/08	2	1
7	Plotter	25000	2	11/1/09	2	2

(Use date functions and aggregate functions)

1. To select the ItemName purchase after 31/10/07
2. Extend the warranty of each item by 6 months
3. Display ItemName , Dateof purchase and number of months between purchase date and present date
4. To list the ItemName in ascending order of the date of purchase where quantity is more than 3.
5. To count the number, average of costperitem of items purchased before 1/1/08
6. To display the minimum warranty, maximum warranty period
7. To Display the day of the date, month, year of purchase in characters
8. To round of the warranty period to month and year format.
9. To display the next Sunday from the date "07-JUN-96"
10. To list the ItemName, which are within the warranty period till present date

**Activity 5: (Numeric, character functions) Use Functions for the following**

1. Find the mod of 165,16
2. Find Square Root of 5000
3. Truncate the value 128.3285 to 2 and -1 decimal places
4. Round the value 92.7683 to 2 and -1 decimal places
5. Convert the string "Department" to uppercase and lowercase
6. Display your address convert the first character of each word to uppercase and rest are in lowercase
7. Combine your first name and last name under the title Full name
8. A) Take a string length maximum of 15 displays your name to the left. The remaining space should be filled with "\*"
9. Take a string length maximum of 20 displays your name to the right. The remaining space should be filled with "#"
10. Find the length of the string "JSS College, Mysore"
11. Display substring "BASE" from "DATABASE"
12. Display the position of the first occurrence of character "o" in Position and Length
13. Replace string Database with Data type
14. Display the ASCII value of " " (Space)
15. Display the Character equivalent of 42

**Activity 6:**

**Database: Subject**

Create Following **table** and insert **tuples** with suitable constraints

**Table - Physics**

Regno	Name	Year	Combination
AJ00325	Ashwin	First	PCM
AJ00225	Swaroop	Second	PMCs
AJ00385	Sarika	Third	PME
AJ00388	Hamsa	First	PMCs

**Table – Computer Science**

Regno	Name	Year	Combination
AJ00225	Swaroop	Second	PMCs
AJ00296	Tajas	Second	BCA
AJ00112	Geetha	First	BCA
AJ00388	Hamsa	First	PMCs

1. Select all students from physics and Computer Science
2. Select student common in physics and Computer Science
3. Display all student details those are studying in second year

4. Display student those who are studying both physics and computer science in second year
5. Display the students studying only physics
6. Display the students studying only Computer Science
7. select all student having PMCs combination
8. select all student having BCA combination
9. select all student studying in Third year
10. Rename table Computer Science to CS

**Activity 7: (views)**

**Database: Railway Reservation System**

Create Following **table** and insert **tuples** with suitable constraints

**Table: Train Details**

Train_No	Train_Name	Start_Place	Destination
RJD16	Rajdhani Express	Bangalore	Mumbai
UDE04	Udhyan Express	Chennai	Hyderabad
KKE55	Karnataka Express	Bangalore	Chennai
CSE3	Shivaji Express	Coimbatore	Bangalore
JNS8	Janashatabdi	Bangalore	Salem

**Table: Availability**

Train_No	Class	Start_Place	Destination	No_of_seats
RJD16	Sleeper Class	Bangalore	Mumbai	15
UDE04	First Class	Chennai	Hyderabad	22
KKE55	First Class AC	Bangalore	Chennai	15
CSE3	Second Class	Coimbatore	Bangalore	8
JNS8	Sleeper Class	Bangalore	Salem	18

1. Create view **sleeper** to display train no, start place, destination which have sleeper class and perform the following
  - a. insert new record
  - b. update destination =" Manglore" where train no=" RJD16"
  - c. delete a record which have train no =" KKE55"
2. Create view **details** to display train no, train name, class
3. Create view **total\_seats** to display train number, start place, use count function to no of seats, group by start place and perform the following
  - a. insert new record
  - b. update start place= "Hubli" where train no= "JNS8"
  - c. delete last row of the view
4. Rename view sleeper to class
5. Delete view details

### Activity 8 (group by, having clause)

#### Database: Bank system

Create Following **table** and insert **tuples** with suitable constraints

**Table: Account**

Account_No	Cust_Name	Brach_ID
AE0012856	Reena	SB002
AE1185698	Akhil	SB001
AE1203996	Daniel	SB004
AE1225889	Roy	SB002
AE8532166	Sowparnika	SB003
AE8552266	Anil	SB003
AE1003996	Saathwik	SB004
AE1100996	Swarna	SB002

**Table: Branch**

Branch_ID	Branch_Name	Branch_City
SB001	Malleswaram	Bangalore
SB002	MG Road	Bangalroe
SB003	MG Road	Mysore
SB004	Jainagar	Mysore

**Table: Depositor**

Account_No	Branch_Id	Balance
AE0012856	SB002	12000
AE1203996	SB004	58900
AE8532166	SB003	40000
AE1225889	SB002	150000

**Table: Loan**

Account_No	Branch_Id	Balance
AE1185698	SB001	102000
AE8552266	SB003	40000
AE1003996	SB004	15000
AE1100996	SB002	100000

1. Display Total Number of accounts present in each branch
2. Display Total Loan amount in each branch
3. Display Total deposited amount in each branch by descending order
4. Display max, min loan amount present in each city.
5. Display average amount deposited in each branch, each city
6. Display maximum of loan amount in each branch where balance is more than 25000
7. Display Total Number of accounts present in each city
8. Display all customer details in ascending order of brachid
9. Update Balance to 26000 where accno=AE1003996
10. Display Customer Names with their branch Name

#### Evaluation Scheme for Lab Examination:

Assessment Criteria	Marks
Writing 2 Programs	10
Execution of 1 Program	10
Viva and Record	05
Total	25

Course Code: <b>CAC08 [FAC420]</b>	Course Title: <b>C# and .Net Technologies</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

At the end of the course, students will be able to:

- Describe Object Oriented Programming concepts like Inheritance and Polymorphism in C# programming language.
- Interpret and Develop Interfaces for real-time applications.
- Build custom collections and generics in C#.

Course Content	Hours
<b>Unit - 1</b>	
Introduction to .Net Technologies: Introduction to Web Technologies. HTML Basics, Scripts. Sample Programs. Advantages and Disadvantages of Client-side and Server-side Scripts. Overview of Client-side Technologies and Server-side Technologies. Introduction to C#: Overview of C#, Literals, Variables, Data Types, Operators, Expressions, Control Structures-Methods, Arrays, Strings, Structures, Enumerations.	14
<b>Unit – 2</b>	
OOPS with C#: Classes, Objects, Inheritance, Polymorphism, Interfaces, Operator Overloading Delegates, Events, Errors and Exceptions. Introduction to VB.NET: Introduction VB.NET -IDE – Creating a shortcut to start VB.NET. Maneuverings the Toolbar Auto-hide, Docking and Undocking, Placing and Resizing the Windows, Forms, Properties Window and Solution Explorer. Writing and Event Procedure. Execution Basic Keywords. Data Types. VB.NET statements. Conditional statements: If Else, Select Case, Switch and Choose Loops: Do, For Next, For Each Next, While loop. Arrays.	14
<b>Unit – 3</b>	
Application Development on .NET: C#.NET: Building Windows Applications, VB.NET: Windows Forms. Working with Controls, Timer, Picture-box, Group-box, Combo-box, Horizontal and Vertical Scrollbar, Numeric-up-down, Track-bar, and Progress-bar. Subroutines and Functions in VB.NET. Database applications ADO.NET Connectivity: Introduction to ADO.NET, ADO vs ADO.NET. Architecture: Data reader, Data adopter, Accessing Data with ADO.NET. Programming Web Applications with Web Forms. ASP .NET applications with ADO.NET	14

2. "Visual [Basic.NET](#)", Shirish Chavan, 3<sup>rd</sup> Edition, Pearson Education, 2009.
3. "[ASP.NET](#) and [VB.NET](#) Web Programming", Matt J. Crouch, Edition 2012.
4. "Computing with C# and the .NET Framework", Arthur Gittleman, 2<sup>nd</sup> Edition, Jones & Bartlett Publishers, 2011

Course Code: <b>CAC08P [FAC420]</b>	Course Title: <b>C# and .Net Technologies Lab</b>
Course Credits: <b>02</b>	Hour of Teaching / Week: <b>04 Hours</b>
Formative Assessment Marks: <b>25</b>	Total Contact Hours: <b>52 Hours</b>
Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

### Practicals:

1. Develop a C# .NET console application to demonstrate the conditional statements.
2. Develop a C# .NET console application to demonstrate the control statements.
3. Develop an application in C#.NET that demonstrates the windows controls
4. Demonstrate Multithreaded Programming in C#.NET
5. Demonstrate subroutines and functions in C#.NET
6. Develop an application for deploying various built-in functions in [VB.NET](#)
7. Develop an MDI application for Employee Pay-roll transactions in [VB.NET](#)
8. Construct a console application to demonstrate the OOP Concepts
9. Develop a web application in [VB.NET](#) for dynamic Login Processing
10. Develop a Windows application with database connectivity for core-banking transactions

### Evaluation Scheme for Lab Examination:

Assessment Criteria	Marks
Writing 2 Programs	10
Execution of 1 Program	10
Viva and Record	05
Total	25

Course Code: <b>CAC09 [FAC430]</b>	Course Title: <b>Computer Networks</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

At the end of the course, students will be able to:

- Explain the transmission technique of digital data between two or more computers and a computer network that allows computers to exchange data.
- Apply the basics of data communication and various types of computer networks in real world applications.
- Compare the different layers of protocols.
- Compare the key networking protocols and their hierarchical relationship in the conceptual model like TCP/IP and OSI.

Course Content	Hours
<b>Unit - 1</b>	
Introduction: Computer Networks and its applications, Network structure, network architecture, Topologies, LAN, WAN, MAN, The OSI reference model, The TCP/IP reference model. The Physical Layer: Transmission Media – Twisted pair, coaxial cable, optical fiber, radio transmission, microwaves and infrared transmission, Switching – message switching, Multiplexing.	14
<b>Unit – 2</b>	
The Data Link Layer: Data Link Layer design issues, Error detection – Single parity checking, Checksum, polynomial codes – CRC, Error correction- Hamming code, Elementary data link protocols, sliding window protocols The Network Layer: Network layer design issues, Routing algorithms – Flooding, Distance vector routing, Hierarchical routing, Link state routing, Congestion, control algorithms – Leaky bucket, token bucket algorithm, admission control, Hop by Hop choke packets.	14
<b>Unit – 3</b>	
The Transport Layer, Presentation Layer and Application Layer: Elements of Transport service, Elements of Transport, protocols, Internet transport protocols (TCP & UDP), Presentation Layer – Introduction, protocol, Application Layer DNS, Electronic Mailing, and World Wide Web.	14

## Semester: IV

Course Code: <b>CAC10 [FAD410]</b>	Course Title: <b>Python Programming</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

At the end of the course, students will be able to:

- Explain the basic concepts of Python Programming.
- Demonstrate proficiency in the handling of loops and creation of functions.
- Identify the methods to create and manipulate lists, tuples and dictionaries.
- Discover the commonly used operations involving file handling.
- Interpret the concepts of Object-Oriented Programming as used in Python.
- Develop the emerging applications of relevant fields using Python.

Course Content	Hours
<b>Unit - 1</b>	
Introduction to Features and Applications of Python; Python Versions; Installation of Python; Python Command Line mode and Python IDEs; Simple Python Program. Python Basics: Identifiers; Keywords; Statements and Expressions; Variables; Operators; Precedence and Association; Data Types; Indentation; Comments; Built-in Functions- Console Input and Console Output, Type Conversions; Python Libraries; Importing Libraries with Examples. Python Control Flow: Types of Control Flow; Control Flow Statements- if, else, elif, while loop, break, continue statements, for loop Statement; range () and exit () functions. Exception Handling: Types of Errors; Exceptions; Exception Handling using try, except and finally. Python Functions: Types of Functions; Function Definition- Syntax, Function Calling, Passing Parameters/arguments, the return statement; Default Parameters; Command line Arguments; Key Word Arguments; Recursive Functions; Scope and Lifetime of Variables in Functions.	14
<b>Unit – 2</b>	
Strings: Creating and Storing Strings; Accessing Sting Characters; the str() function; Operations on Strings- Concatenation, Comparison, Slicing and Joining, Traversing; Format Specifiers; Escape Sequences; Raw and Unicode Strings; Python String Methods. Lists: Creating Lists; Operations on Lists; Built-in Functions on Lists; Implementation of Stacks and Queues using Lists; Nested Lists. Dictionaries: Creating Dictionaries; Operations on Dictionaries; Built-in Functions on Dictionaries; Dictionary Methods; Populating and Traversing Dictionaries. Tuples and Sets: Creating Tuples; Operations on Tuples; Built-in Functions on Tuples; Tuple Methods; Creating Sets; Operations on Sets; Built-in Functions on Sets; Set Methods File Handling: File Types; Operations on Files– Create, Open, Read, Write, Close Files; File Names and Paths; Format Operator.	14

<b>Unit – 3</b>	
<p>Object Oriented Programming: Classes and Objects; Creating Classes and Objects; Constructor Method; Classes with Multiple Objects; Objects as Arguments; Objects as Return Values; Inheritance- Single and Multiple Inheritance, Multilevel and Multipath Inheritance; Encapsulation- Definition, Private Instance Variables; Polymorphism- Definition, Operator Overloading.</p> <p>GU Interface: The tkinter Module; Window and Widgets; Layout Management- pack, grid and place.</p> <p>Python SQLite: The SQLite3 module; SQLite Methods- connect, cursor, execute, close; Connect to Database; Create Table; Operations on Tables- Insert, Select, Update. Delete and Drop Records.</p> <p>Data Analysis: NumPy- Introduction to NumPy, Array Creation using NumPy, Operations on Arrays; Pandas- Introduction to Pandas, Series and DataFrames, Creating DataFrames from Excel Sheet and .csv file, Dictionary and Tuples. Operations on DataFrames.</p> <p>Data Visualisation: Introduction to Data Visualisation; Matplotlib Library; Different Types of Charts using Pyplot- Line chart, Bar chart and Histogram and Pie chart.</p>	14

Course Credits: <b>02</b>	Hour of Teaching / Week: <b>04 Hours</b>
Formative Assessment Marks: <b>25</b>	Total Contact Hours: <b>52 Hours</b>
Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

#### Programs for Practical Component:

##### Part-A

1. Check if a number belongs to the Fibonacci Sequence
2. Solve Quadratic Equations
3. Find the sum of n natural numbers
4. Display Multiplication Tables
5. Check if a given number is a Prime Number or not
6. Implement a sequential search
7. Create a calculator program

8. Explore string functions
9. Implement Selection Sort
10. Implement Stack
11. Read and write into a file

**Part-B**

1. Demonstrate usage of basic regular expression
2. Demonstrate use of advanced regular expressions for data validation.
3. Demonstrate use of List
4. Demonstrate use of Dictionaries
5. Create SQLite Database and Perform Operations on Tables
6. Create a GUI using Tkinter module
7. Demonstrate Exceptions in Python
8. Drawing Line chart and Bar chart using Matplotlib
9. Drawing Histogram and Pie chart using Matplotlib
10. Create Array using NumPy and Perform Operations on Array
11. Create DataFrame from Excel sheet using Pandas and Perform Operations on DataFrames

**Note: A minimum of 10 Programs should be done in each Part.**

**Evaluation Scheme for Lab Examination:**

<b>Assessment Criteria</b>	<b>Marks</b>
Writing 2 Programs	10
Execution of 1 Program	10
Viva and Record	05
Total	25

Course Code: <b>CAC11 [FAD420]</b>	Course Title: <b>Multimedia Animation</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

At the end of the course, students will be able to:

- Write a well-designed, interactive Web site with respect to current standards and practices.
- Demonstrate in-depth knowledge of an industry-standard multimedia development tool and its associated scripting language.
- Determine the appropriate use of interactive versus standalone Web applications.

Course Content	Hours
<b>Unit - 1</b>	
Web Design: Origins and evolution of HTML, Basic syntax, Basic text markup, Images, Lists, Tables, Forms, Frame, Overview and features of HTML5. CSS: Introduction, Levels of style sheets, Style specification formats, Selector forms, Property value forms, Font properties, List properties, Color, Alignment of text, The <span> and <div> tags; Overview and features of CSS3. JavaScript: Object orientation and JavaScript; General syntactic characteristics; Primitives, operations, and expressions; Screen output and keyboard input. Introduction to Animation: Definition, The Start and End States, Interpolation, Animations in HTML.	14
<b>Unit – 2</b>	
CSS Animations, creating a Simple Animation, CSS Animation Property, Keyframes, Declaring Multiple Animations, Wrap-up. CSS Transitions, Adding a Transition, Transitions in Detail, The Longhand Properties, Longhand Properties vs. Shorthand Properties, Working with Multiple Transitions. HTML5 – SVG: Viewing SVG Files, Embedding SVG in HTML5, HTML5– SVG Circle, HTML5 – SVG Rectangle, HTML5 – SVG Line, HTML5 – SVG Ellipse, HTML5 – SVG Polygon, HTML5 – SVG Polyline, HTML5 – SVG Gradients, HTML5 – SVG Star.	14
<b>Unit – 3</b>	
HTML5–CANVAS: The Rendering Context, Browser Support, HTML5 Canvas Examples, Canvas - Drawing Rectangles, Canvas - Drawing Paths, Canvas - Drawing Lines, Canvas - Drawing Bezier Curves, Canvas - Drawing Quadratic Curves, Canvas - Using Images, Canvas - Create Gradients, HTML5 - Styles and Colors, Canvas - Text and Fonts, Canvas - Pattern and Shadow, Canvas - Save and Restore States, Canvas - Translation, Canvas - Rotation, Canvas - Scaling, Canvas - Transforms, HTML5 Canvas - Composition, Canvas – Animations.	14

Course Code: <b>CAC11P [FAD420]</b>	Course Title: <b>Multimedia Animation Lab</b>
Course Credits: <b>02</b>	Hour of Teaching / Week: <b>04 Hours</b>
Formative Assessment Marks: <b>25</b>	Total Contact Hours: <b>52 Hours</b>
Exam Marks: <b>25</b>	Exam Duration: <b>03 Hours</b>

## List of Lab programs

### Part-A

1. Write an HTML program to create and display navigation menus using list tags and anchor tag
2. Write an HTML program to display Multi-media data (text, images, audios, videos, gifs, etc) on a webpage
3. Write an HTML program to create student Registrations form on submitting the form check whether fields are empty or not using JavaScript. If any fields are empty display an error message
4. Write an HTML program to create bio-data (CV or Resume) and to change the following CSS properties
  - Font
  - Text
  - Background
5. Write an HTML program to create div and apply the following CSS properties on created div
  - Margin
  - Padding
  - Border
  - Box shadow
6. Write an HTML program to create a box and using CSS transform and transition properties move the box to the center of the web page on loading web-page
7. Write an HTML program to create a circle and create an animation of bouncing of the circle for 10 sec
8. Write an HTML program to create page loading animations

### Part-B

1. Write an HTML program to draw line, polyline and rectangle and fill rectangle with red color using svg tag.
2. Write an HTML program to draw star and multiple circle and with different color using svg tag Write an HTML program to create logo with linear gradient properties using svg tag.
3. Write an HTML program to draw Square and Rectangle using canvas tag and JavaScript
4. Write an HTML program to draw bezier curve using canvas tag and JavaScript
5. Write an HTML Program to import an external image into a canvas and then to draw on that image
6. Write an HTML program to draw a rectangle box using canvas and to change background color to red, scale of the rectangle to 2 on move-over (hover) properties.
7. Write an html program to draw a circle using canvas and to apply the rotations animations on loading the page

### Evaluation Scheme for Lab Examination:

Assessment Criteria	Marks
Writing 2 Programs	10
Execution of 1 Program	10
Viva and Record	05
Total	25

Course Code: <b>CAC12 [FAD430]</b>	Course Title: <b>Operating System Concepts</b>
Course Credits: <b>03</b>	Hour of Teaching / Week: <b>03 Hours</b>
Formative Assessment Marks: <b>40</b>	Total Contact Hours: <b>42 Hours</b>
Exam Marks: <b>60</b>	Exam Duration: <b>2½ Hours</b>

### Course Outcomes (COs):

At the end of the course, students will be able to:

- Explain the fundamentals of the operating system.
- Comprehend multithreaded programming, process management, process synchronization, memory management and storage management.
- Compare the performance of Scheduling Algorithms
- Identify the features of I/O and File handling methods.

Course Content	Hours
<b>Unit - 1</b>	
Introduction to Operating System: Definition, History and Examples of Operating System; Computer System organization; Types of Operating Systems; Functions of Operating System; Systems Calls; Operating System Structure. Process Management: Process Concept- Process Definition, Process State, Process Control Block, Threads; Process scheduling- Multiprogramming, Scheduling Queues, CPU Scheduling, Context Switch; Operations on Processes- Creation and Termination of Processes; Inter process communication (IPC)- Definition and Need for Inter process Communication; IPC Implementation Methods- Shared Memory and Message Passing; CPU Scheduling: Basic concepts; Scheduling Criteria; Scheduling Algorithms; Multiple-processor scheduling; Thread scheduling; Multiprocessor Scheduling; Real-Time CPU Scheduling.	14
<b>Unit – 2</b>	
Multithreaded Programming: Introduction to Threads; Types of Threads; Multithreading- Definition, Advantages; Multithreading Models; Thread Libraries; Threading Issues. Process Synchronization: Introduction; Race Condition; Critical Section Problem and Peterson’s Solution; Synchronization Hardware, Semaphores; Classic Problems of Synchronization- Readers and Writers Problem, Dining Philosophers Problem; Monitors. Deadlocks: System Model; Deadlocks Characterization; Methods for Handling Deadlocks; Deadlock Prevention; Deadlock Avoidance; Deadlock Detection; and Recovery from Deadlock.	14
<b>Unit – 3</b>	
Memory Management: Logical and Physical Address Space; Swapping; Contiguous Allocation; Paging; Segmentation; Segmentation with Paging. Virtual Memory: Introduction to Virtual Memory; Demand Paging; Page Replacement; Page Replacement Algorithms; Allocation of frames, Thrashing. File System: File Concepts- Attributes, Operations and Types of Files; File System; File Access methods; Directory Structure; Protection; File System Implementation- File System Structure, Allocation Methods, Free Space Management	14

## Skill Enhancement Courses (SEC) for BCA Semester: IV

Course Code: <b>SEC-2 [FAD210]</b>	Course Title: <b>Open-Source Tools</b>
Course Credits: 1 + 1 = <b>02</b>	Hour of Teaching / Week: Theory ( <b>1Hour</b> ) + Practical ( <b>2 Hours</b> )
Formative Assessment Marks: <b>25</b>	Total Contact Hours: ( <b>13 T + 26 P Hours</b> )
Exam Marks: <b>25</b>	Exam Duration: <b>1 Hours</b>

### Course Outcomes (COs):

- Recognize the benefits and features of Open Source Technology and to interpret, contrast and compare open source products among themselves
- Use appropriate open source tools based on the nature of the problem
- Write code and compile different open-source software.

Course Content	Hours
<b>Module 1: Open-Source Software's</b>	
I. Introduction to Open sources, Need of Open Sources, Open Source – Principles, Standard Requirements, Advantages of Open Sources.	06
II. Free Software – FOSS	
III. Licenses – GPL, LGPL, Copyrights, Patents, Contracts & Licenses and Related Issues	
IV. Application of Open Sources. Open Source Operating Systems : FEDORA, UBUNTU	
<b>Module 2: Programming with case studies</b>	
I. Usage of design Tools like Argo UML or equivalent	07
II. Version Control Systems like Git or equivalent	
III. Bug Tracking Systems (Trac, BugZilla)	
IV. BootStrap	
V. Apache	
VI. Berkeley Software Distribution	
VII. Mozilla (Firefox)	
VIII. Wikipedia	
IX. Joomla	
X. GNU Compiler Collection	
XI. Libre Office	

### Text Book:

1. Kailash Vadera, Bhavyesh Gandhi, “Open Source Technology”, Laxmi Publications Pvt. Ltd 2012, 1<sup>st</sup> Edition.

### Reference Book:

**ECE21001****V SEMESTER****DSE 1A: Elective: Data Communication and Computer Networks****Credit (L: T: P = 4: 0: 0)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn in depth Elements of Data Communications and network Systems
- CO2. Learn in depth Transmission Media
- CO3. Understanding the various classifications and characteristics of Signals
- CO4. Understand in details with examples Network Models
- CO5. Learn in depth Error Detection and Corrections Algorithms
- CO6. Deliberate in details with examples Switching Concepts
- CO7. Deliberate the classification and characteristics of networking and internetworking Devices

**Unit - 1****15 Hours****Data Communications:** Components, Data Representation, Dataflow**Networks:** Network criteria, Physical Structures, Topology (Mesh, Star, Tree, Bus, Ring, Hybrid)**Categories of Network:** LAN, MAN, WAN**History of Network:** Protocols and Standards: Protocols (Standards organization),**Addressing:** Physical, Logical, Port Specific.**Unit - 2****15 Hours****Transmission Media:** Guided Media – Twisted pair cable, co-axial cable, optical fibre, Unguided Media – Radio waves, microwaves, Infrared.**Signals:** Analog and Digital Data, Analog and Digital Signals, periodic and non periodic signals. Analog Signals – Sine wave, Peak Amplitude, Period and frequency, Phase, wave length, composite signals. Digital Signals – Band width, Bit length, Bit rate, base band transmission, Digital v/s Analog. Transmission Impairment, Data rate limits (Noisy and noiseless channel)**Unit - 3****15 Hours****Network Models:** Layered tasks, OSI model (peer – to – peer), Layered Architecture. Functions of Layers (OSI), TCP / IP Protocol suite**Multiplexing:** FDM (MUX and DEMUX process, Application of FDM), WDM, TDM (Interleaving, synchronizing, bit padding)**Switching Concept:** Working principle of circuit switching and packet switching. Circuit switched networks, three phases' efficiency, delay. Data grams network, routing table, delay efficiency, virtual.**Error Detection and Correction:** Types of Errors, Redundancy, Error detection virus Error Correction.**Error Detection:** Parity check, Cyclic Redundancy Check (CRC), Check Sum. Error Correction - Retransmission, Forward Error Correction, Burst error Correction.

**Unit - 4****15 Hours**

**Networking And Internetworking Devices:** Connecting Devices - Hubs, Repeaters, Amplifiers, Bridges – LAN bridges, transparent bridges, Source-route bridges, Routers, Gateways, 2 layer and 3 layers switches.

**Routing Concepts:** Types, Shortest path, flooding.

**Wireless Lan's:** Blue tooth - Architecture, Blue tooth layers.

**Network Layer:** IPV4, IPV6 addresses

**Transport Layer:** UDP – user datagram, operations, Application. TCP - Services, TCP segment, SCTP - Services, packet format.

**Application Layer:** - SMTP, SNMP, HTTP, FTP

**Reference Books:**

1. Data Communication and Networking – Forouzan
2. Computer Network – Tanenbaurn – 3rd Editions
3. Computer Network – Larry L. Peterson & Bruce S. Davie

**ECE21101****V SEMESTER****DSE 1A: Elective: Data Communication and Computer Networks Lab****Credit (L: T: P = 0: 0: 2)**

1. Program for Identifying well known Ports
2. Program for Data Retrieval from Remote Database.
3. Program for Simulating SMTP Client.
4. Program for Simulating Telnet Client
5. Program for Simple file transfer between two systems, (without using Protocols)
6. Program for implementing HTTP.
7. Program for Downloading Image files.
8. Simulate Checksum Algorithm.
9. Simulate Stop & Wait Protocol.
10. Simulate Go-Back-N Protocol.
11. Simulate Selective Repeat Protocol.
12. Take an example subnet of hosts. Obtain broaECAST tree for it.
13. Network address with automatic subnet address generation:

ECE21201

## V SEMESTER

**DSE 1B: Elective: Computer Graphics****Credit (L: T: P = 4: 0: 0)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn the classification and characteristics of Elements of Graphics Systems
- CO2. Learn in depth Graphics Algorithms
- CO3. Deliberate the classification and characteristics of 2D Graphics
- CO4. Understand the characteristics of 3D Graphics
- CO5. Deliberate the details of Transformation and Viewing Techniques
- CO6. Learn the details of Illumination and Color Models

**Unit - 1****15 Hours**

**INTRODUCTION:** Survey of computer graphics, Overview of graphics systems – Video display devices, Raster scan systems, Random scan systems, Graphics monitors and Workstations, Input devices, Hard copy Devices, Graphics Software; Output primitives – points and lines, line drawing algorithms, loading the frame buffer, line function; circle and ellipse generating algorithms; Pixel addressing and object geometry, filled area primitives.

**Unit - 2****15 Hours**

**TWO DIMENSIONAL GRAPHICS:** Two dimensional geometric transformations – Matrix representations and homogeneous coordinates, composite transformations; Two dimensional viewing – viewing pipeline, viewing coordinate reference frame; window-to-viewport coordinate transformation, Two dimensional viewing functions; clipping operations – point, line, and polygon clipping algorithms.

**Unit - 3****15 Hours**

**THREE DIMENSIONAL GRAPHICS:** Three dimensional concepts; Three dimensional object representations – Polygon surfaces Polygon tables- Plane equations – Polygon meshes; Curved Lines and surfaces, Quadratic surfaces; Blobby objects; Spline representations – Bezier curves and surfaces -B-Spline curves and surfaces.

**TRANSFORMATION AND VIEWING:** Three dimensional geometric and modeling transformations – Translation, Rotation, Scaling, composite transformations; three dimensional viewing – viewing pipeline, viewing coordinates, Projections, Clipping; Visible surface detection methods.

**Unit - 4****15 Hours**

**ILLUMINATION AND COLOUR MODELS:** Light sources – basic illumination models – halftone patterns and dithering techniques; Properties of light – Standard primaries and chromaticity diagram; Intuitive color concepts – RGB color model – YIQ color model – CMY colour model – HSV color model – HLS color model; Color selection.

**Reference Books:**

1. Computer Graphics C Version by Donald Hearn & M. Pauline Baker Pearson Education, New Delhi, 2004
2. Procedural Elements for Computer Graphics by David F. Rogers, Tata McGraw Hill Book Company, New Delhi, 2003
3. Computer Graphics: Principles & Practice in C by J. D. Foley, S. K. Van Dam, F. H. John, Pearson Education, 2004
4. Computer Graphics using Open GL by Francis S Hill Jr Pearson Education, 2004.

**ECE21301****V SEMESTER****DSE 1B: Elective: Computer Graphics Lab****Credit (L: T: P = 0: 0: 2)**

1. Implementation of Bresenham's Algorithm – Line, Circle, Ellipse.
2. Implementation of Line, Circle and ellipse attributes
3. Two Dimensional transformations - Translation, Rotation, Scaling, Reflection, Shear.
4. Composite 2D Transformations
5. Cohen Sutherland 2D line clipping and Windowing
6. Sutherland – Hodgeman Polygon clipping Algorithm
7. Three dimensional transformations - Translation, Rotation, Scaling
8. Composite 3D transformations
9. Drawing three dimensional objects and Scenes
10. Generating Fractal images

**ECE21401****V SEMESTER****DSE 1C: Elective: Multimedia Systems and Applications****Credit (L: T: P = 4: 0:0)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Understand the details of Components of Multimedia with applications
- CO2. Identify in details with examples Text, Images, Sound and Videos
- CO3. Learn in depth Animation Techniques
- CO4. Understand the details of Multimedia in internet
- CO5. Deliberate the characteristics of Making Multimedia
- CO6. Deliberate in depth Multimedia Making Tools

**Unit - 1****15 Hours**

**Multimedia:** Introduction to multimedia, components, uses of multimedia, multimedia applications, virtual reality.

**Text:** Fonts & Faces, Using Text in Multimedia, Font Editing & Design Tools, Hypermedia & Hypertext.

**Images:** Still Images – bitmaps, vector drawing, 3D drawing & rendering, natural light & colours, computerized colours, colour palettes, image file formats.

**Unit - 2****15 Hours**

**Sound:** Digital Audio, MIDI Audio, MIDI vs Digital Audio, Audio File Formats.

**Video:** How video works, analog video, digital video, video file formats, video shooting and editing.

**Unit - 3****15 Hours**

**Animation:** Principle of animations, animation techniques, animation file formats.

**Internet and Multimedia:** www and HTML, multimedia on the web – web servers, web browsers, web page makers and site builders.

**Unit - 4****15 Hours**

**Making Multimedia:** Stages of a multimedia project, Requirements to make good multimedia, Multimedia Hardware - Macintosh and Windows production Platforms, Hardware peripherals - Connections, Memory and storage devices, Multimedia software and Authoring tools.

**Reference Books:**

1. Tay Vaughan, “Multimedia: Making it work”, TMH, Eighth edition.
2. Ralf Steinmetz and KlaraNaharstedt, “Multimedia: Computing, Communications Applications”, Pearson.
3. Keyes, “Multimedia Handbook”, TMH.
4. K. Andleigh and K. Thakkar, “Multimedia System Design”, PHI.

**ECE21501****V SEMESTER****DSE 1C: Elective: Multimedia Systems and Applications Lab****Credit (L: T: P = 0: 0: 2)**

Practical exercises based on concepts listed in theory using Presentation tools in office automation tool/ GIMP/Blender / Audacity/ Animation Tools/ Image Editors/ Video Editors.

Implement the followings using Blender -

1. Create an animation using the tools panel and the properties panel to draw the following – Line, pie, oval, circle, rectangle, square, pencil, brush and lasso tool
2. Create an animation using text tool to set the font, size, colour etc.
3. Create an animation using free transform tool that should use followings-
  - Move Objects
  - Skew Objects
  - Stretch Objects
  - Rotate Objects
  - Stretch Objects while maintaining proportion
  - Rotate Objects after relocating the centre dot
4. Create an animation using layers having following features- Insert layer, Delete layer, guide layer, Mask layer.
5. Modify the document (changing background color etc. )using the following tools
  - Eraser tool
  - Hand tool
  - Ink bottle tool
  - Zoom tool
  - Paint Bucket tool
  - Eyedropper tool
6. Create an animation for bus car race in which both starts from the same point and car wins the race.
7. Create an animation in which text Hello gets converted into Good Bye (using motion/shape tweening).
8. Create an animation having five images having fade-in fade-out effect.
9. Create an scene to show the sunrise (using multiple layers and motion tweening)
10. Create an animation to show the ripple effect.
11. Create an animation (using Shape tweening and shape hints) for transforming one shape into another.
12. Create an animation for bouncing ball (you may use motion guide layer).

**OR****Project:**

Design a minimum 10 page interactive website using Joomla or WordPress.

**ECE22001****V SEMESTER****DSE 2A: Elective: ASP.Net****Credit (L: T: P = 4: 0: 0)****Course Outcome:**

After successful completion of the course, the student is able to

CO 1. Learn the details of ASP.NET Framework

CO 2. Learn the details of ASP.NET working Environment

CO 3. Deliberate in details with examples Standard Control of ASP.NET

CO 4. Understand the details of Developing Simple Websites Using ASP.NET Controls

CO 5. Deliberate in depth Developing Simple Web Application Using ASP.NET Controls

CO 6. Learn the details of Database Access Controls

CO 7. Identify in details with examples Database Access Controls

**Unit - 1****15 Hours**

**Overview of the ASP.NET:** Introduction of different Web Technology, What is Asp.Net, How Asp.Net Works, Use of visual studio, Different Languages used in ASP.Net. Summary.

**Framework:** Common Language Runtime (CLR), .NET Framework Class Library, Summary

**Unit - 2****15 Hours**

**Setting up and Installing ASP.NET:** Installing Internet Information Server, Installation of Asp.Net, virtual directory, Application Setting in IIS, Summary.

**Unit - 3****15 Hours**

Asp.Net Standard Controls, Displaying information, Label Controls, Literal Controls, Bulleted List, Accepting User Input, Textbox controls, Radio Button and Radio Button List Controls, Checkbox and Checkbox List Controls, Button controls, Link Button Control, Image Button Control, Using Hyperlink Control, Dropdown List, List Box, Displaying Images, Image Control, Image Map Control, Using Panel Control, Using Hyperlink Control, Asp.Net, Page & State Management, Overview of events in page, Summary.

**Unit - 4****15 Hours**

Designing Websites with master pages, creating master pages, Creating default contents, nesting master pages, registering master pages in web configuration, Summary.

**ASP.Net Theme:** ASP.NET Website Theme, Named Skin and Default Skin in ASP.NET Theme, Style Sheet Theme and Theme Attributes of a Page Directive

**Using the Rich Controls:** Accepting File Uploads, Saving files to file system, Calendar Control, Displaying advertisements, Displaying Different Page view, Displaying a Tabbed Page View, Wizard Control, Summary.

**Reference Books:**

1. Mathew Mac Donald, ASP. Net The Complete Reference, McGraw –Hill, 2002.

**ECE22101**

**V SEMESTER**  
**DSE 2A: Elective: ASP.Net Lab**  
**Credit (L: T: P = 0: 0: 2)**

**LAB MANUAL:**

1. Write a Program to generate the factorial operation.
2. Write a Program to perform Money Conversion.
3. Write a Program to generate the Quadratic Equation.
4. Write a Program to generate the Login control.
5. Write a Program to perform Asp.Net state.
6. Write a Program to perform validation operation.
7. Write a Program to perform Tree view operation.
8. Write a Program to display the phone no of an author using database.
9. Write a Program to insert the data in to database using Execute-Non Query.
10. Write a Program to bind data using template in data list.
11. Write a Program to bind data using Hyperlink column in data grid.

ECE22201

**V SEMESTER**  
**DSE 2B: Elective: Visual Programming**  
**Credit (L: T: P = 4: 0:0)**

{**Note:** Use any open source alternative such as Tkinter with Python /SharpDevelop/GAMBAS/OPENXAVA with JAVA}

**Course Outcome:**

After successful completion of the course, the student is able to

CO 1. Learn in details with examples Basic concept Of GUI Environment

CO 2. Deliberate the details of GUI Controls

CO 3. Learn in details with examples Data types and Operations in Visual Programming

CO 4. Learn in details with examples Control statements in Visual Programming

CO 5. Write down in details with examples Modular Programming

CO 6. Learn the details of Forms Handling in Visual Programming

CO 7. Understand in depth Database Connectivity in Visual Programming

**Unit - 1****15 Hours**

**GUI Environment:** Introduction to graphical user interface (GUI), programming language (procedural, object oriented, event driven), the GUI environment, compiling, debugging, and running the programs.

**Controls:** Introduction to controls textboxes, frames, check boxes, option buttons, images, setting borders and styles, the shape control, the line control, working with multiple controls and their properties, designing the user interface, keyboard access, tab controls, default & cancel property, coding for controls.

**Operations:** Data types, constants, named & intrinsic, declaring variables, scope of variables, val function, arithmetic operations, formatting data.

**Unit - 2****15 Hours**

**Decision Making:** If statement, comparing strings, compound conditions (and, or, not), nested if statements, case structure, using if statements with option buttons & check boxes, displaying message in message box, testing whether input is valid or not.

**Modular programming:** Menus, sub-procedures and sub-functions defining / creating and modifying a menu, using common dialog box, creating a new sub-procedure, passing variables to procedures, passing argument by value or by reference, writing a function/procedure.

**Unit - 3****15 Hours**

**Forms Handling:** Multiple forms creating, adding, removing forms in project, hide, show method, load, unload statement, me keyword, referring to objects on a different forms

**Iteration Handling:** Do/loops, for/next loops, using msg box function, using string function

**Arrays and Grouped Data Control:** Arrays - 1-dimension arrays, initializing an array using for each, user-defined data types, accessing information with user-defined data types, using list boxes with array, two dimensional arrays.

**Unit - 4****15 Hours**

lists, loops and printing list boxes & combo boxes, filling the list using property window / add item method, clear method, list box properties, removing an item from a list, list box/ combo box operations.

**Database Connectivity:** Database connectivity of forms with back end tool like mysql, populating the data in text boxes, list boxes etc. searching of data in database using forms. Updating/ editing of data based on a criterion.

**Reference Books:**

1. Reference: Programming in Visual Basic 6.0 by Julia Case Bradley, Anita C. Millispangh (Tata Mcgraw Hill Edition 2000 (Fourteenth Reprint 2004))

**ECE22301****V SEMESTER****DSE 2B: Elective: Visual Programming Lab****Credit (L: T: P = 0: 0: 2)**

1. Print a table of numbers from 5 to 15 and their squares and Cubes.
2. Print the largest of three numbers.
3. Find the factorial of a number n.
4. Enter a list of positive numbers terminated by zero. Find the sum and average of these numbers.
5. A person deposits Rs. 1000 in a fixed account yielding 5% interest. Complete the amount in the account at the end of each year for n years.
6. Read n numbers. Count the number of negative numbers, positive numbers and zeros in the list.
7. Read n numbers. Count the number of negative numbers, positive numbers and zeroes in the list. Use of arrays.
8. Read a single dimension array. Find the sum and average of these numbers.
9. Read a two dimension array. Find the sum of two 2D Array.
10. Create a database Employee and Make a form to allow data entry to Employee Form with the following command buttons:

**ECE22401****V SEMESTER****DSE2C: PHP Programming with MySQL****Credit (L: T: P = 4: 0: 0)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn in depth Elements of PHP
- CO2. Learn in depth Interaction Methods Between HTML and PHP
- CO3. Understand in depth PHP function
- CO4. Understand in depth String Manipulation
- CO5. Learn the characteristics of Regular Expression
- CO6. Learn the details of Developing PHP Web Application

**Unit - 1****15 Hours**

Introduction Basic PHP Development Control Structure: Introduction to www, History, Understanding client/server roles Apache, PHP, MySQL, XAMPP Installation PHP Basic syntax, PHP data Types, PHP Variables PHP Constants, PHP Expressions, PHP Operators Control Structures & Loop

**Unit - 2****15 Hours**

Working With the File System Working With Regular Expressions, Opening a File, Reading from a File, Writing to a File, File Locking, Uploading Files via an HTML Form, Getting File Information, Directory Functions, Getting a Directory Listing, The basic regular expressions, Matching patterns, Finding matches, Replace patterns

**WORKING WITH FORMS:** PHP Form handling, PHP GET/POST, PHP Form Validation, Accessing user input, Combine HTML and PHP code using hidden fields, Redirecting the user, File upload

**Unit - 3****15 Hours**

**CLASSES AND OBJECTS:** Object oriented concepts, Define a class, attributes, Object, Object properties, methods, constructors and destructors, Class constants, Static method, Class inheritance, Abstract classes, Final keyword, Implementing Interface, Object serialization

Using Cookies: What are Cookies? – Setting Cookies – Using Cookie variables – Session Basics: What's a session? – Understanding Session variables – Managing User preferences with Sessions – Graphics: Drawing functions.

**Unit - 4****15 Hours**

**INTRODUCTION TO DATABASE:** What is RDBMS technology?, Introduction to SQL, Connecting to the MYSQL, Selecting a database, Adding data to a table, Displaying returned data on Web pages ,Finding the number of row, Inserting, Deleting , Entering and updating data, Executing multiple queries, Understanding Primary and Foreign Key, Understanding Database Normalization, Dealing with Dates and Times

**Reference Books:**

1. Complete Beginner's Guide to PHP: Programming & Web Development by Cedric Palmer (22 February 2014)
2. PHP and MySQL Web Development by Laura Thomson and Luke Welling
3. PHP Reference: Beginner to Intermediate PHP5 by Mario Lurig
4. PHP 4: A Beginner's Guide by William Mccarty
5. Julie Meloni and Matt Telles, PHP 6, Course Technology, CENGAGE Learning, India Edition, 2008.
6. Kevin Tatroe, Peter MacIntyre and RasmusLerdorf, Programming PHP, O'REILLY media, 3rd edition, 2013.

**ECE22501****V SEMESTER****DSE2C: PHP Programming with MySQL Lab****Credit (L: T: P = 0: 0: 2)**

1. Write a PHP program to find the factorial of a number.
2. Write a PHP program using Conditional Statements.
3. Write a PHP program to find the maximum value in a given multi-dimensional array.
4. Write a PHP program to find the GCD of two numbers using user-defined functions.
5. Design a simple web page to generate multiplication table for a given number using PHP.
6. Design a web page that should compute one's age on a given date using PHP.
7. Write a PHP program to download a file from the server.
8. Write a PHP program to store the current date and time in a COOKIE and display the 'Last Visited' date and time on the web page.
9. Write a PHP program to store page views count in SESSION, to increment the count on each refresh and to show the count on web page.
10. Write a PHP program to draw the human face.
11. Write a PHP program to design a simple calculator.
12. Design an authentication web page in PHP with MySQL to check username and password.

ECE23001

## V SEMESTER

## DSE 3A: Elective: Analysis and Design of Algorithms

(Credit L: T: P = 4: 0: 0)

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn the details of Types of notion of Algorithm
- CO2. Learn in details with examples Algorithm Design Techniques
- CO3. Deliberate in depth Sorting Techniques
- CO4. Deliberate in depth of Searching Techniques
- CO5. Identify in details with examples Analysis of Graph Algorithms
- CO6. Learn the details of Dynamic Programming Methods

**Unit - 1****15 Hours**

**Introduction:** Notion of Algorithm, Review of Asymptotic Notations, Mathematical Analysis of Non-Recursive and Recursive Algorithms Correctness of Algorithm

**Algorithm Design Techniques:** Iterative techniques Divide and conquer greedy algorithms.

**Sorting Techniques:** Selection sort, bubble sort, insertion sort, more sorting techniques-quick sort, merge sort. Radix sort,

**Unit - 2****15 Hours**

**The Greedy Method:** General Method - Container Loading - Knapsack Problem - Tree

**Searching Techniques:** Linear and Binary search, Complexity Analysis.

**Graphs:** Analysis of Graph algorithms -Depth-First Search Breadth-First Search and its applications, minimum Spanning Trees and Shortest Paths -PRIM 'S, KRUSKAL, Dijkstra's algorithm. Branching-Hamiltonian Circuit problem.

**Unit - 3****15 Hours**

**Dynamic Programming:** The General Method, Warshall's Algorithm, Floyd's Algorithm for the All-Pairs Shortest Paths, Single-Source Shortest Paths: The Travelling Salesperson problem.

**Unit - 4****15 Hours**

Vertex Splitting – Job Sequencing With Deadlines - Minimum Cost Spanning Trees - Optimal

Storage on Tapes – Optimal Merge Patterns - #Single Source Shortest Paths#.

Backtracking: The General Method – The 8-Queens Problem – Sum of Subsets – Graph Coloring – Hamiltonian Cycles – Knapsack Problem Branch and Bound: The Method - 0/1 Knapsack Problem.

**Reference Books:**

1. Analysis & design of Algorithm-Padma Reddy
2. A.V. Levitin, Introduction to the Design and Analysis of Algorithms, Pearson Education, 2006.
3. J. Kleinberg and E. Tardos, Algorithms Design, Pearson Education, 2006.
4. Ellis Horowitz, SatrajSahni and SanguthevarRajasekaran, Fundamentals of Computer Algorithms, Universities Press, Second Edition, Reprint 2009.
5. A.A.Puntambekar, Analysis and Design Of Algorithms, Technical Publications, 2008

**ECE23101****V SEMESTER****DSE 3A: Elective: Analysis and Design of Algorithms Lab****(Credit L: T: P = 0: 0: 2)**

1. Implement Insertion Sort.
2. Implement Merge Sort.
3. Implement recursive algorithm
4. Implement Randomized Quick sort.
5. Implement Radix Sort.
6. Implement Searching Techniques (linear & Binary)
7. Implement selection sort
8. Implement Bubble sort
9. Implement Prim's Algorithm
10. Implement Dijkstra's Algorithm
11. Implement Krushkal's Algorithm
12. Implement Travelling Salesperson problem
13. Implement Floyd's Algorithm
14. Implement Depth First Search
15. Implement Binary Search tree.

ECE23201

## V SEMESTER

## DSE 3B: Elective: Mobile Applications

Credit (L: T: P = 4: 0: 0)

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate the details of Concepts of Event Driven Programming
- CO2. Learn in details with examples issues of Mobile applications
- CO3. Specify the details of Mobile applications Development tools and Frameworks
- CO4. Deliberate in details with examples common Mobile device UI's
- CO5. Write down in depth Data persistence Remote data storage and communication
- CO6. Learn in details with examples Code signing

**Unit - 1****15 Hours**

**Event Driven Programming:** UI event loop, Threading for background tasks, Outlets / actions, delegation, notification, Model View Controller (MVC) design pattern.

**Mobile application issues:** limited resources (memory, display, network, file system), input / output (multi-touch and gestures), sensors (camera, compass, accelerometer, GPS)

**Unit - 2****15 Hours**

**Development tools:** Apple iOS toolchain: Objective-C, Xcode IDE, Interface Builder, Device simulator.

**Frameworks:** Objective-C and Foundation Frameworks, Cocoa Touch, UI Kit, Others: Core Graphics, Core Animation, Core Location and Maps, Basic Interaction.

**Unit - 3****15 Hours**

**Common UI's for mobile devices:** Navigation Controllers, Tab Bars, Table Views, Modal views, UI Layout.

**Data Persistence:** Maintaining state between application invocations, File system, Property Lists, SQLite, Core Data.

**Unit - 4****15 Hours**

**Remote Data-Storage and Communication:** "Back End" / server side of application, RESTful programming, HTTP get, post, put, delete, database design, server side JavaScript / JSON.

**Code signing:** security, Keychain, Developers and App Store License Agreement

**ECE23301****V SEMESTER****DSE 3B: Elective: Mobile Applications Lab****Credit (L: T: P = 0: 0: 2)****Software Lab based on Mobile Applications:**

1. Installing Android Environment
2. Create Hello World Application
3. Sample Application about Android Resources
4. Sample Application about Layouts
5. Sample Application about Intents
6. Sample Application I about user interfaces
7. Sample Application about Animations
8. Make a Project based on above labs
9. Sample Application about Android Data
10. Sample Application about SQLite I
11. Sample Application about SQLite II
12. Project Presentation

ECE23401

## V SEMESTER

## DSE 3C: Elective: Machine Learning

Credit (L: T: P = 4: 0: 0)

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate the details of Concepts of Machine Learning
- CO2. Learn in details with examples for Machine Learning Software
- CO3. Specify the details of Linear Algebra
- CO4. Deliberate in details with examples Linear & Logistic Regression
- CO5. Write down in depth Regularization and its utility
- CO6. Learn in details with methods of Neural Networks

**Unit - 1****15 Hours**

**Introduction:** Concept of Machine Learning, Applications of Machine Learning, Key elements of Machine Learning, Supervised vs. Unsupervised Learning, Statistical Learning: Bayesian Method, The Naive Bayes Classifier

**Unit - 2****15 Hours**

**Softwares for Machine Learning and Linear Algebra Overview:** Plotting of Data, Vectorization, Matrices and Vectors: Addition, Multiplication, Transpose and Inverse using available tool such as MATLAB.

**Unit - 3****15 Hours**

**Linear Regression:** Prediction using Linear Regression, Gradient Descent, Linear Regression with one variable, Linear Regression with multiple variables, Polynomial Regression, Feature Scaling/Selection.

**Logistic Regression:** Classification using Logistic Regression, Logistic Regression vs. Linear Regression, Logistic Regression with one variable and with multiple variables.

**Unit - 4****15 Hours**

**Regularization:** Regularization and its utility: The problem of Overfitting, Application of Regularization in Linear and Logistic Regression, Regularization and Bias/Variance.

**Neural Networks:** Introduction, Model Representation, Gradient Descent vs. Perceptron Training, Stochastic Gradient Descent, Multilayer Perceptrons, Multiclass Representation, Backpropagation Algorithm.

**Readings**

1. Ethem Alpaydin, "Introduction to Machine Learning" 2nd Edition, The MIT Press, 2009.
2. Tom M. Mitchell, "Machine Learning", First Edition by Tata McGraw-Hill Education, 2013.
3. Christopher M. Bishop, "Pattern Recognition and Machine Learning" by Springer, 2007.
4. Mevin P. Murphy, "Machine Learning: A Probabilistic Perspective" by The MIT Press, 2012.

**ECE23501****V SEMESTER****DSE 3C: Elective: Machine Learning Lab****Credit (L: T: P = 0: 0: 2)**

For practical Labs for Machine Learning, students may use software like MABLAB/Octave or Python. For later exercises, students can create/use their own datasets or utilize datasets from online repositories like UCI Machine Learning Repository (<http://archive.ics.uci.edu/ml/>).

1. Perform elementary mathematical operations in Octave/MATLAB like addition, multiplication, division and exponentiation.
2. Perform elementary logical operations in Octave/MATLAB (like OR, AND, Checking for Equality, NOT, XOR).
3. Create, initialize and display simple variables and simple strings and use simple formatting for variable.
4. Create/Define single dimension / multi-dimension arrays, and arrays with specific values like array of all ones, all zeros, array with random values within a range, or a diagonal matrix.
5. Use command to compute the size of a matrix, size/length of a particular row/column, load data from a text file, store matrix data to a text file, finding out variables and their features in the current scope.
6. Perform basic operations on matrices (like addition, subtraction, multiplication) and display specific rows or columns of the matrix.
7. Perform other matrix operations like converting matrix data to absolute values, taking the negative of matrix values, adding/removing rows/columns from a matrix, finding the maximum or minimum values in a matrix or in a row/column, and finding the sum of some/all elements in a matrix.
8. Create various type of plots/charts like histograms, plot based on sine/cosine function based on data from a matrix. Further label different axes in a plot and data in a plot.
9. Generate different subplots from a given plot and color plot data.
10. Use conditional statements and different type of loops based on simple example/s.
11. Perform vectorized implementation of simple matrix operation like finding the transpose of a matrix, adding, subtracting or multiplying two matrices.
12. Implement Linear Regression problem. For example, based on a dataset comprising of existing set of prices and area/size of the houses, predict the estimated price of a given house.
13. Based on multiple features/variables perform Linear Regression. For example, based on a number of additional features like number of bedrooms, servant room, number of balconies, number of houses of years a house has been built – predict the price of a house.
14. Implement a classification/ logistic regression problem. For example based on different features of students' data, classify, whether a student is suitable for a particular activity. Based on the available dataset, a student can also implement another classification problem like checking whether an email is spam or not.
15. Use some function for regularization of dataset based on problem 14.
16. Use some function for neural networks, like Stochastic Gradient Descent or backpropagation - algorithm to predict the value of a variable based on the dataset of problem 14.

**ECE24101****V SEMESTER****SEC 2A: Elective: Object Oriented Modelling& Design with UML****Credit (L: T: P = 0: 0: 2)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate in details with examples Object Oriented Development
- CO2. Write down the details of OO Modeling Concepts
- CO3. Learn the details of OO process Overview
- CO4. Identify in depth Design of System Using OO Model
- CO5. Specify the details of Steps for Implementation of OO Modeling
- CO6. Learn the details of Design a System Using UML Tool

**Object Oriented Modeling& Design with UML Lab****Term Work / Assignment**

Each candidate will submit an approximately 10-page written report on a case study or mini project. Students have to do OO analysis & design for the project problem, and develop use case model, analysis model and design model for it, using UML.

**Practical assignment**

Nine assignments, one on each of the diagrams learnt in UML.

**Reference Books:**

1. Object –oriented modeling and design- Michael R Blaha and James R Rumbaugh
2. Object Technology- David A.Taylor
3. Designing Flexible Object Oriented systems with UML – Charles Ritcher
4. Object Oriented Analysis & Design, Satisfier. Jackson, BurdThomson
5. Object Oriented Modeling and Design - James Rumbaugh
6. Teach Yourself UML in 24 Hours - Joseph Schmuilers

**ECE24301****V SEMESTER****SEC 2B: Elective: JQuery****Credit (L: T: P = 0: 0: 2)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate in details with examples JQuery
- CO2. Learn the details of JQuery Overview
- CO3. Specify the details of Steps for Implementation of JQuery
- CO4. Learn the details of Design and use of JQuery

**JQuery Lab**

1. Test if jQuery is loaded.
2. Scroll to the top of the page with jQuery.
3. Disable right click menu in html page using jquery.
4. Blink text using jQuery.
5. Create a Zebra Stripes table effect.
6. Print a page using jQuery.
7. Limit character input in the text area including count.
8. Create a div using jQuery with style tag.
9. Move one DIV element inside another using jQuery.
10. Add a list element within an unordered list element.
11. Remove all the options of a select box and then add one option and select it.
12. How to get the value of a textbox using jQuery?
13. Remove style added with .css() function using jQuery.
14. Distinguish between left and right mouse click with jQuery.
15. Check if an object is a jQuery object.
16. How to detect whether the user has pressed 'Enter Key' using jQuery.
17. How to get textarea text using jQuery.
18. Access form input fields using jQuery.
19. Convert a jQuery object into a string.
20. How to detect a textbox's content has changed using jQuery?
21. Remove a specific value from an array using jQuery.
22. Add options to a drop-down list using jQuery.
23. Delete all table rows except first one using jQuery.
24. Count Child elements using jQuery.
25. Restrict "number"-only input for textboxes including decimal points.
26. Set value in input text using jQuery.
27. Set a value in a span using jQuery.
28. Find the class of the clicked element.
29. Set href attribute at runtime using jquery.
30. Find the total width of an element (including width, padding, and border) in jQuery.
31. Change options of select using jQuery.
32. Access HTML form data using jQuery.

**ECE24501****V SEMESTER****SEC 2B: Elective: MongoDB****Credit (L: T: P = 0: 0: 2)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate in details with examples MongoDB
- CO2. Learn the details of MongoDB Overview
- CO3. Specify the details of Steps for Implementation of MongoDB
- CO4. Learn the details of Design and use of MongoDB

**MongoDB Lab**

1. Write a MongoDB query to display all the documents in the collection restaurants.
2. Write a MongoDB query to display the fields restaurant\_id, name, borough and cuisine for all the documents in the collection restaurant.
3. Write a MongoDB query to display the fields restaurant\_id, name, borough and cuisine, but exclude the field \_id for all the documents in the collection restaurant.
4. Write a MongoDB query to display the fields restaurant\_id, name, borough and zip code, but exclude the field \_id for all the documents in the collection restaurant.
5. Write a MongoDB query to display all the restaurant which is in the borough Bronx.
6. Write a MongoDB query to display the first 5 restaurant which is in the borough Bronx.
7. Write a MongoDB query to display the next 5 restaurants after skipping first 5 which are in the borough Bronx.
8. Write a MongoDB query to find the restaurants who achieved a score more than 90.
9. Write a MongoDB query to find the restaurants that achieved a score, more than 80 but less than 100.
10. Write a MongoDB query to find the restaurants which locate in latitude value less than -95.754168.
11. Write a MongoDB query to find the restaurants that do not prepare any cuisine of 'American' and their grade score more than 70 and latitude less than -65.754168.
12. Write a MongoDB query to find the restaurants which do not prepare any cuisine of 'American' and achieved a score more than 70 and located in the longitude less than -65.754168.  
Note : Do this query without using \$ and operator.
13. Write a MongoDB query to find the restaurants which do not prepare any cuisine of 'American ' and achieved a grade point 'A' not belongs to the borough Brooklyn. The document must be displayed according to the cuisine in descending order.
14. Write a MongoDB query to find the restaurant Id, name, borough and cuisine for those restaurants which contain 'Wil' as first three letters for its name.
15. Write a MongoDB query to find the restaurant Id, name, borough and cuisine for those restaurants which contain 'ces' as last three letters for its name.

16. Write a MongoDB query to find the restaurant Id, name, borough and cuisine for those restaurants which contain 'Reg' as three letters somewhere in its name.
17. Write a MongoDB query to find the restaurants which belong to the borough Bronx and prepared either American or Chinese dish.
18. Write a MongoDB query to find the restaurant Id, name, borough and cuisine for those restaurants which belong to the borough Staten Island or Queens or Bronx or Brooklyn.
19. Write a MongoDB query to find the restaurant Id, name, borough and cuisine for those restaurants which are not belonging to the borough Staten Island or Queens or Bronx or Brooklyn.
20. Write a MongoDB query to find the restaurant Id, name, borough and cuisine for those restaurants which achieved a score which is not more than 10.
21. Write a MongoDB query to find the restaurant Id, name, borough and cuisine for those restaurants which prepared dish except 'American' and 'Chinese' or restaurant's name begins with letter 'Wil'.
22. Write a MongoDB query to find the restaurant Id, name, and grades for those restaurants which achieved a grade of "A" and scored 11 on an ISODate "2014-08-11T00:00:00Z" among many of survey dates..
23. Write a MongoDB query to find the restaurant Id, name and grades for those restaurants where the 2nd element of grades array contains a grade of "A" and score 9 on an ISODate "2014-08-11T00:00:00Z".
24. Write a MongoDB query to find the restaurant Id, name, address and geographical location for those restaurants where 2nd element of coord array contains a value which is more than 42 and upto 52..
25. Write a MongoDB query to arrange the name of the restaurants in ascending order along with all the columns.
26. Write a MongoDB query to arrange the name of the restaurants in descending along with all the columns.
27. Write a MongoDB query to arrange the name of the cuisine in ascending order and for that same cuisine borough should be in descending order.
28. Write a MongoDB query to know whether all the addresses contains the street or not.
29. Write a MongoDB query which will select all documents in the restaurants collection where the coord field value is Double
30. Write a MongoDB query which will select the restaurant Id, name and grades for those restaurants which returns 0 as a remainder after dividing the score by 7
31. Write a MongoDB query to find the restaurant name, borough, longitude and latitude and cuisine for those restaurants which contains 'mon' as three letters somewhere in its name.
32. Write a MongoDB query to find the restaurant name, borough, longitude and latitude and cuisine for those restaurants which contain 'Mad' as first three letters of its name.

ECF21001

## VI SEMESTER

## DSE 4A: Elective: Operation Research

Credit (L: T: P = 4: 0: 0)

**Course Outcome**

After successful completion of the course, the student is able to

- CO1. Write down the details of Origin and Development of Operation Research
- CO2. Understand the characteristics of Linear Programming Problems and Methods
- CO3. Deliberate in depth Transportation Problems
- CO4. Deliberate in depth Assignment Problem
- CO5. Identify in details with examples Network Analysis
- CO6. Learn in depth Application of Operation Research

**Unit - 1****15 Hours**

**Linear Programming Problems:** Origin and development of operations research, formulation of Linear Programming problem, Graphical solution.

Theory of simplex method, Use of artificial variables and their solution.

**Unit - 2****15 Hours**

**Transportation Problem:** Mathematical formulation of transportation problem, Initial basic Feasible solution, North West corner rule, Matrix minima method, Vogel's approximation method, MODI method to find optimal solution.

**Unit - 3****15 Hours**

**Assignment Problem:** Mathematical formulation of an Assignment problem, Assignment algorithm, Hungarian Method to solve Assignment Problem.

**Unit - 4****15 Hours**

**Network Analysis:** Basic components of Network, Rules for drawing Network diagram Time calculation in Networks. Critical Path Method and PROJECT Evaluation and Review Techniques. Algorithm and flow chart for CPM and PERT.

**Reference Books:**

1. Taha, "Operations Research", 7th edition, Pearson Education, 2007.
2. Billey E. Gillett, "Introduction to Operations Research", Himalaya Publishing House, Delhi, 1979.
3. Hamady A. Taha "Operations Research", Collin Mac Millan, 1982

**ECF21101**

**VI SEMESTER**

**DSE 4A: Elective: Operation Research Lab**

**Credit (L: T: P = 0: 0:2)**

**Lab based on Operation Research**

1. LPP
2. Simplex
3. Dual Simplex
4. Big – M
5. Vogel's
6. Maxima and Minima
7. North West corner
8. Sequencing Problems
9. Modi Method
10. Hugarian Method
11. Assignment Problem

**ECE21201****VI SEMESTER****DSE 4B: Elective: Enterprise Resource Planning****Credit (L: T: P = 4: 0: 0)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate the details of ERP
- CO2. Learn in depth Models of ERP
- CO3. Write down in depth Business Process Mapping for ERP
- CO4. Understand in details with applications of ERP and Related Technologies
- CO5. Deliberate the details of ERP Modules
- CO6. Specify in details with examples SAP

**Unit - 1****15 Hours**

Introduction to ERP, Evolution of ERP, What is ERP? Reasons for the growth of ERP, Scenario and Justification of ERP in India, Evaluation of ERP, Various Modules of ERP, Advantage of ERP and Disadvantage of ERP.

**Unit - 2****15 Hours**

An overview of Enterprise, Integrated Management Information, Business Modeling, ERP for Small Business, ERP for make to order companies, Business Process Mapping for ERP Module Design, Hardware Environment and its Selection for ERP Implementation.

**Unit - 3****15 Hours**

ERP and Related Technologies, Business Process Reengineering (BPR), Management Information System (MIS), Executive Information System (EIS), Decision support System (DSS), Supply Chain Management (SCM) (With Example)

**Unit - 4****15 Hours**

ERP Modules, Introduction to Finance, Plant Maintenance, Quality Management, Materials Management, ERP Market, Introduction, SAP AG, Baan Company, Oracle Corporation, People Soft, JD Edwards World Solutions Company, System Software Associates.

**Reference Books:**

1. C.S. V Murthy Enterprise Resource Planning
2. R.G. Saha – Enterprise Resource Planning - HPH
3. Alexis Leon, Leon Publishers: Enterprise Resource Planning
4. Ravi Anupindi, Sunil Chopra, Pearson Education”. “Managing Business Process Flows
5. Altekar, PHI. Enterprise Resource Planning
6. Srivatsava, I.K. International Publishers, Enterprise Resource Planning
7. P. Diwan Vinod Kumar Garg and N.K. Venkitakrishnan, PHI. Enterprise Resource Planning
8. Introduction to SAP, an Overview of SD: MM, PP, FI/CO Modules of SAP. 10. Zaveri Jyotindra Enterprise Resource Planning

**ECE21301**

**VI SEMESTER**

**DSE 4B: Elective: Enterprise Resource Planning Lab**

**Credit (L: T: P = 0: 0: 2)**

Students should be Prepare ERP Solution Report for his / her Case Study under the supervision of Teacher/ Lecturer

ECF21401

**VI SEMESTER****DSE 4C: Elective: E-Commerce Technologies****Credit (L: T: P = 4: 0: 0)****Course Outcome:**

After successful completion of the course, the student is able to

CO1. Understand the details of E-Commerce

CO2. Learn the details of Basic Concepts Of Internet and WWW

CO3. Identify in depth Internet Security Methods

CO4. Learn in details with examples Concepts of Electronic Data Exchange and applications

CO5. Learn in details with examples Planning For E-Commerce

CO6. Understand in depth Features of Internet Marketing

**Unit - 1****15 Hours**

**An introduction to Electronic commerce:**What is E-Commerce (Introduction And Definition), Main activities E-Commerce, Goals of E-Commerce, Technical Components of E-Commerce, Functions of E-Commerce, Advantages and disadvantages of E-Commerce, Scope of E-Commerce, Electronic Commerce Applications, 9 Electronic Commerce and Electronic Business(C2C)(C2G,G2G, B2G, B2P, B2A, P2P, B2A, C2A, B2B, B2C)

**The Internet and WWW:**Evolution of Internet, Domain Names and Internet Organization (.edu, .com, .mil, .gov, .net etc.) , Types of Network, Internet Service Provider, World Wide Web, Internet & Extranet, Role of Internet in B2B Application, building own website, Cost, Time, Reach, Registering a Domain Name, Web promotion, Target email, Banner, Exchange, Shopping Bots.

**Unit - 2****15 Hours**

**Internet Security:** Internet Security Issues Overview –Computer Security Classifications- Intellectual Property threats- Threats to the security of client computers-Threats to the security of communication channels- Threats to the security of Server computers- digital Certificates

Secure Transaction, Computer Monitoring, Privacy on Internet, Corporate Email privacy, Computer Crime( Laws , Types of Crimes), Threats, Attack on Computer System, Software Packages for privacy, Hacking, Computer Virus(How it spreads, Virus problem, virus protection, Encryption and Decryption, Secret key Cryptography, DES, Public Key Encryption, RSA, Authorization and Authentication, Firewall, Digital Signature( How it Works)

**Unit - 3****15 Hours**

**Electronic Data Exchange:**Introduction, Concepts of EDI and Limitation, Applications of EDI, Disadvantages of EDI, EDI model, Electronic Payment System: Introduction, Types of Electronic Payment System, Payment Types, Value Exchange System, Credit Card System, Electronic Fund Transfer, Paperless bill, Modern Payment Cash, Electronic Cash. Online payment basics- Payment cards-E-cash-Holding Electronic cash: online and offline

Cash-Advantages and disadvantages of electronic cash system-electronic wallets-  
Microsoft.NET passport-yahoo Wallet-EGML standard-stored value cards-magnetic strip  
Cards-smart cards.

**Unit - 4****15 Hours**

**Planning for Electronic Commerce:** Planning Electronic Commerce initiates, linking objectives to business strategies, measuring cost objectives, Comparing benefits to Costs, Strategies for developing electronic commerce web sites.

**Internet Marketing:**The PROS and CONS of online shopping, The cons of online shopping, Justify an Internet business, Internet marketing techniques, The E-cycle of Internet marketing, Personalization e-commerce.

**Technologies for Electronic Commerce:** Web Server Hardware and Software- Web server Basics- Types of web sites- web clients and web servers-Software for Web servers-website and utility programs-Web server hardware-Web Hosting Choices.

**Reference Books:**

1. G.S.V.Murthy, E-Commerce Concepts, Models, Strategies- :- Himalaya Publishing House, 2011.
2. Kamlesh K Bajaj and DebjaniNag , E- Commerce , 2005.

**ECF21501****VI SEMESTER****DSE 4C: Elective: E-Commerce Technologies Lab****Credit (L: T: P = 0: 0: 2)**

Software Lab based on E-Commerce Technologies

E-commerce concepts are to be implemented in developing a website using a combination of following technologies:

1. HyperText Markup Language (HTML)
2. Cascading Style Sheets (CSS)
3. JavaScript
4. ASP
5. PHP
6. XML
7. Joomla

ECF22001

## VI SEMESTER

## DSE 5A: Cloud Computing

Credit (L: T: P = 4: 0: 0)

**Course Outcome**

After successful completion of the course, the student is able to

CO1. Learn in depth Fundamentals of Cloud Computing

CO2. Understand the details of Cloud Services and File System

CO3. Learn in depth Concept of Collaborating with Cloud

CO4. Understand the details of Virtualization in cloud

CO5. Learn the classification and characteristics of Security challenges in Cloud Computing

CO6. Specify the classification and characteristics of Security challenges in Cloud Computing

CO7. Understand the details of Security challenges in Cloud Computing

CO8. Understand the Common standards of Cloud Computing

CO9. Deliberate in details with examples Various Application of Cloud Computing

**Unit - 1****15 Hours**

**Cloud Introduction:** Cloud Computing Fundamentals: Cloud Computing definition, Types of cloud, Cloud services: Benefits and challenges of cloud computing, Evolution of Cloud Computing , usage scenarios and Applications , Business models around Cloud– Major Players in Cloud Computing - Issues in Cloud - Eucalyptus - Nimbus - Open Nebula, CloudSim.

**Cloud Services and File System:** Types of Cloud services: Software as a Service - Platform as a Service – Infrastructure as a Service - Database as a Service - Monitoring as a Service – Communication as services.

**Unit - 2****15 Hours**

Service providers- Google App Engine, Amazon EC2, Microsoft Azure, Sales force.

**Collaborating With Cloud:** Collaborating on Calendars, Schedules and Task Management – Collaborating on Event Management, Contact Management, Project Management – Collaborating on Word Processing, Databases – Storing and Sharing Files- Collaborating via Web-Based Communication Tools – Evaluating Web Mail Services – Collaborating via Social Networks – Collaborating via Blogs and Wikis.

**Unit - 3****15 Hours**

**Virtualization For Cloud:** Need for Virtualization – Pros and cons of Virtualization – Types of Virtualization – System Vm, Process VM, Virtual Machine monitor – Virtual machine properties - Interpretation and binary translation, HLL VM - Hypervisors – Xen, KVM , VMWare, Virtual Box, Hyper-V.

**Unit - 4****15 Hours**

**Security, Standards, And Applications:** Security in Clouds: Cloud security challenges – Software as a Service Security, Common Standards: The Open Cloud Consortium –The Distributed management Task Force – Standards for application Developers – Standards for Messaging – Standards for Security, End user access to cloud computing, Mobile Internet devices and the cloud.

**ECF22101****VI SEMESTER****DSE 5A: Cloud Computing Lab****Credit (L: T: P = 0: 0: 2)****Software Lab based on Cloud Computing:**

1. Create virtual machines that access different programs on same platform.
2. Create virtual machines that access different programs on different platforms.
3. Exploring Google cloud for the following
  - a) Storage
  - b) Sharing of data
  - c) Manage your calendar, to-do lists,
  - d) A document editing tool
4. Exploring Open source cloud (Any two)

ECF22201

**VI SEMESTER**  
**DSE 5B: Elective: Data Mining and Data Warehousing**  
**Credit (L: T: P = 4: 0: 0)**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Understand the characteristics of Data Warehousing
- CO2. Understand the details of Data Warehousing Architecture
- CO3. Deliberate in depth Data Mining
- CO4. Learn in details with examples Association Rule Mining
- CO5. Specify the details of Classification and Prediction Techniques
- CO6. Learn in depth Clustering Methods
- CO7. Write down in depth Application of Data Mining

**Unit - 1****15 Hours**

**Data Warehousing:** Introduction- Definition and description need for data ware housing need `for strategic information, failures of past decision support systems, OLTP v/s DWH- DWH requirements-trends in DWH-Application of DWH.

**Data Warehousing Architecture:** Reference architecture- Components of reference architecture - Data warehouse building blocks, implementation, physical design process and DWH deployment process.

**Unit - 2****15 Hours**

A Multidimensional Data, Model Data Warehouse Architecture.

**Data Mining:** Data mining tasks-Data mining vs KDD- Issues in data mining, Data Mining metrics, Data mining architecture - Data cleaning- Data transformation- Data reduction - Data mining primitives.

**Unit - 3****15 Hours**

**Association Rule Mining:** Introduction - Mining single dimensional Boolean association rules from transactional databases - Mining multi-dimensional association rules.

**Classification and Prediction:** Classification Techniques - Issues regarding classification and prediction - decision tree - Bayesian classification –Classifier accuracy.

**Unit - 4****15 Hours**

**Clustering:** Clustering Methods - Outlier analysis.

**Applications and Other Data Mining Methods:** Distributed and parallel Data Mining Algorithms, Text mining- Web mining.

**Reference Books:**

1. Jiawei Han and MichelineKamber,” Data Mining Concepts and Techniques”, Morgan Kaufmann Publishers, USA, 2006.
2. Berson,”DataWarehousing, Data Mining and OLAP”, Tata McGraw Hill Ltd, New Delhi, 2004.

**ECF22301****VI SEMESTER****DSE 5B: Elective: Data Mining and Data Warehousing Lab****Credit (L: T: P = 0: 0: 2)****Software Lab based on Data Mining:**

**Practical List:** Practical are to be done using Weka, and a report prepared as per the format\*. The operations are to be performed on built-in dummy data sets of weka and/or the downloadable datasets mentioned in references below. Also wherever applicable, the parameter values are to be varied (upto 3 distinct values). The 'Visualize' tab is to be explored with each operation.

1. Pre-processing: Apply the following filters –
  - a. weka>filter>supervised>attributed> AddClassification, AttributeSelection, Discretize, NominalToBinary
  - b. weka>filter>supervised>instance: StratifiedRemoveFolds, Resample
  - c. weka>filter>unsupervised>attribute>Add, AddExpression, AddNoise, Center, Discretize, MathExpression, MergeTwoValues, NominalToBinary, NominalToString, NormalizeNumericToBinary, NumericToNominal, NumericTransform, PrincipalComponent, RandomSubset, Remove, RemoveType, ReplaceMissingValues, Standardize
  - d. weka>filter>unsupervised>instance>Normalize, Randomize, Standardize, RemoveFrequentValues, RemoveWithValues, Resample, SubsetByExpression
2. Explore the 'select attribute' as follows  
weka>attributeSelection>, FilteredSubsetEval, WrapperSubsetEval
3. Association mining  
weka>associations>, Apriori, FPGrowth
4. Classification\*\*  
weka>classifiers>bayes>, NaïveBayes, weka>classifiers>lazy>: IB1, IBkweka>classifiers>trees, SimpleCart, RandomTree, ID3
5. Clustering\*\*  
weka>clusters>, SimpleKMeans, FarthestFirst algorithm, DBSCAN, hierarchicalClusterer

ECF22401

**VI SEMESTER****DSE 5C: Elective: Artificial Intelligence and Expert Systems****Credit (L: T: P = 4: 0: 0)****Course Outcome**

After successful completion of the course, the student is able to

- CO1. Deliberate in details with examples Artificial intelligence system
- CO2. Learn the characteristics of Concepts of Representation of knowledge
- CO3. Understand in details with examples Concepts of Representation of knowledge
- CO4. Understand the details of knowledge inference methods
- CO5. Understand in details with examples Concepts of Machine Learning Techniques
- CO6. Learn the details of Expert System

**Unit - 1****15 Hours**

**INTRODUCTION TO AI AND PRODUCTION SYSTEMS:** Introduction to AI-Problem formulation, Problem Definition -Production systems, Control strategies, Search strategies. Problem characteristics, Production system characteristics -Specialized production system-Problem solving methods - Problem graphs, Matching, Indexing and Heuristic functions -Hill Climbing-Depth first and Breath first, Constraints satisfaction - Related algorithms, Measure of performance and analysis of search algorithms.

**REPRESENTATION OF KNOWLEDGE:**Game playing - Knowledge representation, Knowledge representation using Predicate logic

**Unit - 2****15 Hours**

Introduction to predicate calculus, Resolution, Use of predicate calculus, Knowledge representation using other logic-Structured representation of knowledge.

**KNOWLEDGE INFERENCE:** Knowledge representation -Production based system, Frame based system. Inference - Backward chaining, Forward chaining, Rule value approach, Fuzzy reasoning - Certainty factors, Bayesian Theory-Bayesian Network-Dempster -Shafer theory.

**Unit - 3****15 Hours**

**PLANNING AND MACHINE LEARNING:** Basic plan generation systems - Strips - Advanced plan generation systems - Kstrips -Strategic explanations -Why, Why not and how explanations. Learning- Machine learning, adaptive Learning.

**Unit - 4****15 Hours**

**EXPERT SYSTEMS:** Expert systems - Architecture of expert systems, Roles of expert systems -Knowledge Acquisition -Meta knowledge, Heuristics. Typical expert systems - MYCIN, DART, XOON, Expert systems shells.

**Reference Books:**

1. Kevin Night, Elaine Rich, Nair B., “Artificial Intelligence (SIE)”, McGraw Hill- 2008. (Unit-1,2,4,5)
2. Dan W. Patterson, “Introduction to AI and ES”, Pearson Education, 2007. (Unit-III)
3. Peter Jackson, “Introduction to Expert Systems”, 3rd Edition, Pearson Education, 2007.
4. Stuart Russel, Peter Norvig “AI – A Modern Approach”, 2nd Edition, Pearson Education 2007.

**ECF22501****VI SEMESTER****DSE 5C: Elective: Artificial Intelligence and Expert Systems Lab****Credit (L: T: P = 0: 0: 2)**

1. Implement Breadth First Search (for 8 puzzle problem or Water Jug problem or any AI search problem)
2. Implement Depth First Search (for 8 puzzle problem or Water Jug problem or any AI search problem)
3. Implement Best First Search (for 8 puzzle problem or Water Jug problem or any AI search problem)
4. Implement Single Player Game (Using Heuristic Function)
5. Implement Two Player Game (Using Heuristic Function)
6. Implement A\* Algorithm
7. Implement Propositional calculus related problem
8. Implement First order propositional calculus related problem
9. Implement Certainty Factor problem
10. Implement Syntax Checking of English sentences-English Grammar
11. Develop an Expert system for Medical diagnosis.
12. Develop any Rule based system for an application of your choice.

**ECF23001****VI SEMESTER****DSE 6: Elective: Dissertation / Project**  
**Credit (L: T: P = 0: 0: 6) 12 Hours/Week****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Identify in details with examples Problem identification
- CO2. Write down in depth System Analysis
- CO3. Understand and Develop SRS for selected System Problem
- CO4. Understand and Develop System Design for selected System Problem
- CO5. Learn in details and Develop a Code and Test the System
- CO6. Understand the details of Presentation and Demo of Project Work

- ✓ This option is to be offered only in 6th Semester.
- ✓ The students will be allowed to work on any project based on the concepts studied in
- ✓ Core/elective or skill based elective courses.
- ✓ The group size should be maximum of THREE (03) students.
- ✓ Each group will be assigned a teacher as a supervisor who will handle both their theory as Well as lab classes.
- ✓ A maximum of Four (04) projects would be assigned to one teacher.

**ECF24101****VI SEMESTER****SEC 3A: Elective: AJAX****Credit (L: T: P = 0: 0: 2)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate in details with examples AJAX
- CO2. Learn the details of AJAX Overview
- CO3. Specify the details of Steps for Implementation of AJAX
- CO4. Learn the details of Design and use of AJAX

**Term work:** Design & Develop Small web application using AJAX

**Reference Books:**

1. Steven Holzner, “Ajax A Beginner’s Guide”, The McGraw-Hill Companies.
2. Edmond Woychowsky, “Ajax: Creating Web Pages with Asynchronous JavaScript and XML”, Pearson Education, Inc.
3. Thomas A. Powell, “Ajax: The Complete Reference”, McGraw-Hill Companies.

**ECF24301****VI SEMESTER****SEC 3B: Elective: Angular JS****Credit (L: T: P = 0: 0: 2)****Course Outcome:**

After successful completion of the course, the student is able to

- CO5. Deliberate in details with examples Angular JS
- CO6. Learn the details of Angular JS Overview
- CO7. Specify the details of Steps for Implementation of Angular JS
- CO8. Learn the details of Design and use of Angular JS

**Term work:** Design & Develop Small web application using AngularJS

**Reference Books:**

1. Valeri Karpov, Diego Netto, “Professional AngularJS”, WROX
2. Sheppard, Miller, Liptak, “Sams Teach Yourself-AngularJS for .NET Developer in 24 Hours”, Pearson Education India; First edition

**ECF24501**

**VI SEMESTER**

**SEC 3C: Elective: Wordpress**

**Credit (L: T: P = 0: 0: 2)**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate in details with examples Word press
- CO2. Learn the details of Word press Overview
- CO3. Specify the details of Steps for Implementation of Word press
- CO4. Learn the details of Design and use of Word press

**Term work:** Design & Develop Small Web Site using Word press

**Reference Books:**

1. Lisa Sabin-Wilson, Cory Miller, Kevin Palmer, Andrea Rennick, and Michael Torbert, "WordPress® All-in-One For Dummies®", Wiley Publishing, Inc.
2. Tris Hussey, "WordPress Absolute Beginner's Guide", Que Publishing

ECF25101

**VI SEMESTER****SEC 4A: Elective: Python Programming****Credit (L: T: P = 0: 0: 2)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn the details of Python Programming Structure
- CO2. Deliberate the characteristics of Python Programming
- CO3. Understand in details with examples - Python Programming Languages
- CO4. Specify in depth OOPs, Event Driven and GUI features in Python

**Software Lab using Python****Section: A (Simple programs)**

1. Write a menu driven program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice.
2. WAP to calculate total marks, percentage and grade of a student. Marks obtained in each of the three subjects are to be input by the user. Assign grades according to the following criteria
  - Grade A: Percentage  $\geq 80$
  - Grade B: Percentage  $\geq 70$  and  $< 80$
  - Grade C: Percentage  $\geq 60$  and  $< 70$
  - Grade D: Percentage  $\geq 40$  and  $< 60$
  - Grade E: Percentage  $< 40$
3. Write a menu-driven program, using user-defined functions to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.
4. WAP to display the first n terms of Fibonacci series.
5. WAP to find factorial of the given number
6. WAP to find sum of the following series for n terms:  $1 - 2/2! + 3/3! - \dots - n/n!$
7. WAP to calculate the sum and product of two compatible matrices.

**Section: B (Visual Python)**

All the programs should be written using user defined functions, wherever possible.

1. Write a menu-driven program to create mathematical 3D objects
  - I. Curve
  - II. Sphere
  - III. Cone
  - IV. Arrow
  - V. Ring
  - VI. Cylinder.
2. WAP to read n integers and display them as a histogram.
3. WAP to display sine, cosine, polynomial and exponential curves.

4. WAP to plot a graph of people with pulse rate  $p$  vs. height  $h$ . The values of  $p$  and  $h$  are to be entered by the user.
5. WAP to calculate the mass  $m$  in a chemical reaction. The mass  $m$  (in gms) disintegrates according to the formula  $m=60/(t:2)$ , where  $t$  is the time in hours. Sketch a graph for  $t$  vs.  $m$ , where  $t \geq 0$ .
6. A population of 1000 bacteria is introduced into a nutrient medium. The population  $p$  grows as follows:  
$$P(t) = (15000(1:t))/(15: e)$$
Where the time  $t$  is measured in hours. WAP to determine the size of the population at given time  $t$  and plot a graph for  $P$  vs  $t$  for the specified time interval.
7. Input initial velocity and acceleration, and plot the following graphs depicting equations of motion:
  - I. Velocity wrt time ( $v=u:at$ )
  - II. Distance wrt time ( $s=u*t:0.5*a*t*t$ )
  - III. Distance wrt velocity ( $s=(v*v-u*u)/2*a$ )

**ECF25301****VI SEMESTER****SEC 4B: Elective: R Programming****Credit (L: T: P = 0: 0: 2)****Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn the details of R Programming Structure
- CO2. Deliberate the characteristics of R Programming
- CO3. Understand in details with examples - R Programming Languages

**Software Lab Based on R Programming**

1. Write a program that prints 'Hello World' to the screen.
2. Write a program that asks the user for a number n and prints the sum of the numbers 1 to n
3. Write a program that prints a multiplication table for numbers up to 12.
4. Write a function that returns the largest element in a list.
5. Write a function that computes the running total of a list.
6. Write a function that tests whether a string is a palindrome.
7. Implement the following sorting algorithms: Selection sort, Insertion sort, Bubble Sort
8. Implement linear search.
9. Implement binary search.
10. Implement matrices addition, subtraction and Multiplication

**Reference Books:**

1. William N. Venables and David M. Smith, An Introduction to R. 2nd Edition. Network Theory Limited.2009

**ECF25501**

**VI SEMESTER**

**SEC 4C: Elective: CodeIgniter**

**Credit (L: T: P = 0: 0: 2)**

**Course Outcome:**

After successful completion of the course, the student is able to

CO1. Learn the details of CodeIgniter - Application Development Framework

CO2. Deliberate the Features of CodeIgniter

**Term work:** Design & Develop Small web application using CodeIgniter framework

**Reference Books:**

**B.Com.**

First Semester

**2023-24**

**Name of the Program:** Bachelor of Commerce (B.Com.)

**Course Code:** B.Com. 1.1

**Name of the Course:** Financial Accounting

<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>4 Hrs</b>	<b>56 Hrs</b>

**Pedagogy:** Classrooms lecture, tutorials, Group discussion, Seminar, Case studies & field work etc.,

**Course Outcomes: On successful completion of the course, the Students will be able to**

- Understand the theoretical framework of accounting as well accounting standards.
- Demonstrate the preparation of financial statement of manufacturing and non-manufacturing entities of sole proprietors.
- Exercise the accounting treatments for consignment transactions & events in the books of consignor and consignee.
- Understand the accounting treatment for royalty transactions & articulate the Royalty agreements.
- Outline the emerging trends in the field of accounting.

**Syllabus:**

**Module No. 1: Theoretical Framework of Accounting** **10**

Introduction-Meaning and Scope of Accounting- Accounting Terminologies- Uses and Users of Accounting information-Accounting Process-Basis of Accounting: Cash and Accrual basis-Branches of Accounting-Accounting Principles-Concepts and Conventions-Accounting Standards-Indian Accounting Standards (IND AS).

**Module No. 2: Financial Statements of Sole Proprietors** **12**

Introduction-Meaning of Sole Proprietor-Financial Statements of Non-Manufacturing Entities: Trading Account-Income Statement/Profit & Loss Account-Balance Sheet; Financial Statements of Manufacturing Entities: Manufacturing Account-Trading Account-Profit & Loss account- Balance Sheet.

**Module No. 3: Consignment Accounts** **12**

Introduction-Meaning of Consignment-Consignment vs Sales-Pro-forma Invoice-Accounts Sales-Types Commission-Accounting for Consignment Transactions & Events in the books of Consignor and Consignee - Treatment of Normal & Abnormal Loss. -Valuation of Closing Stock-Goods sent at Cost Price and Invoice Price.

**Module No. 4: Royalty Accounts** **14**

Introduction-Meaning-Types of Royalty-Technical Terms: Lessee, Lessor, Minimum Rent – Short Workings –Recoupment of Short Working–Accounting Treatment in the books of Lessee and lessor – Journal Entries and Ledger Accounts including minimum rent account.

**Module No. 5: Emerging Trends in Accounting** **08**

Digital Transformation of Accounting-Big Data Analytics in Accounting-Cloud Computing in accounting- Accounting with drones- Forensic Accounting- Accounting for Planet-- Creative Accounting-Outsourced Accounting- Predictive Accounting (Theory Only).

**Skill Developments Activities:**

- Collect Annual Reports of sole proprietors and identify accounting concepts and conventions followed in the preparation of the annual reports.
- Collect Annual Reports of sole proprietors and identify the different components.
- Preparation of Proform invoice and accounts sales with imaginary figures.
- Collect Royalty Agreements and draft dummy royalty agreements with imaginary figures.

5. Identify latest innovations and developments in the field of accounting.
6. Any other activities, which are relevant to the course.

**Text Books:**

1. ICAI Study Materials on Principles & Practice of Accounting, Accounting and Advanced Accounting.
2. SP Iyengar (2005), Advanced Accounting, Sultan Chand & Sons, Vol. 1.
3. Robert N Anthony, David Hawkins, Kenneth A. Merchant, (2017) Accounting: Text and Cases, McGraw-Hill Education, 13<sup>th</sup> Edition.
4. Charles T. Horngren and Donna Philbrick, (2013) Introduction to Financial Accounting, Pearson Education, 11<sup>th</sup> Edition.
5. J.R. Monga, Financial Accounting: Concepts and Applications. Mayur Paper Backs, New Delhi, 32<sup>nd</sup> Edition.
6. S.N. Maheshwari, and. S. K. Maheshwari. Financial Accounting. Vikas Publishing House, New Delhi, 6<sup>th</sup> Edition.
7. B.S. Raman (2008), Financial Accounting Vol. I & II, United Publishers & Distributors
8. Compendium of Statements and Standards of Accounting. The Institute of Chartered Accountants of India, New Delhi.

**Note: Latest edition of text books may be used.**

**Name of the Program:** Bachelor of Commerce (B.Com.)

**Course Code:** B.Com. 1.2

**Name of the Course:** Management Principles and Applications

<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>4 Hrs</b>	<b>56 Hrs</b>

**Pedagogy:** Classrooms lecture, Case studies, Group discussion, Seminar & field work etc.,

**Course Outcomes: On successful completion of the course, the Students will be able to**

- Understand and identify the different theories of organisations, which are relevant in the present context.
- Design and demonstrate the strategic plan for the attainment of organisational goals.
- Differentiate the different types of authority and chose the best one in the present context.
- Compare and chose the different types of motivation factors and leadership styles.
- Choose the best controlling techniques for better productivity of an organisation.

<b>Syllabus:</b>	<b>Hours</b>
<b>Module No. 1: Introduction to Management</b>	<b>12</b>
Introduction-Meaning and importance of Management-Managerial Functions- Essence of Mangership-Evolution of the Management thoughts: Classical organizational theories- Neo-Classical theories-Modern organizational theories.	
<b>Module No. 2: Planning</b>	<b>10</b>
Introduction-Meaning-Nature-Purpose-Types of plans-Planning process; Strategic planning: Concept-Process-Importance and Limitations; Environmental Analysis and diagnosis: Meaning-importance and Techniques (SWOT/TOWS/WOTS-UP-BCG Matrix-Competitor Analysis); Decision-making-Concept-Importance-Committee and Group decision making Process.	
<b>Module No. 3: Organizing</b>	<b>12</b>

**Module No. 1: Fundamentals of India Economy**

**10**

Introduction - Production & Cost-Demand & Supply-Perfect & Imperfect Competition-Monopoly-National Income Accounting-Business Cycle-Open Economy-Utility theory-GDP-GNP-impact- other Macro financial indicators.

**Module No. 2: Monetary Policy**

**08**

Introduction - Meaning-objectives-qualitative & quantitative measures for credit control. Influence of policy rates of RBI: Repo-Reverse repo- Marginal standing facility and Bank rate. Influence of reserve ratios of RBI: CRR-SLR-Exchange rates-lending/deposit rates-design & issues of monetary policy-LAF - RBI Role, functions and its Governance

**Module No. 3: Fiscal Policy**

**08**

Introduction - Meanings-objectives- public expenditure-public debt-fiscal & budget deficit-Keynesian approach-fiscal policy tools-fiscal policy effects on employment-supply side approach-design & issues of fiscal policy-fiscal budget- Role of Ministry of Finance in Fiscal Policy.

**Module No. 4: Inflation, Unemployment and Labour market**

**08**

Introduction - **Inflation:** Causes of rising & falling inflation-inflation and interest rates-social costs of inflation; **Unemployment** – natural rate of unemployment-frictional & wait unemployment. **Labour market** and its interaction with production system; Phillips curve-the trade-off between inflation and unemployment-sacrifice ratio-role of expectations adaptive and rational

**Module 5: Financial Sector Reforms:**

**08**

Introduction - Financial sector reforms - Recommendation & action taken -SARFESI Act-Narasimham Committee I & II- Kelkar Committee- FRBM Act - Basel-BIS-history-need- mission-objectives-Basel norms I, II & III- criticism of Basel norms-Implementations of Basel norms in India- impact of Basel norms on Indian banks.

**Skill Development Activities:**

1. Collect last ten year GDP rate and examine the same.
2. Collect last two years monetary policy rates of RBI and analyse the impact of the

same.

3. Collect last five years fiscal policy of Indian Government and analyse the impact of the same on rural poor.
4. Collect last five year data on inflation, unemployment rate and labour market conditions and critically prepare the report.
5. Identify the recent financial sector reforms in India.
6. Any other activities, which are relevant to the course.

**Text Books:**

1. V K Puri and S K Mishra, Indian Economy, HPH.
2. Datt and Sundharam's, Indian Economy, S Chand
3. Ramesh Singh, Indian Economy, McGraw Hill education.
4. Khan and Jain, Financial Services, Mcgraw Hill Education, 8th edition
5. RBI working papers
6. Mistry of Finance, GOI of working papers
7. SEBI Guidelines Issued from time to time.

**Name of the Program:** Bachelor of Commerce (B.Com)

**Course Code:** B.Com. 2.6b (Open Elective Course)

**Name of the Course:** Investing in Stock Markets

Course Credits	No. of Hours per Week	Total No. of Teaching Hours
3 Credits	3 Hrs	42 Hrs

**Pedagogy:** Classrooms lecture, Case studies, Group discussion, Seminar & field work etc.,

**Course Outcomes:** On successful completion of the course, the Students will be able to

jj) Explain the basics of investing in the stock market, the investment environment as well as risk & return;

kk) Analyse Indian securities market;

ll) Examine EIC framework and conduct fundamental analysis;

mm) Perform technical analysis;

nn) Invest in mutual funds market.

Syllabus:	Hours
-----------	-------

<b>Module No. 1: Basics of Investing</b>	<b>10</b>
--	-----------

Basics of Investment & Investment Environment. Risk and Return, Avenues of Investment - Equity shares, Preference shares, Bonds & Debentures, Insurance Schemes, Mutual Funds, Index Funds. Indian Security Markets - Primary Market, Secondary Market and Derivative Market. Responsible Investment.

<b>Module No. 2: Fundamental Analysis</b>	<b>08</b>
---	-----------

Top down and bottom up approaches, Analysis of international & domestic economic scenario, Industry analysis, Company analysis (Quality of management, financial analysis: Both Annual and Quarterly, Income statement analysis, position statement analysis including key financial ratios, Cash flow statement analysis, Industry market ratios: PE, PEG, Price over sales, Price over book value, EVA), Understanding Shareholding pattern of the company.

<b>Module No. 3: Technical Analysis</b>	<b>08</b>
---	-----------

Trading rules (credit balance theory, confidence index, filter rules, market breath, advances vs declines and charting (use of historic prices, simple moving average and MACD) basic and advanced interactive charts. Do's & Don'ts of investing in markets.

<b>Module No. 4: Indian Stock Market</b>	<b>08</b>
--	-----------

Market Participants: Stock Broker, Investor, Depositories, Clearing House, Stock Exchanges. Role of stock exchange, Stock exchanges in India- BSE, NSE and MCX. Security Market Indices: Nifty, Sensex and Sectoral indices, Sources of financial information. Trading in securities: Demat trading, types of orders, using brokerage and analyst recommendations

<b>Module 5: Investing in Mutual Funds</b>	<b>08</b>
--	-----------

Concept and background on Mutual Funds: Advantages, Disadvantages of investing in Mutual Funds, Types of Mutual funds- Open ended, close ended, equity, debt, hybrid, index funds and money market funds. Factors affecting choice of mutual funds. CRISIL mutual fund ranking and its usage, calculation and use of Net Asset Value.

**Skill Development Activities:**

1. Work on the spreadsheet for doing basic calculations in finance.
2. Learners will also practice technical analysis with the help of relevant software.
3. Practice use of Technical charts in predicting price movements through line chart, bar chart, candle and stick chart, etc., moving averages, exponential moving average.
4. Calculate of risk and return of stocks using price history available on NSE website.
5. Prepare equity research report-use of spreadsheets in valuation of securities,

fundamental analysis of securities with the help of qualitative and quantitative data available in respect of companies on various financial websites, etc.

6. Any other activities, which are relevant to the course.

**Text Books:**

**Third Semester B.Com.  
Academic Year 2023-24**

<b>Name of the Program:</b> Bachelor of Commerce (B.Com.) <b>Course Code:</b> B.Com.3.1 <b>Name of the Course:</b> Corporate Accounting		
Course Credits	No. of Hours per Week	Total No. of Teaching Hours
4 Credits	3+2 Hrs	56 Hrs
<b>Pedagogy:</b> Classrooms lecture, Case studies, Tutorial Classes, Group discussion, Seminar & field work etc.,		
<b>Course Outcomes:</b> On successful completion of the course, the students will be able to <ul style="list-style-type: none"> <li>a) Understand the treatment of underwriting of shares.</li> <li>b) Comprehend the computation of profit prior to incorporation.</li> <li>c) Know the valuation of intangible assets.</li> <li>d) Know the valuation of shares.</li> <li>e) Prepare the financial statements of companies as per companies act, 2013.</li> </ul>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No.1: Underwriting of Shares</b>		<b>12</b>
Introduction - Meaning of Underwriting - SEBI regulations regarding underwriting; Underwriting commission. Underwriter - functions - Advantages of Underwriting, Types of underwriting - Marked and Unmarked Applications - Determination of Liability in respect of underwriting contract - when fully underwritten and partially underwritten - with and without firm underwriting problem.		
<b>Module No.2: Profit Prior to Incorporation</b>		<b>10</b>
Introduction - Meaning - calculation of sales ratio - time ratio - weighted ratio - treatment of capital and revenue expenditure - Ascertainment of pre-incorporation and post-incorporation profits by preparing statement of Profit and Loss and Balance Sheet as per schedule III of companies Act, 2013.		
<b>Module No.3 Valuation of Intangible Assets</b>		<b>10</b>
Introduction - Valuation of Goodwill - factors influencing goodwill, circumstances of valuation of goodwill - Methods of Valuation of Goodwill: Average Profit Method, Capitalization of average Profit Method, Super Profit Method, Capitalization of Super Profit Method, and Annuity Method - Problems. Brand valuation and Intellectual Property Rights (IPR).		
<b>Module No.4: Valuation of Shares</b>		<b>10</b>
Introduction - Meaning - Need for Valuation - Factors Affecting Valuation - Methods of Valuation: Intrinsic Value Method, Yield Method, Earning Capacity Method, Fair Value of shares. Rights Issue and Valuation of Rights Issue, Valuation of Warrants.		
<b>Module 5: Financial Statements of Companies</b>		<b>14</b>
Statutory Provisions regarding preparation of financial statements of companies as per schedule III of companies act, 2013 and IND AS-1 - Treatment of Special Items - Tax deducted at source - Advance payment of Tax - Provision for Tax - Depreciation - Interest on debentures - Dividends - Rules regarding payment of dividends - Transfer to Reserves - Preparation of Statement of profit and loss and Balance Sheet.		

**Skill Development Activities:**

1. Compile the list of Indian companies which have issued shares through IPO/FPO in the current financial year.
2. Determine Underwriters' Liability in case of an IPO, with imaginary figures. • Present the format of 'Statement of Profit and Loss', 'Balance Sheet' and 'Statement of Changes in Equity', with imaginary figures
3. Collect financial statement of a company and calculate intrinsic value of an equity share..
4. Collect annual report of a Company and List out its assets and Liabilities.
5. Collection of latest financial statements of a company and find out the intrinsic value of shares
6. Collect the annual reports of company and calculate the value of goodwill under different methods
7. Any other activities, which are relevant to the course.

**Text Books:**

1. J.R.Monga, Fundamentals of Corporate Accounting. Mayur Paper Backs, New Delhi.
2. M.C.Shukla, T.S.Grewal, and S.C.Gupta. Advanced Accounts. Vol.-II. S.Chand & Co., New Delhi.
3. S.N. Maheshwari, and S. K. Maheshwari. Corporate Accounting. Vikas Publishing House, New Delhi.
4. Ashok Sehgal, Fundamentals of Corporate Accounting. Taxman Publication, New Delhi.
5. V.K.Goyal and Ruchi Goyal, Corporate Accounting. PHI Learning.
6. Jain, S.P. and K.L.Narang. Corporate Accounting. Kalyani Publishers, New Delhi.
7. Bhushan Kumar Goyal, Fundamentals of Corporate Accounting, International Book House
8. P.C.Tulsian and Bharat Tulsian, Corporate Accounting, S.Chand
9. Amitabha Mukherjee, Mohammed Hanif, Corporate Accounting, McGraw Hill Education
10. Arulanandam & Raman; Corporate Accounting – II
11. Madegowda J – Advanced corporate accounting, HPH
12. Soundarajan. A & K. Venkataramana, Corporate Accounting, VBH.
13. S.P.Jain and K.L.Narang – Corporate Accounting
14. S.Bhat- Corporate Accounting.
15. S.P. Iyengar, Advanced Accountancy, Sultan Chand
16. R.L.Gupta, Advanced Accountancy.
17. Anil Kumar.S, Rajesh Kumar.V and Mariyappa.B, Corporate Accounting, HPH.

**Note: Latest edition of text books may be used.**

<b>Name of the Program:</b> Bachelor of Commerce (B.Com.) <b>Course Code:</b> B.Com.3.2 <b>Name of the Course:</b> Business Statistics		
<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>3+2 Hrs</b>	<b>56 Hrs</b>
<b>Pedagogy:</b> Classrooms lecture, Case studies, Tutorial Classes, Group discussion, Seminar & field work etc.,		
<b>Course Outcomes:</b> On successful completion of the course, the students will be able to <ol style="list-style-type: none"> <li>Familiarizes statistical data and descriptive statistics for business decision-making.</li> <li>Comprehend the measures of variation and measures of skewness.</li> <li>Demonstrate the use of probability and probability distributions in business.</li> <li>Validate the application of correlation and regression in business decisions.</li> <li>Show the use of index numbers in business.</li> </ol>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No.1: Statistical Data and Descriptive statistics.</b>		<b>14</b>
Nature and Classification of data: Univariate, bivariate and multivariate data; Measures of Central Tendency: Mathematical averages including arithmetic mean, Properties and applications. Positional Averages - Mode and Median (including graphic determination).		
<b>Module No.2: Measures of Variation: and Skewness</b>		<b>12</b>
Measures of Variation: absolute and relative. Range, quartile deviation, mean deviation, standard deviation, and their coefficients, Properties of standard deviation/variance. Skewness: Meaning, Measurement using Karl Pearson and Bowley's measures; concept of Kurtosis.		
<b>Module No.3: Probability Distributions</b>		<b>10</b>
Theory of Probability. Approaches to the calculation of probability; Calculation of event Probabilities. Addition and multiplication laws of probability (Proof not required); Conditional probability and Bayes' Theorem (Proof not required)- Expectation and variance of a random variable - Probability distributions - Binomial distribution: Probability distribution function, Constants, Shape, Fitting of binomial distribution - Poisson distribution: Probability function, (including Poisson approximation to binomial distribution), Constants, Fitting of Poisson distribution- Normal distribution: Probability distribution function, Properties of normal curve, Simple problems.		
<b>Module No.4: Correlation and Regression Analysis</b>		<b>12</b>
<b>Correlation Analysis:</b> Meaning of Correlation: - types of correlation- Positive and negative correlation-simple, partial, and multiple correlation. linear and Non-linear correlation and Scatter diagram, Pearson's co-efficient of Correlation; Correlation and Probable error; Spearman's Rank Correlation co-efficient.- problems.		

**Regression Analysis:** meaning and definition- regression lines, Regression equations and estimation; Properties of regression coefficients; Relationship between Correlation and Regression coefficients- problems.

**Module 5: Index Numbers**

**08**

Meaning and uses of index numbers; Construction of index numbers: Fisher's ideal index number with Time Reversal and Factor Reversal Tests. Construction of consumer price indices Using Aggregative Expenditure method and Family Budget method.

**Skill Development Activities:**

1. Application of MS Excel Functions in statistical decision making and students should submit output of the same.
2. Collect the age statistics of 10 new married couples calculate Correlation coefficient.
3. Recall the use of probability theory in business.
4. Identify the applicability of correlation and regression in business decision making.
5. Construct consumer price indices with imaginary figures.
6. Any other activities, which are relevant to the course.

**Text Books:**

1. Levin, Richard, David S. Rubin, Sanjay Rastogi, and H M Siddiqui. Statistics for Management. 7th ed., Pearson Education.
2. David M. Levine, Mark L. Berenson, Timothy C. Krehbiel, P. K. Viswanathan, Business Statistics: A First Course, Pearson Education.
3. Siegel Andrew F. Practical Business Statistics. McGraw Hill Education.
4. Gupta, S.P., and Archana Agarwal. Business Statistics, Sultan Chand and Sons, New Delhi.
5. Vohra N.D., Business Statistics, McGraw Hill Education.
6. Murray R Spiegel, Larry J. Stephens, Narinder Kumar. Statistics (Schaum's Outline Series), McGraw Hill Education.
7. Gupta, S.C. Fundamentals of Statistics. Himalaya Publishing House.
8. Anderson, Sweeney, and Williams, Statistics for Students of Economics and Business, Cengage Learning.

**Note: Latest edition of text books may be used.**

<b>Name of the Program:</b> Bachelor of Commerce (B.Com.) <b>Course Code:</b> B.Com.3.3 <b>Name of the Course:</b> Cost Accounting		
<b>Course Credits</b>	<b>No. of Hours per Week</b>	<b>Total No. of Teaching Hours</b>
<b>4 Credits</b>	<b>3+2 Hrs</b>	<b>56 Hrs</b>
<b>Pedagogy:</b> Classrooms lecture, Case studies, Tutorial classes, Group discussion, Seminar & field work etc.,		
<b>Course Outcomes:</b> On successful completion of the course, the students will be able to <ul style="list-style-type: none"> <li>a) Understand concepts of cost accounting &amp; Methods of Costing.</li> <li>b) Outline the Procedure and documentations involved in procurement of materials &amp; compute the valuation of Inventory.</li> <li>c) Make use of payroll procedures &amp; compute idle and overtime.</li> <li>d) Discuss the methods of allocation, apportionment &amp; absorption of overheads.</li> <li>e) Prepare cost sheet &amp; discuss cost allocation under ABC.</li> </ul>		
<b>Syllabus:</b>		<b>Hours</b>
<b>Module No. 1: Introduction to Cost Accounting</b>		<b>12</b>
Introduction- Meaning and definition- Objectives, Importance and Uses of Cost Accounting, Difference between Cost Accounting and Financial Accounting; Various Elements of Cost and Classification of Cost; Cost object, Cost unit, Cost driver, cost centre; Cost reduction and Cost control; Methods and Techniques of Costing (Meanings Only); Use of IT in Cost Accounting; Limitations of Cost Accounting; Cost Sheet: Meaning and Cost heads in a Cost Sheet, Presentation of Cost Information in Cost Sheet. Problems on Cost Sheet, Tenders and Quotations.		
<b>Module No. 2: Material Cost</b>		<b>12</b>
Materials: Meaning, Importance and Types of Materials – Direct and Indirect Material Materials material control.- Inventory control Technique of inventory control, problems on level setting and EOQ. Procurement- Procedure for procurement of materials and documentation involved in materials accounting – Material Storage: Duties of Store keeper, pricing of material issues, preparation of Stores Ledger Account – FIFO, LIFO, Simple Average Price and Weighted Average Price Methods – Problems.		
<b>Module No. 3: Employee Cost</b>		<b>10</b>
Introduction – Employee Cost – types of labour cost- Labour Cost Control – time keeping and time booking and Payroll Procedure -Preparation of Payroll: Idle Time Causes and Treatment of Normal and Abnormal Idle time, Over Time Causes and Treatment- Labour Turnover- Meaning, Reasons and Effects of Labour turnover. Methods of Wage Payment: Time rates system and piece rates system, and the Incentive schemes- Halsey plan, Rowan plan and Taylor differential piece rates system- problems.		
<b>Module No. 4: Overheads Cost</b>		<b>12</b>
Introduction- Meaning and Classification of Overheads; Accounting and Control of Manufacturing Overheads: Estimation and Collection, Cost Allocation, Apportionment, Re-apportionment and Absorption of Manufacturing Overheads; Problems on Primary and Secondary overheads distribution using Reciprocal Service Methods (Repeated Distribution Method and Simultaneous Equation Method); Absorption of Overheads: Meaning and Methods of Absorption of Overheads; Problems on Machine Hour Rate.		

<b>Module No.5: Reconciliation of Cost and Financial Accounts</b>	<b>10</b>
<p>Introduction – meaning of reconciliation, Reasons for differences in Profits under Financial and Cost Accounts; Procedure for Reconciliation – Ascertainment of Profits as per Financial Accounts and Cost Accounts and Reconciliation of Profits of both set of Accounts – Preparation of Reconciliation Statement – Problems.</p>	
<p><b>Skill Developments Activities:</b></p> <ol style="list-style-type: none"> <li>1. Visit any Manufacturing entity, collect the method of inventory valuation adopted &amp; procedure involved in procuring inventory.</li> <li>2. Draw the format of five documents used for material accounting</li> <li>3. Prepare dummy Payroll with imaginary figures.</li> <li>4. Visit any large-scale organisation, identify the techniques used for controlling administrative, Selling &amp; distribution overheads.</li> <li>5. Visit any manufacturing entity and collect the cost data and prepare the cost sheet.</li> <li>6. Any other activities, which are relevant to the course.</li> </ol>

7. Cost Accounting: S.N. Maheshwari

**ENB22001****SEMESTER II****DISCIPLINE SPECIFIC COURSE - 5****2.5 FINANCIAL ACCOUNTING II****L:T:P-5:1:0****Course Outcome:**

On successful completion of this course the students are able to:

CO1: Understand in depth the details of consignment transaction

CO2: Learn in depth the accounting procedure of joint venture and able to maintain the books of accounts

CO3: Identify the causes for differences between the cash balance in cash book and pass book statement

CO4: Learn the details of hire purchase and installment system

CO5: Identify and recognize the capital and revenue items and able to prepare the financial statement of nonprofit organisation

CO6: Understand the details of royalties and able to Write down the various ledger accounts

**Unit 1: Accounting for consignment transaction**

Meaning, difference between consignment and sale, proforma invoice and account sales, types of commission valuation of goods lost in transit-valuation of stock on consignment, goods sent to branch at cost price and at invoice price, problems on cost price and invoice price.

**Unit 2: Joint Venture**

Meaning – features - differences between joint venture and partnership, joint venture and consignment. Accounting procedures: Joint Bank Account, Records Maintained by Co-venturer of (a) all transactions (b) only his own transactions (Memorandum joint venture account). Problems on joint bank account method only.

**Unit 3: Accounting for Hire purchase and Instalment system**

Meaning, features, preparation of statement of analysis, ascertainment of cash price of an asset, problems on hire purchase system. Accounting for instalment system- meaning, features and differences between hire- purchase and instalment system, problems on instalment system

**Unit 4: Accounting for royalties**

Meaning and types, minimum rent, short working, and recoupment of short working-analytical table-preparation of ledger accounts in the books of both parties excluding sublease

**Unit 5: - Bank Reconciliation Statement**

Meaning and need, reasons for the differences between the cash balance shown in cash book and pass book. Problems on - Bank Reconciliation Statement

**Unit 6: - Financial statement of non-profit organization**

Meaning, recognition of capital and revenue items, receipts and payment account, income and expenditure account, preparation of income and expenditure account and balance sheet

**4.3 CORPORATE ACCOUNTING- II**

**Course Outcome:**

On successful completion of this course the students can:

C01: Learn in depth the latest regulation of Insurance for the preparation of final accounts

C02: Understand the characteristics of Human Resource Accounting

C03: Identify the characteristics of intermediate in stock exchange and start career as stock Broker

C04: Prepare final accounts of life insurance as per latest regulations

C05: Understand the details of Inflation accounting

C06: Learn in depth about Holding and Subsidiary company and play a vital role in preparation of consolidated Balance Sheet

C07: Learn the details of Electricity Supply Act 2003 and able to prepare final accounts of electricity companies

**Unit 1: Accounting for General Insurance Companies**

Fire and marine insurance, preparation of final accounts as per latest regulations

**Unit 2: Accounting for Life Insurance**

Preparation of valuation balance sheet, preparation of final accounts as per latest regulations.

**Unit 3: Final accounts of Electricity Companies**

Forms of financial statements, differences between depreciation as per companies act and as per tariff policy under Electricity supply act 2003

**Unit 4: Holding Company Accounts**

Accounting for Holding Company: Preparation of Consolidated Balance Sheet, Minority interest, Computation of Goodwill/ Capital Reserve, Revaluation of assets of subsidiary Company.

**Unit 5: Human Resource Accounting**

Accounting Aspects of Human Capital –Meaning, Basic Premises, Need and Significance of HRA, Advantages and Limitation of HRA; Monetary and Non-Monetary Models; Cost Based Models- Acquisition Cost Method, Replacement Cost Model, Opportunity Cost Method, standard cost method, Current Purchasing Power Method (C.P.P.M.).

**Unit 6: Inflation accounting and income measurement**

Inflation Accounting: Concept – Limitations of historical based-cost financial statements – Methods of Inflation Accounting: Current Purchasing Power Method – Current Cost Accounting Method (Including problems). Income Concepts for financial reporting – Measurement and Reporting of Revenues, Expenses, Gains and Losses (Theory only) – Analysis of Changes in Gross Profit (Including problems).

**4.5 QUANTITATIVE TECHNIQUES**

**L:T:P-3:1:0****Course Outcome:**

On successful completion of this course the students can:

CO1: Understand in depth the classification and operation of matrices and determinants

CO2: Learn the details of progression and their application to business

CO3: Understand in detail the concept of Ratio, proportion and variation

CO4: Learn in depth the Laws of indices and logarithms and its application to solve business problem

CO5: Understand the details of simple interest and compound interest

CO6: Find the value of present worth, bankers gain, banker's and true discount

**Unit 1: Indices and logarithms**

Meaning-Basic laws of Indices and their application for simplification, laws of logarithms-common logarithms, application of log table for simplification.

**Unit 2: Progression**

Meaning of sequence, progression; types of progressions; arithmetic progression and geometric progression-general terms and sum of 'n' term of Arithmetic progression and Geometric progression-Application problems on Arithmetic progression and geometric progression.

**Unit 3: Ratio, proportion, variation, and percentages**

Meaning and their application to business

**Unit 4: Simple interest and compound interest-Bills discounting-**

Meaning-concepts; Bankers discount, true discount, bankers' gain and present worth of bill.

**Unit 5: Matrices and determinants**

Meaning and types of matrices, matrix operation - addition, subtraction and multiplication  
Determinants of a matrix and its evaluation; solutions of linear equations by using cramer's rule.

## 6.1 PRINCIPLES AND PRACTICE OF AUDITING

**L:T:P-3:1:0**

### **Course Outcome:**

On successful completion of this course the students can:

C01: Learn in depth to practice as an Auditor

C02: Learn the characteristics of errors and frauds and minimize them in maintenance of books of accounts

C03: Identify in detail the importance of Internal Control and Internal Check

C04: Identify the details of audit planning

C05: Learn in depth verification and valuation of Assets and Liabilities

C06: Deliberate in details with examples audit of different types of organizations

### **Unit 1: Introduction**

Meaning and definition of auditing- Nature and importance of auditing objectives of auditing-advantages, different types of audit, qualities of an auditor- audit report- auditing in a computerized environment.

### **Unit 2: Audit planning and control**

Factors affecting audit planning - audit programme advantages-audit note book- appointment of a company auditor- qualifications, disqualifications-rights and duties of a company auditor.

### **Unit 3: Internal check and internal control**

Meaning and objective-internal check for various transactions-limitations of internal control. Vouching-meaning and importance – vouching of cash transactions.

### **Unit 4: verification and valuation of assets and liabilities**

Meaning- problems in valuation of assets, verification and valuation of assets and liabilities- goodwill, Stock in trade, Investments, Patents, Copy rights and trademarks, plant and machinery- capital, creditors, debentures, outstanding expenses, contingent liabilities.

### **Unit 5: Audit of different types of organizations**

Audit of sole trader, audit of partnership firms, audit of hotels, audit of educational institutions, audit of trust, audit of co-operative societies.

B.Com CBCS Syllabus 2019-20

**GROUP A1**  
**SKILL ENHANCEMENT COURSE-1**  
**COMPUTERIZED ACCOUNTING SYSTEM**

**L: T: P- 2:0:2**

**Course Outcome:**

On successful completion of this course the students can:

C01: Learn in depth the characteristics of computerized accounting system

C02: Identify the reason for differences between cash book and bank statement

C03: Learn in details with examples computerised accounting software

C04: Specify in details with examples periodic reports

C05: Learn the classification and characteristics of data entry system

C06: Prepare the quotation, purchase order etc., using computer software

**Unit 1: a) – Computerised Accounting System**

Meaning of computerised Accounting Traditional / Manual System of Accounting; process of Computerised Accounting; features of Computerised Accounting; difference between manual accounting system and computerised accounting. Process/Steps in Computerised Financial Accounting; Advantages of the Computerised Financial Accounting System; Various Components of a Computerised Financial Accounting System

**b) - Voucher Types of Voucher; Bank Payment Voucher; Bank Receipt Voucher; Cash Payment Voucher ; Cash Receipt Voucher ; General Voucher.**

**Unit 2: - Bank Reconciliation Statement**

Common transactions with bank; Cashbook and bank statement ; Reasons for difference between cash book and bank statement ; Bank reconciliation statement

**Unit 3: Computerized Accounting**

Scope of Computerized Accounting; Computerized Accounting Software; Creating a Corporation in Computerized Accounting Software. Chart of Accounts ; Creating Chart of Accounts ; Update Chart of accounts ; Charts of accounts Beginning Balances ; Organizational codes ; Editing charts of accounts;

**Unit 4: Periodic Reports**

General Journal ; Ledger; Trial Balance ; Income Statement ; Balance Sheet Inventory report; Account Receivable report; Account Payable report

**Unit 5: Data Entry System**

Voucher and Entry of vouchers ; Sales Entries ; Purchase Entries; Cash Receipt Entries ; Cash Payment Entries ; Bank transaction Entries Maintain the Records of Sales &

Customers ; Quotations to customers ; Sales orders ; Sales Invoices ; Sales receipts ; Record of Customers ; Sales report ; Customer Report.

**Unit 6: Maintain the Records of Purchases and Vendors/ Suppliers**

Preparing the Quotations; Purchase orders; Payment to vendors; Record of vendors; Utility Bills Payable; Purchase Report; Vendors Report.

**GROUP A1**  
**SKILL ENHANCEMENT COURSE-2**  
**E-FILLING OF RETURNS**

**L:T:P-2:0:2**

**Course Outcome:**

On successful completion of this course the students can:

CO1: Learn in depth the types of e-filing and e-verification of returns

CO2: Specify in details with examples E-filing of returns

CO3: Understand the details of steps involved in e- filling of different forms of IT Return

CO4: Learn the details of E-filing of returns under GST

CO5: Learn the details of returns to be filled by composition tax payer

**Unit 1: E-filing of Returns**

Meaning- objectives- advantages, features of E-filing; Types of e- filing, e-filing Process flow, Types of e-Verification of Returns, How to e-file, who should file e-return;

**Unit 2: ITR-1 and ITR2- ITR-3- ITR-4 introduction**

Format- Heads of income covered- contents- filling the return- steps involved in filing of ITR-1, ITR-2, ITR-3, ITR-4

**Unit 3: ITR-5- ITR-6; ITR-7- introduction**

Format- Heads of income covered- contents- filling the return- steps involved in filing of ITR-5, ITR-6, ITR 7.

**Unit 4: E-filing of returns under GST**

GSTR-1- GSTR-1A, GSTR-2, GSTR 2A; GSTR-3, GSTR 3A, GSTR-3B, GSTR 9, Assesses required to file, contents to be filled, Documents required, steps in filing the above returns;

**Unit 5: Returns to be filed by composition tax payers**

GSTR-4A, GSTR-4, GSTR-9; Returns to be submitted by an input service distributor- GSTR 6, GSTR-6A; Returns to be filed by Tax Deductor-GSTR-7, GSTR-7A;Contents- steps to be followed in filing the above returns

**SKILL ENHANCEMENT COURSE -3**  
**PRINCIPLES AND PRACTICE OF GENERAL INSURANCE**

**L: T: P-3:1:0**

**Course Outcome:**

On successful completion of this course the students can:

CO1: Identify the classification and characteristics of General insurance

CO2: Learn the details of fire insurance policies, insurance coverage and consequential loss

CO3: Deliberate in details with examples underwriting and settlement of claims

CO4: Understand in depth the details of claim procedure and Settlement limitation

CO5: Learn in detail with examples non life miscellaneous insurance

**Unit 1: Introduction**

Meaning of General Insurance – The Evolution and Growth of General Insurance – Types of General Insurance – Fundamentals of General Insurance –Recent innovations. Organization and Management of General Insurance Companies – Regulatory Framework for General Insurance in India.

**Unit 2: Fire Insurance**

Standard policies – Fire Insurance coverage – Consequential loss (fire) Insurance policies – Declaration policies, Marine Insurance: Marine Cargo policies – Hull policies – Institute cargo clauses – Institute hull clauses – Open policies – Accumulation of risk per location - Motor Insurance: Types of policies – Third party Insurance – Comprehensive coverage – Conditions and Exclusions – premium.

**Unit 3: Non life miscellaneous insurances**

Personal Accident Insurance, Health Insurance and Mediclaim policies, Liability Insurance, Burglary Insurance other Miscellaneous Insurances, Rural Insurance covers, Engineering Insurance and its Consequential loss covers, Aviation hull and Aviation liability.

**Unit 4: Underwriting and Settlement of Claims**

Proposal forms, Cover notes, Certificates of Insurance, Endorsements, Moral and Physical Hazards, Statistics Spreading of Risks, Premium Rating, Premium Loading.

**Unit 5: Settlement of Claims**

Claim procedure, TPAs: Claim forms, Investigation / Assessment, Essential Claim Documents, Settlement Limitation, Arbitration, Loss Minimization and Salvage.

**LOGISTICS AND SUPPLY CHAIN MANAGEMENT**

**L: T: P-3:1:0**

**Course Outcome:**

On successful completion of this course the students can:

CO1: Understand in depth supply chain management

CO2: Write down the details of designing the supply chain network

CO3: Learn in details with examples designing and planning transportation network

CO4: Learn the details of Information technology in supply chain

CO5: Identify the dimensions of logistics

CO6: Understand in depth the details of demand management and customer care

**Unit 1: Introduction to Supply Chain Management**

Supply chain – objectives, importance, decision phases, process view, competitive and supply chain strategies, achieving strategic fit, supply chain drivers, obstacles, framework, facilities, inventory, transportation, information, sourcing, pricing.

**Unit 2: Designing the Supply Chain Network**

Designing the distribution network, role of distribution, factors influencing distribution, design options – e-business and its impact, distribution networks in practice, network design in the supply chain, role of network, factors affecting the network design decisions, modelling for supply chain.

**Unit 3: Designing and Planning Transportation Networks**

Role of transportation, modes and their performance, transportation, infrastructure and policies, design options and their trade-offs, tailored transportation. SOURCING AND PRICING: Sourcing, In-house or Outsource – 3<sup>rd</sup> and 4<sup>th</sup> PLs – supplier scoring and assessment, selection, design collaboration, procurement process, sourcing planning and analysis. Pricing and revenue management for multiple customers, perishable products, seasonal demand, bulk and spot contracts.

**Unit 4: Information Technology in the Supply Chain - IT Framework**

Customer relationship management, internal supply chain management – supplier relationship management, transaction management, future of IT. Coordination in a supply chain: Lack of supply chain coordination and the Bullwhip effect, obstacle to coordination, managerial levers, building partnerships and trust, continuous replenishment and vendor-managed inventories, collaborative planning, forecasting and replenishment.

**Unit 5: Dimensions of Logistics**

Introduction: A macro and micro dimension, logistics interfaces with other areas, approach to analysing logistics systems, logistics and systems analysis, techniques of logistics system analysis – factors affecting the cost and importance of logistics.

**Unit 6: Demand Management and Customer Service**

Outbound to customer logistics systems, Demand Management, Traditional Forecasting, CPFRP, customer service, expected cost of stock-outs, channels of distribution.

**SKILL ENHANCEMENT COURSE-5**  
**CORPORATE TAX PLANNING**

**L: T: P-3:1:0**

**Course Outcome:**

On successful completion of this course the students can:

- C01: Learn in depth and specify the tax saving strategies for decision making
- C02: Understand in depth the provisions and laws of tax and able to become tax consultant
- C03: Identify the tax provisions and deductions and able to become tax planner with reference to business restructuring
- C04: Write down the details and identify special provisions in respect of Free Trade Zone, Infrastructure Development and Backward areas
- C05: Learn in detail the provision of Income Tax Act relating to amalgamation
- C06: Understand the classification and characteristics of taxation relief
- C07: Deliberate the provisions of IT Act in relation to managerial decisions

**Unit 1: Introduction:**

Corporation tax, Tax Planning, Tax Evasion, Tax Avoidance, Tax Management, Dividend Tax, Domestic Company, Foreign Company.

- Unit 2:** a) **Tax Planning for new Business:** Location and Nature of Business, Forms of Business Organization  
b) **Tax Planning and Financial Management Decisions:** Tax Planning relating to Capital Structure Decision, Dividend Policy, Inter-Corporate Dividends and Bonus Shares

**Unit 3: Tax Planning and Managerial Decisions**

Tax planning in respect of Own or Lease, sale of assets used for scientific research, make or buy decisions, repair, replace, renewal or renovation of an asset, shut-down or continue decisions.

**Unit 4: Special Tax Provisions**

Tax provisions in respect of Free Trade Zone, Tax provisions in respect of Infrastructure Development, Tax provisions in respect of Backward Areas, Tax provisions in respect of Tax Incentives to Exporters.

**Unit 5: Amalgamation**

Meaning of amalgamation under the Income-tax Act, Transactions not treated as amalgamation, Actual cost and written down value when assets are transferred in a scheme of amalgamation, When a capital asset (other than a block of assets) is transferred, When a block of asset is transferred, Assets in amalgamation not treated as transfer, Transfer of capital assets to amalgamated Indian company.

**Unit 6: Tax Payment**

Tax deduction at source, Tax collection at source, and Advance payment of tax, Relief for double taxation [Secs. 90, 90A and 91], ADT agreements [Sec. 90], Modes of granting relief under ADT agreements , Unilateral relief [Sec. 91], Double taxation relief in case of specified associations [Sec. 90A]

**COMPANY LAW AND SECRETARIAL PRACTICE**

**L: T: P-3:1:0**

**Course Outcome:**

On successful completion of this course the students can:

C01: Understand in depth features of Companies Act -2013 and types of companies

C02: Learn in details the promotion of a Joint Stock Company and conversion

C03: Write down the details of conducting the Board of Directors and Subcommittee meetings

C04: Understand the procedure for alteration of Articles of Association and Memorandum of Association

C05: Learn in detail the appointment of company secretary

C06: Learn the preparation of minutes of various meetings

**Unit 1: Companies Act**

Introduction- companies Act 2013- features of companies Act - 2013, Types of companies- Public companies, Pvt company, statutory corporation, One person company, Dormant company, Associate company, Small company, Limited Liability Partnership- Application of Company Law to banking/insurance sector- Registrar of companies- functions, Ministry of Corporate affairs-functions; SEBI-functions of SEBI.

**Unit 2: Secretary**

Definition, Who can be company secretary, Appointment, General Legal position, Duties of a Company Secretary, Rights of Company Secretary, Liabilities of Company Secretary, Qualification for Appointment as secretary, Dismissal of the Secretary, Secretary in the Whole time practice, Secretarial Compliance certificate, Specimen form

**Unit 3: Company Formation and Conversion**

Company Formation and Conversion Choice of the form of the business entity, Conversion/reconversion of one form of business entity into another, Procedure for incorporation of private/public companies, Companies limited by guarantee and unlimited companies and their conversion/re-conversion registration., Obtaining certificate of commencement of business, obtaining certificate of re-registration, Commencement of new business and certification,

**Unit 4: Procedure for alteration of various clauses of memorandum**

Procedures for alteration of articles, Effect of alteration, specimen forms: Procedure for issue of Shares – Public Issue, Rights Issue and Bonus Shares, Issue of Shares at Par/Premium/Discount; Issue of Shares on Preferential /Private Placement Basis – Allotment, Calls on Shares and Issue of Certificates – Issue of Sweat Equity Shares,

Employees Stock Option Scheme (ESOPs), Employees Stock Purchase Scheme (ESPS), Shares with Differential Voting Rights

### **Unit 5: Meetings**

Collective Decision Making Forums, Authority, Accountability, Delegation and Responsibility ; Board Meetings , Convening and Management of Meetings of Board and Committees; Preparation of Notices and Agenda Papers, General Meetings, Convening and Management of Statutory Meeting, Annual and Extra-Ordinary General Meetings, Voting through Electronic Means; Conducting a Poll and Adjournment of a Meeting; Post-Meeting Formalities, Preparation of Minutes and Dissemination of Information and Decisions

**ENE25001 / ENF25001****GROUP A2****SKILL ENHANCEMENT COURSE-7****QUANTITATIVE DECISION TOOLS****L: T: P-3:1:0****Course Outcome:**

On successful completion of this course the students can:

C01: Understand in depth the characteristics and features of statistics

C02: Learn the details of methods and sources of collection of data

C03: Understand in details with examples Measures of central tendency

C04: Understand in detail the characteristics and application of correlation and regression

C05: Understand in details the classification and application of correlation

C06: Deliberate the characteristics of Index numbers

C07: Learn the characteristics of Testing of hypothesis with application

C08: Learn the creation of variables and entering data using SPSS

**Unit 1: Introduction**

Meaning and definition of statistics, functions, advantages, limitations- collection of data - methods of collecting primary data, and sources of secondary data - classification and tabulation-SPSS –Introduction, uses, creation of variables and entering data.

**Unit 2: Measure of central tendency**

Meaning and Definition of Averages-Arithmetic mean, Median, Mode [grouping method], standard deviation, Calculation of mean, median and Standard deviation using SPSS.

**Unit 3: Correlation**

Meaning and Definition, types of correlation, Methods of calculating correlation coefficient [Karl pear sons and Spearman's correlation] calculation of correlation using SPSS; Regression-Meaning and Definition, Distinction between correlation and Regression, Regression equations and estimations Calculation of Regression using SPSS.

**Unit 4: Index Numbers**

Definition – Types – Methods of Construction and Problems in the Construction – Cost of living index numbers.

Note-Besides solving problems chapter-wise in class rooms, teach using SPSS in computer lab.

**Unit 5: Testing of Hypothesis**

Meaning of hypothesis, types of hypotheses, test of Significance Procedure of testing hypothesis – Z test, one sample t test, Chi square test.

**ENE26001 / ENF26001**

**GROUP A2**

**SKILL ENHANCEMENT COURSE-8**

**BUSINESS RESEARCH METHODS**

**L: T: P-3:1:0**

**Course Outcome:**

On successful completion of this course the students can:

CO1: Learn in depth different methods of research, methodology, data collection, analysis and interpretation of data to become a good business researcher

CO2: Understand and able to report about various issues of different organisations through research report

CO3: Understand the details of types of Business Research and Research design

CO4: Identify and contribute to the discipline of commerce and management through the research

CO5: Deliberate the details of Data analysis

CO6: Identify the details of Research Report

CO7: Specify in details with examples sampling and hypothesis testing

**Unit 1: Introduction to Business Research**

Meaning, types, criteria of good research, scientific approach to research in physical and management science, limitations of applying scientific methods in business research problems, ethical issues in business research, research process, problem formulation, preparation of business research plan/proposal.

**Unit 2: Business Research Design**

Types of business research, Exploratory, Descriptive, and Causal research, Exploratory research: Meaning, suitability, collection, hypothesis, formulation, Descriptive research: Meaning, types of descriptive studies, data collection methods, Causal research: Meaning, various types of experimental designs, types of errors affecting research design.

**Unit 3: Data Collection**

Primary and Secondary data – Sources – advantages/disadvantages, Data collection Methods – Observations, Survey, Interview and Questionnaire design, Qualitative Techniques of data collection. Measurement and Scaling Techniques: Nominal Scale, Ordinal Scale, Interval Scale, Rating Scale, Criteria for good measurement, attitude measurement.

**Unit 4: Sampling and Hypothesis Testing**

Sampling: Meaning, Steps in Sampling process, Types of Sampling – Probability and non probability Sampling Techniques, Errors in sampling. Hypothesis: Meaning, Types, characteristics, sources, Formulation of Hypothesis, Errors in hypothesis testing.

**Unit 5: Data Analysis**

Editing, Coding, Classification, Tabulation, Univariate, Bivariate and multivariate Analysis, Interpretation.

**Unit 6: Research Report**

Types, advantages, disadvantages, Components of research reports, format, chapterisation, language, referencing.

**PROJECT WORK**

**L:T:P- 1:0:3**

C1 - Proposal of Project Work - 15 Marks

C2 - Progress of Project Work - 15 Marks

Viva - 20 Marks

Valuation of Report - 50 Marks

**Course Outcome:**

On successful completion of the project work the students are able to:

C01: Understand in depth the gap between theory and practical through internship

C02: Understand in detail with examples the procedure and able to write a report on the various issues of an organization

C03: Convince and communicate effectively

C04: Learn in detail and able to absorb as an employee by the employer

C05: Specify and analyze the components of project report and prepare the report effectively

C06: develop leadership qualities

**ENE28001**

**GROUP B**  
**SEMESTER V**  
**DISCIPLINE SPECIFIC ELECTIVE**  
**CONSUMER AFFAIRS**

**L: T: P-4:1:0****Course Outcome:**

On successful completion of the project work the students are able to:

CO1: Learn conceptual frame work of consumer and consumer market

CO2: Understand in depth the characteristics of consumer protection law in India

CO3: Deliberate the details of role played by the advisory bodies at different level

CO4: Indentify the grievance redressal mechanism

CO5: Specify the details of role played by industry regulator in consumer protection

CO6: Understand in depth the consumer movement in India

**Unit 1: Conceptual Framework**

Consumer and Markets: Concept of Consumer, Nature of markets: Liberalization and Globalization of markets with special reference to Indian Consumer Markets, E-Commerce with reference to Indian Market, Concept of Price in Retail and Wholesale, Maximum Retail Price (MRP), Fair Price, GST, labelling and packaging along with relevant laws, Legal Metrology. Experiencing and Voicing Dissatisfaction: Consumer buying process, Consumer Satisfaction/dissatisfaction-Grievances-complaint, Consumer Complaining Behaviour: Alternatives available to Dissatisfied Consumers; Complaint Handling Process: ISO 10000 suite

**Unit 2: The Consumer Protection Law in India**

Objectives and Basic Concepts: Consumer rights and UN Guidelines on consumer protection, Consumer goods, defect in goods, spurious goods and services, service, deficiency in service, unfair trade practice, restrictive trade practice. Organizational set-up under the Consumer Protection Act

**Unit 3: Advisory Bodies**

Consumer Protection Councils at the Central, State and District Levels; Adjudicatory Bodies: District Forums, State Commissions, National Commission: Their Composition, Powers, and Jurisdiction (Pecuniary and Territorial), Role of Supreme Court under the CPA with important case law.

**Unit 4: Grievance Redressal Mechanism**

Grievance Redressal Mechanism under the Indian Consumer Protection Law , Who can file a complaint? Grounds of filing a complaint; Limitation period; Procedure for filing and

hearing of a complaint; Disposal of cases, Relief/Remedy available; Temporary Injunction, Enforcement of order, Appeal, frivolous and vexatious complaints; Offences and penalties. Leading Cases decided under Consumer Protection law by Supreme Court/National

Commission: Medical Negligence; Banking; Insurance; Housing & Real Estate; Electricity and Telecom Services; Education; Defective Products; Unfair Trade Practices.

### **Unit -5: Role of Industry Regulators in Consumer Protection.**

Banking: RBI and Banking Ombudsman. ii. Insurance: IRDA and Insurance Ombudsman iii. Telecommunication: TRAI iv. Food Products: FSSAI v. Electricity Supply: Electricity Regulatory Commission vi. Real Estate Regulatory Authority

### **Unit 6: Contemporary Issues in Consumer Affairs**

Consumer Movement in India: Evolution of Consumer Movement in India, Formation of consumer organizations and their role in consumer protection, Misleading Advertisements and sustainable consumption, National Consumer Helpline, Comparative Product testing, Sustainable consumption and energy ratings.

Quality and Standardization: Voluntary and Mandatory standards; Role of BIS, Indian Standards Mark (ISI), Ag-mark, Hallmarking, Licensing and Surveillance; Role of International Standards: ISO an Overview

**Note:** Unit 2, 3 and 4 refer to the Consumer Protection Act, 1986. Any change in law would be added appropriately after the new law is notified

- CO2: Understand the details of contract costing and process costing
- CO3: Identify reasons for reconciliation of cost and financial accounts
- CO4: Learn in depth the details of Activity based costing
- CO5: prepare the operating cost sheet

**Unit 1: Introduction to Costing Methods**

Meaning, Importance and Categories, Cost accounting Standards- Generally Accepted Cost Accounting Principles (GACAP)- Purpose, Objective and Applicability.

**Unit 2: Contract costing**

Introduction- Contract account, Profit on incomplete contracts, work in progress, Contractee's Accounts, Escalation clause.

**Unit 3: Process costing:** Introduction, Distinction between Job costing, and process costing, process losses, inter-process profits, Joint products and by-products- Meaning, features, differences, problems on process accounts including joint and by products.

**Unit 4: Operating Costing**

Introduction, transport costing, standing charges, operating/running charges, and preparations of operating cost sheet.

**Unit 5: Reconciliation of cost and financial accounts**

Meaning, need for reconciliation, reasons for disagreement, reconciliation procedure, problems on reconciliation.

**Unit 6: Activity based costing (ABC)**

Definition, Features, Advantages, Differences between ABC and traditional costing, Allocation of overheads; Objectives of ABC, Development of ABC, Implementation of ABC, Problems on Computation of Activity Based Costing and Traditional Costing;

**References:**

5. Cost Accounting: Jain & Narang
6. Cost Accounting: S.P. Iyengar

**ENE33001**

**GROUP B**  
**SEMESTER V**  
**DISCIPLINE SPECIFIC ELECTIVE**  
**RETAIL MANAGEMENT**

**L: T: P-4:1:0**

**Course Outcome:**

On successful completion of this course the students can:

- C01: Learn in depth the characteristics of retailing
- C02: Understand in depth the details of retail consumer
- C03: Identify and basis of retail market segmentation and strategies
- C04: Specify the factors determining the retail location selection
- C05: Understand in depth merchandise and managing them
- C06: Learn in depth the details of retail operation and retail pricing

**Unit 1: Introduction to Retailing**

Concept of retailing, Functions of retailing, Terms and Definition, retail formats and types, Retailing Channels, Retail industry in India, Importance of retailing, Changing trends in retailing.

**Unit 2: Understanding the Retail Consumer**

Retail consumer behaviour, Factors influencing the Retail consumer, Customer decision making process, Types of decision making, Market research for understanding retail consume.

**Unit 3: Retail Market Segmentation and Strategies**

Market Segmentation and its benefits, kinds of markets, definition of Retail strategy, Strategy for effective market segmentation, Strategies for penetration of new markets, Growth strategies, Retail value chain.

**Unit 4: Retail Location Selection**

Importance of Retail locations, Types of retail locations, Factors determining the location decision, Steps involved in choosing a retail locations, Measurement of success of location.

**Unit 5: Merchandise Management**

Meaning of Merchandising, Factors influencing Merchandising, Functions of Merchandising Manager, Merchandise planning, Merchandise buying, Analyzing Merchandise performance.

**Unit 6: Retail Operations and Retail Pricing**

Store administration, Premises management, Inventory Management, Store Management, receipt Management, Customer service, Retail Pricing, Factors influencing retail prices pricing strategies, controlling costs.

2. Retail Management: Text and Cases (English, Paperback, Swapna Pradhan
3. Retail Management; Principles and Practices – R. Sudarshan
4. Retail Management PB (English, Paperback, Mathur U C)

**ENF28001**

**GROUP C**  
**SEMESTER VI**  
**DISCIPLINE SPECIFIC ELECTIVE**  
**INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT**

**L: T: P-4:1:0**

**Course Outcome:**

On successful completion of this course the students can:

C01: Learn in depth the characteristics of investment

C02: Understand in depth characteristics of financial system and stock market

C03: Identify and use different models for portfolio analysis

C04: Learn in depth capital asset pricing model

C05: Identify the risk and return of investment

C06: Understand in depth portfolio selection

C07: Understand in depth the efficient market hypothesis and portfolio analysis

**Unit 1: Introduction to Investment**

Meaning, Financial and Economic Meaning, Characteristics, Objectives, Investment v/s Speculation, Investment v/s Gambling, Types of Investors and Investment avenues.

**Unit 2: Indian Financial System and Stock Market-Investment Planning,**

Introduction to Stock Market, Overview of Indian Financial System, Market Indices, Methods of Computation of Market Indices.

**Unit 3: Portfolio Management**

Meaning, Phases, Evolution, Role of Portfolio Management, Calculation of Risk and Return, Fundamental Analysis: Economic Analysis, Industry analysis and Company analysis and Technical Analysis: Meaning, Dow Theory, basic Principles, Trends and charts.

#### **Unit 4: Share and Bond Valuation-Share**

Concepts and present value, share valuation model, constant Growth Model, Multiple Growth Model, Discount rate, Multiplier Approach to share values and Regression Analysis. Bonds: Bond Returns, Prices, Pricing Theories, Bond Risks and Bond Duration.

#### **Unit 5: Efficient Market Hypothesis and Portfolio Analysis**

EMH: Random Walk Theory, the Efficient Market Hypothesis, Forms of Market Efficiency. Portfolio Analysis: Expected Return and Risk of Portfolio, Reduction of Portfolio Risk through Diversification, Portfolio with more than two Securities – solved examples.

#### **Unit 6: Portfolio Selection**

Feasible set of Portfolios, Selection of Optimal Portfolio, Limitations of Markowitz Model and Single Index Model and Multi Index Model. Capital Asset Pricing Model and Arbitrage Pricing Theory.

**DISCIPLINE SPECIFIC ELECTIVE**  
**FINANCIAL DERIVATIVES**

**L: T: P-4:1:0****Course Outcome:**

On successful completion of this course the students can:

CO1: Learn in depth the characteristics of financial derivatives and derivatives market

CO2: Deliberate the characteristics of futures and forwards

CO3: Understand in details with examples options

CO4: Deliberate the classification and characteristics of financial swaps

CO5: Write down the details of commodity market

CO6: Identify in depth credit derivatives

**Unit 1: Financial Derivatives**

Introduction, -meaning- Types of financial derivatives - Features of derivatives market - Factors contributing to the growth of derivatives - functions of derivative markets - traders in derivatives markets - Derivatives market in India

**Unit 2: Futures and forwards**

Meaning, differences-valuation of futures, Mechanics of buying & selling futures, Margins, Hedging using futures -specification of futures - Commodity futures, Index futures, interest rate futures – arbitrage opportunities.

**Unit 3: Options:**

Types of options, option pricing, factors affecting option pricing – call and put options on dividend and non-dividend paying stocks put-call parity - mechanics of options - stock options - options on stock index - options on futures – interest rate options. Concept of exotic option. Hedging & Trading strategies involving options, valuation of option: basic model, one step binomial model, Black and Scholes Model,

**Unit 4: Financial Swaps**

features and uses of swaps - Mechanics of interest rate swaps – valuation of interest rate swaps – currency swaps – valuation of currency swaps

**Unit 5: Commodity derivatives**

Commodity futures market-exchanges for commodity futures in India, Forward Market Commissions and regulation-commodities traded – trading and settlements – physical delivery of commodities

**Unit6: Credit Derivatives**

Meaning, common credit derivatives, types of credit dervates, Credit Default swaps(CDS), Total Return swaps, Collateralized debt obligations(CDO), Indian scenario.

**References:**

1. Financial Derivatives- Vohra and Bagri

**GROUP C**  
**SEMESTER VI**  
**DISCIPLINE SPECIFIC ELECTIVE**  
**GOODS AND SERVICES TAX AND CUSTOM DUTY-II**

**L: T: P-4:1:0**

**Course Outcome:**

On successful completion of this course the students can:

C01: Understand the technology and flow of return filing under GST

C02: Learn in details and gain knowledge to practice as GST Consultant

C03: Learn in details provisions of GST in relation to value of taxable supply and input tax credit

C04: Understand in depth tax provisions to make managerial decisions effectively in various tax related matters

C05: Learn in detail the procedure to be followed to assess the value and determine customs duty

C06: Understand the procedure of registration under GST

C07: Prepare tax invoice, credit and debit notes

**Unit 1: Value of taxable supply**

Conditions, inclusions, Consideration not wholly in money, Supply between two related persons, Supply through agent, cost based value, Residual valuation, specific supplies, Service of pure agent. Problems on determination of value of supply.

**Unit 2: Input tax credit**

Meaning, conditions for taking credit, ineligible input tax credit, availability of credit in special circumstances, Input tax credit and change in constitution of registered person, Taking input tax credit in respect of inputs and capital goods sent for job work, Manner of Distribution of Credit by Input Service Distributor (ISD)

**Unit 3: Tax Invoice, Credit and Debit Notes**

Tax invoice; Prohibition of un authorised collection of tax; Amount of tax to be indicated in tax invoice and other documents ; Credit and debit notes.

**Unit 4: Registration under GST**

Persons liable for registration, compulsory registration, Procedure for Registration, Rejection of application for registration, cancellation of Registration

**Unit 5: Returns**

Brief introduction to various GSTRS-procedure for filing various returns.

**Unit 6: Customs Act 1962**

Meaning- Notified goods –specified goods- Prohibition of importation and exportation under sec 11- types of customs duty- Basic customs duty, Education Cess, Anti dumping duty, Safeguard Duty, IGST, GST Compensation Cess- Computation of Assessable value and applicable duties. Exports – Meaning- zero rated supply.

**SEMESTER VI**  
**DISCIPLINE SPECIFIC ELECTIVE**  
**FINANCIAL MANAGEMENT -II**

**L: T: P-4:1:0****Course Outcome:**

On successful completion of this course the students can:

C01: Deliberate the details of working capital management

C02: Learn in depth the details of cash management

C03: Understand the details of working capital financing

C04: Deliberate in details with examples Venture capital financing

C05: Learn in depth the details of shareholders value creation

C06: Deliberate in depth International financial management

**Unit 1: Working Capital Management**

Meaning, Features, types of working capital, factors influencing working capital, level of current assets, operating cycle and cash cycle, current assets financing policy

**Unit 2: Cash Management**

Cash budget cash collection and disbursement, options for investment of surplus funds, credit management- credit policy variables-credit evaluation. Inventory management- need for inventories; order quantity-EOQ model- monitoring and control of inventories-ABC- JIT techniques.

**Unit 3: Working Capital Financing**

Leasing-types of leases, Rationale for leasing, operating leases, leasing as a financing decision; hire purchase financing- Hire purchase financing v/s lease financing, instalment sale, evaluation of Hire purchase financing

**Unit 4: Venture Capital Financing**

Meaning, features, development of venture capital in India, stages in venture financing- the business plan- essentials of a business plan, the process of venture capital financing- Methods of venture financing; Disinvestment mechanisms

**Unit 5: Share Holder Value Creation**

Financial goals and strategy, shareholder value creation- market value added, Market to book value, Economic value added(EVA)- Balanced scorecard- the learning and growth perspective, significance of balanced score card , implementation of score card.

**Unit 6: International Financial Management**

Foreign exchange market, foreign exchange rates- spot exchange rates, bid-ask rate, forward exchange rates- foreign exchange risk- transaction exposure, economic exposure, translation exposure, hedging of foreign exchange risk- foreign currency option, money market operations- financing international operations.

**GROUP C**  
**SEMESTER VI**  
**DISCIPLINE SPECIFIC ELECTIVE**  
**ADVANCED COST AND MANAGEMENT ACCOUNTING-II**

**L: T: P-4:1:0****Course Outcome:**

On successful completion of this course the students can:

CO1: Understand the details of management accounting

CO2: Learn in depth the details of financial statement analysis techniques

CO3: Analyze the inflow and outflow of cash and able to prepare cashflow statement

CO4: Understand the characteristics of different types of ratios

CO5: Learn in depth budget and budgetary control and prepare various budget for different activities of the business

CO6: Learn in depth marginal costing and able to effective decision regarding make or buy, accepting foreign order, continuance or discontinuance of manufacturing a products

**Unit 1: Introduction**

Meaning and Definition of Management Accounting, Scope and Objectives of Management Accounting-Differences between Management Accounting and Financial Accounting –Management accounting and Cost accounting-Limitations of Management Accounting.

**Unit 2: Analysis of Financial Statements**

Common Size Statements, Comparative Statement, Trend analysis.

**Unit 3: Ratio Analysis**

Meaning and Objectives-Types of rations - (A) Profitability Ratios-GP ratio - NP Ratio- Operating ratio- Operating profit ration-Return on capital employed ratio- EPS, (B) Turnover Ratios-working capital turnover ratio- Stock Turnover ratio-Fixed assets turnover ratio-Debtors turnover Ratio-Creditors turnover Ratio, (C) Financial ratios – Current Ratio-liquidity ratio-Debt-equity ratio-Proprietary Ratio-Capital gearing Ration- Advantages and Limitations of Ratios- Construction of Balance sheet using ratios.

**Unit 4: Cost Flow Statement**

Meaning, Definition, Uses and Limitations-Differences between funds flow statement and cash flow statement-Preparation of Cash flow statement (AS-7): Direct method and Indirect Method.

### **Unit 5: Marginal Costing**

Definition - Basic concepts - Assumptions - Marginal Cost statement - Contribution-Break Even Analysis-P/V Ratio-Margin of Safety - Decision areas - Make or Buy and Pricing.

### **Unit 6: Budget and Budgeting Control**

Definition - Basic Concepts - Budget Manual - Key factor - Classification of Budgets - Problems on cash budget, sales budget, Flexible Budget, Cash Planning and Motives for holding cash.

### **References:**

5. Cost Accounting: Jain & Narang
6. Cost Accounting: S.P. Iyengar

**ENF33001**

**GROUP C**  
**VI SEMESTER**  
**DISCIPLINE SPECIFIC ELECTIVE**  
**ORGANISATIONAL BEHAVIOUR**

**L: T: P-4:1:0****Course Outcome:**

On successful completion of this course the students can:

C01: Understand in detail behaviour of employees and able to manage them efficiently

C02: Identify in details employees performance and able to motivate for effective performance

C03: Learn in depth and analyse the behaviour of employees

C04: Understand in details key positions in an organisation and able to occupy them

C05: Learn in details with examples frame policies and strategies in organisation

**Unit 1: Introduction**

Meaning, definition, historical development, fundamental principles of OB, contributing disciplines, approaches, challenges and opportunities.

**Unit 2: Foundations of Individual Behaviour**

Individual behaviour: Foundations of individual behaviour. Ability: Intellectual abilities, Physical ability, the role of disabilities. Personality: Meaning, formation, determinants, traits of personality, personality attributes influencing OB. Attitude: Formation, components of attitudes, relation between attitude and behaviour.

**Unit 3: Perception and Emotions-** Perception: Process of perception, factors influencing perception, link between perception and individual decision making. Emotions: Affect, mood and emotion and their significance, basic emotions, emotional intelligence, self-awareness, self-management, social awareness, relationship management.

**Unit 4: Motivation and Leadership**

Motivation- meaning, theories of motivation-needs theory, two factor theory, Theory X and Y, application of motivational theories. Leadership: Meaning, styles of leadership, leadership theories, trait theory, behavioural theories, managerial grid, situational theories-Fiedler's model, SLT, transactional and transformation leadership.

**Unit 5: Group Behaviour**

Definition, types, formation of groups, building effective teams. Conflict: Meaning, nature, types, process of conflict, conflict resolution. Power and politics: Basis of power, effectiveness of power tactics.

**Unit 6: Emerging Challenges**

Emerging challenges, managing diversity, globalisation, technology transformation, e - business, promoting ethical behaviour.

## Preamble

Biochemistry, today is considered as an application oriented integrated basic science. It's an interdisciplinary science that has emerged by the confluence of principles of Chemistry, Physics and Mathematics to Biology. Advances in Biochemistry have immense positive implications on the understanding of biochemical interactions, cellular communications, hormonal mechanisms and the cross talks between them. The research in Biochemistry has been translational and there is a shift from hypothesis driven research to data dependent research that promises translational, product oriented research. Much of the advancement in Biochemistry is in the advancement of Biotechnology, as a basic science discipline Biochemistry lead to Biotechnological advancement. Considering its pivotal role in Biological sciences, it is imperative to strengthen the fundamental concepts of Biochemistry. The current pattern is designed to provide a focused learning outcome-based syllabus at the Honors level providing structured teaching-learning experiences catering to the needs of the students. The honors course will prepare the students academically and prepare them for employability. The program also inculcate various attributes at the Honors level. These attributes encompass values related to emotional stability, social justice, creative and critical thinking, well-being and various skills required for employability, thus preparing students for continuous learning and sustainability. The new curriculum based on learning outcomes of B. Sc. (Honors) in Biochemistry offers basic knowledge of chemistry in general, including the concepts in organic, inorganic, physical, analytical, spectroscopy and pharmaceutical chemistry. The course defines clearly the objectives and the learning outcomes, enabling students to choose the elective subjects broadening their skills. The course also offers skills to pursue research in the field of Biological Chemistry and thus would produce best minds to meet the demands of society.

## Curriculum

Name of the Degree Program	: B.Sc. (Basic/Honors)
Discipline Core	: Biochemistry
Total Credits for the Program	: 184 Starting year of implementation: 2021-22

The learning outcomes are designed to help learners understand the objectives of studying B.Sc. Biochemistry (Honors) that is, to analyze, appreciate, and understand the basic concepts of biomolecular processes and chemical reactions occurring in the living system. This course is fundamental to tackle many of the health – related challenges facing society. Considering the rapid and far-reaching advances in biological sciences in 21st century, it is imperative to have curriculum incorporating these updated emerging concepts of biochemistry. The current pattern is designed to impart concept-based learning with emphasis on hands-on training, skill development and research. Aimed at multi-faceted development of a student, the curriculum includes courses encompassing core courses, intra and inters discipline specific courses, skill and ability enhancement courses to impart in-depth knowledge in biochemistry complemented with varied subjects and skills. The course seeks to discover and nurture typical attributes of a competent science graduate such as; spirit of inquiry, critical thinking, problem solving, analytical reasoning, aptitude to research/industry and entrepreneurial instincts.

**Program Learning Outcome:** The learning outcome-based curriculum is specific in terms of changes in cognitive and psychomotor behavior of students. Biochemistry Honors course is intended to provide a broad framework enabling students to acquire a skill set that helps them understand and appreciate the field of biochemistry. The structure or design of this framework shall ensure a high standard of the Honors degree in Biochemistry at national level. The program specification are intended as a reference point for prospective students, current students, academic in delivering the program and realizing its objectives. Keeping in pace with the developmental trends in Biochemistry and allied areas, it is expected that the students undertaking Biochemistry (Honors) course become conversant with the essence of Biochemistry and exhibit certain levels of learning outcomes as proposed below;

### **PROGRAMME OUTCOME (PO)**

<b>P01</b>	To create interest in Biochemistry and appreciation for chemical basis of biological processes.
<b>P02</b>	To inculcate the spirit of inquiry and value of systematic study of a discipline. Provide a general understanding of the related disciplines with a holistic knowledge generation in biological sciences.
<b>P03</b>	To provide an in-depth understanding of chemical reaction mechanisms in biological processes.
<b>P04</b>	To provide a flavor of historical developments of enzymes and their applications in research, diagnostics and various industries.
<b>P05</b>	Gain proficiency in basic laboratory techniques and be able to apply the scientific method to the processes of experimentation, hypothesis testing, data interpretation and logical conclusions.
<b>P06</b>	Develop problem solving and analytical skills through case studies, research papers and hands-on-experience
<b>P07</b>	To appreciate biochemical mechanistic basis of physiological processes, metabolism under normal and pathological conditions importance and levels of metabolic regulations.
<b>P08</b>	To apply and effectively communicate scientific reasoning and data analysis in both written and oral forms. They will be able to communicate effectively with well-designed posters and slides in talks aimed at scientific audiences as well as the general public.
<b>P09</b>	To bridge the knowledge and skill gap between academic out and industry requirements.
<b>P010</b>	To give students experience in conducting independent, hypothesis-driven, biological research, project planning and management
<b>P011</b>	To provide skills to publish research findings, and awareness of IP rights, and scientific publication ethics and problems of plagiarism.
<b>P012</b>	To prepare competent human resource with better knowledge, hands-on-experience and scientific attitude, at national and global levels for careers in research and development, academia and Pharma-, biotech- and agro-, and food processing industries.

---

## **GRADUATE ATTRIBUTES B. Sc. BIOCHEMISTRY (Honors):**

Graduates with strong academic knowledge, discipline-specific and generic skills complemented with social responsibility are greatest asset of the country. The curriculum frame work under NEP for Biochemistry graduates aims to build the following attributes;

### **Disciplinary Knowledge:**

- a) Ability to comprehend fundamental concepts of biology, chemistry and apply basic principles of chemistry to biological systems.
- b) Ability to relate various interrelated physiological and metabolic events.
- c) Ability to critically evaluate a problem and resolve to challenge blindly accepted concepts
- d) Ability to think laterally and in an integrating manner and develop interdisciplinary
- e) Good experimental and quantitative skills and awareness of laboratory safety
- f) A general awareness of current developments at the forefront in biochemistry and allied subjects.
- g) Awareness of resources, and their conservation.

### **Communication Skills:**

- a) Ability to speak and write clearly in English and local language
- b) Ability to listen to and follow scientific viewpoints and engage with them.
- c) Ability to understand and articulate with clarity and critical thinking one's position.

### **Critical Thinking:**

- a) Ability to conceptualize critical readings of scientific texts in order to comprehend.
- b) Ability to place scientific statements and themes in contexts and also evaluate them in terms of generic conventions.

### **Problem Solving:**

- a) Ability make careful observation of the situation, and apply lateral thinking and analytical skills.

### **Analytical Reasoning:**

- a) Ability to evaluate the strengths and weaknesses in scholarly texts spotting flaws in their arguments.
- b. Ability to use scientific evidences and experimental approach to substantiate one's argument in one's reading of scientific texts.

### **Research Skills:**

- a) Ability to formulate hypothesis and research questions, and to identify and consult relevant sources to find answers.
- b) Ability to plan and write a research paper.

### **Teamwork and Time Management:**

- a) Willingness to participate constructively in class room discussions and contribute to group work.
- b) Ability to meet a deadline.

### **Scientific Reasoning:**

- a) Ability to analyze theories and beliefs, evaluate ideas and scientific strategies.
- b) Ability to formulate logical and convincing arguments.

### **Reflective Thinking:**

- a) Ability to locate oneself and see the influence of location—regional, national, global— on critical thinking.

### **Self-Directing Learning:**

- a) Ability to work independently in terms of organizing laboratory, and critically analyzing scientific literature.
- b) Ability to postulate hypothesis, questions and search for answers.

### **Digital Literacy:**

- a) Ability to use digital resources, and apply various platforms to convey and explain concepts of biochemistry.

### **Multicultural Competence:**

- a) Ability to engage with and understand cultures of various nations and respect and transcend differences.

**Moral and Ethical Values:**

- a) Ability to interrogate one's own ethical values, and to be aware of ethical and environmental issues.  
 b) Ability to read values inherited in society and criticism vis-a-vis, the environment, religion, spirituality, and structures of power.

**Leadership qualities:**

- a) Ability to lead group discussions, to formulate questions related to scientific and social issues.

**Life-long Learning:**

- a) Ability to retain and build on critical thinking skills, and use them to update scientific knowledge and apply them in day to day business.

**Exit Options and credit requirement**

Progressive Certificate in Science, Diploma in Science, Bachelor of Science Degree or Bachelor of Science Degree with Honors in Biochemistry is awarded at the completion of every progressive year.

A student will be allowed to enter/re-enter only at the ODD semester and can only exit after EVEN semester. Re-entry at various as lateral entrants in academic programs based on the above mentioned earned credits and proficiency test records.

<b>Exit with</b>	<b>Credit requirements</b>
<b>CERTIFICATE IN SCIENCE</b> at the successful completion of First year (Two Semesters) of the Four Years Multidisciplinary Undergraduate Degree Program.	50
<b>DIPLOMA IN SCIENCE</b> at the successful completion of Second year (Four Semesters) of the Four Years Multidisciplinary Undergraduate Degree Programme.	100
<b>BACHELOR OF SCIENCE DEGREE</b> at the successful completion of Three year (Six Semesters) of the Four Years Multidisciplinary Undergraduate Degree Programme.	142
<b>BACHELOR OF SCIENCE DEGREE WITH HONOURS IN BIOCHEMISTRY</b> at the successful completion of Four year (Eight Semesters) of the Four Years Multidisciplinary Undergraduate Degree Program.	184

# Syllabus Theory and Practical B.Sc. (Basic/Honors) Semester-I

**Course code:** DSC-1T: BC-101;

**Course Title:** Chemical Foundations of Biochemistry-1 (Theory)

<b>Course title</b>	<b>Chemical Foundation of Biochemistry-1</b>
Course code	DSC-1T: BC-101
Course credits	04
Total contact hours	56
Duration of ESA (Hour)	03
Formative assessment marks	40
Summative assessment marks	60

**Course Outcome:**

This will inculcate confidence and clarity of mind in students to understand the chemistry of Biomolecules, and Biological reactions.

Course Outcomes /Program Outcomes	1	2	3	4	5	6	7	8	9	10	11	12
Aptitude	x	x	x									
Critical thinking		x										
Subject clarity	x	x										x
Analytical Skill	x				x	x						

<b>Content of Theory course- Chemical Foundation of Biochemistry-1 Total credits = 4</b>	<b>56hr</b>
<b>Unit 1: Scope of Biochemistry and Units of measurement</b>	<b>14 hr</b>
Origin of life, types of organisms, prokaryotes, eukaryotes, unicellular, multicellular, compartmentation of functions in lower and higher organisms, and common physiological events of organisms, chemical composition of living organisms, subcellular organelles, SI units, mass, volume, temperature, amount, length and time. An overview on the metric system, atomic weight, molecular weight, equivalent weight, basicity of acids, acidity of bases, Avogadro's number, molarity, normality, molality, Dalton concept, mole concept, concentration, mole to molar conversion, oxidation number and its significance, density and specific gravity, their significances.	
<b>Unit 2 : Atomic structure and Chemical bonds</b>	<b>14 hr</b>
Structure of an atom, electrons and Quantum numbers, orbitals, shapes of orbitals, s, p, d, and f subshells, K, L, M, N, O, P, and Q shells. Illustration of Pauli's exclusion principle, Aufbau principle, and Hund's rule, electron configuration, octet rule. Formation and properties of noncovalent and covalent bonds, hydrogen bonds, ionic bonds, van der Waals interactions, London forces, dipole-dipole interactions, electrostatic interactions, and hydrophobic interactions. Sigma, pi and co-ordinate bonds, back bonding.	

Corresponding energy associated, outline of theories of bonding.	
<b>Unit 3: Buffers and Colligative properties</b>	<b>14 hr</b>
Acids, bases, Arrhenius concept, proton transfer theory, Lewis concept, Lowry and Bronsted concepts. Buffers, composition, pH, pH scale, Henderson-Hasselbalch equation, titration curve of H <sub>3</sub> PO <sub>4</sub> , pK value, isoelectric pH, ionization of HCl, HNO <sub>3</sub> , H <sub>2</sub> SO <sub>4</sub> . Colligative properties and anomalous colligative properties of solutions, structure of water, phase diagram of pure water, ionic product of water, special properties of water, buffers in animal system. Solutions and types, ionizable solutes, non-ionizable solutes, vapor pressure and its application in distillation, Vant Hoff law, Roul't's law, boiling point, freezing point, de-icing, osmosis and osmotic pressure determination, reverse osmosis, surface tension.	
<b>Unit 4: Electrochemistry and Redox reactions</b>	<b>14 hr</b>
Scope of electrochemistry, electrochemical cells, Daniel cell, galvanic cell, electrode potential and its measurement, electrolysis, types of electrolytes, primary and secondary batteries, electrodes, half-cell reaction, standard electrodes. Laws of thermodynamics, entropy and enthalpy, their relation, Gibb's energy, free energy change, Lewis concept, ions, redox reactions, redox potential, application of redox potential, energy linked to redox reactions, reduction of oxygen, oxidation and reduction of iron in hemoglobin, biological active forms of zinc, calcium, nickel, molybdenum, selenium, and cobalt, NAD <sup>+</sup> /NADH, NADP <sup>+</sup> /NADPH, FAD/FADH <sub>2</sub> , FMN/FMNH <sub>2</sub> . Molecularity and order of a reaction.

**Course Title: Biochemistry in Health and Diseases (theory)**

<b>COURSE TITLE</b>	<b>Biochemistry in Health and Diseases</b>
Couse code	OE-1T: BC-103
Course credits	03
Total contact hours	42
Duration of ESA (Hour)	03
Formative assessment marks	30
Summative assessment marks	70

**Course Outcome:** This open elective course offering to students of various streams gives knowledge about health and various terminologies used in health and disease conditions; Difference between communicable and non-communicable diseases; Health promotion and treatments for various diseases and disorders.

<b>Content of Theory course- Biochemistry in Health and Diseases</b>	<b>42 hr</b>
<b>Total credits =3</b>	
<b>Unit 1: Introduction</b>	<b>14 hr</b>
WHO definition of health, Health and hygiene, General health care, Factors affecting health, Indices and evaluation of health, Disease patterns in developed and developing world; Classification of diseases - Endemic, Epidemic, Pandemic; Professional health hazards.  Disease conditions: Acute disease, Chronic disease, Incurable disease, Terminal disease, Illness, disorders, Syndrome, Pre-disease.	
Treatment: Psychotherapy, Medications, Surgery, Medical devices, and Self-care. Dimensions of Health: Physical, Mental, Spiritual, Emotional, Environmental, and Philosophical.	
<b>Unit 2: Types of Diseases</b>	<b>14 hr</b>
Tuberculosis, Cholera, Typhoid, Conjunctivitis.  Sexually transmitted diseases (STD): Information, statistics, and treatment guidelines for STD, Prevention: Syphilis, Gonorrhoea, AIDS, etc.  Non-communicable diseases: Malnutrition- Under nutrition, Over nutrition, Nutritional deficiencies; Anemia, Stroke, Rheumatic heart disease, Coronary heart disease, Cancer, blindness, accidents, mental illness, Iodine deficiency, Fluorosis, Epilepsy, Asthma.  Genetic disorders: Down's syndrome, Klinefelter's syndrome, Turner's syndrome, Thalassaemia, Sickle cell anemia.  Lifestyle disorders: Obesity, Liver cirrhosis, Diabetes mellitus, Hypertension (Causative agents, symptoms, diagnosis, treatment, prognosis, prevention)	

<b>Unit 3: Health Promotions</b>	<b>14 hr</b>
<p>Preventing drug abuse, Oral health promotion by tobacco control.</p> <p>Mental hygiene and mental health: Concepts of mental hygiene and mental health, Characteristics of mentally healthy person, Warning signs of poor mental health, Promotive mental health, strategies and services, Ego defense mechanisms and implications, Personal and social adjustments, Guidance and Counseling.</p> <p>Infection control: Nature of infection, Chain of infection transmission, Defenses against infection transmission</p>

Formative assessment marks	40
Summative assessment marks	60

**Course Level Learning Outcomes:** Students will be exposed to various spectrophotometry and chromatographic techniques and their applications in separation of chemicals like biomolecules, organic chemicals, drugs etc.

<b>Content of Theory course- Biochemical Techniques-1</b> <b>Total credits =2</b>	<b>28 hr</b>
<b>Unit 1: Photometry</b>	14 hr
Principle of light absorption by molecules. Beer-Lambert law, Types of spectrophotometers. Principles and working of colorimeter, Visible spectrophotometer, UV-Visible spectrophotometer, Fluorescent spectrophotometry, nano-drop-spectrophotometry, Atomic absorption spectrophotometry. Types of Detectors-Phototube, Photomultiplier tube, Photo diode, Diode array detector, Charge coupled device detectors. Applications of spectrophotometry in estimation of organic compounds, enzyme assays, enzyme kinetics, recording spectrum, time-lapse studies,	
<b>Unit 2: Chromatography</b>	14 hr
Separation of small molecules by TLC, column chromatography, HPLC, and GLC.RP-HPLC, normal phase HPLC, HILIC. Column materials, ODS v/s BDS columns, Different columns used in HPLC, and GLC. Different types of detectors used in HPLC and GLC. Preparation of sample for separation by HPLC and GLC. Importance of column material and pore size. Isocratic v/s gradient HPLC

Course credits	02
Total contact hours	28
Duration of ESA (Hour)	03
Formative assessment marks	40
Summative assessment marks	60

**Course Level Learning Outcomes:** Students will learn various means of microbial contaminations in water and food and their implications on health. Student will learn about the standard methods of detection of contaminating microorganisms in food and water samples.

<b>Content of Theory course- <u>Microbiological quality of food and water</u></b> <b>Total credits =2</b>	<b>28 hr</b>
<b>Unit 1: Water Quality &amp; Assessment</b>	<b>14 hr</b>
Sampling of water to detect the microbiological quality of water. Isolation of microorganisms from water sample. Medium: Growth medium, differential medium and specific medium.  Treatment and safety of drinking (potable) water, methods to detect potability of water samples: (a) standard qualitative procedure: presumptive test/MPN test, confirmed and completed tests for fecal coliforms (b) Membrane filter technique and (c) Presence/absence tests	
<b>Unit 2: Microbiology of Food</b>	<b>14 Hr</b>
Intrinsic and extrinsic factors that affect growth and survival of microbes in foods, natural flora and source of contamination of foods in general. Principles, Spoilage of vegetables, fruits, meat, eggs, milk and butter, bread, canned Foods.  Cultural and rapid detection methods of food borne pathogens in foods. Food borne diseases: Food intoxication, food infection, shigellosis. Food sanitation and control: HACCP, Indices of food sanitary quality and sanitizers.

<b>Content of Theory course- Chemical Foundations of Biochemistry-2</b>	<b>56 hr</b>
<b>Total credits = 4</b>	
<b>Unit 1: Chemical Catalysis</b>	<b>14 hr</b>
Definition, characteristics, types, intermolecular, multifunctional, theories of catalysis, properties, characteristics of enzyme catalysis, autocatalysis, industrial catalysis and their role in biological systems (brief). Colloids: true solutions, classification, peptisation, purification, ultrafiltration, Brownian movements, electric properties, coagulation, mutual, lyophilic sols, boiling, dialysis, electro and persistent dialysis, addition of electrolytes, colloids in daily life and applications. Emulsion, types, micelles with biomolecules and its biological applications.	
<b>Unit 2: Nomenclature of Organic Compounds</b>	<b>14 hr</b>
Classification, naming- IUPAC nomenclature, compounds containing one, two functional groups with chains, homologous series. Stereochemistry, geometrical and structural Isomerism, conformation and free rotation. Optical isomerism, symmetry of elements, plane polarized light and optical purity. Nomenclature of enantiomers, epimers, racemic mixture, resolution. Fischer and Newman projection formulae, molecule with one and two chiral and achiral centers. Priority rules; E and Z (CIP rules), R and S, D and L notations, absolute (r and s) and relative (d and l) configuration. Role of stereochemistry in biological systems.	

<b>Unit 3: Organometallic Compounds</b>	<b>14 hr</b>
<p>Metal atom linked organic compounds. Preparation of Grignard reagents and structure, limitations, protonolysis and reactions. Organolithium compounds, preparation and reactions. Organozinc compounds. Organoboranes its mechanisms. Ferrocenes.</p> <p>Introduction to mineral and ores, classification, concentration, extraction, refining, uses of minerals and metals and its importance.</p> <p>Porphyrins and Metal ions: Role of metal ions in biological systems, Fe, Cu, Zn, structure and functions of porphyrins, metalloporphyrins and iron-sulphur clusters with suitable examples and their role in biological systems.</p>	
<b>Unit 4: Inorganic Chemistry</b>	<b>14 hr</b>
<p>Nomenclature of inorganic molecules and coordination compounds, formula. IUPAC nomenclature. Central metal ion, ligand, coordination number, sphere, complex ion, oxidation number of central atom, homoleptic and heteroleptic complexes. Isomerism in complexes, structural, ionisation, solvate, linkage and coordination, Stereoisomerism, geometrical, optical isomerism with simple inorganic complexes. Applications of qualitative, quantitative analysis, photographic, metallurgy, medicine, catalysis and biosystems.</p> <p>Heavy Metal Poisons: Introduction, poisons, lead, mercury, aluminium, arsenic, corrosives, cyanide, irritants, phosphorus, CO<sub>2</sub>, SO<sub>2</sub>, SO<sub>3</sub>, NO<sub>2</sub>, halides and acid fumes, poisoning, sources, signs and symptoms. Free radicals: introduction, definition, generation and scavenger systems. Redox reactions, types, stock notations, change in oxidation number and combination. Endergonic and exergonic reactions with examples. The Importance in biological systems.</p>

**Course outcomes:**

- The student will gain knowledge about energy requirements and the Recommended Dietary Allowances.
- The student will understand the functions and role of macronutrients, their requirements and the effect of deficiency and excess
- The student learns the impact of various functional foods on our health
- The student will be able to apply basic nutrition knowledge in making foods choices and obtaining an adequate diet.
- The student gains competence in connecting the role of various nutrients in maintaining health and learn to enhance traditional recipes.

<b>Content of Theory course- Nutrition and Dietetics</b>	<b>Total credits =3</b>
<b>Unit 1: Basic Concepts of Nutrition</b>	<b>14 hr</b>
Introduction, Basic principles of a balanced diet to provide energy and nutrients. Composition of foods and proximate analysis of foods. Calorific value of foods and Basal metabolism. Basal Metabolic Rate (BMR), Factors affecting BMR, Energy requirements for different physical activities, Specific dynamic action of food, Nutritive value of proteins. Energy requirements and recommended dietary allowance (RDA) for infants, children and pregnant women. Protein calorie malnutrition.	
<b>Unit 2: Macronutrients and Micronutrients</b>	<b>14 hr</b>
Carbohydrates- Digestible and non-digestible, Dietary fibers, Essential fatty acids, lipoproteins and cholesterol. Essential amino acids, Fortification of foods, Protein requirement for different categories.  Vitamins-Sources, requirements, functions and deficiency symptoms of Vitamin-C, Thiamine, Riboflavin, Pyridoxine, Folic acid, Vitamin B12. Absorption of fat-soluble vitamins- A, D, E and K.  Micronutrients: Source, Daily requirement, functions and deficiency disease symptoms of Macro-minerals (Ca, P, and Cl) and micro minerals/trace elements (I, Fe, Zn and Se).	

<b>Unit 3: Dietetics and Diet Therapy</b>	<b>14 hr</b>
<p>Introduction. Food pyramid. Diet planning and introduction to diet therapy. Nutritional requirements for different age groups, anemic child, expectant women, and lactating women. Diet planning for prevention and cure of nutritional deficiency disorders.</p> <p>Diet therapy: Functional foods, Anthropometric measurements, dietary considerations during fever, malaria, and tuberculosis. Prevention and correction of obesity, underweight, and metabolic diseases by diet therapy. Dietary interventions to correct and or manage the gastrointestinal diseases (indigestion, peptic ulcer, constipation, diarrhea, steatorrhea, irritable bowel syndrome.</p> <p>Functional foods-based diet therapy for diabetes, cardiovascular disease and cancer.</p>

**Pedagogy: MOOC/desk work/book chapter/problem solving /assignment**

<b>Formative Assessment</b>	
Assessment occasion	Weightage in marks
Class test (Two class tests)/ Continuous evaluation	20
Seminar/ class work	10
Assignment/ open discussion/ quiz	10
Total	40

**Skill enhancement course: Course Code: SEC-2T:BC-204.1;  
Course Title: Biochemical Techniques-2 (theory)**

<b>Course title</b>	<b>Biochemical Techniques-2</b>
Course code	SEC-2T: BC-204.1
Course credits	02
Total contact hours	28
Duration of ESA (Hour)	03
Formative assessment marks	40
Summative assessment marks	60

**Course Level Learning Outcomes:** Students will be exposed to various electrophoretic and mass spectrometry techniques and their applications in biomolecular separations and drug discovery. A thorough understanding of the above techniques would provide job opportunities in CROs for drug discovery and metabolism and also in diagnostic development companies.

<b>Content of Theory course- Biochemical Techniques-2</b>	<b>28 hr</b>
<b>Total credits =2</b>	
<b>Unit 1: Electrophoresis</b>	14 hr
Protein and nucleic acid Separations: PAGE, Non-denaturing PAGE, Non-reducing SDS-PAGE. 2-D electrophoresis, Preparation of pH gradient gel. Procedure of preparation of polyacrylamide gels, importance of buffers in electrophoretic separations, importance of stacking and resolving gels, use of denaturing agents and reducing agents in electrophoresis. Applications of electrophoretic techniques in disease diagnosis. Staining techniques- Coomassie staining, PAS staining, Silver staining, Fluorescent dye staining, Submerged-gel electrophoresis for the separation of nucleic acids. Nucleic acid staining Techniques. Zymography.	
<b>Unit 2: Mass spectrometry</b>	14 hr
Ionization techniques: Electro ionization, Fast-atom bombardment, Electro-spray ionization, Chemical ionization, Photo-ionization, MALDI. Construction and applications of Mass spectrometer, LC-MS/MS, GC-MS/MS. Preparation of samples for LC-MS and GC-MS. Detectors: Electron multiplier, Faraday's cup, Photomultiplier conversion dynode, Array detectors. Application of LC-MS and GC-MS in drug discovery and metabolic studies.

**Course level learning outcomes:**

By studying this course the students completing B.Sc. (Hons) Biochemistry will have an understanding of the tools of bioinformatics and computational biology and will be in a position to access biological data bases and softwares which will be helpful in understanding sequence alignments and predicting the structures of biomolecules such as proteins. Students will be exposed to available bioinformatics tools and databases. They will be in a position to comprehend the fundamental aspects of in-silico protein structure prediction. They will understand application of theoretical approaches to biological systems. Students will get trained in the application of programs used for database searching, protein and DNA sequence analysis, and prediction of protein structures.

<b>Content of Theory course- <u>Bioinformatics</u></b>	<b>28 hr</b>
<b>Total credits =2</b>	
<b>Unit 1: Introduction to Bioinformatics</b>	<b>14 hr</b>
Bioinformatics: Introduction, Basics of Computer and operating systems, Hardware, Software, Introduction to programming Languages and Paradigms, PERL/R programming, role of supercomputers in biology.  Scope of bioinformatics - Genomics, Proteomics, comparative and functional genomics, Genome annotation, gene prediction approaches and tools. Transcriptome and Proteome, Tools of proteome analysis. DNA microarray: understanding of microarray data and correlation of gene expression data to biological processes and computational analysis tools. Computer aided drug design (CADD) and Systems Biology.	
<b>Unit 2: Database &amp; Sequence Alignment</b>	<b>14 hr</b>
Biological databases: Introduction to biological databases - primary, secondary and composite databases, useful programs, ClustalW, BLASTp. NCBI, EBI, ExPaSy, nucleic acid databases (GenBank, EMBL, DDBJ, NDB), protein databases (PIR, Swiss-Prot, TrEMBL, PDB), metabolic pathway database (KEGG, EcoCyc).  Sequence alignment: Similarity, identity and homology. Concept of Alignment: Pair-wise sequence alignment, gaps, gap-penalties, scoring matrices, PAM250, BLOSUM62, local and global sequence alignment, multiple sequence alignment, Progressive Alignment Algorithm, Application of multiple sequence alignment. BLAST and CLUSTALW.

B.Sc. DEGREE (BASIC/HONS) I AND II SEMESTERS EXAMINATION  
MODEL QUESTION PAPER  
BIOCHEMISTRY

TIME : 2 h

MAX. MARKS: 60

**NOTE: ALL SECTIONS ARE COMPULSORY**

**SECTION - A**

1. Answer any FIVE of the following 5 x 2 = 10
- a.
  - b.
  - c.
  - d.
  - e.
  - f.
  - g.

**SECTION - B**

Answer any FOUR of the following 4x 5 = 20

- 2.
- 3.
- 4.
- 5.
- 6.
- 7.

**SECTION - C**

Answer any THREE of the following 3 x 10 = 30

- 8.
- 9.
- 10.
- 11.
- 12.

**Note: section C may include sub questions a, b**

**DSC 1- PRACTICALS**  
**SCHEME OF PRACTICAL EXAMINATION**  
**I B.Sc., I SEMESTER**

**TITLE: Volumetric Analysis-Practicals-1**

**Times:3hrs**

**Max Marks: 25**

Practical proper :20

Vivo voce : 05

**NOTE :-** Candidates are required to submit the records duly signed by the teacher-in charge and certified by the Head of the Dept.

**PART- A**

**05 Marks**

**I. Any one of the following experiment may be given for procedure writing.**

1. Concept of molarity, molality and normality. Calculation and preparation of molar solutions. (Problems to be given in exams). Calculation and preparation of normal solutions and percent solutions and dilute solutions.
  2. Calibration of volumetric glassware's (Burette, pipette).
  3. Preparation of standard Sodium carbonate solution, standardization of HCl (Methylorange) and estimation of NaOH in the given solution. (methyl orange or phenolphthalein).
  4. Preparation of standard Oxalic acid. Standardization of NaOH and estimation of H<sub>2</sub>SO<sub>4</sub> in the given solution (phenolphthalein).
  5. Preparation of standard Oxalic acid. Standardization of KMnO<sub>4</sub> and estimation of H<sub>2</sub>O<sub>2</sub> in the given solution.
  6. Preparation of standard K<sub>2</sub>Cr<sub>2</sub>O<sub>7</sub>. Standardization of Na<sub>2</sub>S<sub>2</sub>O<sub>3</sub> and estimation of CuSO<sub>4</sub> in the given solution.
  7. Preparation of ZnSO<sub>4</sub>. Standardization of EDTA and estimation of total hardness of water using Eriochrome-Black-T indicator.
  8. Preparation of standard potassium biphthalate. Standardization of NaOH and estimation of HCl in the given solution. (Phenolphthalein).
  9. Estimation of sulphuric acid and oxalic acid in a mixture using standard NaOH solution and standard KMnO<sub>4</sub> solution.
  10. Preparation of standard Potassium dichromate and estimation of ferrous/ferric mixture using diphenylamine indicator (Demonstration).
  11. Preparation of standard oxalic acid solution. Standardization of NaOH solution and estimation of acidity in vinegar.
  12. Preparation of standard potassium bi-phthalate solution, standardization of sodium hydroxide solution and estimation of alkalinity of antacids
  13. Preparation of standard Oxalic acid solution. Standardization of KMnO<sub>4</sub> solution and estimation of calcium in milk.
-

**PART- A**

**05 Marks**

**I. Any one of the following experiment may be given for procedure writing.**

1. Systematic Semi micro–Qualitative Analysis of Inorganic Salt Mixtures Systematic semi micro qualitative analysis of two acid and two basic radicals in the given inorganic salt mixture. The constituent ions in the mixture to be restricted to the following. (Any four binary mixtures shall be given)  
Anions:  $\text{HCO}^-$ ,  $\text{CO}_3^{2-}$ ,  $\text{Cl}^-$ ,  $\text{Br}^-$ ,  $\text{NO}_3^-$ ,  $\text{BO}_3^{3-}$ ,  $\text{SO}_4^{2-}$  and  $\text{PO}_4^{3-}$ .  
Cations:  $\text{Pb}^{2+}$ ,  $\text{Al}^{3+}$ ,  $\text{Fe}^{2+}$ ,  $\text{Fe}^{3+}$ ,  $\text{Mn}^{2+}$ ,  $\text{Zn}^{2+}$ ,  $\text{Ca}^{2+}$ ,  $\text{Sr}^{2+}$ ,  $\text{Ba}^{2+}$ ,  $\text{Mg}^{2+}$ ,  $\text{K}^+$ ,  $\text{Na}^+$  and  $\text{NH}_4^+$ .
  2. Determination of density and viscosity of the given liquid using specific gravity bottle and Ostwald's viscometer.
  3. Determination of density and surface tension of the given liquid using specific gravity bottle and stalagmometer.
  4. Determination of molecular weight of non-volatile solute by Walker-Lumsden method.
  5. Determination of rate constant of decomposition of  $\text{H}_2\text{O}_2$  using  $\text{KMnO}_4$  by volumetric analysis method using ferric chloride as catalyst.
  6. Determination of distribution coefficient of benzoic acid between water and benzene or iodine between water and carbon tetrachloride.
  7. Separation of Two Components from given Binary Mixture of Organic Compounds Qualitatively. (Types of binary mixtures- Solid – Solid, Solid – Liquid, Liquid – Liquid)
  8. Verification of Beer's Law. Estimation of unknown concentration of a biomolecule by using colorimeter
  9. Calibration of pH meter and determination of pH of aerated soft drinks.

## SEMESTER III

<b>COURSE TITLE</b>	<b>BIO-ORGANIC CHEMISTRY</b>
<b>COURSE CREDITS</b>	<b>04</b>
<b>TOTAL CONTACT HOURS</b>	<b>56</b>
<b>DURATION OF ESA</b>	<b>03</b>
<b>FORMATIVE ASSESSMENT MARKS</b>	<b>40</b>
<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>60</b>

### Course outcome:

These topics will enable students to understand the fundamentals of organic chemistry pertinent to their importance in understanding biochemical reactions.

Course outcomes /Programoutcomes	1	2	3	4	5	6	7	8	9	10	11	12
Aptitude	X	X	X	X								
Critical thinking		X										
Subject clarity	X	X				X	X	X		X		X
Analytical skill	X				X	X	X	X	X			X

### UNIT 1: Reaction mechanisms and aliphatic hydrocarbons

**14 hours**

Introduction, meaning of the term, kinetic and non-kinetic. Fundamental aspects: Homo and heterolytic cleavage. Concept of inductive effect, mesomeric effect, resonance, and hyper conjugation. Classification of organic reactions (substitution, addition, elimination, and re-arrangement), with two examples for each. Concepts Reactive intermediates of the following – free radicals, carbo cations and carbanions, free radicals, carbines, nucleophiles and electrophiles(Formation and Stability).

Hydrocarbons -Mechanism of addition of HCl to propene, Markownikoff's rule. Peroxide effect, Alkenes – Ozonolysis, oxidation. Alkynes – formation of acetylides and their importance. Dienes– types with examples. Conjugate dienes, 1,3-butadiene – stability, mechanism of addition of HBr. Conformational analysis of ethane and n-butane.

### UNIT 2: Mechanism of substitution, elimination, and addition reactions

**14 hours**

$S_N1$  and  $S_N2$  reactions on tetrahedral carbon, energy profile diagrams, Stereochemistry, factors affecting  $S_N2$  and  $S_N1$  reactions

The Elimination reactions-  $E_2$  reaction, Zaitsev rule,  $E_1$  reaction. Stereochemistry of  $E_1$  &  $E_2$  reactions,  $E_2$  &  $E_1$  elimination from cyclic compounds. Substitution and Elimination reactions in Synthesis.

---

---

Addition reactions - Aldehydes and Ketones - nucleophilic addition of acetals & ketals. Addition of Ammonia, primary amines, and other ammonia derivatives. Conjugate addition. Conjugate addition in alpha and beta unsaturated aldehydes and ketones 1, 2 and 1,4 addition.

### **UNIT 3: Mechanism of electrophilic aromatic substitution reactions**

**14 hours**

Aromatic compounds - aromaticity, criteria for aromaticity, anti-aromatic, and non-aromatic compounds with examples. Mechanism of electrophilic aromatic substitution reactions- Halogenation, nitration, sulfonation, Friedel crafts alkylation. Friedel crafts acylation- mechanism involved. Relative reactivity of substituted benzenes, polycyclic benzenoid hydrocarbons.

The reaction of the coenzymes.

Overall view of metabolism, thiamine pyrophosphate- structure and its role in decarboxylation of alpha- keto acids.

Biotin- structure and its role in carboxylation of some important biochemical reactions of carbohydrate and lipid metabolism.

Vit B<sub>2</sub> its role in rearrangement reactions.

Vit B<sub>2</sub> coenzymes its role in redox reactions with suitable examples.

### **UNIT 4: Bio-organic compounds**

**14 hours**

Alcohols: Classification, monohydric alcohols: examples, general and distinguishing reactions. Dihydric alcohols: glycols, Tri hydric alcohols: glycerol – synthesis from propene, properties and uses. Phenols: Classification, electronic interpretation of acidity of phenols, mechanism of Kolbe, Reimer– Tiemann and bromination reactions.

Hydroxy acids: Structure and properties: Lactic acid, Citric acid and Isocitric acid. Dicarboxylic acids: Maleic and Fumaric acid. Ketoacids: Pyruvic,  $\alpha$ -Ketoglutaric, Oxaloacetic acid.

Carbonyl compounds: General properties, Keto-enol tautomerism. Mechanisms: addition of HCN to acetaldehyde, Claisen and aldol condensations. Quinones: o and p-benzoquinones-structure and properties.

Amines: Classification, properties, functional group – Basicity of amines, acylation. Reaction with HNO<sub>2</sub> & Schiff's base formation. Distinguishing reactions of primary, secondary and tertiary amines.

---

---

Heterocyclic compounds: Definition, classification with examples, structure and biological importance of furan, pyrrole, thiophene, pyridine, pyran, thiazole, pyrimidine, purine, indole, imidazole, quinoline and isoquinoline. Basicity of pyrrole and pyridine.

Terpenes: Definition, Isoprene rule, classification, isolation, structure and biological importance of menthol, camphor, farnesol, phytol, lanosterol, lycopene and dolichols.

Steroids: Basic ring structure in steroids. Structure and biological importance of cholesterol, phytosterols, ergosterol, cortisol,  $\beta$ -estradiol, testosterone, and aldosterone. Bile acids (Mono, Di & Tri cholic acids).

Alkaloids: Definition, classification based on their structure and biological functions, Isolation of alkaloids, structure and physiological action of morphine, nicotine and atropine.

<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>25</b>

#### Course outcome:

This course aims to familiarize students with the principles of organic chemistry and basic qualitative analysis of organic compounds. Course objective is to provide experimental practice of preparation of organic compounds and extraction of biologically important compounds.

#### Experiments:

I. Systematic qualitative analysis of organic compounds (6 practicals)

1. Urea	2. Aniline	3. Benzoic Acid
4. Salicylic acid	5. Benzaldehyde	6. Acetophenone
7. Chlorobenzene	8. Nitrobenzene	

II. Preparation of following organic compounds (2 practicals)

1. Acetylation: Preparation of acetyl salicylic acid from salicylic acid.
2. Oxidation: Preparation of benzoic acid from benzaldehyde.
3. Nitration: Preparation of m-dinitrobenzene from nitrobenzene.
4. Hydrolysis: Preparation of benzoic acid from ethyl benzoate.

III. Extractions

1. Extraction of caffeine from tea leaves
  2. Extraction of starch from potatoes
  3. Extraction of casein from milk
-

---

## OPEN ELECTIVE 1

<b>COURSE TITLE</b>	<b>BIOCHEMICAL TECHNIQUES</b>
<b>COURSE CREDITS</b>	<b>03</b>
<b>TOTAL CONTACT HOURS</b>	<b>42</b>
<b>DURATION OF ESA</b>	<b>03</b>
<b>FORMATIVE ASSESSMENT MARKS</b>	<b>40</b>
<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>60</b>

### Course outcome:

These topics will enable students to develop competence in handling various chromatographic, electrophoretic and isotopic techniques and apply them in isolating and characterizing different biological molecules.

### UNIT 1 : Microscopy & Centrifugation Techniques

**14 hours**

**Microscopy:** Different types of microscopes – electron microscopes – TEM, SEM. Fluorescence and confocal microscopes used in fine structure studies.

**Centrifugation Techniques:** Introduction, basic principles, and applications of sedimentation. Centrifuges and their use - small bench centrifuges, large capacity refrigerated centrifuges, high speed refrigerated centrifuges, continuous flow centrifuges, Preparative ultra- centrifuges, analytical ultracentrifuges, and density gradient centrifugation.

### UNIT 2 : Chromatography & Electrophoresis techniques

**14 hours**

**Chromatography:** Introduction, classification of chromatographic techniques. Principle, materials, theory and applications of paper chromatography, thin layer chromatography, column chromatography- adsorption chromatography, gel permeation, ion exchange chromatography, affinity chromatography, gas chromatography, FPLC, high performance (pressure) liquid chromatography.

**Electrophoresis techniques:** Introduction. Principles and application of electrophoretic techniques-paper electrophoresis, starch gel electrophoresis, polyacrylamide gel electrophoresis, agarose gel electrophoresis, isoelectric focusing, isotachopheresis, pulse field electrophoresis, two-dimensional electrophoresis, capillary electrophoresis,

---

---

preparative and high voltage electrophoresis.

### UNIT 3 : Radio isotopic techniques & Spectroscopy

14 hours

**Radio isotopic techniques:** Introduction to isotopes; mass and radioisotopes. Nature of radioactive decay, rate of radioactive decay, units of radioactivity, measurement of radioactivity- proportional counters, scintillation counters, autoradiography, isotopic dilution technique. Applications of radioisotopes in the biological sciences.

**Spectroscopy:** Introduction, Nature of electromagnetic Radiations. Principles and applications of the following spectroscopic techniques in biochemical investigations- Visible and Ultraviolet spectroscopy, Fluorescence spectroscopy, Infrared spectroscopy, Optical rotation dispersion (ORD), Circular dichroism (CD) spectroscopy, electron spin resonance (ESR), Atomic Absorption spectroscopy, Nuclear Magnetic resonance (NMR) spectroscopy and Mass spectroscopy

# SEMESTER III

## OPEN ELECTIVE 2

<b>COURSE TITLE</b>	<b>HORMONES - BIOCHEMISTRY AND FUNCTION</b>
<b>COURSE CREDITS</b>	<b>03</b>
<b>TOTAL CONTACT HOURS</b>	<b>42</b>
<b>DURATION OF ESA</b>	<b>03</b>
<b>FORMATIVE ASSESSMENT MARKS</b>	<b>40</b>
<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>60</b>

**Course outcome:** These topics will enable the students to:

- Understand the function of hormones and their regulation.
- Know how hormonal systems act in an integrated manner to regulate overall bodyfunctions.
- Understand how failure of these normal physiologic functions and integrations are associated with some endocrine disorders.

### **UNIT 1 :Overview of endocrine system**

**14 hours**

Introduction to the system and concepts of signaling. Classification, intercellular communication, regulation of synthesis and secretion of hormones. Chemical signaling- endocrine, paracrine, autocrine, and neuroendocrine mechanisms. Mechanisms of hormone action: synergism, antagonism, permissive effects. Division of hormones by the origin, chemical structure, location, and mechanism of action. Physiological role and disorders of Pituitary, Pineal, Thyroid and Parathyroid hormones. Introduction to the hypothalamus as the true master gland with Releasing hormones and inhibitory substances. Neurohypophysis and its secretions – ADH and Oxytocin

### **UNIT 2 :Endocrine glands and their secretions**

**14 hours**

Physiological role and disorders of hormones of pancreas, adrenal, and placenta. Introduction to gastrointestinal hormones and neurotransmitters (Acetyl choline, GABA, Serotonin). Mechanism of action, target tissues, and the physiological effects of gastrointestinal hormones. Structure and functions of sex hormones. Hormones during

---

ovarian and uterine phases of menstrual cycle; Placental hormones; role of hormones during parturition and lactation. Hormone receptors: receptors in the cell membrane and in the cell. Secondary and tertiary messengers (cAMP and Ca<sup>2+</sup>). Overview on signal transduction pathways for steroidal and non-steroidal hormones (One example each).

### UNIT 3 : Clinical endocrinology

**14 hours**

Clinical endocrinology- Blood volume, composition and functions of plasma and serum. Separation and storage of body fluids. Methods of hormone estimation, principles of assay systems, normal range of hormones in tissues and clinical conditions leading to abnormal levels with interpretations. Thyroid function test- Determination of T3, T4, and TSH. Infertility profile: Determination of LH, FSH, TSH, Estrogen, Progesterone, Total Testosterone, Free testosterone. Major manifestations of disease of the endocrine pancreas, thyroid, hypothalamus, and pituitary disease.

<b>COURSE TITLE</b>	<b>ANALYTICAL BIOCHEMISTRY</b>
<b>COURSE CREDITS</b>	<b>04</b>
<b>TOTAL CONTACT HOURS</b>	<b>56</b>
<b>DURATION OF ESA</b>	<b>03</b>
<b>FORMATIVE ASSESSMENT MARKS</b>	<b>40</b>
<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>60</b>

**Course outcome:** These topics will enable the students to

- Understand the concept of biological sample preparation
- Appreciate chemistry and application of analytical instruments.
- Get acquainted with care and maintenance of equipment and chemicals.
- Understand clinically relevant biochemical analysis of all biochemical components i.e., proteins, electrolytes, hormones etc.,
- Have basic knowledge of clinical and forensic analytical methods and their principles.

Course outcomes /Program outcomes	1	2	3	4	5	6	7	8	9	10	11	12
Aptitude	X	X	X	X								
Critical thinking		X				X						
Subject clarity	X	X						X				X
Analytical skill				X	X	X	X	X	X	X	X	X

### UNIT 1: Biological sample preparation and fractionation

**14 hours**

Introduction and objectives of bioanalysis and extraction of molecules from tissues and cells. Sample preparation types of sample living, postmortem extraction of macromolecules from tissues; liquid-liquid, liquid-solid and precipitation methods.

**Centrifugation-** Introduction, principles of centrifugation, Sedimentation, angular velocity, centrifugal field, relative centrifugal field. Types of centrifugations- Preparative and analytical. Differential, density gradient and ultra-centrifugation. Basic instrumentation; types of rotors and their design. Laboratory centrifuge; operational instruction and applications. Analytical Centrifuges- Optics; Application in sub-cellular fractionation. Sedimentation coefficient, care, and maintenance of instrument.

### UNIT 2: Chromatography

**14 hours**

General principles of chromatography, history of chromatography. Classification based on 1. physical way stationary and mobile phase are brought together- Planar and column

---

chromatography, 2. based on types of mobile and/or liquid phase adsorption and partition- Gas chromatography and liquid chromatography. Based on stationary phase- thin layer chromatography, Paper chromatography - ascending, descending and circular, 2-D chromatography, Rf values.

Classification of chromatography based on separation: Principles, methodologies and applications of adsorption, partition, ion-exchange, gel-filtration and affinity- chromatography. Advanced chromatography- HPLC and FPLC, UPLC and GLC.

### **UNIT 3: Electrophoretic and radio isotopic methods**

**14 hours**

**Electrophoresis:** General principle of electrophoresis, velocity of a charged molecule in the applied electric field, relevance of Ohm's law in electrophoretic separations. Supporting media for electrophoresis; work of Tiselius, paper, agarose, polyacrylamide. Chemistry of polymerization of acrylamide gels, methodology and applications of native PAGE and SDS-PAGE, 2-D electrophoresis, Identification of proteins post electrophoresis- dyes and biological activities. Agarose gel and Pulse field electrophoresis, Applications of capillary electrophoresis and isoelectric focusing. Cellulose acetate electrophoresis. Principle and applications of immune-electrophoresis.

**Radioisotopic methods:** Radioactivity-Types of radioactive decay, Properties of  $\alpha$ ,  $\beta$ ,  $\gamma$  radiations. Group displacement law. Decay law - decay constant, Half-life period and average life of a radioactive element. Detection of radioactivity - GM counter and scintillation counters (only principal and working) Applications of radioisotopes -  $^3\text{H}$ ,  $^{14}\text{C}$ ,  $^{131}\text{I}$ ,  $^{60}\text{Co}$  and  $^{32}\text{P}$ . Biological effects of radiations. Radiolabeling, safety measure in handling radio isotopes.

### **UNIT 4: Spectroscopic methods of bio-analysis**

**14 hours**

**Spectroscopic methods:** Wave particle duality of light, electromagnetic spectrum, transition in spectroscopy. Principle, design and application of UV-Vis spectrophotometer. Beer's law and its limitations, determination of molar absorption coefficient of molecules. Working principle and application of a colorimeter, flame photometer and fluorimeter. Principle and application of IR, and Raman, ESR and NMR spectroscopy.

## PRACTICALS IV

<b>COURSE TITLE</b>	<b>ANALYTICAL BIOCHEMISTRY</b>
<b>COURSE CREDITS</b>	<b>02</b>
<b>TOTAL CONTACT HOURS</b>	<b>4 Hours/ Week</b>
<b>DURATION OF ESA</b>	<b>03</b>
<b>FORMATIVE ASSESSMENT MARKS</b>	<b>25</b>
<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>25</b>

**Course outcome:** This course aims to provide experimental practice of analytical techniques in Biochemistry. Upon successful completion, students should develop skills in handling instruments and understand its application in research work.

- Sourcing and handling biological samples.  
Develop skill and proficiency in basic techniques
- Centrifugation
- Chromatography
- Electrophoresis and
- Spectroscopy

### Experiments:

1. Preparation of human lymphocytes using clinical centrifuge
  2. Determination of packed cell volume/ hematocrit
  3. Resolution of basic, acidic and aromatic amino acids by descending and circular paperchromatography.
  4. Separation of plant pigments by gel-permeation chromatography
  5. Identification and resolution of pigments by thin layer chromatography.
  6. Determination of void volume of a gel-filtration column
  7. Recording the absorption spectrum of riboflavin
  8. Colorimetric estimation of glucose by DNS method
  9. Estimation of DNA by diphenylamine method
  10. Estimation of RNA bu orcinol method
  11. Electrophoretic separation of plasma proteins
-

---

## ELECTIVE 1

### BIOCHEMICAL TOXICOLOGY

<b>COURSE TITLE</b>	<b>BIOCHEMICAL TOXICOLOGY</b>
<b>COURSE CREDITS</b>	<b>03</b>
<b>TOTAL CONTACT HOURS</b>	<b>42</b>
<b>DURATION OF ESA</b>	<b>03</b>
<b>FORMATIVE ASSESSMENT MARKS</b>	<b>40</b>
<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>60</b>

**Course outcome:** This open elective course offered to various streams gives basic idea about biochemical basis of various effects of toxins/ pharmaceuticals and an outline of process involved in toxicity testing and drug dosing.

- Categorize the classes of toxicants/drugs and know specific examples
- State the routes of exposure to toxins/drugs;
- Explain the processes of absorption, metabolism and elimination of toxins/drugs; and
- Explain environmental and physiological factors that affect toxicant metabolism

#### **UNIT 1 : Fundamentals of toxicology and dose response**

**14 hours**

Scope of toxicology; why should we know about toxins/xenobiotics (drugs) and What makes a substance toxic? Grading toxicity, Use of animal studies for toxicity, *in vitro* toxicity, organ toxicity (liver and kidney toxicity). Indicators of toxicity/drug effects; biomarkers. Concentration and site of action, dose response, effect of route of administration, ED<sub>50</sub>, LD<sub>50</sub>/TD<sub>50</sub>. Hazard and risk assessment, risk, acceptable daily intake (ADI) and tolerable daily intake (TDI).

#### **UNIT 2 : Factors affecting toxic responses**

**14 hours**

Disposition- Outline of toxin/drug uptake, entry to cells and systemic circulation. Effect of size, shape, solubility, and charge on their uptake. Major sites of absorption, liver, intestine, skin, role of transporters, role of plasma proteins in distribution, plasma levels of toxins/drugs, plasma half-life, excretion- disposition by kidney, biliary excretion. Metabolism- types of metabolic changes of foreign compounds, biotransformation/detoxification reactions, phase-1 and, phase -2 reactions, nature of phase-1 and phase 2 enzymes.

---

---

### UNIT 3 : Targets of toxic damages and biochemical mechanism of toxicity 14 hours

Toxins/drugs causing liver, kidney, gall bladder, and lung damage, methods of identifying the damages. Examples of biochemical toxicity mechanisms; chemical carcinogens - Benzo[a]pyrene, Tamoxifen. Liver necrosis- carbon tetrachloride, Valproic Acid, and Iproniazid, Kidney damage- Chloroform, Antibiotics- gentamycin, Lung damage- 4-Ipomeanol, Neurotoxicity- Isoniazid, paracetamol, primaquine, cyclophosphamide.

# SEMESTER IV

## OPEN ELECTIVE 2

<b>COURSE TITLE</b>	<b>PLANT BIOCHEMISTRY</b>
<b>COURSE CREDITS</b>	<b>03</b>
<b>TOTAL CONTACT HOURS</b>	<b>42</b>
<b>DURATION OF ESA</b>	<b>03</b>
<b>FORMATIVE ASSESSMENT MARKS</b>	<b>40</b>
<b>SUMMATIVE ASSESSMENT MARKS</b>	<b>60</b>

**Course outcomes:** These topics will enable the students to

- Understand the plant cell, photosynthesis, transporters, and important primary metabolites.
- Illustrate plant growth regulators, plant's responses to various biotic and abiotic stresses.
- Explain about plant secondary metabolites and their functional importance.

### **UNIT 1 :Plant cell biology**

**14 hours**

**Plant cell- structure and molecular components:** Cytoskeleton- an overview. Plant cell division, cell cycle. Outlines of energy production in plant cells, Carbon assimilation and nitrogen assimilation.

**An overview of photosynthesis:** C3, C4 plants and crassulacean acid metabolism (CAM); photorespiration; Phytochromes, cryptochromes and phototropins. Non-protein thiols and sulfur cycle.

**Plant cell membranes and membrane transport:** Introduction to plant cell membranes and membrane constituents. Organization of transport systems across plant membranes; Different types of pumps operate at plant cell and organelle membranes; classification and importance of H<sup>+</sup>-ATPases. Ion channels-properties and significance; Aquaporins and water transport.

**Important Primary metabolites of plants:** Cellulose, starch, sucrose, oligosaccharides; fructans, gums, mucilages, poly unsaturated fatty acids, lignin, suberin, surface waxes, sulfides and sweet proteins.

### **UNIT2 :PCR and Stress responses**

**14 hours**

**Plant growth regulators:** Auxins, cytokinins, gibberellins, abscisic acid, ethylene, brassinosteroids, polyamines, jasmonic acid, salicylic acid.

---

---

**Plant responses to biotic and abiotic stresses:** Introduction; Plant pathogens and diseases; plant defense systems - hypersensitive response; systemic acquired resistance; induced systemic resistance; Plant biotic stress response to pathogens and insects.

**Plant abiotic stress responses:** Salt stress, drought, and heavy metal stress responses; osmotic adjustment and significance of osmotic agents such as proline, sugar alcohols and quaternary ammonium compounds; An overview of oxidative stress and oxidative damage. Antioxidant enzymes and stress tolerance.

### **UNIT 3 :Secondary metabolites**

**14 hours**

#### **Plant secondary metabolites (Natural products):**

Introduction; secondary metabolites (natural products) definition; classification of plant secondary metabolites (natural products). An overview of primary metabolism contribution to secondary metabolites biosynthesis.

**Alkaloids:** Classification of alkaloids; Contribution of amino acids for alkaloid biosynthesis; Isolation, purification and characterization of alkaloids. (S)-Seticuline-the chemical chameleon.

**Phenolics:** Classification of phenolic compounds; Classification of flavonoids; Classification of anthocyanins; Isolation, purification and characterization of phenolics.

**Terpenoids:** Classification of terpenoids, biogenic isoprene rule; volatile compounds; plant growth regulator terpenoids – gibberellin, abscisic acid; brassinosteroids and saponins Isolation, purification, and characterization of terpenoids

**Biological properties of secondary metabolites:** Role of secondary metabolites - in plants' defense; in insects' signalling, morphogenesis, and defense. Physiologically active secondary metabolites in modern medicine and therapeutic compounds for human ailments

**Practical weightage**

<b>Component</b>	<b>Marks</b>
Knowledge of relevant processes	30%
Skills and operations involved	50%
Result/ products including calculations and reporting	20%

---

## SCHEME OF VALUATION FOR PRACTICAL EXAMINATION

- A candidate appearing for the first time should submit a duly signed and certified practical record
- Each candidate has to perform one experiment in the specified duration of three hours for **FIFTEEN** marks
- Practical record has to be valued for **FIVE** marks by examiners at the time of examination
- Viva-voce for **FIVE** marks in practical is awarded by continuous assessment in the lab

<b>Sl no</b>	<b>Component</b>	<b>Marks</b>
1	Write up of the experiment	05
2	Conducting experiment	15
3	Result	05
4	Viva-voce	05
5	Practical record	05
<b>TOTAL</b>		<b>35</b>

---

## **Programme Outcome for Bachelor of Science in Biochemistry, Microbiology & Biotechnology**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1.** Demonstrate the ability to justify and explain their thinking and/or approach
- PO2.** Develop state-of-the-art laboratory and professional communication skills
- PO3.** Apply the scientific method to design, execute, and analyze an experiment
- PO4.** Explain scientific procedures and their experimental observations
- PO5.** Demonstrate an understanding of fundamental biochemical principles, structure and function
- PO6.** Work as a laboratory technician, biochemists or medical scientist
- PO7.** Explain the processes used by microorganisms for the growth
- PO8.** Explain the theoretical basis of tools, technologies and methods of microbiology
- PO9.** Design and develop solution to Biotechnology problems
- PO10.** Applying appropriate tools keeping in mind safety factor for environment & society
- PO11.** Create, select, and apply appropriate techniques, resources, and modern tools
- PO12.** Support biotechnology research activity with strong technical background

## **Programme Specific Outcome**

### **Bachelor of Science in Biochemistry, Microbiology & Biotechnology**

After completing the graduation in the Bachelor of Science the students are able to;

- PSO 1:** Gain and understand biochemical and molecular processes
  - PSO2:** Communicate scientific information effectively, relating to microbes and their role in ecosystem and health
  - PSO3:** Acquire, articulate, retain and demonstrate laboratory safety skills
  - PSO4:** Demonstrate applications of biochemical and biological sciences
  - PSO5:** Apply appropriate tools and techniques in biotechnological manipulation
  - PSO6:** Understand the responsibilities of biotechnological practices
-

---

## **Programme Outcome for Bachelor of Science in Botany, Biochemistry & Microbiology**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1.** Identify the taxonomic position of plants using principles and methods of nomenclature and classification in Botany
- PO2.** Understand the impact of the plant diversity in societal and environmental context
- PO3.** Demonstrate the knowledge of, and need for sustainable development
- PO4.** Use interdisciplinary approaches with quantitative skills to work on biological problems
- PO5.** Demonstrate the ability to justify and explain their thinking and/or approach
- PO6.** Develop state-of-the-art laboratory and professional communication skills
- PO7.** Apply the scientific method to design, execute, and analyze an experiment
- PO8.** Explain scientific procedures and their experimental observations
- PO9.** Demonstrate an understanding of fundamental biochemical principles, structure and function
- PO10.** Work as a laboratory technician, biochemists or medical scientist
- PO11.** Explain the processes used by microorganisms for the growth
- PO12.** Explain the theoretical basis of the tools, technologies and methods of microbiology

## **Programme Specific Outcome**

### **Bachelor of Science in Botany, Biochemistry & Microbiology**

After completing the graduation in the Bachelor of Science the students are able to;

- PSO 1:** Demonstrate applications of biochemical and biological sciences
  - PSO2:** Inculcating proficiency in all experimental techniques and methods of analysis
  - PSO3:** Acquire, articulate, retain and demonstrate laboratory safety skills
  - PSO4:** Communicate scientific information effectively, relating to microbes and their role in ecosystem and health
  - PSO5:** Gain proper procedures and regulations in handling and disposal of chemicals
  - PSO6:** Understand biochemical and molecular processes that occur in and between the cells
-

**(Credits: Theory – 04, Practical – 01)****Theory: 60 Hrs****Course Outcome:****After completion of the course the student is able to;****CO1:** Understand the characteristics of energy metabolism**CO2:** Specify the characteristics of dietary carbohydrates**CO3:** Identify in detail with examples dietary lipid & health**CO4:** Understand the characteristics of minerals

- Unit : 1 INTRODUCTION TO NUTRITION & ENERGY METABOLISM 09 Hrs**  
Defining Nutrition, role of nutrients. Unit of energy, Biological oxidation of foodstuff. Measurement of energy content of food, Physiological energy value of foods, SDA.  
Measurement of energy expenditure. Direct and Indirect Calorimetry, factors affecting thermogenesis, energy utilization by cells, energy output – Basal and Resting metabolism, physical activity, factors affecting energy input - hunger, appetite, energy balance Energy expenditure in man. Estimating energy requirements, BMR factors Recommended Nutrient Intakes (RNI) and Recommended Dietary Allowances for different age groups (Adult man, women and children).
- Unit: 2 DIETARY CARBOHYDRATES & HEALTH: 07 Hrs**  
Review functions of carbohydrates. Digestion, absorption, utilization and storage, hormonal regulation of blood glucose. Dietary requirements and source of carbohydrates, blood glucose level.
- Unit :3 DIETARY LIPID & HEALTH: 08 Hrs**  
Review of classification, sources, functions, digestion, absorption, utilization and storage.  
Essential Fatty Acids; Functions of EFA, RDA, – excess and deficiency of EFA. Lipotropic factors, role of saturated fat, cholesterol, lipoprotein and triglycerides. Importance of the following: a) Omega – fatty acids. Omega 3/ omega 6 ratio b) Phospholipids c) Cholesterol in the body d) Mono, Polyunsaturated and Saturated Fatty Acids.
- Unit: 4 DIETARY PROTEINS & HEALTH: 08 Hrs**  
Review of functions of proteins in the body, Digestion and absorption. Essential and Nonessential amino acids. Amino acid Supplementation. Effects of deficiency. Food source and Recommended Dietary Allowances for different age group. Amino acid pool. NPU, Biological Value, Nitrogen balance. PEM and Kwashiorkor.
- Unit :5 FAT & WATER SOLUBLE VITAMINS: 10 Hrs**  
Vitamin A, C, E, K and D  
Dietary sources, RDA, Absorption, Distribution, Metabolism and excretion (ADME), Deficiency. Role of Vitamin A as an antioxidant, in Visual cycle, dermatology and immunity. Role of Vitamin K in Gamma carboxylation. Role of Vitamin E as an antioxidant. Role of Vitamin D and its effect on bone physiology.  
Hypervitaminosis. Vitamin C role as cofactor in amino acid modifications. Niacin- Metabolic interrelation between tryptophan, Niacin and NAD/
-

---

NADP. Vitamin B6-Dietary source, RDA, conversion to Pyridoxal Phosphate. Role in metabolism, Biochemical basis for deficiency symptoms. Vitamin B12 and folate; Dietary source, RDA, absorption, metabolic role Biochemical basis for deficiency symptoms.

**Unit: 6 MINERALS:** Calcium, Phosphorus and Iron - Distribution in the body digestion, Absorption, Utilization, Transport, Excretion, Deficiency, Sources, RDA. **09 Hrs**

Iodine, Fluoride, Mg, Cu, Zn, Se, Manganese - Absorption, Utilization, Transport, Excretion, Deficiency, Sources, RDA.

**Unit: 7 ASSESSMENT OF NUTRITIONAL STATUS:** Anthropometric measurements; Z scores, BMI, skinfold, circumference ratios. Biochemical assessment; Basal metabolic panel, Comprehensive metabolic panel, CBC, Urine Analysis, Assessment of Anemia, ROS assessment. **05 Hrs**

**Unit: 8 FOOD & DRUG INTERACTIONS & NUTRICEUTICALS:** Nutrient interactions affecting ADME of drugs, Alcohol and nutrient deficiency, Antidepressants, psychoactive drugs and nutrient interactions. **04 Hrs**

## **DME21106/ DME21107 PRACTICALS**

- 1 Bioassay for vitamin B12/B1.
- 2 Extraction of oil from oil seeds by soxlet.
- 3 Separation of sugars by circular paper chromatography
- 4 Anthropometric identifications for Kwashiorkor, Marasmus and Obesity.
- 5 Extraction of caffeine from tea leaves
- 6 Vitamin A/E estimation in serum.
- 7 Determination of moisture content of food sample
- 8 Detection of adulterants in food.
- 9 Estimation of Calcium in ragi.
- 10 Estimation of Vitamin – C in lemon or gooseberries by DPPH method
- 11 Estimation of Lactose in milk by Benedict's method
- 12 Estimation of iron in drumsticks
- 13 Determination of iodine value of an oil or fat
- 14 Determination of saponification value of an oil or fat

**Note: Minimum of eight experiments to be done.**

**DSE -2: MOLECULAR BASIS OF INFECTIOUS DISEASES**

(Credits: Theory – 04, Practical – 01)

Theory: 60 Hrs

**Course Outcome:**

After completion of the course the student is able to;

**CO1:** Deliberate in depth infectious agents**CO2:** Learn the detail of bacterial diseases**CO3:** Understand the detail of viral diseases**CO4:** Learn the characteristics of fungal diseases

- Unit : 1 CLASSIFICATION OF INFECTIOUS AGENTS:** Bacteria, Viruses, protozoa and fungi. Past and present emerging and re-emerging infectious diseases and pathogens. Source, reservoir and transmission of pathogens, Antigenic shift and antigenic drift. Host parasite relationship, types of infections associated with parasitic organisms. Overview of viral and bacterial pathogenesis. Infection and evasion **12 Hrs**
- Unit: 2 OVERVIEW OF DISEASES CAUSED BY BACTERIA:** Detailed study of tuberculosis: History, causative agent, molecular basis of host specificity, infection and pathogenicity, Diagnostics, Therapeutics, inhibitors and vaccines. Drug resistance and implications on public health. Other bacterial diseases including Typhoid, Diphtheria, Pertussis, Tetanus, Typhoid and Pneumonia. **18 Hrs**
- Unit: 3 OVERVIEW OF DISEASES CAUSED BY VIRUSES:** Detailed study of AIDS, history, causative agent, pathogenesis, Diagnostics, Drugs and inhibitors. Other viral diseases including hepatitis, influenza, rabies, chikungunya and polio. **12 Hrs**
- Unit: 4 OVERVIEW OF DISEASES CAUSED BY PARASITES:** Detailed study of Malaria, history, causative agents, Vectors, life cycle, Host parasite interactions, Diagnostics, Drugs and Inhibitors, Resistance, Vaccine development. Other diseases including leishmaniasis, amoebiasis. **08 Hrs**
- Unit :5 OVERVIEW OF DISEASES CAUSED BY OTHER ORGANISMS:** **10 Hrs**  
Fungal diseases, General characteristics. Medical importance of major groups, pathogenesis, treatment.

**DME21306/ DME21307****PRACTICALS**

- 1 WIDAL test
- 2 Gram staining
- 3 Acid fast staining
- 4 PCR based diagnosis
- 5 Preparation of media.
- 6 Isolation of bacteria from soil
- 7 Isolation of bacteria from water

- 
- 8 Structural staining- (cellwall and endospore of bacteria).
  - 9 Simple staining and Negative staining
  - 10 Effect of temperature on growth of microorganisms
  - 11 Effect of pH on growth of microorganisms
  - 12 Demonstration of Bacterial Conjugation
  - 13 Demonstration of bacterial transformation and transduction
  - 14 Photographic demonstration of infectious diseases

**Note: Minimum of eight experiments to be done.**

**SEMESTER VI**  
**DSE-1: ADVANCED CELL BIOLOGY AND ENDOCRINOLOGY**

(Credits: Theory – 04, Practical – 01)

Theory: 60 Hrs

**Course Outcome:**

**After completion of the course the student is able to;**

**CO1:** Learn the detail of cell membrane

**CO2:** Understand in detail with examples cell-cell interactions

**CO3:** Identify in depth endocrine organs

**CO4:** Deliberate the detail of immunohistochemistry

<b>Unit : 1</b>	<b>PLASMA MEMBRANE &amp; NUCLEAR TRANSPORT:</b> Properties and Composition of Cell Membrane; Structure of Nuclear Envelope; Nuclear Pore Complex; Transport Across Nuclear Envelope; Regulation of Nuclear Protein Import and Export.	<b>08 Hrs</b>
<b>Unit: 2</b>	<b>CELL-CELL INTERACTION:</b> Cell-Cell Interactions and Cell-Matrix Interactions; Components of Extracellular Matrix: Collagen and Non-Collagen Components; Tight Junctions; Gap Junctions; Desmosomes; Hemidesmosomes; Focal Adhesions And Plasmodesmata; Cell Wall; Role Of Cell Interaction In Development.	<b>10 Hrs</b>
<b>Unit :3</b>	<b>CELL CYCLE &amp; PROGRAMMED CELL DEATH:</b> Overview of The Cell Cycle; Eukaryotic Cell Cycle; Events Of Mitotic Phase; Cytokinesis; Events Of Meiosis And Fertilization; Regulation Of Cell Division And Cell Growth; Apoptosis And Necrosis, Stem Cells And Maintenance of Adult Tissues, Hematopoiesis, Embryonic Stem Cells and Therapeutic Cloning.	<b>12 Hrs</b>
<b>Unit :4</b>	<b>CANCER BIOLOGY:</b> Development and causes Of Cancer; Genetic Basis of Cancer; Oncogenes, Tumor Viruses; Molecular Approach to Cancer Treatment.	<b>10 Hrs</b>
<b>Unit: 5</b>	<b>ADVANCED METHODS IN CELL BIOLOGY:</b>	<b>10 Hrs</b>

---

---

Ultracentrifugation, Fluorescence Microscopy- FACS, Confocal Microscopy, Electron Microscopy, Plant and Animal Cell Culture, Immunohistochemistry.

**Unit: 6 ENDOCRINE SYSTEM:** Endocrine organs, hormones- classification, Hierarchy, interplay, dynamic balance and regulation of their secretions. Functions of the hormones of Hypothalamus, Pituitary, Adrenal, Thyroid, pancreas and Gonads. Concept of receptors- Membrane and cytosolic. Mechanism of hormone action - Steroid hormone and Peptide hormone (second messengers hypothesis. Eg: cAMP, DAG, IP3). **10 Hrs**

### **PRACTICALS**

- 1 Isolation of WBC using ficol reagent method
- 2 Study of cell viability /death assay by use of trypan blue and MTT assay.
- 3 Study of apoptosis through analysis of DNA fragmentation patterns in mitochondria.
- 4 Identification and study of cancerous cells using permanent slides and photomicrographs.
- 5 Antigen-Antibody reaction
- 6 Cell counting methods: counting using Haemocytometer.
- 7 Calibration of ocular micrometer and Measurement of average cell size using Stage micrometer
- 8 Separation of cell organelles by differential centrifugation and assay of marker enzymes. (2 Practicals)
- 9 Photographic demonstration of different types of cells.
- 10 Isolation of chloroplast by differential centrifugation & its identification.
- 11 Buccal smear- barr bodies
- 12 Identification of normal & abnormal karyotype using permanent slides
- 13 Estimation of iodine by titrimetric method from commercial salt
- 14 Industrial /Institution visit

**Note: Minimum of eight experiments to be done.**

DMF21206/ DMF21207

**SEMESTER VI**  
**DSE-2: PLANT BIOCHEMISTRY**

(Credits: Theory – 04, Practical – 01)

Theory: 60 Hrs

**Course Outcome:**

**After completion of the course the student is able to;**

**CO1:** Specify the characteristics of plant cell structure

**CO2:** Deliberate in detail with examples photosynthesis

**CO3:** Understand the detail of nitrogen metabolism

**CO4:** Learn in detail with examples secondary metabolites

<b>Unit : 1</b>	<b>INTRODUCTION TO PLANT CELL STRUCTURE:</b> Plasma membrane, Vacuole and tonoplast membrane, cell wall, plastids and peroxisomes.	<b>5Hr</b>
<b>Unit :2</b>	<b>PHOTOSYNTHESIS &amp; CARBON ASSIMILATION:</b> Structure of PSI and PSII complexes, Light reaction, Cyclic and non cyclic photophosphorylation, Calvin cycle and regulation; C4 cycle and Crassulacean acid metabolism (CAM), Photorespiration.	<b>14Hr</b>
<b>Unit :3</b>	<b>NITROGEN METABOLISM:</b> Biological Nitrogen fixation by free living and in symbiotic association, structure and function of enzyme Nitrogenase. Nitrate assimilation: Nitrate and Nitrite reductase. Primary and secondary ammonia assimilation in plants; ammonia assimilation by	<b>14Hr</b>

---

---

Induction of hydrolytic enzymes  $\beta$ -galactosidase during germination  
Glutamine synthetase-glutamine oxoglutarate amino transferase (GS-GOGAT) pathway. Seed storage proteins in legumes and cereals.

- Unit :4 REGULATION OF PLANT GROWTH:** Introduction to plant hormones and their effect on plant growth and development, Regulation of plant morphogenetic processes by light. **7Hr**
- Unit :5 SECONDARY METABOLITES:** Representatives alkaloid group and their amino acid precursors, function of alkaloids, Examples of major phenolic groups; simple phenylpropanoids, Coumarins, Benzoic acid derivatives, flavonoids, tannins and lignin, biological role of plant phenolics, Classification of terpenoids and representative examples from each class, biological functions of terpenoids. **12Hr**
- Unit :6 PLANT TISSUE CULTURE:** Cell and tissue culture techniques, types of cultures: organ and explants culture, callus culture, cell suspension culture and protoplast culture. Plant regeneration pathways: organogenesis and somatic embryogenesis. Applications of cell and tissue culture and somoclonal variation. **8Hr**

## PRACTICALS

- 1
- 2 Extraction and assay of Urease from Jack bean
- 3 Estimation of carotene in fruits and vegetables
- 4 Estimation of ascorbic acid in fruits and vegetables
- 5 Estimation of phenols in fruits and vegetables
- 6 Estimation of tannins in fruits and vegetables
- 7 Culture of plant plants (explants)
- 8 Extraction of genomic DNA from coconut endosperm, quantification & determination of its purity by Spectrophotometric method.(2 Practicals)
- 9 Extraction of RNA from spinach leaves
- 10 Estimation of DNA by DPA method
- 10 Estimation of RNA by orcinol method
- 11 Extraction of Starch from potato
- 12 Extraction Casein from milk
- 13 Extraction of polyphenols
- 14 Industrial /Institution visit

**Note: Minimum of eight experiments to be done.**

**Pattern of Question Paper**  
**Semester III to VI**  
**Paper III to V and VII (DSC and DSE)**

**Time : 3 Hrs**

**Max Marks: 70**

1. Answer all the questions

5 X 1 = 5

- a. -----
- b. -----
- c. -----
- d. -----
- e. -----

2. Answer any five of the following questions

5 X 3 = 15

- a. -----
- b. -----
- c. -----
- d. -----
- e. -----
- f. -----
- g. -----

3. Answer any four of the following questions

4 X 5 = 20

- a. -----
- b. -----
- c. -----
- d. -----
- e. -----
- f. -----

4. Answer any three questions of the following

3 X 10 = 30

- a. -----
- b. -----
- c. -----
- d. -----
- e. -----

( Note- 10 Marks may be divided in to 6+4 or 5+5)

---

---

**Pattern of Question Paper**  
**Semester V**  
**Paper VI (SEC)**

Time : 2 Hrs

Max Marks: 35

1. Answer all the questions

5 X 1 = 5

- a. -----
- b. -----
- c. -----
- d. -----
- e. -----

2. Answer any five of the following questions

5 X 3 = 15

- a. -----
- b. -----
- c. -----
- d. -----
- e. -----
- f. -----
- g. -----

3. Answer any three of the following questions

3 X 5 = 15

- a. -----
  - b. -----
  - c. -----
  - d. -----
  - e. -----

## MODEL CURRICULUM

<b>Name of the Degree Program</b>	<b>:</b>	<b>B.Sc. (Basic/Hons.)</b>
<b>Discipline Core</b>	<b>:</b>	<b>Biotechnology</b>
<b>Total Credits for the Program</b>	<b>:</b>	<b>B.Sc. Basic - 136 and B.Sc. Hons. - 176</b>
<b>starting year of implementation</b>	<b>:</b>	<b>2021-22</b>

### **Program Outcomes:**

Competencies need to be acquired by the candidate securing B.Sc. (Basic) or B.Sc. (Hons)

### **By the end of the program the students will be able to:**

Competencies need to be acquired by a candidate securing B.Sc. (Basic) or B.Sc. (Hons) degree in Biotechnology.

1. Understanding concepts of Biotechnology and demonstrate interdisciplinary skills acquired in cell biology, genetics, biochemistry, microbiology, and molecular biology.
2. Demonstrating the Laboratory skills in cell biology, basic and applied microbiology with an emphasis on technological aspects
3. Competent to apply the knowledge and skills gained in the fields of Plant biotechnology, animal biotechnology and microbial technology in pharma, food, agriculture, beverages, herbal and nutraceutical industries.
4. Critically analyze the environmental issues and apply the biotechnology knowledge gained for conserving the environment and resolving the problems.
5. Demonstrate comprehensive innovations and skills in the fields of biomolecules, cell and organelles, molecular biology, bioprocess engineering and genetic engineering of plants, microbes, and animals with respect to applications for human welfare.
6. Apply knowledge and skills of immunology, bioinformatics, computational modelling of proteins, drug design and simulations to test the models and aid in drug discovery.
7. Critically analyse, interpret data, and apply tools of bioinformatics and multi omics in various sectors of biotechnology including health and Food.
8. Demonstrate communication skills, scientific writing, data collection and interpretation abilities in all the fields of biotechnology.
9. Learning and practicing professional skills in handling microbes, animals and plants and demonstrate the ability to identify ethical issues related to recombinant DNA technology, genetic engineering, animals handling, intellectual property rights, biosafety, and biohazards.
10. Exploring the biotechnological practices and demonstrating innovative thinking in addressing the current day and future challenges with respect to food, health, and environment.
11. Thorough knowledge and application of good laboratory and good manufacturing practices in biotech industries
12. Understanding and application of molecular biology techniques and principles in forensic

and clinical biotechnology.

13. Demonstrate entrepreneurship abilities, innovative thinking, planning, and setting up small-scale enterprises or CROs.

### Continuous Formative Evaluation/ Internal Assessment

Total Marks for each course = 100%

Continuous assessment (C1) = 20% marks

Continuous assessment (C2) = 20% marks

Semester End Examination (C3) = 60% marks.

- The first component (C1) of assessment is for 20% marks. This shall be based on test, assignment, seminar, case study, field work, project work etc. This assessment and score process should be completed after completing 50% of syllabus of the course/s and within 45 working days of semester program.
- The second component (C2) of assessment is for 20% marks. This shall be based on test, assignment, seminar, case study, field work, internship / industrial practicum / project work etc. This assessment and score process should be based on completion of remaining 50 percent of syllabus of the courses of the semester.
- During the 17th – 19th week of the semester, a semester end examination shall be conducted by the University for each course. This forms the third and final component of assessment (C3) and the maximum marks for the final component will be 60%.
- The outline for continuous assessment activities for Component-I (C1) and Component-II (C2) of a course shall be as under.

#### Outline for continuous assessment activities for C1 and C2

Activities	C1 (% marks)	C2 (% marks)	C1 + C2 (% marks)	C3 (% marks)
Session Test	10	10	20	-
Seminars/Presentations/Assignment	10	10	20	-
Semester end Examination	-	-	-	60
<b>Total</b>	<b>20</b>	<b>20</b>	<b>40</b>	<b>60</b>

#### Practical assessment

Assessment			
Formative assessment		Summative Assessment	Total Marks
Assessment Occasion / type	Weightage in Marks	Practical Exam	
Test C1	10		50
Test C2	10		
Record	5		
<b>Total</b>	<b>25</b>	<b>25</b>	

- For practical course of full credits, Seminar shall not be compulsory. In its place, marks shall be awarded for Practical Record Maintenance. (the ratio is 50% : 50%)
- Conduct of Seminar, Case study / Assignment, etc. can be either in C1 or in C2 component at the convenience of the concerned teacher.

- The teachers concerned shall conduct test / seminar / case study, etc. The students should be informed about the modalities well in advance. The evaluated courses/assignments during component I (C1) and component II (C2) of assessment are immediately provided to the candidates after obtaining acknowledgement in the register by the concerned teachers(s) and maintained by the Chairman in the case of a University Post-Graduate Department and the Principal / Director in the case of affiliated institutions. Before commencement of the semester end examination, the evaluated test, assignment etc. of C1 and C2 shall be obtained back to maintain them till the announcement of the results of the examination of the concerned semester.
- e) The marks of the internal assessment shall be published on the notice board of the department / college for information of the students.
- f) The Internal assessment marks shall be communicated to the Registrar (Evaluation) at least 10 days before the commencement of the University examinations and the Registrar (E) shall have access to the records of such periodical assessments.
- g) There shall be no minimum in respect of internal assessment marks.
- h) Internal assessment marks may be recorded separately. A candidate, who has failed or rejected the result, shall retain the internal assessment marks.

## **Curriculum Structure for the Undergraduate Degree Program**

### **B.Sc. (Basic / Hons.)**

<b>Total Credits for the Program</b>	<b>:</b>	<b>176</b>
<b>Starting year of implementation</b>	<b>:</b>	<b>2021-22</b>
<b>Name of the Degree Program</b>	<b>:</b>	<b>B.Sc. (Basic/Hons.) BIOTECHNOLOGY</b>

#### **Program Articulation Matrix:**

#### **Curriculum Structure for the Undergraduate Degree Program - BSc**

Total Credits for the Program: 176

Starting year of implementation: 2021-22

Name of the Degree Program: B.Sc.

Discipline/Subject: **Biotechnology**

#### **Program Articulation Matrix:**

This matrix lists only the core courses. Core courses are essential to earn the degree in that discipline/subject. They include courses such as theory, laboratory etc. Elective courses may be listed separately

## Pedagogy for student engagement is predominantly lectures. However, other pedagogies enhancing better student engagement to be recommended for each course. The list includes active learning/ course projects/ problem or project-based learning/ case studies/self-study like seminar, term paper or MOOC

Every course needs to include assessment for higher order thinking skills (Applying/ Analyzing/ Evaluating/ Creating). However, this column may contain alternate assessment methods that help formative assessment (i.e. assessment for learning).

## BSc Biotechnology (Basic / Hons.) Semester

1

<b>Course Title: DSC-1T, BTC 101, Cell Biology and Genetics</b>	
Total Contact Hours: <b>56</b>	Course Credits: <b>4+2</b>
Formative Assessment Marks: <b>40%</b>	Duration of ESA/Exam: <b>Hrs</b>
Model Syllabus Authors: <b>Curriculum Committee</b>	Summative Assessment Marks: <b>60%</b>

**Course Pre-requisite(s):** *Mention only course titles from the curriculum that are needed to be taken by the students before registering for this course.*

### Course Outcomes (COs):

At the end of the course the student should be able to:

*(Write 3-7 course outcomes. Course outcomes are statements of observable student actions that serve as evidence of knowledge, skills and values acquired in this course)*

1. Would be able to comprehend the structure of a cell with its organelles
2. \*Can explain the organization of genes and chromosomes, chromosome morphology and its aberrations

**Course Articulation Matrix:** Mapping of Course Outcomes (COs) with Program Outcomes (POs 1-12)

Course Outcomes (COs) / Program Outcomes (POs)	1	2	3	4	5	6	7	8	9	10	11	12
1. Would be able to comprehend the structure of a cell with its organelles	*	*			*							
2. Can distinguish between the Structure of prokaryotic and eukaryotic cell.	*	*			*							
3. Can explain the organization of genes and chromosomes, chromosome morphology and its aberrations	*	*			*							

Course Articulation Matrix relates course outcomes of course with the corresponding program outcomes whose attainment is attempted in this course. Mark 'X' in the intersection cell if a course outcome addresses a particular program outcome.

# BSc Biotechnology (Basic / Hons.)

## Semester 1

### Title of the Courses:

Course 1 : DSC-1T, Cell Biology and Genetics

Course 2 : OE 1T, Biotechnology for human welfare

Course 3 : SEC 1T, Biotechnological Skills and Analytical Techniques

Course 1 : DSC-1T, BTC 101, Cell Biology and Genetics		Course 2 : OE 1T, BTC 301, Biotechnology for human welfare		Course 3 : SEC 1T, BTC 701, Biotechnological Skills and Analytical Techniques	
Number of Theory Credits	Number of lecture hours/semester	Number of Theory Credits	Number of lecture hours/semester	Number of Theory Credits	Number of lecture hours/semester
4	56	3	42	1	14

**Content of Course 1: Theory: DSC-1T, BTC 101, Cell Biology and Genetics 56 Hrs**

**Unit – 1: Cell as a Basic unit of Living Systems and Cellular Organelles 14Hrs**

Concept, Development and Scope of Biotechnology. Historical perspectives. Discovery of cell, the cell Theory, Ultra structure of prokaryotic and eukaryotic cell- (Both plant and animal cells),

**Surface Architecture:** Structural organization and functions of plasma membrane and cell wall of bacteria and plants.

**Cellular Organelles:** Structure and functions of cell organelles – Endoplasmic reticulum, Golgi complex, Mitochondria, Chloroplast, Ribosomes, Lysosomes, Peroxisomes, Nucleus (Nuclearenvelope with nuclear pore complex, Nucleolus, Nucleoplasm and Chromatin). Vacuole, Cytosol and Cytoskeleton structures (Microtubules, Microfilaments and Intermediate filaments).

**Unit- 2. Chromosomes and Cell Division**

**14Hrs**

General Introduction, Discovery, Morphology and structural organization – Centromere, Secondary constriction, Telomere, Chromonema, Euchromatin and Heterochromatin, Chemical composition and Karyotype. Single-stranded and multi- stranded hypothesis, folded- fibre and nucleosome models.

Special type of chromosomes: Salivary gland and Lampbrush chromosomes.

**Cell Division:** Cell cycle, phases of cell cycle, Regulation of cell cycle-, checkpoints and enzymes involved. Significance of cell cycle, interphase nucleus, stages of mitosis and meiosis, achromatic apparatus, synaptonemal complex. Cell Senescence and programmed cell death.

**Unit-3.Genetics:**

**14Hrs**

**Mendelian Genetics:** Introduction and brief history of genetics. Mendelian theory: Laws of inheritance- dominance, segregation, incomplete dominance, codominance with an example. Law of independent assortment, test cross, back cross.

**Gene interaction:** Deviations to Mendelian inheritance- Supplementary factors: comb pattern in fowls, Complementary genes- Flower colour in sweet peas, Multiple factors–Skin colour in human beings, Epistasis– Plumage colour in poultry (13:3), Multiple allelism: Blood groups in Humans- ABO and Rh.

**Maternal Inheritance:** Plastid inheritance in Mirabilis, Petite characters in yeast and Kappa particles in Paramecium.

Sex-linked inheritance- Colour blindness, hemophilia, Y-linked traits.

Introduction, Chromosome theory of inheritance, Coupling and repulsion hypothesis, Linkage in maize and Drosophila, Mechanism of crossing over and its importance, chromosome mapping-linkage map in maize.

**Chromosomal variations:** A general account of structural and numerical aberrations, chromosomal evolution of wheat and cotton.

**Mutations:** Types of mutations, Spontaneous and induced, Mutagens: Physical and chemical, Mutation at the molecular level, Applications of mutations- plants, animals and microbes.

**Sex Determination in Plants and animals:** Concept of allosomes and autosomes, XX- XY, XX-XO, ZW-ZZ, ZO-ZZ types.

**Human Genetics:** Karyotype in man, inherited disorders – Allosomal (Klinefelter syndrome and Turner's syndrome), Autosomal (Down syndrome and Cri-Du-Chat Syndrome).

**Epigenetics:** Plant and humans.

### **Course 1: Practical: DSC-1P, BTC 101, Cell Biology and Genetics**

- 1) Study and maintenance of simple and compound microscope
- 2) Use of Micrometer and calibration, measurement of onion epidermal cells and yeast
- 3) Study of stages in mitosis from onion root tips
- 4) Study of stages in meiosis in grasshopper testes/onion or Rhoeo flower buds.
- 5) Mounting of polytene chromosomes
- 6) Buccal smear – Barr bodies
- 7) Karyotype analysis - Human and Onion  
Human – Normal and Abnormal – Down and Turner's syndromes
- 8) Isolation and staining of Mitochondria
- 9) Isolation and staining of Chloroplast
- 10) RBC cell count by Haemocytometer
- 11) Simple genetic problems based on theory

### **Text Books / References**

5. Principles of Gene Manipulations- Old & Primrose, Black Well Scientific Publications
6. Cell Biology-Ambrose & Dorothy M Easty, ELBS Publications
7. Fundamentals of Cytology- L. W. Sharp, McGraw Hill Company
8. Cytology-Willson & Marrison, Reinform Publications
9. Molecular Biology- Christopher Smith, Faber & Faber Publications
10. Cell Biology & Molecular Biology – EDP De Robertis & EMF Robertis, Saunder College.
11. Cell Biology- C.B Powar, Himalaya Publications
12. Basic Genetics- Daniel L. Hartl, Jones & Barlett Publishers USA
13. Human Genetics and Medicine lark Edward Arnold PLondon
14. Genetics – Monroe W Strickberger, Macmillain Publishers, New York
15. Genes V - Benjamin Lewin, Oxford University Press.
16. Genes I - Benjamin Lewin, Wiley Eastern Ltd., Delhi
17. Principles of Genetics- Sinnott, L.C. Dunn, Dobzhansky, McGraw-Hill.
18. Genetics – Edgar Altenburg Oxford & IBH publications
19. Principles of Genetics – E.J. Gardener, M.J. Simmons and D.P. Snustad, John Wiley & Son Publications
20. Genetics- P.K.Gupta, Rastogi Publication, Meert, India

## Course 2: Theory: OE 1T, Biotechnology for Human Welfare 42Hrs

### Unit – 1: Industry

14Hrs

Introduction, Scope, branches and applications of Biotechnology.

Biotechnology in industry: Industrial production of alcoholic beverage (wine), antibiotic (Penicillin), enzyme (lipase)

Applications of biotechnology in food, detergent and pharmaceutical industries

### Unit – 2: Environment

14Hrs

Application of biotechnology in environmental aspects :

Bioremediation: Degradation organic pollutants, hydrocarbons and agricultural wastes, Superbug  
Bioplastics and Biofuels.

### Unit – 3: Forensic and Health Sciences

14Hrs

Application of biotechnology in forensic science:

Solving crimes of murder and rape, paternity testing and theft using DNA finger printing techniques

Application of biotechnology in health:

Genetically engineered insulin, recombinant vaccines, gene therapy, diagnostics-ELISA and PCR, human genome project.

Summative Assessment = 60 Marks	
Formative Assessment Occasion / type	Weightage in Marks
Attendance	10
Seminar	10
Debates and Quiz	10
Test	10
Total	60 marks + 40 marks = 100 marks

## Course 3: Theory: SEC 1T, Biotechnological Skills and Analytical Techniques

### LEARNING OUTCOMES

- Skill enhancement as per National Occupational Standards (NOS) of Lab Technician/ Assistant” Qualification Pack issued by Life Sciences Sector Skill Development Council - LFS/Q0509, Level 3.
- Knowledge about major activities of biotech industry, regulations, and compliance, environment, health, and safety (EHS), good laboratory practices (GLP), standard operating procedures (SOP) and GMP as per the industry standards.
- Demonstrate soft skills, such as decision making, planning, organizing, problem solving, analytical thinking, critical thinking, and documentation.

## Course 3: Theory: SEC 1T, Biotechnological Skills and Analytical Techniques 14Hrs

### 1. Insights into biotechnology industry:

Biotechnology Industry in Indian and Global context - organization in context of large/medium/small enterprises, their structure and benefits.

### 2. Industry professional skills to be acquired:

Planning and organising skills, decision-making, problem-solving skills, analytical thinking, critical thinking, team management, risk assessment.

### 3. Interpersonal skills:

Writing skills, reading skills, oral communication, conflict-resolution techniques, interpretation of research data, trouble shooting in workplace

### 4. Digital skills:

Basic Computer Skills (MS Office, Excel, PowerPoint, Internet) for Workplace. Professional Email drafting skills and PowerPoint presentation skills

### Analytical Skills in laboratory:

**Solutions:** Molarity, Molality, Normality, Mass percent % (w/w), Percent by volume (% v/v), parts per million (ppm), parts per billion (ppb), Dilution of concentrated solutions. Standard solutions, stock solution, solution of acids. Reagent bottle label reading and precautions

### Course 3 :Practicals: SEC 1P, Biotechnological Skills and Analytical Techniques

#### 1. **Methods and practices of cleaning and management of lab**

Learning and Practice of Integrated clean-in-place (CIP) and sterilize-in-place (SIP) as per industry standards, material requirements for cleaning specific area, equipment, ventilation area, personal protective requirements

#### 2. **Procedure of cleaning and storage of Lab ware:**

Methodology for storage area, Cleaning procedure and materials to be used for various surfaces. Sign boards, labelling do's& don'ts

Knowledge about standard procedures of cleaning or glass ware, plastic ware.

Maintenance of inventory

#### 3. **Principles and practices of lab safety:**

Knowledge about safety symbols and hazard signs. Personal safety gears, utility, and disposal. Equipment safety protocols, chemical safety protocols. Documentation of chemical and equipment usage records. Handling hazardous chemicals.

#### 4. **Best practices of usage and storage of chemicals:**

Knowledge and practice in handling of chemicals, labelling and stock maintenance. SOP and material handling. Procedures to maintain chemicals, labelling, storage, and disposal.

#### 5. **Record maintenance as per SOPs**

Labelling of samples and reagents as per SOPs.

Recording detail of work done for research experiments. Importance of study of manuals, health and safety instructions.

#### 6. **Usage and maintenance of basic equipment of biotechnology lab:** Principles, calibrations, and SOPs of weighing balances, pH meters, autoclaves, laminar flows and biosafety cabinets (levels), basic microscopes, homogenizers, stirrers, colorimeters, UV, and Visible spectrophotometers.

#### 7. **Preparation of solutions and standards** - Properties and uses of chemicals commonly used in life sciences laboratories. Maintaining safety standards for handling various solutions and chemicals. Preparation of test reagents and buffers, Protocols for proper mixing of chemicals. Safety precautions while preparation and storage of incompatible chemicals and reagents.

#### 8. **Preparation of media:** Maintenance and storage of purified water for media (Plant Tissue culture media, Microbiological media, and Animal cell culture media) preparation. Preparation and storage of concentrated stock solutions. Documentation and disposal of expired stocks.

Collection of indents of media requirement, preparation, and storage. Media coding, documentation, and purpose of usage.

#### 9. **Practical methods for decontamination and disposal:**

Decontamination methods, Safe disposal practices of decontaminated media or materials.

## **10. Laboratory record writing**

Method of record writing , data collection and recording , reporting of result, discussion of result , summary writing, effective power point presentation taking any experiment as example

## **11. Industry visit or Analytical laboratory visit**

### **Pedagogy:**

The general pedagogy to be followed for theory and practicals are as under. Lecturing, Tutorials, Group/Individual, Discussions, Seminars, Assignments, Counseling, Remedial Coaching. Field/Institution/Industrial visits, Hands on training, Case observations, Models/charts preparations, Problem solving mechanism, Demonstrations, Project presentations, Experiential documentation, and Innovative methods.

Active learning as per LSSSDC (NSDC) LFS/Q0509 guidelines, at skill training Level

Case studies about application of microbial biomolecules in various industries. Seminar on topics of microbial biochemist

## BSc Biotechnology (Basic / Hons.) Semester 2

### Title of the Courses:

**Course 1 : DSC-2T, Microbiological Methods and Techniques**

**Course 2 : OE- 2T, Applications of Biotechnology in Agriculture**

Course 1: DSC-2T, <b>Microbiological Methods and Techniques</b>		Course 2: OE- 2T, <b>Applications of Biotechnology in Agriculture</b>	
Number of Theory Credits	Number of lecture hours/semester	Number of Theory Credits	Number of lecture hours/semester
<b>4</b>	<b>56</b>	<b>3</b>	<b>42</b>

**Content of Course: DSC-2T, BTC 102, Microbiological Methods and Techniques 56 Hrs**

### **Unit - 1 General Microbiology and Instrumentation**

14Hrs

General Introduction to Microbiology: Scope and relevance of microbiology, important contributions by Robert Koch, Leeuwenhoek, Jenner, Pasteur, Flemming, Ivanowsky

General account on structure, classification and reproduction of bacteria, virus and fungi

**Microscopy:** Principles and applications of Compound microscope, Dark field microscope, Phase contrast microscope, Fluorescence Microscope, Confocal microscope, Electron Microscopes- TEM and SEM.

**Analytical techniques:** Working principles and applications: Centrifuge, Ultracentrifuge, Spectrophotometer, Chromatography: Paper, TLC, Column (adsorption, gel-filtration, ion exchange, affinity), HPLC, GC.

### **Unit - 2 Sterilization techniques**

14Hrs

Definition of terms-sterilization, disinfectant, antiseptic, sanitizer, germicide, microbicidal agents, microbiostatic agent and antimicrobial agent.

**Physical methods of control:** Principle, construction and applications of moist heat sterilization- Pasteurization, Boiling, Fractional sterilization-Tyndallization and autoclave. Dry heat sterilization- Incineration and hot air oven.

Filtration – Diatomaceous earth filter, seitz filter, membrane filter and HEPA

Radiation: Ionizing radiation- $\gamma$  rays and non ionizing radiation- UVrays

**Chemical methods:** Alcohol, aldehydes, phenols, halogen, metallic salts, Quaternary ammonium compounds and sterilizing gases as antimicrobial agents.

### **Unit – 3: Microbiological techniques**

14Hrs

**Culture Media:** Components of media, natural and synthetic media, chemically defined media, complex media, selective, differential, indicator, enriched and enrichment media

**Pure culture methods:** Serial dilution and plating methods (pour, spread, streak); cultivation, maintenance and preservation/stocking of pure cultures; cultivation of anaerobic bacteria

**Microbial growth and its measurements:** Growth curve, enumeration methods (turbidity, cell counting, colony counting)

**Stains and staining techniques:** Principles of staining, Types of stains-simple stains, structural stains, negative stain and differential stains.

**Antibiotic sensitivity testing methods:** Disc and Agar well diffusion techniques

**Five modes of action with one example each:** Inhibitor of nucleic acid synthesis; Inhibitor of cell wall synthesis; Inhibitor of cell membrane function; Inhibitor of protein synthesis; Inhibitor of metabolism

**Antifungal agents:** Mechanism of action of Amphotericin B, Griseofulvin

**Antiviral agents:** Mechanism of action of Amantadine, Acyclovir, Azidothymidine Antibiotic resistance, MDR, XDR, MRSA, NDM-1

### **Course 1: Practicals: DSC-2 P, Microbiological Methods and Techniques**

1. To study the principle and applications of important instruments (biological safety cabinets, autoclave, incubator, BOD incubator, hot air oven, light microscope, pH meter) used in the microbiology and Biotechnology laboratory.
2. Sterilization of medium using Autoclave and assessment for sterility
3. Sterilization of glassware using Hot Air Oven and assessment for sterility
4. Sterilization of heat sensitive material by membrane filtration and assessment for sterility
5. Preparation of culture media for bacteria, fungi and their cultivation.
6. Plating techniques: Spread plate, pour plate and streak plate.
7. Isolation of bacteria and fungi from soil, water and air
8. Study of Rhizopus, Penicillium, Aspergillus using temporary mounts
9. Colony characteristics study of bacteria from air exposure plate
10. Staining techniques: Bacteria – Gram, Negative, Capsule, Endospore staining Fungi – Lactophenol cotton blue staining
11. Bacterial cell motility Water analysis - MPN test
12. Biochemical Tests – IMViC, Starch hydrolysis, Catalase test, Gelatin hydrolysis
13. - hanging drop technique

## **Course 2: Theory: OE- Applications of Biotechnology in Agriculture 42 Hrs**

### **Unit – 1: Agricultural Biotechnology** 14 Hrs

Concepts and scope of biotechnology in Agriculture. Plant tissue culture, micro propagation, entrepreneurship in commercial plant tissue culture. Banana tissue culture - primary and secondary commercial setups, Small scale bio enterprises: Mushroom cultivation

### **Unit – 2: Transgenic plants** 14 Hrs

The GM crop debate – safety, ethics, perception and acceptance of GM crops  
GM crops case study: Bt cotton, Bt brinjal, Biopesticides: Baculovirus pesticides, Mycopesticides  
Genetic Engineering for quality improvement: Golden rice, Seed storage proteins, Flavours– capsaicin, vanillin

### **Unit – 3: Molecular pharming and post-harvest protection** 14 Hrs

Plants as bio factories for molecular pharming: edible vaccines, plant bodies, nutraceuticals  
Post-harvest Protection:  
Antisense RNA technology for extending shelf life of fruits and shelf life of flowers.  
Biosafety, bioethics and IPR.

## BSc Biotechnology (Basic / Hons.) Semester 3

### Title of the Courses:

Course 1 : DSC-3T, Biomolecules

Course 2 : OE- 3T, Nutrition and Health

Program Name	BSc Biotechnology		Semester	Third Sem
Course Title	Biomolecules			
Course code	FSC460	DSC -3T	No. of Theory Credits	4
Contact hours	56 hrs		Duration of ESA/Exam	2 Hours
Formative Assessment Marks	40		Summative Assessment Marks	60

### Course Pre-requisite (s):

**Course Outcomes (COs):** At the end of the course the student should be able to:

1. Acquire knowledge about types of biomolecules, structure, and their functions
2. Will be able to demonstrate the skills to perform bioanalytical techniques
3. Apply comprehensive innovations and skills of biomolecules to biotechnology field

### Content

#### Hrs

#### Unit-I

14

**Carbohydrates:** Introduction, sources, classification of carbohydrates. Structure, function and properties of carbohydrates. Monosaccharides – Isomerism and ring structure, Sugar derivatives – amino sugars and ascorbic acid Disaccharides –

Maltose, Lactose and Sucrose

Polysaccharides – Classification as homo and heteropolysaccharides, Homopolysaccharides - storage polysaccharides (starch and glycogen- structure, reaction, properties), structural polysaccharides (cellulose and chitin-structure, properties), Heteropolysaccharides - glycoproteins and proteoglycans. Metabolism: Glycolysis and gluconeogenesis, Krebs's cycle, ETC- oxidative phosphorylation.

**Amino Acids, Peptides and Proteins:** Introduction, classification and structure of amino acids; Zwitterion, isoelectric point, pK values. Essential and nonessential amino acids.

Peptide bond and peptide, Structural organization of proteins - primary, secondary ( $\alpha$  helix,  $\beta$  sheets) tertiary and quaternary. Fibrous and globular proteins, Denaturation and renaturation of proteins. General aspects of amino acid metabolism: Transamination, deamination, decarboxylation and urea cycle.

#### Unit-II

14 Hrs

**Lipids:** Classification and function of lipids, Saturated and unsaturated fatty acids, properties (saponification value, acid value, iodine number, rancidity), Hydrogenation of fats and oils. General structure and biological functions of phospholipids, sphingolipids, glycolipids, lipoproteins, prostaglandins, cholesterol, ergosterol. Metabolism:  $\beta$  oxidation of fatty acids. Biosynthesis of palmitate.

**Enzymes:** Introduction, nomenclature and classification, enzyme kinetics, factors influencing enzyme activity, metalloenzymes, activation energy and transition state, enzyme activity, specific activity. Coenzymes, cofactors and their functions (one reaction involving TPP, FAD, NAD). Enzyme inhibition- Irreversible and reversible (competitive, non-competitive and uncompetitive inhibition with an example each) Zymogens (trypsinogen, chymotrypsinogen and pepsinogen),

Isozymes (LDH, Creatine kinase and their clinical significance).

### Unit–III

14 Hrs

**Vitamins:** Water- and fat-soluble vitamins, dietary source and biological role of vitamins Deficiency manifestation of vitamin A, B, C, D, E and K

**Nucleic acids:** Structure of nucleosides, nucleotides in DNA and RNA. Structure and functions of DNA and RNA, Watson and Crick model of DNA and other forms of DNA (A and Z). Types of RNA (rRNA, tRNA, mRNA, snRNA, hnRNA, miRNA), ribozymes. Metabolism- Overview of biosynthesis and degradation of purine and pyrimidine, salvage pathway.

**Hormones:** Classification of hormones based on chemical nature and mechanism of action. Chemical structure and functions of the following hormones: Glucagon, insulin, Epinephrine ,Testosterone and Estradiol.

### Unit–IV

14 Hrs

**Electrophoresis:** Principle, procedure and applications of electrophoresis (paper electrophoresis, gel electrophoresis -PAGE, SDS- PAGE & agarose electrophoresis) and isoelectric focusing.

**Spectroscopy:** Colorimetry, UV-Vis spectrophotometry, Spectrofluorimetry, IR and NMR spectroscopy, atomic absorption spectroscopy, mass spectroscopy

**Radioisotope techniques:** Radioactivity, half life, radioisotopes, GM counter, scintillating counting, autoradiography, applications, biosafety.

### Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs 1-12)

Course Outcomes (COs) / Program Outcomes (POs)	Program Outcomes (POs)											
	1	2	3	4	5	6	7	8	9	10	11	12
Acquire knowledge about types of biomolecules, structure, and their functions	✓				✓							✓
Will be able to demonstrate the skills to perform bioanalytical techniques			✓								✓	✓
Apply comprehensive innovations and skills of biomolecules to biotechnology field	✓				✓							✓

**Pedagogy:** Lectures, Seminars, Industry Visits and Assignment.

Course Title	<b>Biomolecules</b>	Practical Credits	<b>2</b>
Course No.	<b>DSC-3P</b>	Contact hours	48 h

### Content

1. Introduction to basic instruments (Principle, standard operating procedure) with demonstration.
2. Definitions and calculations: Molarity, Molality, Normality, Mass percent (w/w), Percent by volume (v/v), parts per million (ppm), parts per billion (ppb), Dilution of concentrated solutions. Standard solutions, stock solution, solution of acids. Reagent bottle label reading and precautions.
3. Preparation of standard buffers by Henderson-Hasselbalch equation – Acetate, phosphate, Tris and determination of pH of solution using pH meter.
4. Estimation of glucose by DNS method
5. Determination of  $\alpha$ -amylase activity by DNS method
6. Estimation of proteins by Biuret method
7. Estimation of amino acid by Ninhydrin method
8. Extraction of protein from soaked/sprouted green gram by salting out method
9. Separation of amino acids by circular paper chromatography
10. Demonstration of PAGE
11. Determination of iodine number of lipids

Program Name	<b>BSc Biotechnology</b>		Semester	<b>Third Sem</b>
Course Title	<b>Nutrition and Health</b>			
Course Code	<b>FSC900</b>	<b>OE-3</b>	No. of Theory Credits	<b>3</b>
Contact hours	<b>Lecture</b>	42 h	Duration of ESA/Exam	<b>2 Hours</b>
	<b>Practical</b>	-		
Formative Assessment Marks	40		Summative Assessment Marks	60

### Course Pre-requisite(s):

**Course Outcomes (COs):** At the end of the course the student should be able to:

1. Study the concepts of food, nutrition, diet and health
2. To apply the best practices of food intake and dietary requirements
3. Acquire knowledge about various sources of nutrients and good cooking practices

### Content

**42 Hrs**

#### Unit-I – Introduction

**14 Hrs**

Concepts of nutrition and health. Definition of Food, Diet and nutrition, Food groups. Food pyramids. Functions of food. Balanced diet. Meal planning. Eat right concept. Functional foods, Prebiotics, Probiotics, and antioxidants

#### Unit -II – Nutrients

**14 Hrs**

Macro and Micronutrients - Sources, functions and deficiency. Carbohydrates, Proteins, Fats – Sources and calories. Minerals –Calcium, Iron, Iodine. Vitamins – Fat soluble vitamins –A, D, E & K. Water soluble vitamins – vitamin C, Thiamine, Riboflavin, Niacin. Water–Functions and water balance. Fibre –Functions and sources. Recommended Dietary Allowance, Body Mass Index and Basal Metabolic Rate.

#### Unit -III – Nutrition and Health

**14 Hrs**

Methods of cooking affecting nutritional value. Advantages and disadvantages. Boiling, steaming, pressure cooking. Oil/Fat – Shallow frying, deep frying. Baking. Nutrition through lifecycle. Nutritional requirement, dietary guidelines: Adulthood, Pregnancy, Lactation, Infancy- Complementary feeding, Pre-school, Adolescence, geriatric. Nutrition related metabolic disorders- diabetes and cardiovascular disease.

**Pedagogy:** Lectures, Seminars, Industry Visits and Assignments

## BSc Biotechnology (Basic / Hons.) Semester 4

### Title of the Courses:

#### Course 1 : DSC-4T, Molecular Biology

Program Name	BSc Biotechnology	Semester	Fourth Sem
Course Title	Molecular Biology		
Course No.	DSC -4T	No. of Theory Credits	4
Contact hours	56 hrs	Duration of ESA/Exam	2 Hours
Formative Assessment Marks	40	Summative Assessment Marks	60

#### Course 2 : OE- 4T, Intellectual Property Rights

##### Course Pre-requisite (s):

**Course Outcomes (COs):** At the end of the course the student should be able to:

1. Study the advancements in molecular biology with latest trends.
2. Will acquire the knowledge of structure, functional relationship of proteins and nucleic acids.
3. Aware about the basic cellular processes such as transcription, translation, DNA replication and repair mechanisms.

### Content

#### Hrs

##### Unit-I

14 Hrs

**DNA as genetic material, Replication and Repair:** Experimental proof of DNA as genetic material (Griffith's, Avery-McCleod-McCarty, Martha-Chase). Central dogma, Replication of DNA in prokaryotes and eukaryotes– semiconservative mode (Messelson and Stalh experiment), Theta, linear and rolling circle models. Enzymes and proteins involved in replication-DNA polymerases, helicases, gyrases, ligase, SSB proteins, RNase H  
The replication complex: Pre-priming proteins, primosome, replisome, unique aspects of eukaryotic chromosome replication, Fidelity of replication.

DNA damage and Repair mechanism: types of damage, photo reactivation, excision repair, mismatch repair and SOS repair.

##### Unit-II

14 Hrs

**Transcription and RNA processing:** Transcription in prokaryotes- RNA polymerase, sigma factor, promoter, initiation, elongation and termination.

Transcription in eukaryotes: Eukaryotic RNA polymerases, transcription factors, promoters, enhancers, mechanism of transcription initiation, promoter clearance, elongation and termination. RNA processing of pre-mRNA: 5' cap formation, polyadenylation, splicing. Processing of rRNA and tRNA.

##### Unit-III

14 Hrs

**Translation:** Genetic code and its characteristics, Wobble hypothesis. Translation- in prokaryotes and eukaryotes- ribosomes, enzymes and factors involved in translation. Activation of amino acids, aminoacyl tRNA synthetases. Mechanism of translation- initiation, elongation and termination of polypeptide chain. Fidelity of translation, Inhibitors of translation. Post translational modifications of proteins, Protein folding and targeting- to mitochondria and lysosomes.

##### Unit-IV

14 Hrs

**Regulation of gene expression:** Prokaryotic gene regulation- operon concept- regulation of *lac* operon and *trp* operon, attenuation control. Eukaryotic gene regulation- Activators, repressors binding to enhancers,

coordinated control (tissue specific gene expression), DNA methylation, chromatin remodeling, Translational control of gene expression-ferritin mRNA regulation, RNAi- miRNA and siRNA.

### Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs 1-12)

Course Outcomes (COs) / Program Outcomes (POs)	Program Outcomes (POs)												
	1	2	3	4	5	6	7	8	9	10	11	12	
Study the advancements in molecular biology with latest trends	✓				✓								✓
Will acquire the knowledge of structure, functional relationship of proteins and nucleic acids					✓	✓							✓
Aware about the basic cellular processes such as transcription, translation, DNA replication and repair mechanisms	✓				✓				✓				✓

**Pedagogy:** Lectures, Seminars, Industry Visits, Debates, Quiz and Assignments

Course Title	<b>Molecular Biology</b>	Practical Credits	<b>2</b>
Course No.	<b>DSC-4P</b>	Contact hours	48

### Content

1. Preparation of DNA model
2. Estimation of DNA by DPA method
3. Estimation of RNA by Orcinol method
4. DNA isolation from plant/ animal/ microbial sources
5. Concentration and purity of isolated DNA samples
6. Agarose gel electrophoresis of DNA
7. Charts on- DNA replication, transcription, translation, Types of DNA, RNA

## Course 2 : OE- 4T, Intellectual Property Rights

Program Name	<b>BSc Biotechnology</b>		Semester	<b>Fourth Sem</b>
Course Title	<b>Intellectual Property Rights</b>			
Course Code	<b>FSD900</b>	<b>OE-4</b>	No. of Theory Credits	<b>3</b>
Contact hours	<b>Lecture</b>	42 h	Duration of ESA/Exam	<b>2 Hours</b>
	<b>Practical</b>	-		
Formative Assessment Marks	40		Summative Assessment Marks	60

### Course Pre-requisite(s):

**Course Outcomes (COs):** At the end of the course the student should be able to:

1. Knowledge about need and scope of Intellectual property rights
2. Acquire knowledge about filing patents, process, and infringement
3. Knowledge about trademarks, industrial designs, and copyright

### Content

**42 Hrs**

#### **Unit-I - Introduction to Intellectual property rights (IPR):**

**14 Hrs**

Genesis and scope. Types of Intellectual property rights - Patent, Trademarks, Copyright, Design, Trade secret, Geographical indicators, Plant variety protection. National and International agencies – WIPO, World Trade Organization (WTO), Trade-Related Aspects of Intellectual Property Rights (TRIPS), General Agreement on Tariffs and Trade (GATT).

#### **Unit -II - Patenting, process, and infringement**

**14 Hrs**

Basics of patents - Types of patents; Patentable and Non-Patentable inventions, Process and Product patent. Indian Patent Act 1970; Recent amendments; Patent Cooperation Treaty (PCT) and implications. Process of patenting. Types of patent applications: Provisional and complete specifications; Concept of “prior art”, patent databases (USPTO, EPO, India). Financial assistance, schemes, and grants for patenting. Patent infringement- Case studies on patents (Basmati rice)

#### **Unit -III - Trademarks, Copy right, industrial Designs**

**14 Hrs**

Trademarks- types, Purpose and function of trademarks, trademark registration, Protection of trademark. Copy right- Fundamentals of copyright law, Originality of material, rights of reproduction, industrial Designs: Protection, Kind of protection provided by industrial design.

## **B.Sc. Biotechnology 5<sup>th</sup> Semester**

Program Name	<b>B.Sc. Biotechnology</b>	Semester	<b>5<sup>th</sup> Semester</b>
Course Title	<b>Genetic Engineering (Theory + Practical)</b>		
Course Code:	<b>DSC –A9 (T)</b>	No. of Theory Credits	<b>04</b>
Contact hours	<b>60 hrs</b>	Duration of ESA/Exam	<b>03 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

### **Course Objectives**

1. Understand the fundamental principles and techniques of genetic engineering.
2. Explore the applications of genetic engineering in agriculture, medicine, biotechnology, and environmental science.
3. Develop practical skills in genetic engineering techniques and laboratory procedures.
4. Gain knowledge of gene expression regulation and genetic modification methods.
5. Enhance critical thinking and problem-solving skills through discussions and case studies.
6. Stay updated on emerging trends and advancements in genetic engineering.

### **Course Outcomes:**

1. Demonstrate a thorough understanding of the fundamental principles and techniques of genetic engineering.
2. Apply the knowledge of genetic engineering to diverse applications in agriculture, medicine, biotechnology, and environmental science.
3. Perform laboratory procedures and develop practical skills in genetic engineering techniques.
4. Explain gene expression regulation mechanisms and apply genetic modification methods effectively.
5. Evaluate genetic engineering's ethical, social, and legal implications and propose responsible solutions.
6. Stay updated with recent advancements in genetic engineering, critically evaluate emerging trends, and assess their potential impact on various fields.

**Unit I- Fundamentals of Genetic Engineering****15**

Definition, scope, and historical overview of genetic engineering. Importance and applications in various fields.

**DNA Structure and Manipulation** - Techniques for DNA isolation and purification. Methods for quantification and characterization of DNA samples.

**RNA Analysis and Gene Expression**- Methods for RNA isolation and purification. Analysis of gene expression.

**Recombinant DNA technology** – Introduction to molecular cloning. Overview of cloning vectors. Plasmids, phage, cosmid, BAC, and YAC. Features and applications of cloning vectors in genetic engineering. Enzymes used in recombinant DNA technology: Restriction endonucleases, Polymerases, Ligase, kinases, and phosphatases. Techniques for molecular cloning of DNA or RNA fragments in bacterial and eukaryotic systems.

**Unit II- Practices in Genetic Engineering****15**

Recombinant Protein Expression and Purification, affinity tags. Techniques for expressing recombinant proteins using bacterial, animal, and plant expression systems. Strategies for protein purification and characterization. Hybridization techniques, Southern, Northern, Western, FISH, Polymerase Chain Reaction (PCR) and its types, molecular probes, DNA sequencing- Sanger's, Next Generation Sequencing.

**Gene Manipulation Techniques** - Methods of gene delivery. Physical, chemical, and biological methods. Transformation, transfection, electroporation and micro-injection. Gene knockout techniques in bacterial and eukaryotic organisms.

**Genome Editing** - Introduction to genome editing techniques- Principles and applications of genome editing techniques. CRISPR-Cas9, site-directed mutagenesis, and other genome editing methods.

**Unit III- Applications of Genetic Engineering****15**

Introduction to Applications. Overview of the diverse applications of genetic engineering. Gene therapy and its potential in treating genetic disorders. Strategies for gene delivery in therapeutic applications. Diagnostic Applications. DNA fingerprinting and its applications in forensics. Molecular diagnostic techniques and their role in disease diagnosis. Use of genetic engineering in the development of therapeutics and vaccines. Production of biopharmaceuticals using recombinant DNA technology.

**Unit IV- Advances in Genetic Engineering and Ethics****15**

Industrial Applications. Industrial applications of genetic engineering, such as enzyme production, biofuel production, and bioremediation. Scale-up techniques and process optimization in industrial settings. Introduction to synthetic biology and its integration with genetic engineering. Design and construction of artificial biological systems.

**Ethical and Regulatory Considerations** - Discussion of ethical implications associated with genetic engineering. Introduction to regulatory guidelines and safety considerations for genetic engineering research and applications

**Pedagogy:** Lectures, Seminars, Industry Visits, Debates, Quiz and Assignments

<b>Summative Assessment = 60 Marks</b>	
<b>Formative Assessment / type</b>	<b>Weightage in Marks</b>
Attendance	10
Seminar	10
Debates and Quiz	10
Test	10
<b>Total FA</b>	<b>40</b>
<b>Total (FA + SA)</b>	<b>100 marks</b>

Course Title	<b>Genetic Engineering</b>	Practical Credits	<b>02</b>
Course Code:	<b>DSC–A10 (P)</b>	Contact hours	<b>60 hrs</b>

### Practical Content

- 1. Introduction to Laboratory Techniques** - Safety guidelines and laboratory protocols  
Aseptic techniques and proper handling of materials. Basic equipment and instrument operation  
Preparation of reagents and media
- 2. Nucleic Acid Extraction and Quantification**- DNA extraction from different sources (e.g., bacteria, plant, animal). RNA extraction and purification methods. Quality assessment and quantification of nucleic acids (spectrophotometry, gel electrophoresis).
- 3. Polymerase Chain Reaction (PCR)**  
Primer design and optimization PCR setup and cycling conditions  
Agarose gel electrophoresis for PCR product analysis
- 4. Cloning and Plasmid Manipulation**  
Isolation of Plasmid Restriction enzyme digestion Ligation reactions  
Transformation of bacterial cells with recombinant plasmids Colony selection and screening for successful cloning
- 5. Gel Electrophoresis and DNA Analysis**  
Agarose gel electrophoresis for DNA fragment separation and analysis DNA size determination using molecular weight markers  
DNA band visualization techniques (e.g., Ethidium bromide staining, DNA intercalating dyes)

## B.Sc. Biotechnology 5<sup>th</sup> Semester

Program	B.Sc. Biotechnology		Semester	5 <sup>th</sup> Semester
Course Title	Plant and Animal Biotechnology (Theory + Practical)			
Course Code:	DSC-A11 (T)	No. of Theory Credits	04	
Contact hours	60 hrs	Duration of ESA/Exam	3 Hours	
Formative Assessment Marks	40	Summative Assessment Marks	60	

### Course Objectives

1. To understand the fundamental aspects of plant and animal biotechnology.
2. Learn about biotechnological tools and techniques used in plant and animal research.
3. Explore methods of introducing foreign genes into plants and animals through transformation techniques.
4. Gain practical skills in plant tissue culture and animal cell culture for improvement.
5. Design strategies for plant genetic manipulation against biotic and abiotic stressors.
6. Hypothesize strategies to increase plant yield and fruit/seed quality.
7. Apply knowledge to real-world challenges in agriculture, veterinary medicine, conservation, and biomedical research
8. Understand the need for animal biotechnology for human welfare.

### Course Outcomes:

**After completing this course, the student is expected to learn the following:**

1. Demonstrate a comprehensive understanding of plant biology, physiology, genetics, and molecular biology.
2. Apply biotechnological tools and techniques used in plant research and agriculture, such as plant tissue culture, genetic engineering and transgenics.
3. Execute plant tissue culture techniques for callus induction, somatic embryogenesis, and micropropagation, and apply them in plant breeding and propagation.
4. Perform plant transformation methods and demonstrate the ability to introduce foreign genes into plants using different techniques.
5. Apply knowledge about ethical considerations and regulatory frameworks associated with plant biotechnology and genetically modified crops.
6. Understand the biology and characterization of cultured cells, including their adhesion, proliferation, differentiation, morphology, and identification.
7. Gain practical skills in basic mammalian cell culture techniques, measuring growth parameters, assessing cell viability, and understanding cytotoxicity.

8. Learn about germplasm conservation techniques and the establishment of gene banks, along with large-scale culture methods for cell lines.
9. Explore organ and histotypic culture techniques, biotransformation, 3D cultures, whole embryo culture, somatic cell cloning, and the ethical considerations surrounding stem cells and their applications.

## **Plant and Animal Biotechnology - Content of Theory**

**60 hrs**

### **Unit-I – Plant Tissue culture methods**

**15**

Introduction, history, definition, hypothesis, and concept of totipotency. Principles of plant tissue culture, media and laboratory organization, types of culture, morphogenesis, differentiation, callus, direct, indirect organogenesis, and somatic embryogenesis, synthetic seeds. *In vitro* propagation and micropropagation, Seed culture, embryo culture, Meristem culture, bud culture, limitations and applications. Secondary metabolites, *In vitro* secondary metabolite production, Suspension cultures, cell cultures, growth vs secondary metabolite production, bioreactors and scaling up of secondary metabolite production, limitations, and applications.

### **Unit -II Transgenic Plants and biosafety**

**15**

Overview of transgenic plants and their significance in agriculture. - Techniques for introducing foreign genes into plants: Agrobacterium-mediated transformation, biolistics, and other methods. Selection and screening of transformed plants. Applications of Transgenic Plants - Improved crop traits through genetic engineering: pest resistance, herbicide tolerance, disease resistance, and abiotic stress tolerance. Biosafety assessment of transgenic plants: potential risks and benefits. International regulatory frameworks for releasing and commercializing genetically modified organisms (GMOs). Ethical and socio-economic impacts of transgenic crops. Intellectual property rights and access to transgenic technologies.

### **Unit-III Animal Cell culture methods**

**15**

History and laboratory organisation, Media. Cell types and culture characters. Pluripotency, Multipotency, Differentiation, Trans differentiation Reprogramming, Biology and characterization of cultured cells- cell adhesion, proliferation, differentiation, morphology of cells, and identification. The basic technique of mammalian cell culture *in vitro*, Measuring parameters of growth in cultured cells, cell viability, and cytotoxicity. Large-scale culture of cell lines- monolayer, suspension, and immobilized cultures. Organ and histotypic culture: Technique, advantages, limitations, applications. Stem cells: types (embryonic, adult, induced pluripotent), isolation, identification, expansion, differentiation and uses, stem cell engineering, ethical issues.

### **Unit -IV Gene transfer in animals and applications**

**15**

Gene constructs promoter/ enhancer sequences for transgene expression in animals. Selectable markers for animal cells- thymidine kinase. Transfection of animal cells- calcium phosphate coprecipitation, electroporation, lipofection, peptides, direct DNA transfer, viral vectors, Retrovirus, microinjection. Transgene identification methods. Transgenic and genome-edited animals. Ethical issues in transgenesis. Recent advances and applications in the field.

Manipulation of animal reproduction and characterization of animal genes, Embryo transfer in cattle and applications. Somatic cell cloning - cloning of Dolly. Ethical issues. Production of recombinant vaccines.

<b>Formative Assessment /type</b>	<b>Weightage in Marks</b>
Attendance	10
Seminar	10
Debates and Quiz	10
Test	10
<b>Total</b>	<b>60 marks + 40 marks = 100 marks</b>

**Pedagogy:** Lectures, Seminars, Industry Visits, Debates, Quiz, and Assignments. Case studies highlight successful applications and challenges in transgenic crop development.

Course Title	<b>Plant and Animal Biotechnology</b>	Practical Credits	<b>2</b>
Course Code	<b>DSC-A-12 (P)</b>	Contact hours	<b>60 hrs</b>

### **Content of Practical**

1. Laboratory organization of basic and commercial plant tissue culture
2. Media preparation (MS, B5), solid media preparation, and Liquid media preparation
3. Explant preparation – Leaf, bud, rhizome, and meristem
4. Synthetic seed production
5. Callus culture- Initiation and establishment of different types of callus cultures
6. Micropropagation with a suitable example – Stage 0, 1, 2, 3, and 4
7. Staining, cell viability, and cell count of cell cultures
8. Preparation of cell culture media: Preparation of basic cell culture media, such as Dulbecco's Modified Eagle Medium (DMEM), supplemented with fetal bovine serum (FBS), antibiotics, and other required additives.
9. Aseptic techniques and sterile handling: Practicing aseptic techniques, including properly handling tools and equipment, working in a laminar flow hood, and maintaining sterility throughout the cell culture process.
10. Filter sterilization: Practice filter sterilization for sensitive media ingredients.
11. Cell counting and viability assessment: Count cells using a hemocytometer or automated cell counter, and perform viability assays (e.g., trypan blue exclusion) to determine the percentage of viable cells.
12. Cell staining and microscopy: Staining the cultured cells using dyes such as hematoxylin and eosin (H&E), and observe them under a light microscope to study cell morphology and structure.
13. Contamination identification and troubleshooting: Learn to identify and troubleshoot common issues in cell culture, such as contamination by bacteria, fungi, or mycoplasma, and implement appropriate

corrective measures.

14. Experimental design and data analysis: Students can design and execute simple experiments, record and analyze data, and interpret the results based on their observations and measurements.

**Course Outcomes (COs):** At the end of the course the student should be able to:

1. Demonstrate skills as per National Occupational Standards (NOS) of the “Lab Technician/Assistant” Qualification Pack issued by the Life Sciences Sector Skill Development Council-LFS/Q0509.
2. Develop knowledge of laboratory safety procedures and protocols and acquire skills

- in handling and maintaining laboratory equipment and instruments.
- Operate analytical equipment and instruments as per standard operating procedures (SOP)
  - Knowledge about major activities of the biotech industry, regulations and compliance, environment, health and safety (EHS), good laboratory practices (GLP), and Good Manufacturing Practices (GMP) as per the industry standards.
  - Demonstrate soft skills, such as decision-making, planning, organizing, problem-solving, analytical thinking, critical thinking, and documentation.

**Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs 1-13)**

Course Outcomes (COs)/Program Outcomes (POs)	1	2	3	4	5	6	7	8	9	10	11	12	13
Develop knowledge of laboratory safety procedures and protocols and acquires skills in handling and maintaining laboratory equipment and instruments.	✓	✓

<b>Biotechnology Skills and Analytical Techniques Content</b>	<b>30 Hrs</b>

**Unit-I Insights into the biotechnology industry and basic professional skills**

**15**

Biotechnology Industry in Indian and Global Context- Organization in the context of large/medium/small enterprises, their structure, and benefits.

**Industry-oriented professional skills:** Planning and organizing skills, decision-making, problem-solving skills, analytical thinking, critical thinking, team management, and risk assessment. **Interpersonal skills:** Writing skills, reading skills, oral communication, conflict resolution techniques, interpretation of research

data, and troubleshooting in the workplace.

**Digital skills:** Basic computer skills (MS Office, excel, power point, internet) for the workplace.

Professional E-mail drafting skills and PowerPoint presentation skills. Overview of good manufacturing practices (GMP), Good Documentation practices (GDP), and good laboratory practices (GLP).

## Unit- II Basic laboratory skills and Analytical Techniques

15

**Analytical skills in the laboratory:** Preparations of solutions, molarity, molality, normality, mass percent % (w/w), percent by volume (%v/v), parts per million (ppm), parts per billion (ppb), dilution of concentrated solutions. Standard solutions, stock solution, and solution of acids. Reagent bottle label reading and precautions.

**Analytical techniques:** Basic principle, operation, application, maintenance, calibration, validation, and troubleshooting of instruments- Microscope-Simple, compound, TEM, SEM, fluorescence. Centrifuge and different types, Hot air oven, pH meter, different types of pH electrodes Autoclave, Incubator, BOD, COD, cell counter, Laminar airflow. Spectroscopy- Colorimeter, UV-Visible spectroscopy. Electrophoresis- Agarose Gel electrophoresis, SDS-PAGE, PCR, Conductivity meter, and Potentiometer. Biosafety cabinets.

**Pedagogy:** Lectures, Seminars, Industry Visits, Debates, Quiz, and Assignments

Course title	Quality control methods in biology (Practical)	Practical credits-1	5 <sup>th</sup> Semester
Course No.	SEC -4	Contact hours	4hrs/week
<b>Content</b>			

### Unit-1

**Methods and practices of cleaning and management of lab:** Learning and Practice of Integrated clean-in-place (CIP) and sterilize-in-place (SIP) as per industry standards, material requirements for cleaning specific areas, equipment, ventilation area, personal protective requirements Calibration of and use of micropipette.

### Unit-2

Preparation of Standard Operating Procedure (SOP) for various equipment in the QC Lab, Best practices of using and storing chemicals: Knowledge and practice in handling chemicals, labeling, and stock maintenance. SOP and material handling. Procedures to maintain chemicals, labeling, storage, and disposal.

**Handling and calibration of lab equipment-** weighing balance, Autoclave, Hot air Oven, Incubator, Centrifuge, Water bath, Colony Counter, and stability chamber, Preparation of Normality, Molarity, and buffer solutions

### Unit-3

**Preparation of media:** Maintenance and storage of purified water for media (plant tissue culture media, microbiological media, and animal cell culture media) preparation. Preparation and storage of

concentrated stock solutions. Documentation and disposal of expired stocks. Collection of findings of media requirement, preparation, and storage. Media coding, documentation, and purpose of usage. Demonstration, handling, and troubleshooting of High-Performance Liquid Chromatography and Gas chromatography. Demonstration of Polymerase Chain Reaction (PCR), Hands-on training on colorimeter and spectrophotometer, Industry visit, or analytical laboratory visit.

**Note:** Semester end examination is only in the theory component; questions from the practical part could be included, if any.

### B.Sc. Biotechnology 6<sup>th</sup> Semester

Program Name	<b>B.Sc. Biotechnology</b>		Semester	<b>6<sup>th</sup> Semester</b>
Course Title	<b>Immunology (Theory + Practical)</b>			
Course Code:	<b>DSC-A13(T)</b>	No. of Theory Credits	<b>04</b>	
Contact hours	<b>60 hrs</b>	Duration of ESA/Exam	<b>3 Hours</b>	
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>	

### Course Objectives:

- 1 To understand the various aspects of immunity, elicitation of immune responses, factors determining the outcome of immune responses and major players of immunity, relevance between nutritional support and immunity, and immunological techniques.
- 2 To provide knowledge on essential features of antigens and antibodies and their types and different theories of Antibody formation.
3. To acquire knowledge on types of immunity, phagocytosis, interferons, and the complement system.
- 4 To explain the concept of hypersensitivity, autoimmunity, and transplantation.
- 5 To provide knowledge on immune deficiencies and several immunological techniques

### Course Outcomes:

At the end of the course, the student should be able to:

- i. Demonstrate comprehension of the underlying structure and function of the immune system and related disorders.
- ii. Demonstrate an understanding of the role of cells and molecules in immune reactions and responses
- iii. Demonstrate technical skills in immunological tools and techniques
- iv. Apply the domain-specific knowledge and skills acquired in immunology for innovative therapies and Immunotechnologies
- v. Understand the fundamental concepts of immunity, and the contributions of the organs and cells in immune responses.
- vi. Realize how the MHC molecule's function and host encounters an immune insult.
- vii. Understand the antibodies and complement system
- viii. Understand the mechanisms involved in the initiation of specific immune responses
- ix. Differentiate the humoral and cell-mediated immune mechanisms
- x. Comprehend the overreaction by our immune system leading to hypersensitive conditions and its consequences
- xi. Understand unique properties of cancer cells, immune recognition of tumors, immune evasion of cancers

### Immunology - Content of Theory

60 Hrs

#### Unit-I Cells and Organs of the Immune System

15

Introduction to the Immune System: History of Immunology, Types of Immunity: first and second line of defense, innate and acquired/adaptive immunity, specificity, diversity.

Cells of the immune system: Antigen-presenting cells (APCs), Role of B and T-lymphocytes in Humoral immunity and cell-mediated immunity, primary and secondary immune response, Immunization, memory.

Organs of the Immune system: Thymus, bone marrow, spleen, Lymph Node, peripheral lymphoid organs

#### Unit -II Molecules of the Immune System

Antigens and haptens: Properties (foreignness, molecular size, heterogeneity). Adjuvants. Antigenicity and Immunogenicity. Affinity and Avidity. B and T cell epitopes, superantigens Immunoglobulins:

Classification, structure, and function. Antibody diversity, Monoclonal and polyclonal antibodies.

Major histocompatibility complexes: Classification, structure, and function. Antigen processing pathways – Cytosolic and Endocytic, Complement Pathways, Cytokines: Classification and function, Hypersensitivity: Reactions – Types I, II, and III. Delayed Type Hypersensitive Response.

### Unit -III Immunotechniques and vaccines

Structure and properties of antigens- iso- and allo-antigens, antigen specificity, Cross-reactivity, Precipitation, Immunodiffusion reactions: Radial immunodiffusion, Ouchterlony double diffusion, Immunoelectrophoresis. Agglutination: Agglutination reactions. ELISA, RIA. Immunocytochemistry, Fluorescent Techniques.

Vaccines: Conventional, peptide vaccines, subunit, DNA vaccines. Toxoids, antisera, edible vaccines, plantibodies, and Cancer vaccines.

### Unit – IV

Transplantation immunology: Phases in graft rejection and immuno-suppressors. Autoimmune Disorders: Systemic and Organ-specific Autoimmune disorders with examples Immunodeficiencies: Primary and secondary immunodeficiencies; acquired immunodeficiency syndrome  
Cancer and the immune system – immune surveillance, immunological escape, cancer antigens, cancerimmunotherapy

Microbial diseases in humans: Mode of infection, symptoms, epidemiology and control measures of diseases caused by Viruses ( Hepatitis-B), Bacteria (Typhoid), Fungi (Aspergillosis), Protozoa (Malaria).

**Pedagogy:** Lectures, Seminars, Industry Visits, Debates, Quiz and Assignments

<b>Summative Assessment = 60 Marks</b>	
<b>Formative Assessment Occasion/ type</b>	<b>Weightage in Marks</b>

Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

### **Course Objectives:**

1. Perform simulations of microbial growth and metabolism
2. Design bioreactors for the production of various products.
3. Present knowledge about major metabolic pathways and those related to biofuel production from microbes.
4. Understand the fundamental concepts and principles of environmental biotechnology and Explore the interrelationship between biotechnology and the environment.
5. Gain knowledge of the various applications of biotechnology in environmental conservation, pollution control, and sustainability.
6. Learn about microbial processes and their role in environmental biotechnology.
7. Understand the principles of bioremediation and its application in the clean-up of environmental pollutants.
8. Explore the potential of bioenergy production and waste management through biotechnological approaches.
9. Identify and characterize the most important contaminants in the Bioprocess and other industrial wastes.
10. Reuse/recycle the biological waste to clean technology such as energy, biofuel, bio fertilizer through bioremediation

### **Course out comes:**

1. Exploitation of microorganisms for industrial use and their improvement, and formulation of media for efficient growth and production of microbial or cell-based products.
2. The design, operation, and specific applications of various bioreactors.
3. Demonstrate a comprehensive understanding of the fundamental concepts and principles of environmental biotechnology.
4. Apply knowledge of biotechnological techniques to address environmental challenges, such as pollution control and waste management.
5. Analyze and evaluate environmental biotechnology case studies, research findings, and real-world applications.
6. Design and implement biotechnological approaches for environmental remediation, utilizing microbial processes and biodegradation principles.

7. Evaluate the ethical and sustainable aspects of environmental biotechnology practices and make informed decisions regarding their application in environmental conservation.
8. Communicate scientific concepts and research findings related to environmental biotechnology effectively, both in written and oral forms, to diverse audiences.

<b>Bioprocess and Environmental Biotechnology – Content of Theory</b>	<b>60 hrs.</b>
---	----------------

### **UNIT- I – Introduction to bioprocess technology**

**15**

Basic principle components of fermentation technology. Strain improvement of industrially important microorganisms. Types of microbial culture and its growth kinetics– Batch, Fed-batch, and Continuous culture. Principles of upstream processing – Media preparation, Inocula development, and sterilization.

### **UNIT- II-Bioreactors and downstream processing**

Bioreactors- Significance of Impeller, Baffles, Sparger; Specialized bioreactors- design and their functions: airlift bioreactor, tubular bioreactors, membrane bioreactors, tower bioreactors, fluidized bed reactor, packed bed reactors

Downstream processing- cell disruption, precipitation methods, solid-liquid separation, liquid-liquid extraction, filtration, centrifugation, chromatography, drying devices (Lyophilization and spray dry technology), crystallization, biosensors-construction and applications, Microbial production of ethanol, amylase and Single Cell Proteins.

### **Unit III- Fundamentals of Environmental Biotechnology**

Introduction to Environmental Biotechnology- Principles of Environmental Science. Role of Biotechnology in Environmental Conservation. Microbial Processes in Environmental Biotechnology. Pollution and Biotechnology – Major issues in environmental pollution and the role of biotechnology in addressing them. Biotechnological Methods of Pollution Detection-General bioassay methods for pollution detection. Cell biological methods for assessing pollution levels. Use of biosensors in pollution monitoring. Biotechnological Methods in Pollution Abatement-Reduction of CO<sub>2</sub> emission using biotechnological approaches. Addressing eutrophication through biotechnological interventions. Application of cell immobilization techniques in pollution abatement.

### **Unit IV-Bioremediation and Waste Management**

Importance of bioremediation in environmental cleanup. Types of contaminants suitable for bioremediation. Microorganisms used in bioremediation. *In-situ* Bioremediation Methods. – Bioaugmentation. Biostimulation. Bioventing. Phytoremediation. *Ex-situ* Bioremediation Methods – Composting, Land farming, Biopile and bioslurry systems. Xenobiotics. Bio metallurgy and bio- mining. Waste water Management. Waste water Characterization and Composition. Biological Processes in Waste water Treatment. Activated Sludge Process and Biological Nutrient Removal, Anaerobic Digestion and Biogas Production. Solid Waste Management.

**Pedagogy:** Lectures, Seminars, Industry Visits, Debates, Quiz and Assignments

<b>Summative Assessment = 60 Marks</b>	
<b>Formative Assessment Occasion/ type</b>	<b>Weightage in Marks</b>
Attendance	10
Seminar	10
Debates and Quiz	10
Test	10
<b>Total</b>	<b>60 marks + 40 marks = 100 marks</b>

Course Title	<b>Bioprocess and Environmental Biotechnology (Practical)</b>	Practical Credits	<b>02</b>
Course No.	<b>DSC-A16 (P)</b>	Contact hours	<b>60 hrs</b>

### Content of Practical

1. Bacterial growth curve.
2. Calculation of the thermal death point (TDP) of a microbial sample.
3. Study of fermentor- Demonstration.
4. Production of wine.
5. Estimation of the percentage of alcohol, total acidity & volatile acidity in wine.
6. Production and analysis of ethanol.
7. Production and analysis of amylase.
8. Production and analysis of lactic acid.
9. Isolation of industrially important microorganisms from natural resources.
10. Standard analysis of Water.

<b>Practical Assessment</b>			
<b>Formative Assessment</b>		<b>Summative Assessment</b>	<b>Total Marks</b>
<b>Assessment Occasion/ type</b>	<b>Weightage in Marks</b>	<b>Practical Exams</b>	
Record	05	25	<b>50</b>
Test	10		
Attendance	05		
Performance	05		
<b>Total</b>	<b>25</b>

## PATTERN OF THEORY EXAMINATION

**B.Sc – BIOTECHNOLOGY**

**Theory Question Paper Pattern for DSC, DSE, and OE Courses**

**Duration: 2 Hours**

**Maximum: 60 Marks**

**All questions are compulsory**

**Draw neat labeled diagrams wherever necessary**

I Answer any EIGHT of the following

2X8=16

- (1)
- (2)
- (3)
- (4)
- (5)
- (6)
- (7)
- (8)
- (9)
- (10)

II Answer any SIX of the following

4X6=24

- (11)
- (12)
- (13)
- (14)
- (15)
- (16)
- (17)
- (18)

III Answer any TWO of the following

10X2=20

- (19)
- (20)
- (21)
- (22)

-----

**PATTERN OF PRACTICAL EXAMINATION**

**Practical examination – B. Sc BIOTECHNOLOGY**

**Duration: 3 hours**

**Max. Marks: 25**

Q. 1 Major question	08 Marks
Q. 2 Minor question	04 Marks
Q. 3 Identify and comment	2X4 = 08Marks
Q. 4 Viva-voce	05 Marks

-----

### **PATTERN OF FORMATIVE**

#### **ASSESMENT – PRACTICALS**

**Max. Marks: 25**

1 IA 1	10 Marks
2 IA 2	10 Marks
3 Record	05 Marks

-----

**JSS COLLEGE OF ARTS, COMMERCE AND  
SCIENCE (AUTONOMOUS)

## **Programme Outcomes for Bachelor of Science in Chemistry, Zoology and Biotechnology:**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1. Demonstrate the ability to justify, explain, and/or approach the concept both in written and oral forms
- PO2. Demonstrate the ability to present clear, logical and succinct arguments
- PO3. Develop state-of-the-art laboratory skills and professional communication skills.
- PO4. Apply the scientific method to design, execute, and analyze an experiment.
- PO5. Appreciate the central role of chemistry in the society and use this as a basis for ethical behaviour in issues facing chemists/drugs.
- PO6. Understand Chemistry as an integral part for addressing social, economic, and environmental problems.
- PO7. Identify the major groups of organisms with an emphasis on animals and plants.
- PO8. Compare and contrast the characteristics of animals that differentiate themselves from other living and non-living creatures.
- PO9. Give specific examples of physiological adaptations.
- PO10. Design and develop solution to Biotechnology problems keeping in mind the safety measures for environment and society.
- PO11. Support Biotechnology research activity with strong technical background knowledge.

## **Programme Outcomes for Bachelor of Science in Biochemistry, Microbiology and Biotechnology:**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1. Demonstrate the ability to justify and explain their thinking approach, both written and oral.
- PO2. Develop state-of-the-art laboratory skills and professional communication skills.
- PO3. Apply the scientific method to design, execute, and analyze an experiment, to explain their scientific procedures and experimental observations.
- PO4. Demonstrate an understanding of fundamental biochemical principles, structure and biological function and metabolic pathways.
- PO5. Work as a laboratory technician, biochemists or medical scientist.
- PO6. Describe/ explain the processes used by microorganisms for their replication, survival, and interaction with their environment and host populations.
- PO7. Explain the theoretical basis of the tools, technologies and methods common to microbiology.
- PO8. Design and develop solution to Biotechnology problems by applying appropriate tools while keeping in mind safety factor for environment & society.
- PO9. Create, select, and apply appropriate techniques, resources, and modern tools with an understanding of the limitations.
- PO10. Support biotechnology research activity with strong technical background knowledge.

## **Programme Specific Outcomes**

### **Bachelor of Science in Chemistry, Zoology and Biotechnology:**

After completing the graduation in the Bachelor of Science the students are able to:

PSO1. Find jobs at all level of chemical, pharmaceutical, food products and life oriented material Industries

PSO2. Apply appropriate techniques for the qualitative and quantitative analysis of chemicals in laboratories and in industries.

PSO3. Recognize the relationship between different structures and functions at different levels.

PSO4. Characterize the biological, chemical and physical features of environments that Animals inhabit.

PSO5. Demonstrate effectively the applications of biochemical and biological sciences.

PSO6. Know and apply appropriate tools and techniques in biotechnological manipulation

PSO7. Understand his or her responsibilities in biotechnological practices.

## **Programme Specific Outcomes**

### **Bachelor of Science in Biochemistry, Microbiology and Biotechnology:**

After completing the graduation in the Bachelor of Science the students are able to;

**PSO 1:** Gain and understand biochemical and molecular processes that occur in and between cells to expand understanding of biology

**PSO2:** Be knowledgeable in proper procedures and regulations in handling and disposal of chemicals.

**PSO3:** Communicate scientific information effectively, especially relating to microbes and their role in ecosystem and health related issues.

**PSO4:** Acquire, articulate, retain and demonstrate laboratory safety skills applicable to microbiological research or clinical methods.

**PSO5:** Demonstrate effectively the applications of biochemical and biological sciences

**PSO6:** Decide and apply appropriate tools and techniques in biotechnological manipulation.

**POS7:**Justify societal, health, safety and legal issues and understand his or her responsibilities in biotechnological practices.

**SEMESTER I  
CELL BIOLOGY AND GENETICS (4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.** Develop an understanding of the structure and functions of organelles.

**CO2.** Understand the structure of chromosomes, types, cell differentiation and features of cancer cells.

**CO3.** Gain comprehensive understanding of the chemical basis of heredity and methods.

**CO4.** Understand effect of mutation, mechanism and Chromosomal Aberrations.

**CELL BIOLOGY**

**NO. HOURS**

**UNIT I**

**15**

Cell: Introduction and Historical perspective, the cell theory, ultra structure of plant and animal cell.

Cell organelles: Structure and functions of – cell wall, plasma membrane, membrane protein, cytoplasm, mitochondria, chloroplast, Golgi complex, endoplasmic reticulum, ribosome, lysosomes, peroxisomes, nucleus.

Cell division: Cell cycle and phases, regulation of cell cycle and significances of cell cycle. Mitosis and meiosis, interphase nucleus, achromatic apparatus, synaptosomal complex and significances of mitosis and meiosis.

**UNIT II**

**15**

Eukaryotic chromosomes: Types, chromatin structure, nucleosomes, and higher order chromatin organization.

Special chromosomes – Polytene and B chromosome, lamp brush chromosome.

Cell interaction and motility: Cell motility flagellar and ciliary motion. Structure and function of muscle cells, muscle contraction, nerve cell structure and function.

Stem cells, differentiation of stem cells (eg: Haematopoietic stem cells) and their application. Special cells: Blood cells, identification, structure and different types of blood cells and cancer cells.

**GENETICS**

**UNIT III**

**15**

Introduction: Historical developments in the field of genetics. Organisms suitable for genetic experimentation and their genetic significance. Mendelian Theory: Law of dominance, Mendel's experimental on monohybrid and di-hybrid crosses, Law of segregation & Principle of independent assortment. Verification of segregates by test and back crosses. Deviation to Mendelian inheritance of genes (13:3 ratio), incomplete dominance (Flower colour in sweet peas), co dominance (Blood groups in human beings), epistasis (Dominant & recessive epistasis). Sex-linked inheritance (colour blindness), linkage, crossing over and cytoplasmic inheritance (Plastid inheritance in *Mirabilis*).

**UNIT IV**

**15**

Mutation: Natural and induced mutations, chemical, physical and biological mutagens with an example each.

Structure and characteristics of bacterial and eukaryotic chromosome, chromosome morphology, concept of euchromatin and heterochromatin.

Chromosomal aberrations: Deletion, duplication, inversion and translocation. Chromosomal disorders in human beings, abnormalities – Aneuploidy and Euploidy.

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

1. Cell counting methods: using Haemocytometer.
2. Measurements with the help of light microscope.
  - a. Calibration of ocular micrometer
  - b. Measurement of biological materials (cells/spores etc.).
  - c. Demonstration-Separation of cell organelles by differential centrifugation
3. Study of Mitosis -onion root tips.
4. Study of Meiosis –onion flowers buds/rheo flowers
5. Demonstration of plasmolysis and deplasmolysis
6. Isolation of chloroplast from leaves
7. Study of at least five simple mutants of Drosophila-Photographic demonstration
8. Preparation of polytene chromosome from salivary glands of Drosophila
9. Genetic Problems; Monohybrid, Di hybrid and interactions of Genes
10. Special Chromosomes; Lampbrush and Polytene chromosomes
11. Comment (Types of chromosome (slide/picture), chromosomal disorders in humans- Humans -Down's Turner's and Klinefelter's Syndrome

**SEMESTER II**  
**BIOMOLECULES & BIO-ANALYTICAL TECHNIQUES** **(4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

- CO1.** Understand the properties, mechanisms and biological importance of Bio-molecules .
- CO2.** Comprehend the mechanism of enzyme action, factors affecting it and its applications.
- CO3.** Understand and able to relate the principles underlying various instruments in the field of Biology.
- CO4.** Compare and contrast the role of bio -molecules and enzymes.

**BIOMOLECULES** **NO. HOURS**

**UNIT I:** **15**  
Carbohydrates: Structure (Fischer and Haworth structure), function and properties of Monosaccharide's (Glucose, Fructose), disaccharides (Sucrose, Maltose and Lactose) and Heteropolysaccharide's- hyaluronic acid and heparin. Reducing and Non reducing Sugars, Stereochemistry- Epimers, Enantiomers, Anomers and Isomers.  
Proteins: Amino acids- General structure , essential and non essential amino acids , classification based on polarity , zwitter ionic structure, pka value. D and L amino acids, optical activity. Peptide bond, primary, secondary, tertiary and quaternary structural organization of proteins. Globular and fibrous proteins with special reference to structure of haemoglobin and collagen.

**UNIT II:** **15**  
Lipids: Classification of lipids with examples. Simple and compound lipids, unsaturated and saturated fatty acids, physical and chemical properties of fats and oils. Structure and biological importance of phospholipids and cholesterol.  
Nucleic acids: Structure of bases, nucleosides, nucleotides and secondary structure of DNA and different forms of DNA. Types and functions of RNA, cloverleaf structure of tRNA.

**UNIT III:** **15**  
General characteristics of enzymes, nomenclature and classification of enzymes. Mechanism of enzyme action: active site, enzyme substrate complex formation-lock and key and induced fit theory. Concept of co-enzymes and cofactors with an example. Factors influencing enzyme activity: pH, temperature, substrate concentration, metal ion, inhibitors (allosteric) and activators, energy of activation. Isozymes, multienzyme complex and multifunctional enzymes with an example to each

**BIO-ANALYTICAL TECHNIQUES**

**UNIT IV:** **15**  
Bio-analytical Techniques: Lambert-Beer Law, working principles of UV-Visible spectrophotometry and colorimetry.  
Centrifugation: Basic principle of centrifugation, ultracentrifuge and its application.  
Chromatography: Principles of chromatography, Types- Partition chromatography- paper and thin layer chromatography & Adsorption chromatography - column chromatography, ion exchange & molecular sieve (principle & application).  
Isotopes: Their importance in biological studies, measure of radioactivity, GM counters

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

1. Qualitative analysis of Carbohydrates.
2. Qualitative analysis of Lipids.
3. Estimation of reducing sugar by DNS method.
4. Estimation of Protein by Biuret method.
5. Estimation of amino acid by ninhydrin method /formal titration
6. Determination of activity and specific activity of enzyme-Salivary amylase.
7. Effect of pH on enzyme activity
- 8.. Effect of temperature on enzyme activity.
9. Effect of metal ions on enzyme activity.
10. Preparation of buffer solution.
11. Identification of amino acids by circular paper chromatography.

8. Practical Enzymology Hans Bisswanger Wiley-VCH 2004

**SEMESTER III**  
**MOLECULAR BIOLOGY & GENETIC ENGINEERING** **(4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.** Display a broad understanding of core molecular Biology.

**CO2.** Discuss and differentiate the process of Transcription and Translation

**CO3** Explain key concepts of genome organization and manipulation.

**CO4.** Demonstrate working knowledge in a defined skill set of molecular biology and biotechnology protocols.

**MOLECULAR BIOLOGY** **NO. HOURS**

**UNIT I** **15**

DNA as genetic material: Experiments of Griffith and Hershey & Chase. Central Dogma of Molecular biology.

Concept of gene: Definition, generalized structure of Prokaryotes and Eukaryotes.

DNA Replication: Modes of DNA replication- Semiconservative, conservative and dispersive method.

Replication of DNA in prokaryotes and eukaryotes. Components of replication –lagging strand leading strand Okazaki fragment, role of SSBP, gyrase, helicase, RNA polymerase, DNA polymerase. Inhibitors of replication- role of actinomycin, acriden, novobiocin, novobiocin, amphidicolin and N-ethyl maleimide.

Genetic code: Major features of genetic code, outline of Deciphering of genetic code and Wobble hypothesis.

**UNIT II** **15**

Transcription and RNA processing : RNA structure and types of RNA, Transcription in prokaryotes: Prokaryotic RNA polymerase, role of sigma factor, promoter, Initiation, elongation and termination of RNA chains. Inhibitors of Transcription- rifampicin, actinomycin, alpha amanitin and platinum antitumor drugs. Transcription in eukaryotes: Eukaryotic RNA polymerases, transcription factors, promoters, enhancers, mechanism of transcription initiation, promoter clearance and elongation RNA splicing and processing: processing of pre-mRNA: 5' cap formation, polyadenylation, splicing, rRNA and tRNA splicing.

Translation: Activation of amino acids, ribosome (composition & components), formation of initiation complex. Initiation, elongation and termination, inhibitors of protein synthesis.

**GENETIC ENGINEERING**

**UNIT III** **15**

Enzymes in Genetic engineering and its importance-Restriction endonucleases-types of restriction enzymes, ligases, alkaline phosphatases, polynucleotide kinase, terminal deoxynucleotidyltransferase, S1 nuclease, Klenow fragment, taq DNA polymerases, ribonuclease, reverse transcriptase

Gene cloning vectors: Types of vectors –Cloning vector and expression vector . Plasmids (pBR322, pUC 19) and cosmids (pLFR5, pJB8). Importance of plasmids as cloning vectors, stability of plasmids, different forms of plasmid, concepts of YAC and BAC.

**UNIT IV** **15**

Recombinant DNA technology: Isolation of gene, construction and preparation of complementary DNA. Probes- types, preparation and hybridization, genomic library.

Genetic engineering techniques: Gel electrophoresis, southern and northern blotting techniques, PCR and

its types, Sanger's, Maxam & Gilbert method of DNA sequencing.

Applications of Genetic Engineering: Therapeutic products produced by genetic engineering-blood proteins, human hormones. Genetic engineering in plants: Use of *Agrobacterium tumefaciens* and *A. rhizogenes*, Ti plasmids, Direct DNA transfer to plants.

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

1. Preparation of stock solution for molecular biology experiments.
2. Colorimetric estimation of DNA.
3. Colorimetric estimation of RNA.
4. Demonstration of  $T_m$  value of DNA.
5. Extraction of DNA from plant and microbial source.
6. Quantification of DNA by spectrophotometry.
7. Determination of purity of DNA.
8. Agarose gel electrophoresis of DNA.
9. Southern blotting (demonstration).
10. Isolation of plasmid DNA.

**DMD22005/ DMD22006**

**SEMESTER IV**

**PLANT TISSUE & ANIMAL CELL CULTURE**

**(4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.**Develop concept of plant tissue and animal cell culture techniques and their application in biotechnology.

**CO2.** Comprehend the knowledge of transgenic plants in industrial and agricultural applications.

**CO3.**Establish and maintain various cell lines used in tissue culture.

**PLANT CELL CULTURE**

**NO. HOURS**

**UNIT I**

**15**

Plant tissue culture introduction: History and development, Importance of plant tissue culture.

Laboratory organization and culture techniques: general requirements and aseptic conditions. Media preparation, culture media, sterilization, and pre-treatment to explants.

Principles of tissue culture: Callus culture- Definition of callus, initiation, maintenance, sub culture and organogenesis .Factors affecting organogenesis .

organ culture- culture protocols and importance of root and meristem culture.

Micropropagation in plants: stages of micropropagation, methods, advantages, applications.

**UNIT- II**

**15**

Somaclonal variation for disease resistance and agronomic traits.

Somatic embryogenesis: Embryoid and embryogenesis. Protocol and importance of somatic embryogenesis, Synthetic seeds and its applications, germplasm conservation and preservation.

Suspension culture: Batch and continuous cell suspension culture. Importance of suspension culture in production of secondary metabolites. Protoplast culture and fusion: Definition of protoplast, isolation principle, culture protocol, action of enzymes, regeneration of plants, protoplast fusion, somatic cell hybridization and its application.

**ANIMAL TISSUE CULTURE**

**UNIT - III**

**15**

Introduction: History, developments and importance of animal cell culture. Characteristics of animal cell growth, Advantages and disadvantages of tissue culture methods and laboratory facilities.

Culture procedure and culture media: Preparation and sterilization of glasswares and media. Culture media containing naturally occurring ingredients, blood plasma, blood serum, serum-free media, tissue extracts, complex natural media, chemically defined media, and basal salt solution –HBSS.

**UNIT – IV**

**15**

Primary culture, cell lines and cloning: Preparation of primary culture –mechanical and enzymatic method. Primary and established cell lines, somatic cell fusion.

Tissue cultures- cover slip method, watch glass method and use of agar.

Whole embryo culture. (e.g. Chick embryo).

Hybridoma technology: Production of monoclonal antibodies.

Animal propagation –Artificial insemination, superovulation, embryo transfer, in-vitro fertilization, embryo splitting.

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

1. Media preparation and sterilization techniques.
2. Callus cultures: choice of explants, preparation of explants, callus induction, subculture and maintenance.
3. Regeneration of plants from growth hormones.
4. Meristem culture for pathogen free plants.
5. Preparation synthetic seed
6. Suspension culture – initiation of suspension culture from callus.
7. Plant protoplast Isolation.
- 8 . Cell viability test by tryphan blue method.
9. Preparation of HSS and glasswares of cell culture experiments
- 10.Isolation of PMN leucocytes from human peripheral blood sample and staining and identification.(lishman stain).
11. Demonstration of dissegration of cells by mechanical and enzymatic methods.
12. Photographic Demonstration of Animal Cell culture Lab equipments

**SEMESTER V**  
**DSE: IMMUNOLOGY AND MEDICAL BIOTECHNOLOGY (4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.** Understand the role of different types of Cells in immune system .

**CO2.** Discuss the principles and applications of immunological techniques.

**CO3.** Understand to diagnose diseases.

**CO4.** Comprehend the knowledge of therapeutic applications of enzyme and hormone.

**IMMUNOLOGY**

**NO. HOURS**

**UNIT I**

**15**

Historical account and chronological events of Edward Jenner and Louis Pasteur.

Antigens: Definition, chemical nature, haptens, epitopes, antigenicity, blood group antigens.

Antibodies: Definition, types, structure of IgG.

Types of immunity – Innate- mechanism of innate immunity. Adaptive immunity – active and passive and adoptive immunity.

Cells and organs involved in immune system – T- cells, B-cells, antigen presentation and macrophages, their role in antigen recognition, clonal selection, and immunological memory. Immunological aspects of viral (HIV), bacterial and parasitic infection ( one example each)

**UNIT II**

**15**

Immune disorders: Hypersensitivity, auto immune disorders- organ specific and systemic specific Grave's diseases, Hashimoto's disease , systemic lupus erythematosus.

Immuno techniques: Precipitation reaction, immuno diffusion-ODD and RID, RIA, Hemagglutination, ELISA, immunofluorescent, Western blotting. Major Histocompatibility complexes – class I & class II MHC antigens, antigen processing. Vaccines & Vaccination – adjuvants, cytokines, DNA vaccines, recombinant vaccines, bacterial vaccines, viral vaccines, vaccines to other infectious agents, passive & active immunization.

**MEDICAL BIOTECHNOLOGY**

**UNIT III**

**15**

Vaccine production: Introduction, new developments, types of vaccines – Inactivate, Attenuated and Recombinant Vaccines-Peptide and DNA, production of vaccines using genetically engineered microorganisms (Ex:HBV).

Enzymes in diagnosis: Enzymes used to detect and quantify blood glucose, cholesterol, triglycerides, urea and uric acid. Immobilized enzymes as diagnostic tools.

Nucleic acid analysis: Features of DNA probes and its applications in diagnosis, identification of *Mycobacterium tuberculosis* in clinical samples using PCR.

Enzymes in therapy: List of enzymes and their therapeutic applications.(Ex: DNase, debriding enzymes, asparaginase, superoxide dismutase, rennin, streptokinase, urokinase ,lipase and adenosine deaminase)

**UNIT IV**

**15**

Hormone therapy: List of hormones and their therapeutic applications (Ex: Insulin, human growth hormone, erythropoietin, calcitonin, lipocortin, somatotropin and alpha melanocyte stimulating hormone), production of humulin by recombinant DNA technology.

Therapeutic proteins: Cytokines as therapeutic proteins, production of interferon by recombinant DNA technology.

Human gene therapy: Definition, differences between somatic and germ line gene therapy, embryo, ex vivo, in vivo and antisense gene therapy -one example each, principle and applications.

Transgenic plants for production of biopharmaceutical (tobacco, tomatoes, and potatoes)

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

1 Determination of blood group

a) ABO blood grouping

b) Rh blood grouping.

2 Immuno diffusion :

a) ODD

b) RID.

3 Separation of serum from blood

4 Demonstration of ELISA

5 Demonstration of Western blotting

6 MIC assay

7 Isolation of antibiotic resistant strains using gradient plate method

8 Estimation of urea by BAMO method

9 Qualitative analysis of normal and abnormal constituents of urine

10 Photographic demonstration of transgenic animals and plants for production of biopharmaceutical

**DME22205/DME22206**

**SEMESTER V**

**DSE: MICROBIALTECHNOLOGY & AGRICULTURAL BIOTECHNOLOGY (4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.**Develop skills associated with screening of Industrially Important Strains.

**CO2.**Understand principles underlying design of Fermentor, Fermentation Process and downstream processing

**CO3.**Discuss the various aspects for the improvement of crop plants.

**CO4.** Understand the application of r-DNA technology to enhance the production of crop plant .

**MICROBIALTECHNOLOGY**

**NO. HOURS**

**UNIT I**

**15**

Introduction to biotechnological importance of microorganisms.

Metabolic pathway involved in microbial products (EMP,PPP and ED), primary and secondary metabolites, enzymes and microbial biomass.

Microbial production: Use of microbes in production of vitamins (vit-C), enzymes (Amylase), organic acids (citricacid),amino acids (glutamicacid),polysaccharides (xanthan),growth regulators (auxins), colorants (phycocyanin) ,flavors (diactyl), antibiotics (penicillin).

**UNIT II**

**15**

Kinetics of microbial growth and product formation: Phase of cell growth in batch cultures and continuous culture. Growth associated and non-growth associated product formation kinetics, substrate and product inhibition on cell growth and product formation.

Bioreactors- Types and functions. Purification & characterization of proteins, Upstream and downstream processing, solids and liquid handling. Disruption of microbial cells- centrifugation, filtration of fermentation broth, ultra centrifugation, liquid extraction, ion-exchange recovery of biological products.

Immobilization of cell- Introduction and methods of microbial cell immobilization.

**AGRICULTURAL BIOTECHNOLOGY**

**UNIT III**

**15**

Introduction: Biotechnology for crop improvement, future prospects of biotechnology for agriculture.

Biological nitrogen fixation: Nitrogen fixing microorganisms, role of nitrogenase, genetics of nitrogen fixing microorganisms, regulation of nif gene expression and mechanism of nitrogen fixation.

Bio fertilizers and phyto-stimulations: Mechanism of growth promotion by microbial inoculants- microbial production and application methods of microbial inoculants- *Rhizobium*, *azospirillum*, *azotobacter*, *mycorhizae*.

**UNIT IV**

**15**

Genetic engineering of crop plant: Gene transfer technique for desirable traits in crop plants. Agro bacterium mediated gene transfer, Direct gene transfer methods to protoplast. Few examples of transgenic plants, plants obtained through gene transfer techniques –BT cotton, herbicide tolerant soybean, virus resistance (papaya ring spot).

Microbial pesticides: Fungicides and herbicides. Bacterial, fungal and viral bio agents- *Bacillus*

*Thurengensis* (BT) and *BeaveriaBassiana*. Mechanism of control of plant disease-hypo virulence, competition antibiotics, induced resistance, mycoparasitism.

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

- 1 .Identification of important microorganisms relevant to biotechnology: E.coli, sacchromycescervisiae, spirulina.
- 2 .Demonstration of commercial products-single cell proteins microbial flavours.
- 3 .Entrapment of yeast for enzyme action & estimation of invertase activity
4. Preparation of wine.
5. Estimation of percentage of alcohol by Specific gravity method .6 .Seed inoculation with rhizobium culture and observation for root nodulation.
7. Preparation of bio control formulations.
8. Biofertilizers formulation.
9. Isolation and identification of *Rhizobium*.
10. Isolation and identification of *azospirillum*. Isoalation and Identification of *azotobacter*. Study of morphology of *mycorhizae*.
11. Photographic demonstration of BT cotton, herbicide tolerant soybean, virus resistance (papaya ring spot).
12. Demonstration of steps involved in large scale production of biofertilizers.

**DMF22005/ DMF22006**

**SEMESTER VI**

**DSE: ENVIRONMENTAL BIOTECHNOLOGY AND BIOSTATISTICS**

**(4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.** Gain an understanding of the causes, types and control methods for Environmental Pollution.

**CO2.** Differentiate the application of different life forms in Environmental Remediation.

**CO3.** Apply Statistical Tools for Analysis of Biological Data.

**ENVIRONMENTAL BIOTECHNOLOGY**

**NO. HOURS**

**UNIT I**

**15**

Introduction: Major issues in environment pollution. Role of Biotechnology to solve the problems.

Biotechnological methods of pollution detection: General bioassay, cell biological methods, immunoassay, DNA based methods, use of biosensor.

Biotechnological methods in pollution abatement: reduction of CO<sub>2</sub> emission, Waste water treatment – conventional waste treatment, Use of Algae, Eutrophication, Use of Cell Immobilization.

**UNIT II**

**15**

Biotechnology and biodegradation: Degradation of Xenobiotic compounds-organic (chlorinated hydrocarbons, substituted simple aromatic compounds, polyaromatic hydrocarbons, pesticides and surfactants.

Biohydrometallurgy and Biomining: Bioleaching, biosorption, oil degradation and creation of super bugs. Treatment of Industrial wastes: Pulp, Dye, leather and solid waste management. Genetically engineered microbes for waste treatment.

Ecofriendlybioproducts: Biomass resources, biogas, and alcohol as a fuel, biological hydrogen generation and biodegradable plastics.

**BIOSTATISTICS**

**UNIT III**

**15**

Introduction, Basic concepts- population, data, sample and variable. Types of data-primary and secondary, methods of data collection- direct personal interview, indirect oral interview, through correspondence, questionnaire and census. Classification of data- qualitative, quantitative and simple classification. Sampling methods- random and non-random. Tabulation of data- structure of a table, simple and complex table.

**UNIT IV**

**15**

Graphical and diagrammatic representation of data- histogram, bar graph and pie diagram. Frequency of distribution- without class intervals, with class intervals and cumulative frequency distribution. Measures of central tendency- mean, median and mode. Measure of dispersion- range, mean deviation, co-efficient of deviation and standard deviation.

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

- 1 & 2. Analysis of sewage water for BOD & COD.
- 3 Estimation of Hydrogen sulphides in the sewage water.
  - b. Estimation of chloride in sewage water sample.
  - c. Estimation of residual chloride in sewage water sample.
  - d. Estimation of carbon dioxide in sewage water sample.
4. Identification of microbial flora in the given water sample.
- 5 . Estimation of percentage of alcohol by specific gravity bottle method
- 6 a. Photographic demonstration of septic tank, sand filters, Imhoff's tank and biosensors.
  - b. Photographic demonstration of creation of superbug.
  - c. Photographic demonstration of genetically modified microbes.
  - d. Photographic demonstration of genetically modified plants.
  - e. Photographic demonstration of genetically modified animals.

Biostatistics problems

- 7 Problems on graphical and diagrammatic representation of data ( histogram, bar graph and pie chart)
- 8 Calculation of mean, median, mode, standard deviation

**DMF22205/ DMF22206**

**SEMESTER VI**

**DSE: BIOINFORMATICS AND BIOPROCESS TECHNOLOGY**

**(4 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.** Understand the basic concepts and tools used in Bioinformatics.

**CO2.** Comprehend the knowledge of Genomics and Proteomics.

**CO3.** Develop an understanding of the various aspects of Bioprocess Technology.

**CO4.** Enhance the skills associated in Fermentation Process.

**BIOINFORMATICS**

**NO. HOURS**

**UNIT I**

**15**

Bioinformatics and the Internet: Introduction, Internet basics, connecting to the internet electronic mail, File transfer protocol, The World Web.

Database- DNA, protein, genomic mapping database, sequence alignment software-pair wise & multiple alignments, gene families

**UNIT II**

**15**

Information retrieval from databases: Databases similarity searching, FASTA, BLAST SEARCH, Clustal W, Clustal X, DIALIGN2, Multalign Navigating the NCBI web site.

Genomics and Proteomics: Types of genomes, bacterial genome sequence project.

Human genome project, Micro array technologies-types and applications.

**BIOPROCESS TECHNOLOGY**

**UNIT-III**

**15**

Introduction to bioprocess technology. Range of bioprocess technology and its chronological development. Basic principle components of fermentation technology. Types of microbial culture and its growth kinetics- Batch, Fed batch and Continuous culture.

**UNIT IV**

**15**

Design of bioprocess vessels- Significance of Impeller, Baffles, Sparger; Types of culture/production vessels- Airlift; Cyclone Column; Packed Tower and their application in production processes.

Principles of upstream processing – Media preparation, Inoculation, development and sterilization.

Introduction to oxygen requirement in bioprocess; mass transfer coefficient; factors affecting K<sub>L</sub>a.

Bioprocess measurement and control system with special reference to computer aided process control.

## **PRACTICALS**

**(2 CREDITS)**

**HOURS : 4 HOURS /WEEK**

1. Sequence information resource
2. Understanding and use of various web resources: EMBL, Genbank, Entrez, Unigene, Protein information resource (PIR)
3. Understanding and using: PDB, Swissprot, TREMBL
4. Using various BLAST and interpretation of results.
5. Retrieval of information from nucleotide databases.
6. Sequence alignment using BLAST.
7. Multiple sequence alignment using Clustal W.
8. Bacterial growth curve.
9. Production and analysis of ethanol.
10. Production and analysis of amylase.
11. Production and analysis of lactic acid.
12. Isolation of industrially important microorganism from natural resource.

**DME22405/ DME22406**

**SEC  
MICROBIAL TECHNIQUES**

**(2 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.** Understand and demonstrate basic sterilization techniques.

**CO2.** Analyze the anatomy of prokaryotic cell and structural detail of eukaryotic cell.

**CO3.** Acquire the knowledge of Culture media and their applications.

**CO4.** Assess the growth measurement and pattern of microorganism.

**MICROBIAL TECHNIQUES**

**NO. HOURS**

**UNIT I**

**07**

General introduction. Concept of Prokaryotes and Eukaryotes. General account on Structure, Classification & Reproduction of Bacteria, Fungi & Viruses.

**UNIT II**

**08**

Microbial Techniques: Sterilization: Principles and applications of  
a. Physical Methods: Autoclave, Hot air oven, Laminar airflow, Seitz filter, Sintered glass Filter, membrane filter.  
b. Chemical Methods: Alcohol, Aldehydes, Phenols, Halogens and Gaseous agents.  
c. Radiation Methods: UV rays and Gamma rays.

**UNIT III**

**08**

Microscopy: working principle and applications of Light microscopy, phase contrast microscopy and electron microscopy.  
Staining-Types, Simple and differential (Gram's and acid fast)

**UNIT IV**

**07**

Microbial nutrition and growth: nutritional classes of microorganisms, culture media, pure culture, microbial growth pattern and methods of growth measurements, method of maintenance and preservation of cultures.

**SEC  
ENZYMOLOGY**

**(2 CREDITS)**

**Course Outcomes:**

After completing the course students are able to:

**CO1.** Understand relationship between the structure and function of enzymes.

**CO2.** Interpret mechanisms of enzymatic action kinetics and molecular interactions and specifies importance of enzymes.

**CO3.** Characterise the inhibitor affects on enzyme kinetics.

**CO4.** Enumerate methods in immobilization of enzymes.

<b>ENZYMOLOGY</b>	<b>NO. HOURS</b>
<b>UNIT – I</b>	<b>7</b>
Enzyme classification . Enzyme substrate complex: concept of E-S complex, binding sites, active site, specificity, factors affecting initial rate, E, S, temp. &pH.	
<b>UNIT – II</b>	<b>8</b>
Kinetics of enzyme activity, Michaelis-Menten equation, Different plots for the determination of Km and Vmax and their physiological significance. Enzyme inhibition types of inhibition, Mechanism of enzyme action: General mechanistic principle.	
<b>UNIT – III</b>	<b>7</b>
Allosteric enzymes with special reference to phosphofructokinase. Kinetics of allosteric enzymes. Isoenzymes– multiple forms of enzymes with special reference to lactate dehydrogenase. Multienzyme complexes. Ribozymes. Multifunctional enzyme- eg Fatty Acid synthase.	
<b>UNIT – IV</b>	<b>8</b>
Enzyme Technology: Methods for large scale production of enzymes. Immobilized enzyme and their comparison with soluble enzymes, Methods for immobilization of enzymes. Immobilized enzyme reactors. Application of Immobilized and soluble enzyme in health and industry.

**Pattern of Question Paper  
Semester I to VI  
Paper I to VI (DSC)**

Time : 3 Hrs

Max Marks: 70

I. Answer all the questions

5 X 1 = 5

- 1 .....
- 2.....
- 3.....
- 4.....
- 5.....

II. Answer any five questions

5 X 3 = 15

- 6.....
- 7.....
- 8.....
- 9.....
- 10.....
- 11.....

III. Answer any four questions

4 X 5 = 20

- 12.....
- 13.....
- 14.....
- 15.....
- 16.....

IV. Answer any three questions

3 X 10 = 30

- 17.....
- 18.....
- 19.....
- 20.....

( Note- 10 Marks may be divided in to 6+4 or 5+5)

**Pattern of Question Paper  
Semester V  
(SEC)**

Time : 2 Hrs

Max Marks: 35

I. Answer all the questions

5 X 1 = 5

- 1 .....
- 2 .....
- 3 .....
- 4 .....
- 5 .....

II. Answer any five questions

5 X 3 = 15

- 6 .....
- 7 .....
- 8 .....
- 9 .....
- 10 .....
- 11 .....

III. Answer any four questions

4 X 5 = 20

- 12 .....
- 13 .....
- 14 .....
- 15 .....
- 16 .....

IV. Answer any one question

1 X 10 = 10

- 17 .....
- 18 .....

( Note- 10 Marks may be divided in to 6+4 or 5+5)

**Scheme for Practical Examination**

**I B.Sc., I Semester**

**CELL BIOLOGY & GENETICS**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Determine the total no. of cells in the given sample by haemocytometer **18**  
or  
Measure the length of the given material by micrometry  
or  
Identify any three mitotic stages from root tip squash preparation.
2. Identify and comment on the spotter A, B and C. **3x4=12**

**I B.Sc., II Semester**

**BIOMOLECULES & BIO-ANALYTICAL TECHNIQUES**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Estimate the amount of glucose in the given sample by DNS method. **18**  
or  
Estimate the amount of protein in the given sample by biuret method.  
or  
Determine the optimum ph for the given enzyme.  
or  
Identify the given biomolecule by performing qualitative analysis.
2. Identify and comment on the spotter A, B and C. **3x4=12**

**II B.Sc., III Semester**

**MOLECULAR BIOLOGY & GENETIC ENGINEERING**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Estimate the amount of DNA in the given sample by DPA method. **18**  
or  
Estimate the amount of RNA in the given sample by orcinol method.  
or  
Isolate DNA from the given material .
2. Identify and comment on the spotter A, B and C. **3x4=12**

**II B.Sc.,**

**IV Semester**

**PLANT TISSUE & ANIMAL CELL CULTURE**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Determine the total no. of living and dead cells in the given sample by tryphen blue exclusion method. **18**  
or  
Demonstrate the production of synthetic seeds. Write the principle and procedure for the same.  
or  
Demonstrate the initiation of suspension culture from callus. Write the principle and procedure for the same. Or  
Demonstrate the surface sterilization of explants. Write the principle and procedure for the same.
- 2 . Identify and comment on the spotter A, B and C. **3x4=12**

**III B.Sc.,**

**V Semester**

**IMMUNOLOGY & MEDICAL BIOTECHNOLOGY**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Determine the blood group of the given sample. **18**

or

Determine the antigen antibody reaction by conducting ODD.

or

Demonstrate MIC assay. Write the principle and procedure for the same.

2. Identify and comment on the spotter A, B and C. **3x4=12**

**III B.Sc., VI Semester**

**MICROBIALTECHNOLOGY & AGRICULTURAL BIOTECHNOLOGY**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Estimate the invertase activity from the given immobilised cells. **18**

or

Estimate the percentage of alcohol in the given sample by specific gravity bottle method.

2. Identify and comment on the spotter A, B and C. **3x4=12**

**III B.Sc., VI Semester**

**ENVIRONMENTAL BIOTECHNOLOGY & BIostatISTICS**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Determine the BOD of the given water sample. **10**

or

Estimate the amount of hydrogen sulphide present in the given water sample.

Or

Estimate the amount of carbon di oxide and chloride present in the given water sample.

Or

Estimate the percentage of alcohol in the given sample by specific gravity bottle method.

2. Identify and comment on the spotter A, B and C. **3x4=12**

3. Statistics problem

**III B.Sc., VI Semester**

**BIOINFORMATICS AND BIOPROCESS TECHNOLOGY**

**Duration : 3 hours**

**Max. Marks :35**

**Practical paper :30 and Record:05**

1. Estimate the amylase activity. **18**

Or

Identify and write critical note on the given microorganism.

2. Identify and comment on the spotter A, B and C. **3x4=12**

**JSS COLLEGE OF ARTS, COMMERCE AND SCIENCE

**JSS COLLEGE OF ARTS, COMMERCE AND SCIENCE (AUTONOMOUS)  
OOTY ROAD, MYSURU-25**

---

**DEPARTMENT OF BOTANY**

---

**PROCEEDINGS OF THE MEETING OF BOARD OF STUDIES FOR THE PROGRAMMES  
B. Sc. IN BOTANY, BIOCHEMISTRY, MICROBIOLOGY (B.Sc. 07) AND CHEMISTRY,  
BOTANY, ZOOLOGY, (B.Sc. 08) HELD ON 14 JUNE 2019 AT 11.00 AM IN THE CHAMBER  
OF THE CHAIRMAN, DEPARTMENT OF BOTANY, JSS COLLEGE, OOTY ROAD,  
MYSURU-25**

---

MEMBERS	SIGNATURE
<b>Dr. S Prathibha</b> Associate Professor, Dept. of Botany, JSS College, Ooty Road Mysuru Chairman	
<b>Dr. Sowmya</b> Associate Professor, Department of Botany Yuvaraja's college, Mysuru  Member (VC Nominee)	
<b>Dr. Syed Fasihuddin</b> Associate professor of Botany Govt. Science College Bengaluru- 560001  Member (AC Nominee)	
<b>Dr. V. N. Muralidhar</b> Associate professor of Botany Govt. first grade College Sira- 572137 Tumkur District  Member (AC Nominee)	

At the outset, the Chairman, BOS in Botany, welcomed the members to the meeting of BOS and briefed about the agenda to be discussed. The following agenda were placed by the Chairman which were discussed and resolved as follows:

---

**Agenda 1:** To frame/ revise, discuss and approve the Scheme/ Syllabus under Choice Based Credit System for the programmes: B.Sc. in Botany, Biochemistry, Microbiology and Chemistry, Botany, Zoology from the academic year 2019-20 onwards.

---

The Chairman appraised the members about the introduction of Choice Based Credit System to the above said programmes with the course matrix in 2017-18. Accordingly, a draft revised/ modified Scheme/ Syllabus was presented and placed before the Board for their opinion and approval.

**Resolution:** The BOS went through the Scheme/ Syllabus and discussed in length about various aspects of the same. After incorporation of the changes suggested by the members of BOS, the Syllabus was approved. Details of changes made with respect to the introduction of revised/ modified Scheme/ Syllabus in the existing courses is shown in Annexure-I.

---

**Agenda 2:** To prepare the Panel of Examiners for the examinations for the year 2019-20.

---

The Chairman presented the proposed Panel of Examiners to I to VI Semester examinations of 2019-20.

**Resolution:** After incorporating of certain changes suggested by the members, the Panel of Examiners was approved.

---

**Agenda 3:** Approval of Reference Books

---

The Chairman presented the proposed list of Reference Books to the Members.

**Resolution:** After incorporating of certain changes suggested by the members, the list of Reference Books was approved.

---

**Agenda 4:** Any other matter with the permission of the Chairman

---

The career oriented course Horticulture syllabi was thoroughly analysed and the contents were restructured according to the present day requirement. Question paper pattern, Maximum marks allotted and the hours per unit are also changed as per the BOS member's corroboration to bring uniformity

Finally the meeting was concluded with the Chairman thanking the Members for their active participation in the deliberations of the meeting.

Chairman

## Annexure-I:

Revision/ modification made in the existing Syllabus for 2019-2020 batch onwards:

Existing	Proposed	Justification	Approved
<b>I B.Sc. I Sem DSC-I</b>			
<b>Biodiversity of Microbes and Archegoniate (CMA23007/08):</b>	<b>Biodiversity of Microbes and Archegoniate (DMA23007/08):</b>		
<b>Unit 1: Microbial diversity:</b>			
A. Virus- replication	Deleted	Repetition	<b>Approved</b>
<b>D. Fungi- <i>Puccinia</i></b>	Yeast	Yeast is most important from economic point of view	<b>Approved</b>
<b>Unit 2: Archegoniate:</b>			
<b>A. Pteridophytes -<i>Marsilea</i></b>	Deleted	Better to study in higher level	<b>Approved</b>
<b>Practicals:</b> Gram's Staining of Bacteria	Deleted	Repetition in Microbiology	<b>Approved</b>
Study of <i>Marsilea</i>		Better to study in higher level	
Study of <i>Puccinia</i>		Yeast is most important from economic point of view	
<b>I B.Sc. II Sem DSC-II</b>			
<b>Plant Ecology Morphology and Angiosperm Taxonomy</b>	<b>Plant Ecology Morphology and Angiosperm Taxonomy</b>		

<b>(CMB23007/08):</b>	<b>(DMB23007/ 08):</b>		
<b>Unit-3: Taxonomy:</b> <b>C. Angiosperm families: Apiaceae</b>	Arecaceae	To Represent Monocot family	<b>Approved</b>
<b>Practicals:</b>  Apiaceae	Solanaceae & Arecaceae	Routinely used vegetables belong Solanaceae family & to represent Monocot family	<b>Approved</b>
<b>II B.Sc. III Sem-DSC III</b>			
<b>Plant Anatomy Embryology (CMC23007/08):</b>	<b>Plant Anatomy and Embryology of Angiosperm (DMC23007/ 08):</b>		
<b>Unit 3: Adaptive and protective systems</b>	Brief Account of Epidermis, cuticle, Stomata & Trichome. Added	Blown up syllabi	<b>Approved</b>
<b>Practicals:</b>	Content Restructured	Appropriate	
<b>Unit 4: Embryology</b>	<b>Unit 4: Embryology of Angiosperms</b>		
Structure of pollen grains	Types of Tetrad, Male gametophyte & Embryosac development- Monosporic, Bisporic, Tetrasporic added	For detailed embryological studies.	
Mechanism & Adaptation of Pollination	deleted	Studied previously in lower levels	<b>Approved</b>
<b>Practicals:</b>	Content Restructured	Appropriate	
<b>III B.Sc. V Sem-DSC IV</b>			
<b>Plant Physiology and Metabolism. (CMD23007/08):</b>	<b>Plant Physiology and Metabolism</b>		

	(DMD23007/08):		
<b>Unit 1: Plant-water relations:</b> <b>Unit 2: Mineral nutrition</b> <b>Unit 3: Translocation in phloem</b> <b>Unit 4: Photosynthesis</b> <b>Unit 5: Respiration</b> <b>Unit 6: Enzymes</b> <b>Unit 7: Nitrogen metabolism</b> <b>Unit 8: Plant growth regulators</b> <b>Unit 9: Plant response to light and temperature</b>	<b>UNIT 1 Plant – Water Relations:</b> <b>1.Fundamental concepts,</b> <b>2.Short Distance Transport,</b> <b>3. Long distance Transport,</b> <b>4.Transpiration,</b> <b>5.Mineral nutrition,</b> <b>6.Translocation of solutes</b> <b>UNIT 2 – Enzymes:</b> <b>UNIT 3 – Bioenergetics:</b> <b>UNIT 4 -Nitrogen Metabolism:</b> <b>UNIT 5 - Plant Growth and Movements:</b>	Content Restructured	<b>Approved</b>
<b>Practicals:</b>	Content Restructured	Appropriate	<b>Approved</b>
<b>III B.Sc. V Sem-DSE I</b>			
<b>DSE-1: Cell and Molecular Biology (CME23007/08):</b>	<b>DSE-1: Cell and Molecular Biology (DME23007/08):</b>		
<b>Unit 1-Techniques in Biology:</b> Sample Preparation for light microscopy; Sample Preparation for electron microscopy; X-ray diffraction analysis.	<b>deleted</b>	Repetition in microbiology	<b>Approved</b>
<b>Unit 2-Cell Membrane and Cell Wall :</b> Carbohydrates in the membrane; Faces of the membranes;	<b>deleted</b>	Better to study in higher classes	<b>Approved</b>

<b>Unit 7-Genetic material:</b> DNA replication (Prokaryotes and eukaryotes): bidirectional replication, semi-conservative method	<b>Unit 7-Gene concept:</b> Semi-conservative method required	Appropriate	<b>Approved</b>
<b>III B.Sc. V Sem SEC-I</b>			
<b>Floriculture</b>	<b>Contents restructured</b>	Appropriate	<b>Approved</b>
<b>III B.Sc. VI Sem DSE-II</b>			
<b>DSE-2: Genetics and Plant Breeding (CMF23007/08)</b>	<b>DSE-2: Genetics and Plant Breeding (DMF23007/08)</b>		
<b>Unit 1- Heredity:</b> lethal genes Pleiotropism, co- dominance 9:7; 9:4:3; 13:3; 12:3:1	<b>deleted</b>	Repetition in Zoology	<b>Approved</b>
<b>Practicals:</b>	Complementary factors; supplementary factors, Duplicate factors, Epistasis	Proper terminologies have been used instead of ratios	<b>Approved</b>
	Genetic problems on Mendel's laws included	For better elucidation of theoretical concepts	<b>Approved</b>

**Chairman**

## **Programme Outcomes for BSc. in Chemistry, Botany, Zoology:**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1.** Demonstrate the ability to justify and explain their thinking and/or approach, both written and oral. Demonstrate the ability to present clear, logical and succinct arguments, including prose and mathematical language. Write and speak using professional norms, and demonstrate an ability to collaborate effectively.
- PO2.** Develop state-of-the-art laboratory skills and professional communication skills.
- PO3.** Apply the scientific method to design, execute, and analyze an experiment and also to explain their scientific procedures as well as their experimental observations.
- PO4.** Appreciate the central role of chemistry in our society and use this as a basis for ethical behaviour in issues facing chemists including an understanding of safe handling of chemicals, environmental issues and key issues facing our society in energy, health and medicine.
- PO5.** Explain why chemistry is an integral activity for addressing social, economic, and environmental problems.
- PO6.** Identify the taxonomic position of plants using principles and methods of nomenclature and classification in Botany.
- PO7.** Understand the impact of the plant diversity in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO8.** Use interdisciplinary approaches with quantitative skills to work on biological problems.
- PO9.** Identify the major groups of organisms with an emphasis on animals and be able to classify them within a phylogenetic framework.
- PO10.** Compare and contrast the characteristics of animals that differentiate them from other forms of life.
- PO11.** Give specific examples of the physiological adaptations, development, reproduction and behaviour of different forms of life.

## **Programme specific Outcomes for BSc. in Chemistry, Botany and Zoology**

After completing the graduation in the Bachelor of Science the students are able to:

**PS01:** Communicate effectively the fundamentals and applications of chemical and Biological sciences

**PS02:** Possess deeper understanding of Natural laws, accuracy and validity of both theoretical and practical knowledge

**PS03:** Explicate ecological interconnectedness of life, by tracing energy and nutrient flows through the environment

**PS04:** Analyse the avenues and remedies for burning environmental issues

**PS05:** Pursue, enhance and appreciate conservation practices for sustainable use of plants and development

**PS06:** Interact with the social activities with ethical approach due to collaborative field visits, botanical tours and academic trips.

## **Programme Outcome for Bachelor of Science in Botany, Biochemistry & Microbiology**

After completing the graduation in the Bachelor of Science the students are able to:

PO1. Identify the taxonomic position of plants using principles and methods of nomenclature and classification in Botany

PO2. Understand the impact of the plant diversity in societal and environmental context

PO3. Demonstrate the knowledge of, and need for sustainable development

PO4. Use interdisciplinary approaches with quantitative skills to work on biological problems

PO5. Demonstrate the ability to justify and explain their thinking and/or approach

PO6. Develop state-of-the-art laboratory and professional communication skills

PO7. Apply the scientific method to design, execute, and analyze an experiment

PO8. Explain scientific procedures and their experimental observations

PO9. Demonstrate an understanding of fundamental biochemical principles, structure and function

PO10. Work as a laboratory technician, biochemists or medical scientist

PO11. Explain the processes used by microorganisms for the growth

PO12. Explain the theoretical basis of the tools, technologies and methods of microbiology

## **Programme Specific Outcome**

### **Bachelor of Science in Botany, Biochemistry & Microbiology**

After completing the graduation in the Bachelor of Science the students are able to;

**PSO1:** Demonstrate applications of biochemical and biological sciences

**PSO2:** Inculcating proficiency in all experimental techniques and methods of analysis

**PSO3:** Acquire, articulate, retain and demonstrate laboratory safety skills

**PSO4:** Communicate scientific information effectively, relating to microbes and their role in ecosystem and health

**PSO5:** Gain proper procedures and regulations in handling and disposal of chemicals

**PSO6:** Understand biochemical and molecular processes that occur in and between the cells

## LIST OF APPROVED PANEL OF EXAMINERS:

Sl. No	Name	Designation and DOB	Joining Date
<b>Internal Examiners</b>			
1.	Dr.Prathibha S Jss College, Ooty Road, Mysore	Asso. Prof. 28/04/1964	28/08/1986
2.	Kiran B L Jss College, Ooty Road, Mysore	Asst. Prof. 30/12/1992	23/09/2015

32.	Deepa hebbar Maharani`s Science College for Women, Mysore	Asst. Prof.	

I B.Sc., I Semester DSC-I  
**Biodiversity of Microbes and Archegoniate**  
Theory (Credits: 4)

Lectures: 60 Hours  
(4 hours/week)

**Course outcome:**

After completion of the course the student is able to:

- CO1 Understand the characteristics of viruses
- CO2 Learn the classification and characteristics of bacteria
- CO3 Identify the classification and characteristics of archegoniate
- CO4 Identify the characteristics of algae
- CO5 Understand the classification and characteristics of fungi.

**Unit 1- Microbial diversity:**

**A. Virus (4 Lectures)**

General structure, DNA virus (T<sub>4</sub>-phage); Lytic and lysogenic cycle, RNA virus (TMV); Economic importance.

**B. Bacteria (5 Lectures)**

Definition, Classification (Based on Shape, Arrangement and flagellation) and Economic importance; ultra structure, Reproduction – vegetative (fission, Budding) asexual (Endospore) Sexual (Genetic recombination-Conjugation, Transformation and Transduction).

**C. Algae (14 Lectures)**

General characteristics; Classification, Reproduction and Economic importance of algae. Type study- *Nostoc*, *Spirogyra*, *Sargassum*.

**D. Fungi (16 Lectures)**

1. General characteristics, classification, nutrition, reproduction and economic importance. Type Study - *Rhizopus*, *Saccharomyces* (Yeast), *Penicillium*,
2. Lichens: Distribution, classification and Economic importance, structure and reproduction.

**Unit 2- Archegoniate:**

**A. Bryophytes (7 Lectures)**

General characteristics, Classification and Economic importance. Type Study- *Marchantia* and *Polytrichum*

**B. Pteridophytes (7 Lectures)**

General characteristics and classification, Stellar evolution. Type Study - *Selaginella* and *Equisetum*.

**C. Gymnosperms (7 Lectures)**

General characteristics, classification and Economic importance. Type Study- *Cycas* and *Pinus*.

I B.Sc., I Semester DSC-I  
Biodiversity of Microbes and Archegoniate  
Practical (Credits: 2)

Lectures: 60 Hours  
(4 hours/week)

1. Study of TMV and of T<sub>4</sub>- Phage through Microphotographs
2. Study of Bacteria.
3. Study of *Nostoc* (Specimen and permanent slides)
4. Study of *Spirogyra* (Specimen and permanent slides)
5. Study of *Sargassum* (Specimen and permanent slides)
6. Study of *Rhizopus*
7. Study of *Yeast*
8. Study of *Penicillium*
9. Study of Lichens
10. Study of *Marchantia*
11. Study of *Polytrichum*
12. Study of *Selaginella*
13. Study of *Equisetum*
14. Study of *Cycas*
15. Study of *Pinus*

I B.Sc., I Semester DSC-I  
Biodiversity of Microbes and Archegoniate  
Practical Question paper

Time: 4 Hours

Max. Marks: 35 (25+05+05)

- I. Identify the specimens 'A' and 'B' with reasons and labeled sketches 3x2=06 marks
- II. Prepare a stained temporary slide of 'C'. Sketch, label and Identify with Reasons leave the preparation for evaluation. 4x1=04 marks
- III. Write critical notes on 'D', 'E' and 'F' 3x3=09 marks
- IV. Identify the Microslides 'G', 'H' and 'I' and with reasons and labeled Sketches 2x3=06 marks
- V. Practical record 05 marks
- VI. Viva- Voce 05marks

\*\*\*

**I B.Sc., II Semester DSC-II**  
**Plant Ecology, Morphology and Angiosperm Taxonomy**  
**Theory (Credits: 4)**

**Lectures: 60 Hours**  
**(4 hours/week)**

**Course outcome:**

After completion of the course the student is able to:

- CO1 Specify the characteristics of ecosystem
- CO2 Learn the classification and characteristics of Plant communities
- CO3 Understand in details with examples plant morphology
- CO4 Understand in depth Herbarium

**Unit 1- Plant Ecology:**

**A. Introduction to Ecology and Ecological factors: (6 Lectures)**

Introduction to ecology, Climatic factors- Light, temperature and water. Edaphic factors- soil formation, types and profile. Shelford law of tolerance.

**B. Ecosystem (6 Lectures)**

Structure and components of an ecosystem, study of pond and forest ecosystem, energy flow and trophic levels; Food chains, food webs, Ecological pyramids. Biogeochemical cycles- Carbon, Nitrogen and Phosphorous.

**C. Plant communities (6 Lectures)**

Morphological Adaptations of hydrophytes and xerophytes. Plant Succession, Hydrosere and Xerosere.

**Unit 2- Leaf and Floral Morphology: (15 Lectures)**

- A. Leaf- Structure, types and phyllotaxy.
- B. Types of Inflorescence
- C. Flower- structure of a typical flower (*Tribulus terrestris* / *Muntingia calabura*), Variation in floral morphology and floral organs in detail.
- D. Types of Inflorescence
- E. Types of fruits

**Unit-3: Taxonomy:**

**A. Introduction to plant taxonomy (8 Lectures)**

- 1. Taxonomic hierarchy
- 2. Types of classification (artificial, natural and phylogenetic)
- 3. Systems of classification- Bentham and Hooker, Engler and Prantl
- 4. Plant Nomenclature-Binomial system and ICBN principles.

**B. Herbarium technique: (5 Lectures)**

1. Herbarium- Techniques and importance
2. Botanical gardens

**C. Angiosperm families:**

**(14 Lectures)**

Study of the following families according to Bentham and Hooker's system of classification.--Malvaceae, Leguminosae (Papilionaceae, Caesalpiniaceae and Mimosaceae), Apocynaceae Asteraceae and Arecaceae.

\*\*\*

**I B.Sc., II Semester DSC-II**  
**Plant Ecology, Morphology and Angiosperm Taxonomy**  
**Practical (credits: 2)**

**Lectures: 60 Hours**  
**(4 hours/week)**

1. Study of Ecological instruments used to measure microclimatic variables: Soil thermometer, Maximum and Minimum Thermometer, Anemometer, Psychrometer/Hygrometer, Rain gauge.
2. Study of morphological adaptations of the following
  - a. Hydrophytes                   Eg: *Hydrilla. Pistia and Eichhornia*
  - b. Xerophytes                   Eg: *Opuntia, Euphorbia Tirucalli, Nerium and Casuarina*
3. Study of biotic interactions of the following:
  - a. Stem parasite                   Eg: *Cuscuta.*
  - b. Root parasite                   Eg: *Striga.*
  - c. Epiphytes,                   Eg: *Vanda*
  - d. Predatory plants (Insectivorous plants) Eg: *Nepenthes.*
4. Study of root modifications
5. Study of stem modifications
6. Study of leaf-structure, types, phyllotaxy and modifications.
7. Parts of a typical flower (*Tribulus terrestris / Muntingia calabura*)
8. Floral organs in detail with their variations.
9. Types of inflorescence
10. Types of fruits
11. Study of families Malvaceae, Apocynaceae
12. Study of families Leguminosae (Papilionaceae, Caesalpiniaceae and Mimosaceae)
13. Study of families and Asteraceae
14. Study of Solanaceae and Arecaceae
15. Mounting of a properly dried and pressed specimen of any wild plant with herbarium label

**Suggested Readings:**

**Plant Anatomy and Embryology of Angiosperms  
Theory (Credits: 4)**

**Lectures: 60 Hours  
(4 hours/week)**

**Course outcome:**

After completion of the course the student is able to:

- CO1 Understand the details of histology
- CO2 Understand the details of anatomy
- CO3 Understand the characteristics of secondary growth
- CO4 Learn the details of embryology

**Unit 1: Histology and Anatomy (18 Lectures)**

Meristem- structure, classification, based on origin, position and function. Study of Simple and complex tissues.

Internal Structure of dicot and monocot root, stem and leaf.

**Unit 2: Secondary Growth (4 Lectures)**

Process of secondary growth in dicot stem.

**Unit 3: Adaptive and protective systems (7 Lectures)**

Anatomical adaptations in xerophytes (Nerium & Causarina) and Hydrophytes (Hydrilla & Eichhornia). Epidermis, cuticle, Stomata & Trichome. (Brief Account)

**Unit 4: Embryology of Angiosperms (8 Lectures)**

T.S of mature anther, Microsporogenesis, types of tetrads and Male gametophyte, Megasporogenesis- types of ovules, L.S of Anatroous ovule, Embryosac development- Monosporic (Polygonum), Bisporic (Allium), Tetrasporic (Frittilaria) structure of Mature Embryo sac.

**Unit 5: Pollination and fertilization (11 Lectures)**

Definition, types, contrivances for self and cross pollinations

Process of Double Fertilization, Post Fertilization changes

**Unit 6: Embryo and endosperm (6 Lectures)**

Structure and development of Dicot (Capsella) and Monocot embryo (Maize). Endosperm- nucellar, cellular, helobial and ruminant.

**Unit 7: Experimental Embryology (6 Lectures)**

Brief account of apomixis (recurrent and non-recurrent), apospory, polyembryony, parthenocarpy.

1. Study of Meristems through permanent slides and photographs- apical, intercalary and lateral meristems.
2. Study of simple Tissues (parenchyma, collenchyma and sclerenchyma) through Permanent slides and photographs.
3. Study of complex Tissue (xylem and phloem) through Permanent slides and photographs.
4. Study of Anatomical characteristics of Root: Monocot- *Zea mays* and Dicot- *Helianthus*.
5. Study of Anatomical characteristics of Stem: Monocot- *Zea mays*; Dicot-*Helianthus*.
6. Study of Anatomical characteristics of Monocot and Dicot Leaf.
7. Adaptive anatomy: Xerophyte (*Nerium & Causaurina*); Hydrophyte (*Hydrilla & Eichhornia*).
8. Structure of anther (young and mature) and mounting of Pollen grains.
9. Calculation of percentage of germinated pollen in a given medium (Hanging drop method).
10. Types of ovules: Anatropous, Orthotropous, Circinotropous, Amphitropous/ Campylotropous.
11. Female gametophyte: Polygonum (monosporic) type of Embryo sac Development.
12. Pollination types and seed dispersal mechanisms. (Photographs and specimens).
13. Dissection/ mounting of embryo/endosperm from seeds.

\*\*\*

**\*\*\***

**Course outcome:**

After completion of the course the student is able to:

- CO1 Learn in depth translocation in phloem
- CO2 Specify the classification and characteristics of enzyme
- CO3 Understand the details of photosynthesis
- CO4 Identify the characteristics of plant response to light and temperature

**UNIT 1 - Plant – Water Relations: (20 Lectures)**

1. **Fundamental concepts:** Importance of water to plants, Diffusion, Imbibition, Osmosis, Endosmosis and Exosmosis, Plasmolysis, Osmotic Pressure, Water potential and its components.
2. **Short Distance Transport:** Absorption of water – Active and passive absorption, Absorption of minerals – Donnan's equilibrium (Passive absorption), Carrier-ion concept (Active absorption)
3. **Long distance Transport:** Ascent of sap; Root pressure theory (Vital theory), TCT Theory (Physical theory), Soil plant atmospheric continuum (SPAC)
4. **Transpiration:** Types, Mechanism of stomatal movement; Starch-sugar interconversion theory, Potassium ion pump theory, Significance of transpiration, Antitranspirants, Guttation.
5. **Mineral nutrition:** Macro and Micro nutrients; Role of Nitrogen, Phosphorous, Potassium, Sulphur, Manganese and Zinc, Hydroponics.
6. **Translocation of solutes:** Path of translocation, Munch's mass flow hypothesis with merits and demerits.

**UNIT 2 – Enzymes: (4 Lectures)**  
Properties, Classification and Mode of action (Lock & Key theory, Induced fit theory)**UNIT 3 – Bioenergetics: (18 Lectures)**

1. **Photosynthesis :** Introduction, Photosynthetic apparatus, Mechanism – Light and Dark reactions (C<sub>3</sub> pathway/Calvin Cycle), C<sub>4</sub> pathway, Significance of Photosynthesis.
2. **Respiration :** Introduction,,Types, Ultrastructure of Mitochondrion, Mechanism of Aerobic respiration – Glycolysis, Krebs' cycle and Terminal Oxidation of reduced coenzymes , Anaerobic respiration – alcoholic & lactic acid fermentation, Significance .

**UNIT 4 -Nitrogen Metabolism: (6 Lectures)**

Nitrogen fixation (Symbiotic and Non Symbiotic), Nitrate reduction, Aminoacids & their synthesis  
(Transamination & Reductive amination)

**UNIT 5 - Plant Growth and Movements: (12 Lectures)**

1. Growth: Definition, Phases of growth and Growth curve
2. Growth regulators Chemical nature, application of Auxins, Gibberellins, Cytokinins, Abcissic acid (ABA) & Ethylene.
3. Photoperiodism and Vernalisation : A brief account.
4. Plant movements : Tropisms & their types ( Phototropism, Thigmotropism, Hydrotropism & Geotropism)

**I. Minor Experiments:**

1. a) Root pressure experiment
- b) Ganong's Potometer experiment
2. c) Ganong's light screen experiment
- d) Mohl's half leaf experiment
3. f) Kuhne's experiment to demonstrate fermentation.
- g) Phototropism
4. h) Geotropism
- i) Arc Auxanometer experiment
5. j) Bolting.
- k) Effect of auxins on rooting.

**II. Major Experiments:**

1. Determination of Osmotic Potential by Plasmolytic method using *Rhoeo discolor* (Epidermal peel)
2. Experiment to demonstrate the Relationship between Absorption and Transpiration.
3. Experiment to demonstrate the Suction force due to transpiration.
4. Separation of photosynthetic pigments using paper Chromatography.
5. Evolution of Oxygen during photosynthesis
6. Calculation of stomatal index and stomatal frequency.

**III. Biochemical tests:**

Qualitative biochemical tests for Carbohydrates, fats and protein.

\*\*\*

**DMD23108/DMD23107**

**II B.Sc., IV Semester DSC-IV  
Plant Physiology and Metabolism  
Practical Question Paper**

**Time: 4 Hours**

**Max. Marks: 35 (25+05+05)**

**I. Perform the major experiment 'A' write the principle, Requirements, Procedure and record the result with inference and leave the setup for evaluation** **9x1 =9 marks**

**II. Comment on 'B' & 'C' (Minor experiments)** **4x2=8 marks**

**II. Perform the biochemical test of the given sample 'D' & 'E'** **4x2=8 marks**

**IV. Practical record** **05 marks**

**V. Viva-Voce** **05 marks**

**\*\*\***

**Course outcome:**

After completion of the course the student is able to:

- CO1 Understand in depth microscopy
- CO2 Learn the details of cell
- CO3 Specify the details of DNA
- CO4 Learn the details of gene regulation

**Unit 1- Microscopy: (5 Lectures)**

Principles of microscopy; Light Microscopy; Phase contrast microscopy; Fluorescence microscopy; Electron microscopy (EM)- Scanning EM and Scanning Transmission EM (STEM).

**Unit 2- Cell: (4 Lectures)**

Cell Theory; Ultra structure of Prokaryotic and eukaryotic cells;

**Unit 3- Cell Wall and Cell Membrane: (4 Lectures)**

Cell wall- Structure; Cell Membrane- Fluid mosaic model and functions

**Unit 4- Cell Organelles: (13 Lectures)**

Ultrastructure and functions of Nucleus, Mitochondrion, Chloroplast, Endoplasmic reticulum, Golgi bodies, Lysosomes, Ribosomes, Peroxisomes and Glyoxisomes

Morphology of chromosomes in general, Ultrastructure of Chromosome (Nucleosome concept), Karyotype and Ideogram

**Unit 5-Cell Division: (6 Lectures)**

Cell cycle, Mitosis and Meiosis and their significance

**Unit 6- Nucleic acids: (12 Lectures)**

**A. DNA:** Chemistry, Structure and Replication in Eukaryotes (semi- conservative method) DNA as a genetic material Griffith's and Avery's transformation experiments, Hershey-Chase bacteriophage experiment.

**B.RNA:** Chemistry, Structure, Types (mRNA, tRNA, rRNA) and structure. Frankel Conrat's experiment

**Unit 7-Gene concept: (12 Lectures)**

A. Cistron, Recon, Muton- Prokaryotic and Eukaryotic gene structure, Split gene concept.

B. Genetic code- features, Wobble concept. Protein synthesis: Transcription, Splicing and Translation. Central dogma of molecular Biology.

**Unit 8-Regulation of gene expression: (4 Lectures)**

Lac operon and Tryp operon concepts.

1. Preparation of fixatives and stains: FAA, Carnoy's fixative, safranin, acetocarmine and acetoorcein.
2. Study of viruses, prokaryotic cell (bacteria) and eukaryotic cell with the help of light and electron micrographs.
3. Study of cell organelles through photographs.
4. Study of structure of plant cell through temporary mounts- Onion peeling and tomato pulp
5. Study of Mitosis (temporary mounts and permanent slides).
6. Study of Meiosis (temporary mounts and permanent slides).
7. Study the structure of nuclear pore complex by photograph (from Gerald Karp)
8. Structure of DNA and RNA (mRNA, rRNA, tRNA).
9. Study DNA packaging through photographs- solenoid model.
10. Lac operon and Tryp operon concepts.

**Course outcome:**

After completion of the course the student is able to:

- CO1 Understand in details with application, if applicable, economic botany
- CO2 Specify the details of plant tissue culture
- CO3 Understand in details with examples recombinant DNA technology

**Unit 1: Cereals and Millets (4 Lectures)**

Rice, Wheat, Maize, Ragi (Botanical name, family, part used, morphology and uses)

**Unit 2: Legumes (6 Lectures)**

General account with special reference to Pigeon pea, Green gram, Black gram, Bengal gram (Botanical name, family, part used, morphology and uses)

**Unit 3: Spices and condiments (8 Lectures)**

General account with special reference to clove, black pepper, cinnamom, cardamom, garlic, onion, chilli and coriander (Botanical name, family, part used, morphology and uses)

**Unit 4: Beverages (4 Lectures)**

Tea and coffee (Botanical name, family, part used, morphology and uses)

**Unit 5: Oils and Fats (4 Lectures)**

General description with special reference to groundnut, sunflower, mustard (Botanical name, family, part used, morphology and uses)

**Unit 6: Fibre Yielding Plants (4 Lectures)**

General description with special reference to Cotton, Jute, kapok and sunn hemp (Botanical name, family, part used, morphology and uses)

**Unit 7: Introduction to biotechnology (2 lecture)****Unit 8: Plant tissue culture (10 Lectures)**

Micropropagation ; haploid production through androgenesis and gynogenesis; brief account of embryo & endosperm culture with their applications

**Unit 9: Recombinant DNA Techniques (18 Lectures)**

Blotting techniques: Northern, Southern and Western Blotting, DNA Fingerprinting; Molecular DNA markers i.e. RAPD, RFLP, SNPs; DNA sequencing, PCR and Reverse Transcriptase-PCR. Hybridoma and monoclonal antibodies, ELISA and Immunodetection.

**DME23308/DME23307**

**III B.Sc., V Semester DSE-II  
Economic Botany and Biotechnology  
Practical (2 credits)**

**Lectures: 60 Hours  
(4 hours/week)**

1. Study of Cereals and Millets
2. Study of Legumes
3. Study of Spices and condiments
4. Study of Beverages
5. Study of Oils and Fats
6. Study of Fibre Yielding Plants
7. Familiarization with basic equipments in tissue culture.
8. Study through photographs: Anther culture, somatic embryogenesis,
9. Study through photographs: endosperm and embryo culture; micropropagation.
10. Study of molecular techniques: PCR, Blotting techniques and PAGE.

**Floriculture**

Theory (2 credits)

Lectures: 30 Hours  
(2 hours/week)**Course outcome:**

After completion of the course the student is able to:

- CO1 Specify the classification and characteristics of gardening
- CO2 Understand in depth nursery management
- CO3 Identify in details with examples ornamental plants

**Unit 1- Establishment and management of Nurseries: (7 Lectures)**

Definition, importance of nurseries, classification of nurseries, and management of nurseries

1. **Basic requirements for Nurseries:** Agro-climatic conditions, Topography, Selection of site Selection of soil, Seed bed preparation, Water supply and irrigation.

Parts of nursery- a) Building structures, b) Propagating structures- raising of seedlings

2. **Management of nursery:** Irrigation, Nutrition, Weed control, Plant protection, Uprooting, packing and transplantation

**Unit 2-Gardening and Landscaping (8 Lectures)****A. Features of a garden:**

1. Introduction, living elements, hedges, edges, trees, flower beds, lawn, Shrubbery, climbers and creepers, paths, Steps, arches, pergola, rockery, Water garden, sunken garden, carpet beds, topiary, trophy, ,non living elements.
2. Gardening: Introduction, Formal style, Informal style, planning a garden, creating a garden, establishment of the garden.
3. Some Famous gardens of India

**B. Landscaping:**

1. Home garden, Public garden. Educational institution, commercial complexes and companies.
2. Importance, Scope of floriculture and landscape gardening.

**Unit 3-Garden Plants:****(5 Lectures)**

Introduction, Annuals, Biennials, Perennials, Shrubs, Trees, Climbers(Divine Vines) Succulents, Cacti,Ferns, Gymnosperms, Palms, Orchids, Bulbous Ornamentals.

**Unit 4- Commercial Floriculture:****(8 Lectures)**

Introduction, Importance of Floriculture from social, Economic, Health and Aesthetic point of view. Marketing and floristry in Indian scenario. Future and scope of Floriculture in India- Employment opportunities. Packaging of cut flowers; Flower arrangements; Methods to prolong vase life; Cultivation of Important cut flowers (Rose, Chrysanthemum, Gerbera, Gladiolous, Marigold, Orchids).

**Unit 5- Diseases and pests of ornamental plants:****(2 Lectures)**

\*\*\*

**Ethnobotany**  
**Theory (Credits 2)****Lectures: 30 Hours**  
**(2 hours/week)****Course outcome**

After completion of the course the student is able to:

**CO1.** Understand the details of Ethnobotany

**CO2.** Learn the characteristics of traditional medicinal plants

**Unit 1- Ethnobotany: (6 Lectures)**

Introduction, concept, scope and objectives; Ethnobotany as an interdisciplinary science

The relevance of ethnobotany in the present context; Major and minor ethnic groups or

Tribals of India, and their life styles. Plants used by the tribals: a) Food plants b) intoxicants and beverages c) Resins and oils and miscellaneous uses.

**Unit 2- Methodology of Ethnobotanical studies: (6 Lectures)**

a) Field work b) Herbarium c) Ancient Literature d) Archaeological findings e) temples and sacred places.

**Unit 3- Role of Ethnobotany in modern Medicine: (10 Lectures)**

Medico-ethnobotanical sources in India; Significance of the following plants in ethnobotanical practices (along with their habitat and morphology) a) *Azadirachta indica* b) *Ocimum sanctum*

c) *Vitex negundo* d) *Gloriosa superba* e) *Tribulus terrestris* f) *Pongamia pinnata*

g) *Cassia auriculata* h) *Indigofera tinctoria*

Role of ethnobotany in modern medicine with special example *Rauwolfia serpentina*, *Trichopus zeylanicus*, *Artemisia*, *Withania*.

Role of ethnic groups in conservation of plant genetic resources Endangered taxa and forest management (participatory forest management).

**Unit 4- Ethnobotany and legal aspects: (8 Lectures)**

Ethnobotany as a tool to protect interests of ethnic groups. Sharing of wealth concept with

few examples from India. Biopiracy, Intellectual Property Rights and Traditional Knowledge.

<b>Total</b>	<b>30</b>	<b>8X2=16</b>	<b>5X6=30</b>	<b>10X4=40</b>	<b>86</b>

**Course outcome:**

After completion of the course the student is able to:

- CO1 Specify the details of heredity
- CO3 Write down the classification and characteristics of mutations
- CO4 Learn the details of plant breeding
- CO2 Identify in details with examples linkage

**Unit 1- Heredity:****(24 Lectures)**

1. Brief life history of Mendel
2. Terminologies
3. Laws of Inheritance
4. Modified Mendelian Ratios: incomplete dominance; complementary factors; supplementary factors, Duplicate factors, Epistasis.
6. Pedigree Analysis
7. Cytoplasmic Inheritance: leaf variegation in *Mirabilis jalapa*, Male sterility.
8. Chromosome theory of Inheritance.
9. Quantitative inheritance-Concept, mechanism, examples. Monogenic vs polygenic Inheritance.

**Unit 2- Sex-determination and Sex-linked Inheritance:****(6 Lectures)**

Sex – determination in *Melandrium album* by XX-XY method, Bridges Genic balance theory, Sex-linked Inheritance

**Unit 3- Linkage and Crossing over:****(8 Lectures)**

Linkage: complete & incomplete linkage, coupling & repulsion, recombination frequency, linkage in Maize, two point test cross, linkage maps, Coincidence and interference. Crossing over: concept and significance.

**Unit 4-Mutations and Chromosomal Aberrations:****(6 Lectures)**

Types of mutations, effects of physical & chemical mutagens. Numerical chromosomal changes: Euploidy, Polyploidy and Aneuploidy; Structural chromosomal changes: Deletions, Duplications, Inversions & Translocations.

**Unit 5- Plant breeding and Methods of crop improvement:**

**(12 lectures)**

Introduction, objectives and Methods: Plant introduction, selection, Hybridization- Emasculation and bagging. Mutation breeding, polyploidy breeding, genetic or molecular plant breeding. Methods of propagation– Procedure, advantages and limitations

**Unit 6- Inbreeding depression and heterosis:**

**(4 lectures)**

Inbreeding depression and Heterosis; Applications. Germplasm maintenance, Pollen banks and Quarantine measures.

1. Mendel's laws through seed ratios. Laboratory exercises in probability and chi-square.
2. Chromosome mapping using point test cross data.
3. Pedigree analysis for dominant and recessive autosomal and sex linked traits.
4. Incomplete dominance and gene interaction through seed ratios (9:7, 9:6:1, 13:3, 15:1, 12:3:1, 9:3:4).
5. Study of aneuploidy: Down's, Klinefelter's and Turner's syndromes through photographs.
6. Photographs/Permanent Slides showing Translocation Ring, Laggards and Inversion Bridge.
7. Hybridization techniques - Emasculation, Bagging (For demonstration only).
8. Induction of polyploidy conditions in plants (For demonstration only).

**Course outcome:**

After completion of the course the student is able to:

- CO2 Learn the details of Spectrophotometry
- CO3 Write down the details of chromatography
- CO1 Specify the details of cell fractioning
- CO4 Identify in details with application, if applicable, biostatistics

**Unit 1: Imaging and related techniques (15 Lectures)**

Principles of microscopy; Light microscopy; Fluorescence microscopy; Confocal microscopy; Use of fluorochromes: (a) Flow cytometry (FACS); (b) Applications of fluorescence microscopy: Chromosome banding, FISH, chromosome painting; Transmission and Scanning electron microscopy – sample preparation for electron microscopy, cryofixation, negative staining, shadow casting, freeze fracture, freeze etching.

**Unit 2: Cell fractionation (8 Lectures)**

Centrifugation: Differential and density gradient centrifugation, sucrose density gradient, CsCl<sub>2</sub> gradient, analytical centrifugation, ultracentrifugation, marker enzymes.

**Unit 3: Radioisotopes (4 Lectures)**

Use in biological research, auto-radiography, pulse chase experiment.

**Unit 4: Spectrophotometry (4 Lectures)**

Principle and its application in biological research.

**Unit 5: Chromatography (8 Lectures)**

Principle; Paper chromatography; Column chromatography, TLC, GLC, HPLC, Ionexchange chromatography; Molecular sieve chromatography; Affinity chromatography.

**Unit 6: Characterization of proteins and nucleic acids (6 Lectures)**

Mass spectrometry; X-ray diffraction; X-ray crystallography; Characterization of proteins and nucleic acids; Electrophoresis: AGE, PAGE, SDS-PAGE

**Unit 7: Biostatistics (15 Lectures)**

Statistics, data, population, samples, parameters; Representation of Data: Tabular, Graphical; Measures of central tendency: Arithmetic mean, mode, median; Measures of dispersion: Range, mean deviation, variation, standard deviation; Chi-square test for goodness of fit.

**DMF23308/ DMF23307**

**III B.Sc., VI Semester DSE-IV  
Analytical Techniques in Plant Science  
Practicals (2 credits)**

**Lectures: 60 Hours  
(4 hours/week)**

1. Study of Blotting techniques: Southern, Northern and Western, DNA fingerprinting, DNA sequencing, PCR through photographs.
2. Demonstration of ELISA.
3. To separate nitrogenous bases by paper chromatography.
4. To separate sugars by thin layer chromatography.
5. Isolation of chloroplasts by differential centrifugation.
6. To separate chloroplast pigments by column chromatography.
7. To estimate protein concentration through Lowry's methods.
8. To separate proteins using PAGE.
9. To separate DNA (marker) using AGE.
10. Study of different microscopic techniques using photographs/micrographs (freeze fracture, freeze etching, negative staining, positive staining, fluorescence and FISH).
11. Preparation of permanent slides (double staining).

**Botany Pattern of theory question paper (CBCS)**  
**DSC I-DSC IV**  
**(I semester to IV)**

**Time: 3 Hours**

**Max. Marks: 70**

**Instructions to the candidates:**

Draw neat labelled diagrams where ever necessary.

**I. Explain / define any FIVE of the following.**

**2x5=10**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.

**II. Write short notes on any FOUR of the following.**

**5x4=20**

- 9.
- 10.
- 11.
- 12.
- 13.
- 14.

**III. Give comprehensive and detailed account of any FOUR of the following.**

**10x4=40**

- 15.
- 16.
- 17.
- 18.
- 19.
- 20.

\*\*\*

**Botany Pattern of theory question paper (CBCS)**

**DSE**

**(V semester to VI)**

**Time: 3 Hours**

**Max. Marks: 70**

**Instructions to the candidates:**

Draw neat labelled diagrams where ever necessary.

**II. Explain / define any FIVE of the following.**

**2x5=10**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.

**II. Write short notes on any FOUR of the following.**

**5x4=20**

- 9.
- 10.
- 11.
- 12.
- 13.
- 14.

**III. Give comprehensive and detailed account of any FOUR of the following.**

**10x4=40**

- 15.
- 16.
- 17.
- 18.
- 19.
- 20.

**Botany Pattern of theory question paper (CBCS)**

**SEC**

**(V semester)**

**Time: 2 Hours**

**Max. Marks: 50**

**Instructions to the candidates:**

Draw neat labelled diagrams where ever necessary.

**III. Explain / define any FIVE of the following.**

**2x5=10**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.

**II. Write short notes on any FOUR of the following.**

**5x4=20**

- 9.
- 10.
- 11.
- 12.
- 13.
- 14.

**III. Give comprehensive and detailed account of any TWO of the following.**

**10x2=20**

- 15.
- 16.
- 17.
- 18.

36.	Dr. Shamala Maharani`s Science College for Women, Mysore	Asst. Prof.		7019453250

## **Aims of Bachelor's degree programme in Botany**

The broad aims of the bachelor's degree programme in Botany are:

1. To provide an environment that ensures the cognitive development of students in a holistic manner. A dialogue about plants and their significance is fostered in this framework, rather than didactic monologues on mere theoretical aspects
2. To provide the latest subject matter, both theoretical as well as practical, such a way to foster their core competency and discovery learning. A botany graduate as envisioned in this framework would be sufficiently competent in the field to undertake further discipline-specific studies, as well as to begin domain-related employment.
3. To mould a responsible citizen who is aware of the most basic domain-independent knowledge, including critical thinking and communication.
4. To enable the graduate to prepare for national as well as international competitive examinations, especially UGC-CSIR NET, and UPSC Civil Services Examination.

### **Program Learning Outcomes**

The students graduating with the Degree B.Sc. Three years and B. Sc. (Honors) Botany should be able to acquire.

**Core competency:** Students will acquire core competency in the subject Botany, and allied subject areas.

1. The student will be able to identify major groups of plants and compare the characteristics of lower (e.g. algae and fungi) and higher (angiosperms and gymnosperms) plants.
2. Students will be able to use the evidence-based comparative botany approach to explain the evolution of organisms and understand the genetic diversity on the earth. The students will be able to explain various plant processes and functions, metabolism, concepts of gene, genome, and how organism's function is influenced at the cell, tissue, and organ level.
3. Students will be able to understand the adaptation, development, and behavior of different forms of life.
4. The understanding of networked life on earth and tracing the energy pyramids

through nutrient flow is expected from the students.

5. Students will be able to demonstrate the experimental techniques and methods of their area of specialization in Botany.

**Analytical ability:**

The students will be able to demonstrate the knowledge in understanding research and addressing practical problems.

1. Application of various scientific methods to address different questions by formulating the hypothesis, data collection, and critically analyze the data to decipher the degree to which their scientific work supports their hypothesis.

**Critical Thinking and problem-solving ability:**

An increased understanding of fundamental concepts and their applications of scientific principles is expected at the end of this course. Students will become critical thinkers and acquire problem-solving capabilities.

**Digitally equipped:**

Students will acquire digital skills and integrate the fundamental concepts with modern tools. **Ethical and Psychological strengthening:** Students will also strengthen their ethical and moral values and shall be able to deal with psychological weaknesses.

**Team Player:** Students will learn team workmanship in order to serve efficiently institutions, industry, and society

**Independent Learner:**

Apart from the subject-specific skills, generic skills, especially in botany, the program outcome would lead to gain knowledge and skills for further higher studies, competitive examinations, and employment. Learning outcomes-based curriculum would ensure equal academic standards across the country and a broader picture of their competencies. The Bachelor's program in Botany and Botany honors may be mono-disciplinary or multidisciplinary with following broad objectives.

1. Critically evaluation of ideas and arguments by collecting relevant information about the plants, to recognize the position of the plant in the broad classification and Phylogenetic level.
2. Identify problems and independently propose solutions using creative approaches, acquired through interdisciplinary experiences, and a depth and breadth of knowledge/expertise in the field of Plant Identification.
3. Accurately interpretation of collected information and use taxonomical information to evaluate and formulate a position of the plant in taxonomy.

4. Students will be able to apply the scientific method to questions in botany by formulating testable hypotheses, collecting data that address these hypotheses, and analyzing those data to assess the degree to which their scientific work supports their hypotheses.
5. Students will be able to present scientific hypotheses and data both orally and in writing in the formats that are used by practicing scientists.
6. Students will be able to access the primary literature, identify relevant works for a particular topic, and evaluate the scientific content of these works.
7. Students will be able to apply fundamental mathematical tools (statistics, calculus) and physical principles (physics, chemistry) to the analysis of relevant biological situations.
8. Students will be able to identify the major groups of organisms with an emphasis on plants and be able to classify them within a phylogenetic framework. Students will be able to compare and contrast the characteristics of plants, algae, and fungi that differentiate them from each other and other forms of life.
9. Students will be able to use the evidence of comparative biology to explain how the theory of evolution offers the only scientific explanation for the unity and diversity of life on earth. They will be able to use specific examples to explicate how descent with modification has shaped plant morphology, physiology, and life history.
10. Students will be able to explain the ecological interconnectedness of life on earth by tracing energy and nutrient flow through the environment. They will be able to relate the physical features of the environment to the structure of populations, communities, and ecosystems
11. Students will be able to demonstrate proficiency in the experimental techniques and methods of analysis appropriate for their area of specialization within biology.

## **B. Sc. Botany Programme outcomes as per NEP 2020**

**Name of the Degree Program: B.Sc.**

**Discipline Core: Botany**

**Total Credits for the Program: 176**

**Starting year of implementation: 2021-22**

### **Program Outcomes:**

#### **By the end of the program the students will be able to:**

(Refer to literature on outcome based education (OBE) for details on Program Outcomes)

**PO1:** Skill development for the proper description using botanical terms, identification, naming and classification of life forms especially plants and microbes.

**PO2:** Acquisition of knowledge on structure, life cycle and life processes that exist among plant and microbial diversity through certain model organism studies.

**PO3:** Understanding of various interactions that exist among plants and microbes; to develop the curiosity on the dynamicity of nature.

**PO4:** Understanding of the major elements of variation that exist in the living world through comparative morphological and anatomical study.

**PO5:** Ability to explain the diversity and evolution based on the empirical evidences in morphology, anatomy, embryology, physiology, biochemistry, molecular biology and life history.

**PO6:** Skill development for the collection, preservation and recording of information after observation and analysis- from simple illustration to molecular database development.

**PO7:** Making aware of the scientific and technological advancements- Information and Communication, Biotechnology and Molecular Biology for further learning and research in all branches of Botany..

**PO8:** Internalization of the concept of conservation and evolution through the channel of spirit of inquiry.

**PO 9:** To enable the graduates to prepare for national as well as international level competitive examinations like UGC-CSIR, UPSC, KPSC etc.

**PO10:** To enable the students for practicing the best teaching pedagogy as a biology teacher including the latest digital modules.

**PO 11:** The graduates should be knowledgeable and competent enough to appropriately deliver on aspects of global importance like climate change, SDGs, green technologies etc at the right opportunity.

**PO 12:** The graduate should be able to demonstrate sufficient proficiency in the hands-on experimental techniques for their area of specialization within biology during research and in the professional career

## **B. Sc. Botany Programme specific outcomes as per NEP 2020**

**PSO1:** The framework of curriculum for the Bachelor's program in Botany aims to transform the course content and pedagogy to provide a multidisciplinary, student-centric, and outcome-based, holistic education to the next generation of students.

**PSO2:** Aside from structuring the curriculum to be more in-depth, focused, and comprehensive with significant skill-set for all exit levels; keeping in mind the job prospects; the emphasis has been to maintain academic coherence and continuum throughout the program of study and help build a strong footing in the subject, thereby ensuring a seamless transition into their careers.

**PSO3:** Special attention is given to eliminate redundancy, discourage rote learning, and espouse a problem-solving, critical thinking, and inquisitive mindset among learners.

The curriculum embraces the philosophy that science is best learned through experiential learning, not limited to the confines of a classroom but rather through hands-on training, projects, field studies, industrial visits, and internships.

**PSO4:** This updated syllabus, with modern technology, helps students stay informed on the leading- edge developments in plant sciences and promotes curiosity, innovation, and a passion for research, that will serve them well in their journey into scientific adventure and discovery beyond graduation.

**PSO5:** The goal is to equip students with holistic knowledge, competencies, professional skills, and a strong positive mindset that they can leverage while navigating the current stiff challenges of the job market.

## SUGGESTED METHODOLOGY FOR TEACHING, LEARNING AND EVALUATION

### TEACHING-LEARNING

The whole programme is an Outcome Based Education. Different methods are to be used for teaching learning evaluation; in order to attain the fixed outcomes.

#### **Theory:**

*Student:* Review of Literature, Assignment, Presentation, e-learning, Discussion and Debate with peer group, teachers and experts.

*Teacher:* Lecture, Demonstration, Presentation, Discussion and Debate.

#### **Practical:**

*Student:* Identification, Comparison, Differentiation and Categorization of different plants and their parts by observing Permanent Slides, Hand sectioning etc., Demonstration, Experimentation, Field visit, Report Writing and Keeping records

*Teacher:* Demonstration, Experimentation, Field visit, Certification

**Project:** The finalization of the topic should be done at the beginning of the fourth semester and the list should be kept with the HOD for the perusal of the University Examination authorities. There should be at least three projects from a department. The selection of the topic and group should be student centered as far as possible. A project log book/register is to be maintained by each student and submitted along with the project report during the final submission.

*Student:* Suggestion of Topic, Discussion with the Project guide and Peer group, Review of Literature, Project planning and Designing, Experimentation, Data Analysis and Project Report Preparation and Presentation.

*Teacher:* Confirmation of Topic, Demonstration, Planning of Experimentation, Guidance and Correction and Certification.

### **Experiential Learning (Internships etc.):**

Student should choose one of the topics for self-study from the beginning of the seventh semester. A report should be submitted by the end of Eighth Semester.

Suggested topics include: Studies on mangroves / Sacred groves / Campus flora; Cultivation of RET / Fruit / Vegetable / Medicinal plants / Mushroom; Topics related to Social responsibility- River restoration, PBR (People Biodiversity Register) preparation, Herbarium arrangement, VFC (Village Forest Committee), VNRC (Village Natural Resource Committee) formation, Landscaping and Green Auditing.

### **Field Study / Study Tour:**

The plant diversity studies should be carried out with the support of Field Study / Study Tour. During each year there should be a field study of 1-5 days duration, with a minimum of 5 days for the completion of the programme.

## **EVALUATION**

### **External Evaluation:**

External assessment by the University level examinations on specified times announced by the University for all the courses, theory, practical and Project/Viva Voce. Each student should go through the evaluation process according to the University Regulations 2021-2022

### **End Semester Evaluation-Theory:**

The components of external evaluation and their unit wise and each theory and practical course and the time of examination will be in accordance with the calendar prepared by

the University for each academic year. At the end of each semester, there will be an examination for theory courses. The duration of examinations for all theory and practical courses in Botany will be three hours, except for the Generic Elective Course papers.

### **External –Practical:**

Practical Courses have external examination for all semester. There will be an external practical examiner and an internal examiner / skilled assistant for every practical examination of three hour duration. The external evaluation should be carried out by the team of examiners.

### **EXTERNAL – PROJECT / FIELD STUDY / VIVA VOCE**

The Project/Field Study/General Viva Voce will be conducted in I/II/III/IV/V/VI/VII/VIII Semester Practical Examination.

#### **Viva should be based on:**

##### **Project work**

##### **Experiential Learning (Internships**

##### **etc) Field Study**

#### **General Learning Activity of four years:**

For the external evaluation the components and weightage of Project/Field Study/ Viva Voce can be discussed and determined finally by the Board of Examiners; the suggested components and their weightage is given below. The project viva should be based on the Project and importance should be given to the Scientific method undertaken in that project. The general viva should be on based the changes in the outlook of the student after the learning activity of the 4 year programme, field study and Experiential Learning (Internships etc.). Time taken for each practical batch should be 3 hrs, by giving nearly 10-15 minutes for each student. The project/field study/viva voce evaluation should be conducted by external examiners and internal examiner.

## **ELIGIBILITY TO APPEAR FOR PRACTICAL EXAMINATION**

1. 80% Attendance (All Sem.)
2. Certified Bona-fide Record (All Sem.)
3. Herbarium and Field Book (Respective Sem.)
4. Field Study Reports (Respective Sem.)
5. Certified Bona-fide Project Report (Eighth Sem.)
6. Report on Experiential Learning (Internships etc.) (EighthSem.)

## **CONTINUOUS INTERNAL EVALUATION**

Internal evaluation is a continuous evaluation in all types of courses- theory/ practical / Project / Field study. The teacher has flexibility in deciding the components and their weightage in accordance with the University Regulations, 2021-22. Internal evaluation should be verytransparent to the students and the components and relative weightage should be announced at the beginning of each learning activity by the concerned teacher. Internal evaluation should be published in the notice board, one week before the closure of each semester.

### **INTERNAL –THEORY**

The percentile system can be adopted for calculating the internal component, test paper.

<b>Sl. No.</b>	<b>COMPONENTS</b>	<b>WEIGHTAGE</b>
<b>1</b>	<b>Attendance</b>	<b>10</b>
	<b>Test Papers</b>	<b>40</b>
<b>2</b>	<b>Assignment</b>	<b>20</b>
	<b>Seminar</b>	<b>20</b>
	<b>Viva</b>	<b>10</b>

### **INTERNAL – PRACTICAL**

The internal evaluation may be regular internal assessment on hourly basis or unit wise, whichever is communicated with the student.

<b>Sl. No.</b>	<b>COMPONENTS</b>	<b>WEIGHTAGE</b>
<b>1</b>	<b>Regularity</b>	<b>25</b>
<b>2</b>	<b>Practical Skill-</b> (Sectioning, Drawing, Labeling, Record Keeping Etc)	<b>50</b>
<b>3</b>	<b>Regular Viva/Model Examination</b>	<b>25</b>

### **INTERNAL - PROJECT/FIELD STUDY/VIVA VOCE**

Internal evaluation of the project should start with the beginning of the project and can be finalized by the project viva.

<b>Sl. No.</b>	<b>COMPONENTS</b>	<b>WEIGHTAGE</b>
<b>1</b>	<b>Participation</b>	<b>50</b>
<b>2</b>	<b>Viva</b>	<b>25</b>
<b>3</b>	<b>Field Study and other Assignment Reports</b>	<b>25</b>

## Curriculum Structure for the Undergraduate Degree

### Program B.Sc. BOTANY

**Total Credits for the Program: 176**

**Starting year of implementation:**

**2021-22 Name of the Degree Program: B.Sc.**

**Discipline/Subject: BOTANY**

#### Program Articulation Matrix:

This matrix lists only the core courses. Core courses are essential to earn the degree in that discipline/subject. They include courses such as theory, laboratory, project, internships etc. Elective courses may be listed separately.

<b>Semester</b>	<b>Title / Name Of the course</b>	<b>Program outcomes that the course addresses (not more than 3 per course)</b>	<b>Pre-requisite course(s)</b>	<b>Pedagogy</b>	<b>Assessments</b>
1	BOT A1 Microbial Diversity and Technology	PO1	---	Ex. MOOC	Quiz
2	BOT A2 Diversity of Non flowering Plants	PO2, PO3	BOT A1	Desk Work	Debate
3	BOT A3 Plant Anatomy and	PO4, PO5	BOT A1 and A2	Problem solving,	

	Developmental Biology			Book Chapter	Class work  Class work Seminar Project writing Articles writing, Interpretation of results
4	BOT A4 Ecology and Conservation Biology	PO4, PO5	BOT A1 A2 A3	Seminar,	
5.	BOT A5 Plant Taxonomy and Resource Botany	PO6, PO7	BOT A1 A2 A3	Project based learning,	
	BOT A6 Cell Biology and Genetics	PO6, PO7	BOT A6 A1 A2 A3 A4 A5	Term paper	
6.	BOT A7 Plant Physiology and Biochemistry	PO6, PO7, PO9	BOT A5	Assignment,	
	BOT A8 Plant Biotechnology	PO8. PO9	BOT A5	Group Discussion	
7.	BOT A9 Molecular Biology	PO8, PO9	BOT A6 A8	Research Project	
	BOT A10 Seed Biology and Seed Technology	PO9, PO10	BOT A5 A8 A9	Instrumentation	
	BOT A11 Plant Health Technology	PO9, PO10	BOT A5 A4 A8		

8.	BOT A12 Medicinal Plants and Phytochemistry	PO9, PO10	BOT A4 A5 A7 A8		
	BOT A13 Bioinformatics and Computational Biology	PO9, PO10	BOT A5 A8 A9		
	BOT A14 Research Methodology	PO9, PO10	BOT A13		

- Pedagogy for student engagement is predominantly lectures. However, other pedagogies enhancing better student engagement to be recommended for each course. The list includes active learning/ course projects/ problem or project based learning/ case studies/self-study like seminar, term paper or MOOC
- Every course needs to include assessment for higher order thinking skills (Applying/ Analyzing/ Evaluating/ Creating). However, this column may contain alternate assessment methods that help formative assessment (i.e. assessment for learning).

**IIA. Model Program Structures for the Under-Graduate Programs in Universities and Colleges in Karnataka Bachelor of Science (Basic/ Hons.) (Botany as Major)**

Sem.	Discipline Core (DSC) (L+T+P)	Discipline Elective (DSE) / Open Elective (OE)	Ability Enhancement Compulsory Courses (AECC), Languages (L+T+P)		Skill Enhancement Courses (SEC)		Total Credits

## **BOTANY COURSE OUTCOMES (COs):**

At the end of the course the student should be able to:

*(Write 3-7 course outcomes. Course outcomes are statements of observable student actions that serve as evidence of knowledge, skills and values acquired in this course)*

### **Semester I (A-1): Microbial Diversity and Technology**

1. Understand the fascinating diversity, evolution, and significance of microorganisms.
2. Comprehend the systematic position, structure, physiology and life cycles of microbes and their impact on humans and environment.
3. Gain laboratory skills such as microscopy, microbial cultures, staining, identification, preservation of microbes for their applications in research and industry.

### **Semester II (A-2): Diversity of Non- Flowering Plants**

1. Understand the diversity and affinities among Algae, Bryophytes, Pteridophytes and Gymnosperms.
2. Understand the morphology, anatomy, reproduction and life cycle across Algae, Bryophytes, Pteridophytes and Gymnosperms, and their ecological and evolutionary significance.
3. Obtain laboratory skills/explore non-flowering plants for their commercial applications.

### **Semester III (A-3): Plant Anatomy and Developmental Biology**

1. Observation of variations that exist in internal structure of various parts of a plant and as well as among different plant groups in support for the evolutionary concept.
2. Skill development for the proper description of internal structure using botanical terms, their identification and further classification.
3. Understanding the basic concepts in plant morphogenesis, embryology and organ development.

#### **Semester IV (A-4): Ecology & Conservation Biology**

1. Understanding the fundamental concepts in ecology, environmental science and phyto geography.
2. Concept development in conservation, global ecological crisis, Sustainable development and pros and cons of human intervention.
3. Enable the student to appreciate bio diversity and the importance of various conservation strategies, laws and regulatory authorities and global issues related to climate change and sustainable development.

#### **Semester V (A-5): Plant Taxonomy & Resource Botany**

1. Ability to identify, classify and describe the plants in scientific terms. Identification of plants using dichotomous keys.
2. Recognition, processing and utilization of economically important plants.
3. Skill development in processing of biomass and plant products as source of food, healthcare, energy and natural products.

#### **Semester V (A-6): Cell Biology & Genetics**

1. Identify the basic principles and current trends in classical genetics and Cell biology.
2. Recognize the historical process of the evolution of molecular genetics from classical genetics.
3. Develop theoretical background on molecular genetics to provide a strong support for the student for future research and employability.

#### **Semester VI (A-7): Plant Physiology & Biochemistry**

1. Preliminary understanding of the basic functions and intermediary metabolism in a plant body.
2. Awareness on the interdisciplinary nature of botany, chemistry and physics by studying the principles of plant life, growth and reproduction.
3. Recognizing the wonderful mechanism of transport and the Interrelationships existing between metabolic pathways thereby gaining and idea about the importance of plants in the dynamicity of nature.

**Semester VI (A-8): Plant Biotechnology**

1. Learning of knowledge & skill in plant tissue culture, plant molecular biology and transgenic.
2. Application of plant biotechnology in plant genomics, phylogenetic studies and metabolic engineering.
3. Understanding of new molecular techniques in cell and metabolic manipulations.

**Semester VII (A-9): Molecular Biology**

1. Understanding the mechanism and concepts of life process at molecular level through central dogma concept.
2. Skill acquiring in the basic molecular biology techniques & characterization of micro- molecules.
3. Acquiring the emerging technology skills in plant genetic engineering & proteomics.

**Semester VII (A-10): Seed Biology & Seed Technology**

1. Understanding the seed structure and related functions, seed health and productivity.
2. Technology for assessing the seed pathology, purity, and preservation.
3. Learning the field and laboratory protocols of seed production, certification and quality.

**Semester VII (A-11): Plant Health Technology**

1. Understanding & learning common diseases & control measures of plant diseases.
2. Acquiring skills in plant disease diagnosis, control & management through IPM.
3. Learning of new skills in health clinic through biological methods.

**Semester VIII (A-13): Medicinal Plants & Phytochemistry**

1. Knowledge of Indian system of medicine with regard to medicinal plants.
2. Acquiring skills in identification, cultivation and preservation of medicinal plants.
3. Isolation, identification, characteristics of active principles in medicinal plants & drug formulations.

### **Semester VIII (A-14): Bioinformatics & Computational Biology**

1. Learning of basic principles of application, ICT Technology in biological studies & research.
2. Acquiring skill to utilize the computational apps, active data basis and tools in analysis in genetics & proteomics.
3. Learning skills and software used for biological research & process understanding.

### **Semester VIII (A-15): Research Methodology**

1. Understanding the working of science for further application in free, independent, individual needs and in designing scientific experimentation.
2. Acquire knowledge on the principles, components and applications of various scientific equipment in biology.
3. Foundation knowledge in the basic concepts, components and functions of informatics and the importance of statistical principles in biological research.

## Job opportunities in Botany

Exit after ONE Year: Certificate Course

I Sem. - A1: Microbial Diversity and Technology

II Sem. – A2: Diversity and Conservation of Non- Flowering plants

### Job opportunities in Botany

- *Preparation of algal, fungal microbial, bryophyte, pteridophyte, and gymnosperm slides for educational institutions and other line departments (Entrepreneurship).*
- Providing algal, fungal microbial, bryophyte, pteridophyte, and gymnosperm materials for educational institutions and other line departments (Entrepreneurship).
- Developing Nursery (Entrepreneurship).
- Nursery supervisor/manager
- Mushroom cultivation (Entrepreneurship).
- Cyanobacterial, algal and microbial culture (Entrepreneurship).
- Fermentation industries. Dairy farming industries. Dairy products industries. Spice Industries (Lichens)
- Quarantine dept., Quality control/analyst, packaging, Lab. assistant

## **Job opportunities in Botany**

Exit After **TWO** Year: **Diploma Course**

**I Semester-A3: Plant Anatomy and Developmental Biology**

**IV Semester-A4: Ecology and Conservation Biology**

### **Job opportunities in Botany**

#### **In Addition to one year certificate**

- Preparation of Anatomy embryology and Ecological slides for educational institutions and other line departments (Entrepreneurship).
- Providing Anatomy embryology and Ecological materials for educational institutions and other line departments (Entrepreneurship).
- Lab technician
- Garden / nursery supervisor
- Developing his/her own nursery (Entrepreneurship).
- Forest guard, Wild life watch guard.
- Forest nursery (Entrepreneurship).

## **Job opportunities in Botany**

Exit After **THREE** Year: **Degree Course**

**V Semester-A5: Plant Taxonomy and Resource Botany**

**V Semester-A6: Genetics and Cell Biology**

**VISemester-A7: Plant Physiology and Biochemistry**

**VI Semester-A8: Plant Biotechnology**

<b>Job opportunities in Botany</b>
<p><b>In Addition to two year diploma</b></p> <ul style="list-style-type: none"><li>• Supplying the angiosperm plants and cytological slides to the educational institutions and other line departments (Entrepreneurship).</li><li>• Advisor for Health department</li><li>• Marketing NTFPs species (Entrepreneurship).</li><li>• RFO/ forest officers</li><li>• Biochemical Laboratory (Soil, Water, Air testing etc). (Entrepreneurship).</li><li>• Adviser to grow advanced crop (Biotech crop).</li><li>• Farmer friendly liaison officer.</li><li>• Advisor for crop improvement programme.</li></ul>

## **Job opportunities in Botany**

**Exit After FOUR Year: Degree Course (Honors)**

**VII Semester-A9: Molecular Biology**

**VII Semester-A10: Seed Biology and Seed Technology**

**VII Semester-A11: Plant Health Technology**

**VIII Semester-A12: Medicinal Plants and Phytochemistry**

**VIII Semester-A13: Bioinformatics & Computational Biology**

**VIII Semester-A14: Research Methodology**

<b>Jobs opportunities in Botany</b>
<b>In Addition to three year degree</b>
<ul style="list-style-type: none"><li>• Assisting for Ayurvedic doctors.</li><li>• Medicinal plants Marketing (Entrepreneurship).</li><li>• R &amp; D Botany, Biotechnology, Ayurvedic and Pharmaceutical Lab.</li><li>• Laboratory on checking food adulteration (Entrepreneurship).</li><li>• Soil and water assessment laboratory (Entrepreneurship).</li><li>• Biological material analysis Laboratory(Entrepreneurship).</li><li>• Teacher in primary and High Schools.</li><li>• Prepare for joining Research institution for Ph.D. programmes.</li><li>• Wild life photographer</li><li>• Separation and Analyzing phytochemical compounds.</li><li>• Seed technician.</li><li>• Plant health manager</li></ul>

**SUGGESTED DISCIPLINE SPECIFIC ELECTIVE PAPERS (DSE): UG - BOTANY**

<b>Srl No</b>	<b>Subject</b>
1.	Aquatic Botany
2.	Bio-analytical techniques.
3.	Stress Biology
4.	Introduction to plant breeding
5.	Biostatistics
6.	Biofuels & Technology
7.	Horticulture post-harvest practices
8.	Reproductive biology of Angiosperms.
9.	Agroforestry
10.	Food Science
11.	Plant Microbe interaction
12.	IPR
13.	Good laboratory practices
14.	Forensic Botany
15.	Botanical garden, landscaping & Greenhouse technology
16.	Herbal Technology
17.	Plant tissue culture
18.	Genetic Engineering in plants and biosafety
19.	Fermentation Technology

21.	Organic Farming
22.	Plant Genomics and proteomics
23.	Mushroom Cultivation
24.	Global Climate Change
25.	Dendrology and Arboriculture

## I B.Sc., I- Semester DSC-1

### Microbial Diversity and Technology

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
4	56	2	56
<b>Content of Theory Course 1</b>			<b>56 Hrs</b>
<b>Unit –1</b>			15
<p><b>Chapter No. 1: Microbial diversity</b>-Introduction to microbial diversity; Methods of estimation; Hierarchical organization and positions of microbes in the living world. Whittaker’s five-kingdom system and Carl Richard Woese’s three-domain system. Distribution of microbes in soil, air, food and water. Significance of microbial diversity in nature</p>			5
<p><b>Chapter No. 2 History and developments of microbiology</b>-Microbiologists and their contributions (Leeuwenhoek, Louis Pasteur, Robert Koch, Joseph Lister, Dmitri Iwanowski, Sergius Winogradsky and M W Beijerinck and Paul Ehrlich)</p>			5
<p><b>Chapter No. 3 Microscopy</b>-Working principle and applications of light, dark field, phase contrast and electron microscopes (SEM and TEM). Microbiological stains (acidic, basic and special) and Principles of staining. Simple, Gram’s and differential staining.</p>			5

<b>Unit – 2</b>	15
<b>Chapter No. 4. Culture media for Microbes-</b> Natural and synthetic media, Routine media -basal media, enriched media, selective media, indicator media, transport media, and storage media.	5
<b>Chapter No. 5. Sterilization methods</b> -Principle of disinfection, antiseptic, tyndallisation and Pasteurization, <b>Sterilization</b> -Sterilization by dry heat, moist heat, UV light, ionization radiation, filtration. Chemical methods of sterilization- phenolic compounds, anionic and cationic detergents.	5
<b>Chapter No. 6. Microbial Growth</b> -Microbial growth and measurement. Nutritional types of Microbes- autotrophs and heterotrophs, phototrophs and chemotrophs; lithotrophs and organotrophs.	5
<b>Unit – 3</b>	11
<b>Chapter No. 7 Microbial cultures and preservation</b> -Microbial cultures. Pure culture and axenic cultures, subculturing, Preservation methods-overlaying cultures with mineral oils, lyophilisation. Microbial culture collections and their importance. A brief account on ITCC, MTCC and ATCC.	5
<b>Chapter No. 8. Viruses-</b> General structure and classification of Viruses; ICTV system of classification. Structure and multiplication of TMV, SARS-COV-2, and Bacteriophage (T2). Cultivation of viruses. Vaccines and types.	4
<b>Chapter No. 9. Viroids-</b> general characteristics and structure of Potato Spindle Tuber Viroid (PSTVd); Prions - general characters and Prion diseases. Economic importance of viruses.	2

<b>Unit – 4</b>	15
<p><b>Chapter No. 10. Bacteria-</b> General characteristics and classification. Archaeobacteria and Eubacteria. Ultrastructure of Bacteria; Bacterial growth and nutrition. Reproduction in bacteria- asexual and sexual methods. Study of <i>Rhizobium</i> and its applications. A brief account of Actinomycetes and Cyanobacteria. Mycoplasmas and Phytoplasmas- General characteristics and diseases. Economic importance of Bacteria.</p>	5
<p><b>Chapter No. 11. Fungi-</b>General characteristics and classification. Thallus organization and nutrition in fungi. Reproduction in fungi (asexual and sexual). Heterothallism and parasexuality. Type study of <i>Phytophthora</i>, <i>Rhizopus</i>, <i>Neurospora</i>, <i>Puccinia</i>, <i>Penicillium</i> and <i>Trichoderma</i>. Economic importance of Fungi.</p>	6
<p><b>Chapter No. 12. Lichens</b> – Structure and reproduction. <b>VAM Fungi</b> and their significance. <b>Plant diseases-</b>Late Blight of Potato, Black stem rust of wheat; Downy Mildew of Bajra, Grain smut of Sorghum, Sandal Spike, Citrus Canker, Root Knot Disease of Mulberry.</p>	4

**I B.Sc., I- Semester DSC-1**  
**MICROBIAL DIVERSITY AND TECHNOLOGY**

**PRACTICALS**

**Lectures: 56 Hours**  
**(4 Hours/week)**

**Practical 1:** Safety measures in microbiology laboratory and study of equipment/appliances used for microbiological studies (Microscopes, Hot air oven, Autoclave/Pressure Cooker, Inoculation needles/loop, Petri plates, Incubator, LAF, Colony counter, Haemo cytometer, Micrometer etc.).

**Practical 2:** Enumeration of soil/food /seed microorganisms by serial dilution technique.

**Practical 3:** Preparation of culture media (NA/PDA) sterilization, inoculation, incubation of *E coli* / *B. subtilis*/ Fungi and study of cultural characteristics.

**Practical 4:** Determination of cell count by using Haemocytometer and determination of microbial cell dimension by using Micrometer.

**Practical 5:** Simple staining of bacteria (Crystal violet /Nigrosine blue) / Gram's staining of bacteria.

**Practical 6:** Isolation and study of morphology of *Rhizobium* from root nodules of legumes

**Practical 7:** Preparation of spawn and cultivation of paddy straw (Oyster) mushroom.

**Practical 8:** Study of vegetative structures and reproductive structures - *Albugo*, *Phytophthora*, *Rhizopus*, *Saccharomyces*, *Puccinia*, *Agaricus*, *Lycoperdon*, *Penicillium*, (Depending on local availability)

**Practical 9:** Preparation of agar slants, inoculation, incubation, pure culturing and preservation of microbes by oil overlaying.

**Practical 10:** Study of late blight of Potato, Downy mildew of Bajra, Citrus canker, Tobacco mosaic disease, Sandal spike disease.

**Practical 11:** Study of well-known microbiologists and their contributions through charts and photographs (As mentioned in theory).

**Practical-12:** Visit to water purification units/Composting/ microbiology labs/dairy and farms to understand role of microbes in day today life.

(**Note:** Botanical study tour to a floristic rich area for 1-2 days and submission of study report is compulsory)

**SCHEME OF BOTANY THEORY EXAMINATION  
I SEMESTER  
MICROBIAL DIVERSITY AND TECHNOLOGY**

**Time:** 2.5 Hours

**Max Marks-** 60

**Instructions:** Draw neat labelled diagrams wherever necessary

**I. Define/Explain any Four of the following:**

**2X4=8 Marks**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.

**II. Answer any Four of the following:**

**5X4=20 Marks**

- 7.
- 8.
- 9.
- 10.
- 11.
- 12.

**III. Answer any Four of the following:**

**8X4=32 Marks**

- 13.
- 14.
- 15.
- 16.
- 17.
- 18.

**MICROBIAL DIVERSITY AND TECHNOLOGY**

**Time:** 3 Hours

**Max Marks-** 25

**I. Write critical notes on A, B & C**

**3X2=6**

**Marks**

A and B- Microbial Instruments (As mentioned in the syllabus)

C- Microbiologists (As mentioned in the Syllabus)

(Identification- 1 mark, Application/Contribution- 1Mark)

**II. Bacterial staining D -Simple / Gram's staining**

**5 Marks**

(Preparation- 3 Marks Flow chart- 2 Marks)

**III. Prepare a temporary stained slide E of the given material and leave the preparation for evaluation.**

**5  
Marks**

*(Rhizobium, Rhizopus, Saccharomyces, Penicillium)*

(Identification- 1 Mark, Mounting- 2 Marks, Diagram with reasons- 2 Marks)

**IV. Identify the Specimens F & G**

**2X3=6**

**Marks**

(F- Albugo, Phytophthora, Agaricus, Lycoperdon)

(G - Plant Diseases (As Mentioned in the Syllabus)

( Identification with Diagram - 2 Marks, Reason – 1Mark)

**V. Identify the Permanent Slide J**

**3 Marks**

(Fungi/Pathology)

(Identification & Diagram- 2 Marks, reasons- 1 Marks)

\*\*\*\*\*

## B.Sc. BOTANY: Open Elective Course (OE-1.1)

### Semester I

#### OE-1.1: PLANTS AND HUMAN WELFARE

##### Course Outcome:

On completion of this course, the students will be able to

1. To make the students familiar with economic importance of diverse plants that offer resources to human life.
2. To make the students known about the plants used as-food, medicinal value and also plant source of different economic value.
3. To generate interest amongst the students on plants importance in day today life, conservation, ecosystem and sustainability.

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
3	39	0	00
<b>Content of Theory Course OE-1.1: PLANTS AND HUMAN WELFARE</b>			39 Hrs
<b>Unit I</b>			13
Origin of Cultivated Plants. Concept of Centres of Origin, their importance with reference to Vavilov's work. Examples of major plant introductions. Crop domestication and loss of genetic diversity (Only conventional plant breeding methods). Importance of plant bio- diversity and conservation. <b>Cereals:</b> Wheat and Rice (origin, evolution, morphology, post-harvest processing & uses). Green revolution. Brief account of millets and their nutritional importance. <b>Legumes:</b> General account (including chief pulses grown in Karnataka- red gram, green gram, chick pea, soybean). Importance to man and ecosystem.			
<b>Unit II</b>			13
<b>Cash crops:</b> Morphology, new varieties and processing of sugarcane, products and by-products of sugarcane industry. Natural Rubber –cultivation, tapping and processing. <b>Spices:</b> Listing of important spices, their family and parts used, economic importance with special reference to Karnataka. Study of fennel, clove, black pepper and cardamom. <b>Fruits:</b> Mango, grapes and Citrus (Origin, morphology, cultivation ,processing and uses) <b>Beverages:</b> Tea, Coffee (morphology, processing&uses)			
<b>Unit III</b>			13
<b>Oils and fats:</b> General description, classification, extraction, their uses and health implications; groundnut, coconut, sunflower and mustered (Botanical name, family & uses). Non edible oil yielding trees and importance as biofuel. Neem oil and applications.			

<p><b>Essential Oils:</b> General account. Extraction methods of sandal wood oil, rosa oil and eucalyptus oil. Economic importance as medicine, perfumes and insect repellents.</p> <p><b>Drug-yielding plants:</b> Therapeutic and habit-forming drugs with special reference to Cinchona, Digitalis, Aloe vera and Cannabis.</p> <p><b>Fibers:</b> Classification based on the origin of fibers; Cotton and jute (origin morphology, processing and uses).</p>

## B.Sc. BOTANY: Open Elective Course (OE-1.2)

### Semester I

### OE 1.2: BOTANY FOR THE BEGINNERS

#### Course Outcome:

On completion of this course, the students will be able to

1. To make the students familiar with importance of Botany: plants as natural resources.
2. To make the students known about the plants used as-food, medicinal value and economic value for sustainable development.
3. To generate interest amongst the students to know the importance of plants in day today life, ecosystem restoration.

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
3	39	0	00
<b>Content of Theory OE 1.2: BOTANY FOR THE BEGINNERS</b>			<b>39 hrs</b>
<b>UNIT I: Living World</b>			<b>13 hrs.</b>
<p>Origin of Cultivated Plants. Concept of Centres of Origin, their importance with reference to Vavilov's work. Examples of major plant introductions. Crop domestication and loss of genetic diversity (Only conventional plant breeding methods). Importance of plant bio- diversity and conservation.</p> <p>Concept of Living and Non Living: Viruses, Bacteria, Fungi, Plants and Animals; Five kingdom Classification- Classification of plants- Eichler's system – general characters of groups- An introduction to the Life cycle of plants. Cell Structure-Prokaryote and eukaryote</p>			
<b>UNIT II: Morphology of Angiosperms, Origin and Evolution of Life</b>			<b>13 hrs</b>
<p>Typical angiosperm plant: Functions of each organ viz. Root, Stem, leaves, inflorescence, flowers, fruit and seed. Flower: Basic structure - essential and non essential whorls.</p> <p>Definition, Ancient Concepts and Modern Concepts. Origin of Life – Geological Time scale – Variation in Hydrosphere, Lithosphere, Atmosphere and Biosphere from Pre Cambrian to Coenozoic era. Darwin's Natural Selection theory and Modern evidences at molecular and organismic level in support of Darwin's theory</p>			
<b>UNIT III: Interaction between plants and animals</b>			<b>13 hrs</b>
<p>General concept on Interaction between plants, microbes and animals. Ecological Significance of Plants – Solar energy fixing Producers, Nitrogen fixation, biofertilisers, biopesticides,</p> <p>Symbiotic relationships-Mutualism, Commensalism, Proto-operation, Parasitism.</p>			

Plants and Animals for pollination and seed/fruit dispersal- Pollination- Entomophily, Chiropterophily, Myrmecophily Seed Dispersal: Zoochory, Specific case studies on examples for co evolution- Dodo and Calvaria, Butterflies and plants; Wasps and Ficus, mimicking for pollinators. Medicinal uses of plants – traditional knowledge and scientific knowledge – a brief account

## B.Sc. BOTANY: Open Elective Course (OE-1.3)

### Semester I

#### OE 1.3: MUSHROOM CULTIVATION

##### Course Outcome:

On completion of this course, the students will be able to

1. To make the students familiar with mushroom cultivation for commercial exploitation.
2. To make the students known about the *Agaricus* (mushroom) used as-food, medicine and economic value for sustainable development.
3. To generate interest amongst the students to know the importance of mushroom in day today life.

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
<b>3</b>	<b>39</b>	<b>0</b>	<b>00</b>
<b>Content of Theory Course OE 1.3: MUSHROOM CULTIVATION</b>			<b>39 hrs</b>
<b>UNIT-I . Mycology and Mushroom Biology</b>			<b>13 hrs.</b>
<p>Five kingdom classification of organisms. Kingdom fungi. General characters of form, function, reproduction and relationship with other organisms. Importance of fungi in human welfare.</p> <p>Morphology (range of form, macro-morphology, micro-morphology), life cycle of a typical mushroom and biological function. Edible, non-edible and poisonous species. Domestication of mushroom. Importance of mushroom in human nutrition, sustainable livelihood, ecosystem function and quality of the environment.</p>			
<b>UNIT II. Applied Mushroom Biology</b>			<b>13 hrs</b>
<p>Mushroom cultivation and production. Lab scale, pilot plant and large scale cultivation of commercial species. Crop cycle- spawn, substrate, substrate processing, spawning, spawn run, cropping, harvesting, environment requirement, post harvest practices, shelf life, preservation, storage, transport and marketing. Value-added products of mushroom. Constraints and environment management. Economics of mushroom cultivation. Designs of mushroom facility. Economics of mushroom cultivation and marketing.</p>			
<b>UNIT IV. Mushroom Biotechnology.</b>			<b>13 hrs</b>
<p>Concept. Preparation of flavours, appetizers, nutraceuticals, dietary supplements and cosmetics. Mushroom bioremediation. Cleaning of polluted sites. Utilization of mushroom mycelium or enzymes in recycling biological materials. Mycofiltration and applications of the process. Mycorrhiza applications. Biopulping, biobleaching and biotransformations. Biodetergents.</p>

**II SEMESTER**  
**SCHEME OF PRACTICAL QUESTION PAPER**  
**DIVERSITY OF NON- FLOWERING PLANTS**

**Time:** 3 Hours

**Max Marks-** 25

**I. Prepare a temporary stained slide of the given material A and leave the preparation for evaluation** **5 Marks**

Algae (Nostoc, Oedogonium, Chara, Batrachospermum / Polysiphonia )

(Preparation - 2 Mark, Diagram-1 Marks, Identification with Reasons- 2 Marks)

**II. Identify the given specimens B & C** **2X3=6 Marks**

**B-** Bryophytes (Marchantia and Anthoceros)

**C-** Pteridophytes (Selaginella, Equisetum, Pteris , Azolla,)

(Identification- 1 Mark, Diagram with reasons- 2 Marks)

**III. Identify the Permanent Slides D, E, F & G** **4X2=8 Marks**

(One each from Algae, Bryophyte, Pteridophyte and Gymnosperms)

(Identification- 1 Mark, Diagram with Reasons-1 Marks)

**IV. Comment on H & I** **2X3=6 Marks**

H- Gymnosperm

I – Fossils

(Identification- 1 Mark, Diagram with Reasons- 2 Marks)

\*\*\*\*\*

**II SEMESTER**  
**PRACTICAL QUESTION PAPER**  
**DIVERSITY OF NON- FLOWERING PLANTS**

**Time:** 3 Hours

**Max Marks-** 25

**I.** Prepare a temporary stained slide of the given material **A** and leave the preparation for evaluation

**5 Marks**

**II.** Identify the given specimens **B & C**

**2X3=6 Marks**

**III.** Identify the Permanent Slides **D, E, F & G**

**4X2=8 Marks**

**IV.** Comment on **H & I**

**2X3=6 Marks**

**NOTE: Duly valued, Certified practical record & Submissions/ Assignments/ Tour or field visit reports are compulsorily to be submitted by the student.**

\*\*\*\*\*

**Open Elective Course (OE-2.1)**  
**I B.Sc., Semester II**

**PLANT PROPAGATION, NURSERY MANAGEMENT AND GARDENING**

**Paper Outcome:**

On completion of this course, the students will be able to

1. To gain knowledge of gardening, cultivation, multiplication, raising of seedlings of garden plants.
2. To get knowledge of new and modern techniques of plant propagation.
3. To develop interest in nature and plant life.

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
<b>3</b>	<b>39</b>	<b>0</b>	<b>00</b>
<b>Unit I :Nursery and Vegetative propagation</b>			13
<p>Definition, objectives and scope and general practices and building up of infrastructure for nursery, planning and seasonal activities. Planting - direct seeding and transplants, Soil free/soilless/ synthetic growth mediums for pots and nursery.</p> <p>Air-layering, cutting, selection of cutting, collecting season, treatment of cutting, rooting medium and planting of cuttings. Hardening of plants .Green house, mist chamber, shed root, shade house and glass house.</p>			
<b>Unit II :Gardening</b>			13
<p>Definition, objectives and scope. Different types of gardening - landscape and home/terrace gardening, parks and its components. Plant materials and design. Computer applications in landscaping, Gardening operations: soil laying, manuring, watering, management of pests and diseases and harvesting.</p>			
<b>Unit III: Seed, Sowing/raising of seeds and seedlings</b>			13
<p>Structure and types - Seed dormancy; causes and methods of breaking dormancy. Seed storage: Seed banks, factors affecting seed viability, genetic erosion Seed production technology. Seed testing and certification.</p> <p>Transplanting of seedlings - Study of cultivation of different vegetables and flowering plants: cabbage, brinjal, lady's finger, tomatoes, carrots, bougainvillea, roses, geranium, ferns, petunia, orchids etc. Storage and marketing procedures. Developing and maintenance of different types of lawns. Bonsai technique.</p>

## Open Elective Course (OE-2.2)

### I B.Sc., Semester II

#### BIO-FUELS

##### Course Outcome:

On completion of this course, the students will be able to

1. To make the students familiar with Bio-fuel plant species cultivation for commercial exploitation.
2. To make the students known about the Bio-fuel used in automobile industries and solving fuel problems in feature.
3. To generate interest amongst the students to know the importance of Bio-fuel in day today life and economic wellbeing.

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
3	39	0	00
<b>UNIT-I</b>			<b>10 hrs.</b>
Introduction, definition, scope and Importance of Bio-fuel with respect to climate change and environmental issues. Public awareness. Biofuels scenario in India and world. History of Biofuels. Advantages and disadvantages of biofuels. Developmental generation of biofuels: first, second, third and fourth generation of biofuels and present status.			
<b>UNIT II</b>			<b>16 hrs</b>
Biofuel feed stocks: Agricultural waste, farm waste, forestry waste, organic wastes from the residential, institutional and industrial waste and its importance.(Biomass-plant, animal and microbial based waste). Algal biofuel.  Biodiesel species: <i>Pongamia pinnata</i> , <i>Simarouba gluca</i> , <i>Jatropha curcas</i> , <i>Azardirachta india</i> , <i>Madhuca indica</i> and <i>Callophyllum innophyllum</i> . Seed harvesting, processing, oil extraction, and characterization.			
<b>UNIT III</b>			<b>13 hrs</b>
Introduction to biodiesel, bioethanol, biogas and bio hydrogen. Production technology of biofuels (Biodiesel, ehanol and biogas). Quality analysis of biodiesel, bioethanol and biogas and its comparison with national and international standards. Biofuel sustainability; Biofuel Policy in Karnataka and India. Biofuel production statistics. Fuel against food security concepts.			

### **Text Books and References**

- 2) Bioenergy and Biofuels (2017). Ozcan Konur. CRC Press, Taylor & Francis's group.
- 3) <https://mnre.gov.in/biofuels>

### **Pedagogy:**

**Lectures, Practicals, Field and laboratory visits, Participatory Learning, Seminars, Assignments, specimen submission etc**

## Open Elective Course (OE-2.3)

### I B.Sc., Semester II

#### BIOFERTILISERS

##### Course Outcome:

On completion of this course, the students will be able to

1. To make the students familiar with bio-fertilizer plant species cultivation for commercial exploitation.
2. To make the students known about the bio-fertilizer used in agriculture forming and industries and solving problems erupted by synthetic fertilizer.
3. To generate interest amongst the students to know the importance of bio-fertilizer in day today agricultural practices and economic wellbeing.

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
3	39	0	00
<b>Content of Theory Course 2.3: BIOFERTILISERS</b>			<b>39 hrs</b>
<b>UNIT-I. General account, isolation and mass multiplication</b>			<b>13 hrs.</b>
General account about the microbes used as biofertilizer – Rhizobium – isolation, identification, mass multiplication, carrier based inoculants, Actinorrhizal symbiosis. <i>Azospirillum</i> : isolation and mass multiplication – carrier based inoculants, associative effect of different microorganisms. <i>Azotobacter</i> : classification, characteristics – crop response to <i>Azotobacter</i> inoculum, maintenance and mass multiplication			
<b>UNIT II. Association of Cyanobacteria and Fungi</b>			<b>13hrs</b>
Cyanobacteria (blue green algae), <i>Azolla</i> and <i>Anabaena Azollae</i> association, nitrogen fixation, factors affecting growth, blue green algae and <i>Azolla</i> in rice cultivation  Mycorrhizal association, types of mycorrhizal association, taxonomy, occurrence and distribution, phosphorus nutrition, growth and yield – colonization of VAM –its influence on growth and yield of crop plants			
<b>UNIT III. Applications of Cyanobacteria and Fungi</b>			<b>13 hrs</b>
Organic farming – Green manuring and organic fertilizers, Recycling of biodegradable municipal, agricultural and Industrial wastes – bio-compost making methods, types and method of vermin-composting – field Application.

### PLANT ANATOMY AND DEVELOPMENT BIOLOGY

Number of Theory Credits	Number of lecture hours/semester	Number of practical Credits	Number of practical hours / semester
<b>04</b>	<b>56 hours</b>	<b>02</b>	<b>52 hours</b>
Unit	PLANT ANATOMY		Teaching hours
<b>I</b>	<b>ANGIOSPERM ANATOMY, PLANT CELL STRUCTURE AND TISSUES</b>		<b>14</b>
	<p>Introduction, objective and scope of Plant Anatomy, Plant cell structure- nature of plant cell wall.</p> <p><i>Tissue and tissue systems</i> - meristematic tissue, permanent tissue and secretory cells.</p> <p><b>Classification of meristem:</b> (apical, intercalary and lateral), primary and secondary meristem.</p> <p><i>Apical meristem:</i> Theories on organization of meristem (apical cell theory, Tunica-Corpus theory, Histogen theory and Korper-Kappe theory).</p> <p>Types of vascular bundles and Vascular cambium, Origin, development, arrangement and diversity in size and shape of leaves.</p>		
<b>II</b>	<b>ANGIOSPERM ANATOMY</b>		<b>14</b>
	<p><b>Structure of Dicot root:</b> primary structure and secondary growth (Sunflower), Structure of monocot root (Maize).</p> <p><b>Structure of Dicot stem:</b> Primary structure and secondary growth (Helianthus annuus), Structure of Monocot stem (Zea mays).</p> <p><b>Structure of Dicot leaf:</b> Primary structure (Helianthus annuus), primary structure of Monocot leaf (Zea mays), Stomatal types.</p> <p><b>Anomalous secondary growth:</b> Boerhaavia (dicot stem) Dracaena (monocot stem) Applications in Systematics, and Pharmacognosy. Forensicbotany.</p>		

<b>III</b>	<b>DEVELOPMENTAL BIOLOGY</b> <b>MORPHOGENESIS AND DIFFERENTIATION</b>	<b>14</b>
	<p><b>Morphogenesis in plants -</b> Differentiation and cell polarity in acellular (<i>Dictyostelium</i>), Unicellular (<i>Acetabularia</i>) and multicellular system (root hair and stomata formation)</p> <p><b>Organogenesis:</b> Differentiation of root, stem, leaf and axillary bud. Mechanism of leaf primordium initiation, development and Phyllotaxis (Diversity in size and shape of leaves)</p> <p>Root cap, quiescent centre and origin of lateral roots. Transition from vegetative apex into reproductive</p> <p>Developmental patterns at flowering apex: ABC model specification of floral organs. Modification of gene action by growth hormones and cellular differences between floral organs. Senescence - a general account.</p>	
<b>IV</b>	<b>REPRODUCTIVE BIOLOGY</b>	<b>20</b>
	<p>Introduction, Scope and contributions of Indian embryologists: P. Maheswari, B G L Swamy, B.M Johri, M.S. Swaminathan and K.C. Mehta.</p> <p><b>Microsporangium:</b> Development and structure of mature anther, Anther wall layers, Tapetum -types, structure and functions and sporogenous tissue.</p> <p><b>Microsporogenesis-</b> Microspore mother cells, microspore tetrads, Pollinia.</p> <p><b>Microgametogenesis-</b> Formation of vegetative and generative cells, structure of male gametophyte. Pollen embry sac (Nemec phenomenon).</p> <p><b>Megasporangium -</b> Structure of typical Angiosperm ovule. Types of ovule (Anatropous, Orthotropous, Amphitropous, Hemianatropous, Campylotropous, Circinotropous).</p> <p><b>Megagametogenesis-</b> Types and development of Female gametophyte/embryosac- monosporic- <i>Polygonum</i> type, bisporic - <i>Allium</i> type, tetrasporic - <i>Fritillaria</i> type. Structure of mature embryosac.</p> <p><b>Pollination and Fertilization:</b> Structural and functional aspects of pollen, stigma and style. Post pollination events; Current aspects of fertilization and Significance of double fertilization, Post fertilization changes.</p> <p><b>Endosperm -</b> Types and its biological importance. Free nuclear (<i>Cocos nucifera</i>) cellular (<i>Cucumis</i>), helobial types. Ruminant endosperm. Study of non-endospermic plants from Podostemaceae, Orchidaceae, Trapaceae.</p> <p><b>Embryogenesis -</b> Structure and development of Dicot (<i>Capsella bursa pastoris</i>) and Monocot (<i>Najas</i>), embryo. Polyembryony, Apomixis and Parthenocarpy.</p>

**II B.Sc. III-Semester- DSCC**  
**PLANT ANATOMY AND DEVELOPMENT BIOLOGY**  
**PRACTICALS**

**LIST OF EXPERIMENTS TO BE CONDUCTED**

**Practical No. 1**

- i) Study of meristems (Permanent slides/ Photographs).
- ii) Study of Simple Tissues (Parenchyma, Collenchyma and Sclerenchyma) and Complex Tissues (xylem and phloem).

**Practical No.2, 3 & 4**

Maceration technique to study elements of xylem and phloem, Study of primary structure of dicot root (Cicer), stem (Tridax) and leaf (Datura/Zinnia) and monocot root (Maize), stem (Grass) and leaf (Grass).

**Practical No.5**

Anomalous secondary growth: *Boerhaavia* (dicot stem) *Dracaena* (monocot stem)

**Practical No. 6**

Study of trichomes (any three types) and stomata (any three types) with the help of locally available plant materials

**Practical No. 7**

Permanent slides of Microsporogenesis and male gametophyte, Mounting of Pollen grains of Grass and Hibiscus and Pollinia of Calotropis

**Practical No. 8**

Pollen germination by hanging drop method

**Practical No. 9**

Permanent slides: T.S of Tricarpellary and pentacarpellary ovary, Matured ovule, Placentation types: Axile, Marginal and Parietal types.

**Practical No. 10**

Mounting of embryo: Tridax /Cyamopsis/Crotolaria, Mounting of endosperm: Cucumis

**Practical No. 11 & 12**

**Mini project work in groups of 3-5 students, from the following list**

- a) Study of pollen morphology of different flowers with respect to shape, colour, aperture etc.
- b) Pollen germination of different pollen grains and calculate percentage of germination.
- c) Calculate the percentage of germination of one particular type of pollen grain collected from different localities/ under different conditions.
- d) Study of placentation of different flowers.
- e) Any other relevant study related to Anatomy / Embryology

**SCHEME OF BOTANY PRACTICAL EXAMINATION**  
**PLANT ANATOMY AND DEVELOPMENTAL BIOLOGY**

**Time: 3 Hours**

**Max Marks- 25**

- I. Prepare a temporary stained slide of the given material A. Leave the Preparation for evaluation** **5 Marks**  
(Root, Stem, Leaf)  
(Preparation -2 Marks, Identification -1, Diagram with Reasons- 2Marks)
- II. Identify the given slides B, C & D** **3X3=9 Marks**  
(**B** from Tissues, **C** from Anatomy, **D** from Embryology)  
(Identification-1 Mark, Diagram with reasons - 2 Marks)
- III. Mount the material E** **3 Marks**  
(Pollen grain/Stomata/Trichomes)  
(Mounting - 2 Mark, Diagram with Reasons-1 Marks)
- IV. Pollen germination of F by hanging drop method.** **5 Marks**  
(Preparation - 3 Marks, Procedure-2 Marks)
- V. Mount the material of G** **3 Marks**  
(Endosperm / Embryo)

**SCHEME OF BOTANY THEORY EXAMINATION**  
**III SEMESTER**  
**MODEL QUESTION PAPER**  
**PLANT ANATOMY AND DEVELOPMENTAL BIOLOGY**

**Time: 2 Hours**

**Max Marks- 60**

**Instructions: Draw neat labelled diagrams wherever necessary**

**I. Define/Explain any Four of the following:**

**2X4=8 Marks**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.

**II. Answer any Four of the following:**

**5X4=20 Marks**

- 7.
- 8.
- 9.
- 10.
- 11.
- 12.

**III Answer any Four of the following:**

**8X4=32 Marks**

- 13.
- 14.
- 15.
- 16.
- 17.
- 18.

**Open Elective Course (OEC - 3)**

**Community Forestry**

Course No.	Type of Course	Theory / Practical	Credits	Instruction hour per week	Total No. of Lectures / Hours / Semester	Duration of Exam	Formative Assessment Marks	Summative Assessment Marks	Total Marks
OEC-3.1	OEC	Theory	03	03	42 hrs	2 hrs	40	60	100

**Learning outcomes:**

After completion of the course, the students will be able to;

- Understand community forestry and its conservation
- Examine the use of trees and community forestry
- Interpret the role of indigenous / tribal people in conservation of forest
- Examine the role of various community forestry conservation programs
- Measure the different properties of trees such as wood volume, age, height, volume etc.

**Keywords:**

Community forestry, Commercial forestry, Conservation Land uses, Timber harvesting

**Unit I**

**14 lectures**

Defining community forestry and conservation, Indigenous community-based forestry systems and their changes, Case studies of indigenous forest management systems: India., History of commercial forestry in India, Diseases of commercial forestry, maintenance of forests, Protection from fire, illicit felling, Measurement of Trees- Height, girth, wood density, wood quality, clear and selective felling.

**Unit II**

**14 lectures**

Role of community forestry in Environmental conservation, Water shed management, soil management and poverty reduction, Trees as a forest management tool managing vegetation to modify climate, soil conditions & ecological processes, Social considerations on land-uses.

### **Unit III**

**14 lectures**

State-sponsored community forestry and conservation programs, Changing paradigms in forestry and environmental conservation, Community-managed commercial timber harvesting. Community based forestry and collaborative conservation in India, factors contributing to the rise of community forestry, Role of tribes in Forest and management.

### **Suggested Reading**

**B.Sc. BOTANY – III Semester**

**Open Elective Course (OEC - 3)**

**Algal Cultivation and Applications**

Course No.	Type of Course	Theory / Practical	Credits	Instruction hour per week	Total No. of Lectures / Hours / Semester	Duration of Exam	Formative Assessment Marks	Summative Assessment Marks	Total Marks
OEC-3.2	OEC	Theory	03	03	42 hrs	2 hrs	40	60	100

**Learning outcomes:**

**On completion of this course, the students will be able to;**

- Understand core concepts and fundamentals of various levels of algal growth
- Translate various algal technologies for benefit of ecosystem
- Demonstrate algal growth in different types of natural water.
- Analyze emerging areas of Algal Biotechnology for identifying commercial potentials of algal products & their uses.

**Keywords:**

Culture techniques, Algal growth, Algal blooms, Eutrophication, Algal immobilization, Biofertilizers, Pollution indicators

**Unit I**

**14 lectures**

A brief account of culture techniques and media for algal research. Measurement of algal growth: lag phase, log phase, stationary phase and death phase using biomass, chlorophyll content. Limits to algal growth in natural waters. Dynamics and consequences of marine & freshwater algal blooms;

**Unit II**

**14 lectures**

Causative factors for eutrophication and its impact on algal blooms. Algal immobilization: methods and applications, Algal technologies for the restoration/maintenance of soil fertility; reclamation of usar soils. Restoration of degraded aquatic systems through algae; High rate algal ponds for the treatment of wastewaters for the production of useful biomass & fuels.

### **Unit III**

**14 lectures**

Emerging areas of Algal Biotechnology: Single cell proteins, bio-fertilizers, Algae as food, medicine, feed, Biofuel, industrial products such as phyco-colloid (Agar-agar, Algin, Carrageenan, Diatomite); A brief account of commercial potentials of algal products & their uses. Algae as indicators of pollution. Biofouling, Sewage disposal. Waste-land reclamation. Use of Algae in experimental studies. Algae in space. Algal toxins.

**Open Elective Course (OEC - 3)**  
**Landscaping and Gardening**

Course No.	Type of Course	Theory / Practical	Credits	Instruction hour per week	Total No. of Lectures / Hours / Semester	Duration of Exam	Formative Assessment Marks	Summative Assessment Marks	Total Marks
OEC-3.3	OEC	Theory	03	03	42 hrs	2 hrs	40	60	100

**Learning outcomes:**

**After the completion of this course the learner will be able to:**

- Apply the basic principles and components of gardening
- Conceptualize flower arrangement and bio-aesthetic planning
- Design various types of gardens according to the culture and art of bonsai
- Distinguish between formal, informal and free style gardens
- Establish and maintain special types of gardens for outdoor and indoor land scaping

**Keywords:**

Gardening, Landscaping, Flower arrangement, Vertical gardens, Roof gardens, Computer aided designing

**Unit I**

**14 lectures**

Principles of gardening, garden components, adornments, lawn making, methods of designing rockery, water garden, etc. Special types of gardens, their walk-paths, bridges, constructed features. Green house. Special types of gardens, trees, their design, values in land scaping, propagation, planting shrubs and herbaceous perennials. Importance, design values, propagation, plating, climbers and creepers, palms, ferns, grasses and cacti succulents.

**Unit II**

**14 lectures**

Flower arrangement: importance, production details and cultural operations, constraints, post-harvest practices. Bio-aesthetic planning, definition, need, round country planning, urban planning and planting avenues, schools, villages, beautifying railway stations, dam sites, hydroelectric stations, colonies, river banks, planting material for play grounds.

### **Unit III**

**14 lectures**

Vertical gardens, roof gardens. Culture of bonsai, art of making bonsai. Parks and public gardens. Land scape designs, Styles of garden, formal, informal and freestyle gardens, types of gardens, Urban land scaping, Land scaping for specific situations, institutions, industries, residents, hospitals, road sides, traffic islands, dam sites, IT parks, corporate. Establishment and maintenance, special types of gardens, Bio-aesthetic planning, eco-tourism, indoor gardening, therapeutic gardening, non-plant components, water-scaping, xeri-scaping, hardscaping; Computer Aided Designing (CAD) for outdoor and indoor scaping Exposure to CAD (Computer Aided Designing)

### **Suggested Readings**

2. Butts, E. and Stensson, K. (2012). *Sheridan Nurseries: One hundred years of People, Plans, and Plants*. Dundurn Group Ltd.
3. Russell, T.(2012). *Nature Guide: Trees: The world in your hands* (Nature Guides).

**II B.Sc. IV SEMESTER**  
**Ecology and Conservation Biology**

Number of Theory Credits	Total Lecture Hours/Semester	Number of Practical Credits	Total Practical hours/Semester
<b>04</b>	<b>56</b>	<b>02</b>	<b>56</b>

<b>Contents of Theory Course</b>		
<b>Unit</b>	<b>Topics</b>	<b>Teaching Hours</b>
<b>I</b>	<p><b>Introduction to Ecology and Conservation Biology:</b> Definitions, Principles of Ecology, Brief History, Major Indian Contributions, Scope and importance. Ecological levels of organisation.</p> <p><b>Ecological factors:</b> Climatic factors: light, temperature, precipitation and humidity.</p> <p><b>Edaphic factors:</b> Soil and its types, soil texture, soil profile, soil formation; physico-chemical properties of soil - mineral particle, soil pH, soil aeration, organic matter, soil humus and soil microorganisms.</p> <p>Topographic Factors: Altitude</p> <p><b>Ecological groups of plants and their adaptations:</b> Morphological and anatomical adaptations of hydrophytes, xerophytes, epiphytes and halophytes.</p>	15 hrs
<b>II</b>	<p><b>Ecosystem Ecology:</b> Introduction, types of ecosystems with examples -terrestrial and aquatic, natural and artificial.</p> <p>Structure of ecosystem: Biotic and Abiotic components, detailed structure of a pond ecosystem.</p> <p>Ecosystem functions and processes: Food chain-grazing and detritus; Food web. Ecological pyramids -Pyramids of energy, biomass and number. Principles of Energy flow in ecosystem.</p> <p>Bio-geo chemical cycles: Gaseous cycles -carbon and nitrogen, Sedimentary cycle- Phosphorus.</p> <p>Ecological succession: Definition, types- primary and secondary. General stages of succession. Hydrosere and xerosere.</p> <p><b>Community Ecology:</b> Community and its characteristics – frequency, density, Abundance, cover and basal area, phenology, stratifications, life-forms. Concept of Ecotone and Ecotypes.</p> <p>Intra-specific and Inter-specific interactions with examples.</p> <p><b>Ecological methods and techniques:</b> Methods of sampling plant communities – transects and quadrates. Remote sensing as a tool for vegetation analysis, land use – land cover mapping.</p> <p><b>Population Ecology:</b> Population and its characteristics – Population density, natality, mortality, age distribution, population growth curves and dispersal.</p>	15 hrs

<p><b>III</b></p>	<p><b>Phytogeography and Environmental issues:</b></p> <p>Theory of land bridge, theory of continental drift, polar oscillations and glaciations. Centre of origin of plant – Vavilov’s concept, types. Phytogeographical regions – concept, phytogeographical regions of India. Vegetation types of Karnataka – Composition and distribution of evergreen, semi-evergreen, deciduous, scrub, mangroves, shoal forests and grasslands. An account of the vegetation of the Western Ghats.</p> <p>Pollution: Water pollution: Causes, effect, types; water quality indicators, water quality standards in India, control of water pollution (Waste water treatment). Water pollution disasters – National mission on clean Ganga ,Minimata, Pacific gyre garbage patch, Exxon valdez oil spill.</p> <p>Air pollution: Causes, effect, air quality standards, acid rain, control.</p> <p>Soil pollution: Causes, effect, solid waste management, control measures of soil pollution.</p>	<p>11hrs</p>
<p><b>IV</b></p>	<p><b>Biodiversity and its conservation:</b></p> <p>Biodiversity: Definition, types of biodiversity - habitat diversity, species diversity and genetic diversity, Global and Indian species diversity. SDG’s in biodiversity conservation.</p> <p>Values of Biodiversity – Economic and aesthetic value, Medicinal and timber yielding plants. NTFP. Threats to biodiversity.</p> <p>Concept of Biodiversity Hotspots, Biodiversity hot spots of India.</p> <p>Concept of endemism and endemic species.</p> <p>ICUN plant categories with special reference to Karnataka/ Western Ghats.</p> <p>Biodiversity Conservation- Indian forest conservation act, Biodiversity bill (2002).</p> <p>Conservation methods – <i>In-situ</i> and <i>ex-situ</i> methods</p> <p><i>In-situ</i> methods –Biosphere reserves, National parks, Sanctuaries, Sacred grooves.</p> <p><i>Ex-situ</i> methods-Botanical gardens, Seed bank, Gene banks, Pollen banks, Culture collections, Cryopreservation.</p>	<p>15 hrs</p>

**II B.Sc. IV-Semester**  
**Ecology and Conservation Biology**  
**PRACTICALS**

**LIST OF EXPERIMENTS TO BE CONDUCTED**

Practical No.	Experiments
1	Determination of pH of different types of Soils, Estimation of salinity of soil/water samples.
2	Study of Ecological instruments – Wet and Dry thermometer, Altimeter, Hygrometer, Soil thermometer, Rain Gauge, Barometer, etc
3	Hydrophytes: Morphological adaptations in <i>Pistia</i> , <i>Eichhornia</i> , <i>Hydrilla</i> , <i>Nymphaea</i> . Anatomical adaptations in <i>Hydrilla</i> (stem) and <i>Nymphaea</i> (petiole).
4	Xerophytes: Morphological adaptations in <i>Asparagus</i> , <i>Casuarina</i> , <i>Acacia</i> , <i>Aloe vera</i> , <i>Euphorbiatirucalli</i> . Anatomical adaptations in phylloclade of <i>Casuarina</i> .
5	Epiphytes: Morphological adaptations in <i>Acampe</i> , <i>Bulbophyllum</i> , <i>Drynaria</i> . Anatomical adaptations in epiphytic root of <i>Acampe</i> / <i>Vanda</i> . Halophytes: study of Viviparyin mangroves, Morphology and anatomy of Pneumatophores.
6	Study of a pond/forest ecosystem and recording the different biotic and abiotic components
7	Demonstration of different types of vegetation sampling methods – transects and quadrats. Determination of Density and frequency.
8	Application of remote sensing to vegetation analysis using satellite imageries
9	Field visits to study different types of local vegetations/ecosystems and the report to be written in practical record book.
10	Determination of water holding capacity of soil samples
11	Determination of Biological oxygen demand (BOD)
12	Determination of Chemical oxygen demand (COD)
13	Determination of soil texture of different soil samples.

**SCHEME OF BOTANY PRACTICAL EXAMINATION**  
**IV-Semester**  
**ECOLOGY AND CONSERVATION BIOLOGY**

**Time: 3 Hours**

**Max Marks- 25**

**I. Conduct the experiment A.**

**6 Marks**

(COD/Water holding capacity of soil/Salinity of soil/Water sample)  
(Requirements - 1Mark, Procedure -3 marks, Result - 2Marks)

**II. Write the ecological adaptations of B & C**

**2X3=6 Marks**

(Hydrophytes, Xerophytes, Epiphyte, Halophyte, Parasite)  
(Identification-1 Mark, Diagram with reasons - 2 Marks)

**III. Prepare a temporary stained slide of the given material D. Leave the preparation for evaluation.**

**5 Marks**

(Hydrilla/Nymphaea/Casuarina/Orchid root)  
(Mounting -2 Mark, Identification-1,Diagram with Reasons-2 Marks)

**IV. Comment on E (Ecological instruments)**

**3 Marks**

(Instruments studied in Practicals)

**V. Identify the slides/Chart F & G**

**2 X 2.5=5 Marks**

(One from adaptations, One from Quadrants/Remote sensing of Satellite image)

**BLUE PRINT OF BOTANY THEORY**  
**EXAMINATION IV SEMESTER-BLUE PRINT**  
**ECOLOGY AND CONSERVATION BIOLOGY**

**Time: 2.5 Hours**

**Max Marks- 60**

<b>Units</b>	<b>2 marks</b>	<b>5 marks</b>	<b>8 marks</b>	<b>Total Marks.</b>

**SCHEME OF BOTANY THEORY EXAMINATION  
IV- SEMESTER  
ECOLOGY AND CONSERVATION BIOLOGY**

**Time: 2 Hours**

**Max Marks- 60**

**Instructions: Draw neat labelled diagrams wherever necessary**

**I. Define/Explain any Four of the following:**

**2X4=8 Marks**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.

**II. Answer any Four of the following:**

**5X4=20 Marks**

- 7.
- 8.
- 9.
- 10.
- 11.
- 12.

**III. Answer any Four of the following:**

**8X4=32 Marks**

- 13.
- 14.
- 15.
- 16.
- 17.
- 18.

\*\*\*

**B.Sc. BOTANY – IV Semester**  
**Open Elective Course**  
**Plant Diversity and Human Welfare**

Course No.	Type of Course	Theory / Practical	Credits	Instruction hour per week	Total No. of Lectures / Hours / Semester	Duration of Exam	Formative Assessment Marks	Summative Assessment Marks	Total Marks
OEC - 4.1	OEC	Theory	03	03	42 hrs	2 hrs	40	60	100

**Learning outcomes:**

After the completion of this course, the learner will be able to:

- Develop understanding of the concept and scope of plant biodiversity
- Identify the causes and implications of loss of biodiversity
- Apply skills to manage plant biodiversity
- Utilize various strategies for the conservation of biodiversity
- Conceptualize the role of plants in human welfare with special reference to India

**Keywords:**

Biodiversity, Biodiversity loss, Hotspots, Biodiversity management, Conservation strategies, Biodiversity awareness programmes

**Unit I: Plant Diversity and its Scope**

**14 lectures**

Levels of biodiversity: Genetic, Species and Ecosystem; Agro-biodiversity and cultivated plant taxa and related wild taxa. Values and uses of Biodiversity, Methodologies for valuation, Ethical and aesthetic values, Uses of plants; Ecosystem services.

**Unit II: Loss of Biodiversity and Management of Plant Biodiversity**

**14 lectures**

Loss of biodiversity-causes and implications, Hotspots of biodiversity, extinction of species, projected scenario for biodiversity loss. Organizations associated with biodiversity management, IUCN, UNEP, WWF, UNESCO, NBPGR; Methodology for execution; Biodiversity legislation; Information management and communication.

### **Unit III: Conservation of Biodiversity, Role of Plants in Relation to Human Welfare**

**14 lectures**

Conservation of genetic, species and ecosystem diversity, *In situ* and *ex situ* conservation strategies, India's biodiversity and its conservation Social approaches to conservation, Biodiversity awareness programmes, Sustainable development. Importance of forestry their utilization and commercial aspects; Avenue trees; Ornamental plants of India; Alcoholic beverages; Fruits and nuts; Wood and its uses; their commercial importal,

4. Heywood, V.H. and Watson, R.T.(1995). Global biodiversity and Assessment. Cambridge University Press.

**B.Sc. BOTANY – IV Semester**  
**Open Elective Course**  
**Medicinal Plants in Health Care**

Course No.	Type of Course	Theory / Practical	Credits	Instruction hour per week	Total No. of Lectures / Hours / Semester	Duration of Exam	Formative Assessment Marks	Summative Assessment Marks	Total Marks
OEC-4.2	OEC	Theory	03	03	42 hrs	2 hrs	40	60	100

**Learning outcomes:**

On completion of this course, the students will be able to:

- Recognize the basic medicinal plants
- Apply techniques of conservation and propagation of medicinal plants.
- Setup process of harvesting, drying and storage of medicinal herbs
- Propose new strategies to enhance growth of medicinal herbs considering the practical issues pertinent to India

**Keywords:**

Medicinal plants, Traditional systems, endangered medicinal plants, Ethnobotany, Folk medicines, Ethnic communities

**Unit I: History and Traditional System of Medicine** **14 lectures**

History, Scope and Importance of Medicinal Plants; Traditional systems of medicine; Definition and Scope.

**Ayurveda:** History, origin, panchamahabhutas, saptadhatu and tridosha concepts, Rasayana, plants used in ayurvedic treatments,

**Siddha:** Origin of Siddha medicinal systems, Basis of Siddha system, plants used in Siddha medicine.

**Unani:** History, concept: Umoor-e-tabiya, tumors treatments / therapy, polyherbal formulations.

**Unit II: Conservation, Augmentation and Ethnobotany and Folk Medicine** **14 lectures**

Conservation of Eendemic and endangered medicinal plants, Red list criteria; *In situ* conservation: Biosphere reserves, sacred groves, National Parks; *Ex situ* conservation: Botanic Gardens, Ethnomedicinal plant Gardens.

**Propagation of Medicinal Plants:** Objectives of the nursery, its classification, important components of a nursery, sowing, pricking, use of greenhouse for nursery production, propagation through cuttings, layering, grafting and budding.

Ethnobotany and Folk medicines. Definition; Ethnobotany in India: Methods to study ethnobotany; Applications of Ethnobotany: National interacts, Palaeo-ethno-botany. Folk medicines of ethnobotany, ethnomedicine, ethnoecology, ethnic communities of India.

### Unit III Medicinal Plants

14 lectures

Brief description of selected plants and derived drugs, namely Guggul (*Commiphora*) for hypercholesterolemia, *Boswellia* for inflammatory disorders, Arjuna (*Terminalia arjuna*) for cardioprotection, turmeric (*Curcuma longa*) for wound healing, antioxidant and anticancer properties, Kutaki (*Picrorhiza kurroa*) for hepatoprotection, Opium Poppy for analgesic and antitussive, Salix for analgesic, Cincona and Artemisia for Malaria, Rauwolfia as tranquilizer, Belladonna as anticholinergic, Digitalis as cardiotoxic, Podophyllum as antitumor.

**B.Sc. BOTANY – IV Semester**  
**Open Elective Course (OEC - 4)**  
**Floriculture**

Course No.	Type of Course	Theory / Practical	Credits	Instruction hour per week	Total No. of Lectures / Hours / Semester	Duration of Exam	Formative Assessment Marks	Summative Assessment Marks	Total Marks
OEC - 4.3	OEC	Theory	03	03	42 hrs	2 hrs	40	60	100

**Learning outcomes:**

After completing this course the learner will be able to;

- Develop conceptual understanding of gardening from historical perspective
- Analyze various nursery management practices with routine garden operations.
- Distinguish among the various Ornamental Plants and their cultivation
- Evaluate garden designs of different countries
- Appraise the landscaping of public and commercial places for floriculture.
- Diagnoses the various diseases and uses of pests for ornamental plants.

**Keywords:**

Gardening, Transplanting, Mulching, Plant growth regulators, Ornamental plants, Commercial floriculture

**Unit I**

**14 lectures**

Introduction: Importance and scope of floriculture and landscape gardening. Nursery Management and Routine Garden Operations: Sexual and vegetative methods of propagation; Soil sterilization; Seed sowing; Pricking; Planting and transplanting; Shading; Stopping or pinching; Defoliation; Wintering; Mulching; Topiary; Role of plant growth regulators.

**Unit II**

**14 lectures**

Ornamental Plants: Flowering annuals; Herbaceous perennials; Divine vines; Shade and ornamental trees; Ornamental bulbous and foliage plants; Cacti and succulents; Palms and Cycads; Ferns and fern allies; Cultivation of plants in pots; Indoor gardening; Bonsai. Principles of Garden Designs: English, Italian, French, Persian, Mughal and Japanese gardens; Features of a garden (Garden wall, Fencing, Steps, Hedge, Edging, Lawn, Flowerbeds, Shrubbery, Borders, Water-garden. Some Famous gardens of India.

Floriculture and green house technology. Commercial aspects and exporting of flowers and ornamental plants. Quarantine and testing requirements.

### **Unit III**

**14 lectures**

Landscaping Places of Public Importance: Landscaping highways And Educational institutions. Commercial Floriculture: Factors affecting flower production; Production and packaging of cut flowers; Flower arrangements; Methods to prolong vase life; Cultivation of Important cut flowers (Carnation, Aster, Chrysanthemum, Dahlia, Gerbera, Gladiolus, Marigold, Rose, Liliun, Orchids). Diseases and Pests of Ornamental Plants.

# 1<sup>st</sup> Semester NEP Syllabus for B.Voc 2022-23 Batch

Sl no.	PROCESS MACHINERIES FOR PULP PROCESSING (PRACTICAL)	Hrs
<b>UNIT 1: INTRODUCTION TO PULP PROCESSING</b>		
1.	Safety measures and personal protective equipment (PPE) in the work area Familiarization with the process machineries and their components Setting up and preparing the work area for pulp processing Cleaning and maintenance of process machineries Troubleshooting common issues in pulp processing equipment	8
<b>UNIT 2: FRUIT AND VEGETABLE PREPARATION FOR PULP PROCESSING</b>		
2.	Sorting and grading fruits and vegetables Washing and sanitizing raw materials Pre-processing techniques such as peeling, slicing, and removing seeds or pits Proper storage and handling of prepared fruits and vegetables	6
<b>UNIT 3: PULP EXTRACTION AND REFINING</b>		
3.	Operating pulp extraction equipment Adjusting and monitoring extraction parameters Refining pulp using appropriate techniques Quality control tests to assess pulp consistency and quality Unit 4: Packaging and Storage of Fruit Pulp	8
<b>UNIT 4: PACKAGING AND STORAGE OF FRUIT PULP</b>		
4.	Packaging fruit pulp using suitable materials and techniques Sealing and labeling of packaged fruit pulp Storage and preservation techniques for maintaining product quality Quality control checks for packaged fruit pulp	8
	<b>Total Practical</b>	<b>30</b>
SL.no.	(THEORY)	Hrs
1.	Overview of pulp processing Importance of fruit and vegetable processing in the food industry Types of fruits and vegetables used for pulp processing Basic principles of pulp production Introduction to process machineries used in pulp processing	4
2.	Selection and procurement of fruits and vegetables Sorting and grading of raw materials	3

	Washing and sanitization techniques Pre-processing methods for different types of fruits and vegetables	
3.	Extraction methods for pulp production Equipment used for pulp extraction Refining techniques for achieving desired pulp consistency and texture Quality control measures during the extraction and refining process	4
4	Packaging materials and considerations for fruit pulp Packaging techniques to ensure product safety and shelf life Storage conditions and requirements for fruit pulp Quality control measures during packaging and storage	4
	<b>Total Theory</b>	<b>15</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 15 hours L:T:P = 1:0:2</b>

## 1<sup>st</sup> Semester NEP Syllabus for B.Voc 2022-23 Batch

Sl no.	<b>PRODUCTION OF FRUIT PULP (PRACTICAL)</b>	Hrs
	<b>UNIT 1: INTRODUCTION TO FRUIT PULP PRODUCTION</b>	
1.	Hands-on activities related to fruit pulp production Introduction to fruit pulp production equipment and tools Safety guidelines for handling fruits and equipment	2
	<b>UNIT 2: FRUIT SELECTION AND PREPARATION</b>	
2.	Sorting, cleaning, and washing of fruits Removal of seeds, skins, and undesirable parts Techniques for peeling and slicing fruits Proper handling and storage of prepared fruits	8
	<b>UNIT 3: EXTRACTION AND PROCESSING METHODS</b>	
3.	Demonstrations of different extraction methods Hands-on exercises for pulp extraction techniques Enzyme treatments and their application in fruit pulp processing	8
	<b>UNIT 4: FRUIT PULP PRESERVATION AND PACKAGING</b>	
4.	Techniques for pulp preservation Hands-on exercises for different preservation methods Packaging and labelling procedures for fruit pulp	9
	<b>UNIT 5: PRODUCT DEVELOPMENT AND MARKETING</b>	
5.	Market analysis and target consumer identification Packaging and branding strategies Marketing channels and distribution networks	3
	<b>Total Practical</b>	<b>30</b>
SL.no.	<b>(THEORY)</b>	Hrs
1.	Overview of fruit pulp production Importance of fruit pulp in the food industry Types of fruits used for pulp production Nutritional value and health benefits of fruit pulp Market trends and demand for fruit pulp	4
2.	Selection criteria for fruits used in pulp production Proper handling and storage of fruits for pulp production	2
3.	Different methods of fruit pulp extraction (e.g., pressing, milling, blending) Factors influencing the choice of extraction method	4

	Enzyme treatments and their effects on pulp quality	
4	Techniques for pulp preservation (e.g., freezing, canning, aseptic packaging) Packaging materials and their suitability for fruit pulp	3
5	Value-added products using fruit pulp (e.g., juices, smoothies, jams) Product development and innovation in the fruit pulp industry	2
	<b>Total Theory</b>	<b>15</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 15 hours L:T:P = 1:0:2</b>

**JSS COLLEGE OF ARTS, COMMERCE & SCIENCE**  
**(Autonomous)Ooty Road, Mysore-25.**  
**B.Voc in Food Processing and Engineering.**  
**1<sup>st</sup> Semester: Production of Fruit Pulp**

QP: 15120

**Section A:**

( 5X1 Marks)

Multiple Choice Questions

Choose the most appropriate answer for each question.

- 1.
- 2.
- 3.
- 4.
- 5.

**Section B**

(5X3=15 Marks)

Answer any three questions from this section.

- 1.
- 2.
- 3.
- 4.
- 5.

**Section C**

(10X1=10 marks)

Answer any one question from this section.

- 1.
- 2.
- 3

# 1<sup>st</sup> Semester NEP Syllabus for B.Voc 2022-23 Batch

Sl no.	FOOD SAFETY AND, HYGIENE AND SANITATION (PRACTICAL)	Hrs
	<b>UNIT 1: INTRODUCTION TO FOOD SAFETY AND SANITATION</b>	
1.	Hands-on training in cleaning and sanitizing procedures (2 hours) Demonstrations of personal hygiene and protective measures (1 hour) Introduction to HACCP principles through case studies (3 hours)	6
	<b>UNIT 2: FOOD SAFETY PRACTICES IN PROCESSING FOOD PRODUCTS</b>	
2.	Simulated scenarios for temperature control and monitoring (2 hours) Identification and control of allergens in a processing unit (2 hours) Equipment and utensil maintenance and sanitation (2 hours) Pest control practices and inspections (2 hours)	8
	<b>UNIT 3: IMPLEMENTING SAFETY AND SANITATION IN THE WORK AREA</b>	
3.	Work Area Design and Layout for Food Safety (2 hours) Good Manufacturing Practices (GMPs) (2 hours) Training and Supervision of Employees (2 hours) Waste Management and Disposal (1 hour) Emergency Preparedness and Response (1 hour)	8
	<b>UNIT 4: MONITORING AND AUDITING FOOD SAFETY AND SANITATION</b>	
4.	Internal Monitoring and Self-Inspection (2 hours) Food Safety Audits and Inspections (2 hours) Corrective Actions and Continuous Improvement (2 hours) Food Safety Culture and Communication (1 hour) Emerging Trends and Technologies in Food Safety (1 hour)	8
	<b>Total Practical</b>	<b>30</b>
SL.no.	(THEORY)	Hrs
1.	Importance of Food Safety and Sanitation in the Food Industry (1 hour) Regulatory Framework and Standards (1 hour) Hazards and Risks in Food Processing (1 hour)	3
2.	Food Handling and Storage Practices (1 hour) Cross-Contamination Prevention (1 hour) Safe Use and Maintenance of Equipment and Utensils (1 hour) Pest Control in Food Processing Areas (1 hour)	4
3.	Standard Operating Procedures (SOPs) (1 hour) Work Area Design and Layout for Food Safety (1 hour) Waste Management and Disposal (1 hour) Emergency Preparedness and Response (1 hour)	4
4	Theory: 4 hours Documentation and Record-Keeping (1 hour)	4

	Corrective Actions and Continuous Improvement (1 hour) Food Safety Culture and Communication (1 hour) Emerging Trends and Technologies in Food Safety (1 hour)	
	<b>Total Theory</b>	<b>15</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 15 hours L:T:P = 1:0:2</b>

## IInd Semester NEP Syllabus for B.Voc 2022-23 Batch

<b>Sl no.</b>	<b>PLANTATION CROP TECHNOLOGY (THEORY)</b>	<b>Hrs</b>
	<b>Unit 1: Introduction to plantation crops</b>	
1.	Definition of plantation crops Importance and contribution to the economy Major plantation crops and their geographical distribution	4
	<b>Unit 2: Harvesting and Post-Harvest Technology</b>	
2.	Post-harvest handling and processing Value addition and storage techniques	3
	<b>UNIT 3: Processing of plantation crops</b>	
3.	Maturity indices and harvesting techniques Processing of coffee, Tea, areca nut, coconut, cocoa, Cashew, Palm etc Value addition products from plantation crop products	4
	<b>Unit 4: Sustainability and Environmental Issues:</b>	
4.	Sustainable practices in plantation agriculture Biodiversity and conservation Environmental impacts and mitigation measures	4
	<b>Total Theory</b>	<b>15</b>
<b>Sl. no.</b>	<b>(PRACTICAL)</b>	<b>Hrs</b>
1.	value Addition: Practical involve processing plantation crops to create value-added products like tea processing, coffee roasting, or Tea processing and areca nut, cashew	10
2.	Post-Harvest Handling: Students may learn about post-harvest techniques, including grading, sorting, and packaging of harvested crops.	6
3.	Quality assessment and sensory evaluation of value added plantation crops	8
4.	Plantation Establishment: Practical sessions focus on proper planting techniques, spacing, and layout for different plantation crops like tea, coffee, rubber, or oil palm.	6
	<b>Total Practical</b>	<b>30</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 15 hours L:T:P = 1:0:2</b>

## IInd Semester NEP Syllabus for B.Voc 2022-23 Batch

Sl no.	<b>Food Engineering Processing: Principles and Applications (THEORY)</b>	<b>Hrs</b>
<b>Unit 1: Introduction to Food Engineering</b>		
1.	Food engineering minimizes waste and optimizes resources in food processing. Food engineers promote sustainability and efficiency in the food industry through innovative practices. Food engineering contributes to food security by improving production efficiency and ensuring the availability of safe and nutritious food.	3
<b>Unit 2: Overview of Unit Operations and Unit Processes in Food Engineering</b>		
2.	Introduction to unit operations and unit processes Examples of unit operations in food engineering Examples of unit processes in food engineering	3
<b>UNIT 3: Principles of heat transfer: conduction, convection, and radiation</b>		
3.	Heat exchangers and their applications in food processing Heat transfer during processing operations: Pasteurization Sterilization Baking	6
<b>UNIT 4: Mass Transfer in Food Processing (3 hours)</b>		
4.	Mass Transfer in Food Processing (3 hours) Principles of mass transfer: diffusion, evaporation, and adsorption Mass transfer in drying and dehydration processes Mass transfer in concentration and extraction processes	3
<b>Total Theory</b>		<b>15</b>
Sl. no.	<b>(PRACTICAL)</b>	<b>Hrs</b>
1.	Heat Transfer Practical Hands-on experiments on heat transfer principles Measurement of heat transfer coefficients Operation and maintenance of heat exchangers	10
2.	Mass Transfer Practical Hands-on experiments on mass transfer principles Measurement of diffusion coefficients Drying and dehydration experiments	10
3.	Food Processing Operations Practical Practical demonstrations of food processing operations involving heat and mass transfer Pasteurization techniques and equipment	10

	Sterilization techniques and equipment Baking processes and equipment	
	<b>Total Practical</b>	<b>30</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 15 hours L:T:P = 1:0:2</b>		

## Reference Books

### 1. "Food Process Engineering and Technology" by Zeki Berk

This book provides an overview of food process engineering principles and their applications. It covers topics such as heat and mass transfer, food preservation, food quality, and processing operations.

Available for free download in PDF format:

[http://www.hesperianpress.com/pdf/Food\\_Process\\_Engineering\\_and\\_Technology.pdf](http://www.hesperianpress.com/pdf/Food_Process_Engineering_and_Technology.pdf)

### 2 "Food Engineering: Integrated Approaches" by Gustavo Barbosa-Canovas et al.

This book offers a comprehensive overview of food engineering principles and their integration in food processing. It covers topics such as food preservation, thermal processing, separation techniques, and packaging. Available for free download in PDF format: <https://www.intechopen.com/books/food-engineering-integrated-approaches>

### 3 "Fundamentals of Food Process Engineering" by Romeo T. Toledo

This book provides an introduction to the fundamental principles of food process engineering. It covers topics such as heat and mass transfer, food preservation, dehydration, and thermal processing. Available for free download in PDF format:

[http://www.hesperianpress.com/pdf/Fundamentals\\_of\\_Food\\_Process\\_Engineering.pdf](http://www.hesperianpress.com/pdf/Fundamentals_of_Food_Process_Engineering.pdf)

### "4 Unit Operations in Food Processing" by R.L. Earle

This book focuses on the unit operations involved in food processing. It covers topics such as fluid flow, heat transfer, size reduction, mixing, and separation processes. Available for free online reading:

<https://www.nzifst.org.nz/unitoperations/>

## IInd Semester NEP Syllabus for B.Voc 2022-23 Batch

Sl no.	PRINCIPLES AND TECHNIQUES IN FOOD MANUFACTURING (THEORY)	Hrs
<b>Unit 1: Fruit and Vegetable Processing and Preservation</b>		
1.	Importance of fruit and vegetable selection for processing Pre-processing techniques: sorting, cleaning, washing, and grading Juice extraction methods and clarification techniques Canning of fruit and vegetables products	4
<b>Unit 2: Cereal Processing</b>		
2.	Theory (Total Hours: 3) Overview of cereal processing industry Common cereal grains and their characteristics Principles of cereal milling Flour production process and quality considerations	3
<b>UNIT 3: Bakery Confectionery Production</b>		
3.	Bakery product formulation and ingredient selection Mixing techniques and equipment in bakery production Dough fermentation and proofing principles Baking principles and oven technologies	4
<b>Unit 5: Packaging and Quality Assurance</b>		
4.	Packaging materials and techniques for food processing Quality assurance and shelf-life extension techniques	4
<b>Total Theory</b>		<b>15</b>
Sl. no.	(PRACTICAL)	Hrs
1.	Sorting, cleaning, and grading of fruits and vegetables Juice extraction experiments and quality analysis Hands-on experience in fruit and vegetable drying techniques Packaging and storage of processed fruits and vegetables	10
2.	Sorting, cleaning, and grading of fruits and vegetables Juice extraction experiments and quality analysis Hands-on experience in fruit and vegetable drying techniques Packaging and storage of processed fruits and vegetables	6
3.	Formulation and preparation of bakery product recipes Hands-on mixing and dough preparation Fermentation and proofing experiments Baking and quality assessment of bakery products	8
4.	Hands-on packaging of food products Quality assessment and sensory evaluation techniques	6
<b>Total Practical</b>		<b>30</b>
<b>Total Practical Hours: 30 hours Total Theory Hours: 15 hours L:T:P = 1:0:2</b>

**JSS COLLEGE OF ARTS, COMMERCE & SCIENCE (AUTONOMOUS)**  
**B.N ROAD, MYSURU – 25**  
**SYLLABUS**  
**B.Voc- II Semester**  
**Communicative English**

No. of Credits : 3

No. of Instruction hrs : 3 / Week(45 hrs)

- AIMS:**
- 1) To familiarize students to basic English
  - 2) To enable them to develop listening & speaking skills

**OBJECTIVES:** Students should be able to \_\_\_\_

- 1) Write English without grammatical errors
- 2) Speak English Language effectively and accurately
- 3) Listen and understand public announcements and news on TV & Radio

**Module – 1 Grammar**

	<b>Marks</b>	<b>Hrs/ Week</b>
1. Subject and Verb Agreement	5	6
2. Voice	5	5
3. Articles	5	3
4. Speech	5	6
5. Question tag	5	5
6. Framing of Questions	5	Q=05

**Module – 2 Writing Skills**

1. Letter Writing Letter of Application/Letter of Grievances/Resume Preparation	10	4
2. Comprehension	10	3
3. Essay Writing	10	3

**Module – 3 Speaking Skills**

1. Greeting		
2. Requesting		
3. Enquiring		
4. Explaining	10	Q=05
5. Reporting		
6. Permission		
7. Thanking		

<b>70</b>	<b>45</b>	
-----------	-----------	--

**B.Voc Semester - III**

<b>Sl. no.</b>	<b>Information Communication Technology</b>	<b>Hrs</b>
1	The humanitarian supply chain – Definition, system of organizations, people, technology, activities, information and resources involved in moving a product or service from supplier to customer	5
2	Technology framework – Front-end services, Middleware services and Infrastructure services: Supporting the food assistance supply chain; Mapping technologies; Web portals	5
3	Mobile technologies - Combining hand-held and wireless communications technologies	5
4	Beneficiary identification - Challenges in food assistance to ensure that assistance goes to the right beneficiaries	5
5	ICT in emergencies – Requirement inputs of Food assistance interventions during emergencies	5
6	Linking the humanitarian supply chain - Ways in which WFP uses technology and technological techniques to fulfill its role as the provider of food assistance in development and emergencies	5

<b>Sl. no.</b>	<b>Practical</b>	<b>Hrs</b>
1.	Identification of software related to Food Processing and Engineering	3
2.	Practicing the use of software	6
3.	Requirement development for Food Processing Software	6

**INDIAN CONSTITUTION**  
**COMMON PAPER TO ALL DEGREE CLASSES (FOR B.Voc 45 HOURS 3/WEEK)**

**UNIT I** **08 hrs**

- a) Preamble of the Indian Constitution
- b) Salient features of Indian Constitution

**UNIT II** **10 hrs**

- a) Fundamental Rights
- b) Fundamental Duties
- c) Directive principles of State Policy

**UNIT III** **14 hrs**

- a) President – Election Method, Powers and Functions
- b) The Role of the Prime Minister
- c) The Parliament – Structure, Power and Functions(Lok Sabha and Rajya Sabha)
- d) Supreme Court – Organization and Jurisdiction

**UNIT IV** **13 hrs**

- a) The Role of Governor in the Administration of State
- b) Powers and Functions of the Chief Minister
- c) Composition , Powers and Functions of both the Houses of State Legislature
- d) High Court – Organization and Jurisdiction

**TEXT BOOKS**

- An introduction to the Constitution of India by M V Pylee
- Introduction to the Constitution of India by D D Basu
- Understanding the Constitution of India by Dr. H M Rajashekar
- Indian Constitution by Sommanna, Brahamananda, H B Mallikarjuna swamy,
- Indian Constitution by H T Ramakrishana, Rajiv

**B.Voc Semester - IV**

<b>Sl. no.</b>	<b>Biostatistics</b>	<b>Hrs</b>
1.	Statistical concepts: Data structure, sampling methods, collection, classification and tabulation of data, graphical and diagrammatic representation, histogram, frequency polygon, frequency curve, bar graph, pie chart etc.	4
2.	Measure of Central Frequency: Mean, median, mode.	2
3.	Measure of dispersion of data: Range, semi-interquartile range, mean deviation, standard deviation, standard error, coefficient of variation, confidence limits.	5
4.	Types of distribution of data: Normal, Binomial, Poisson.	7
5.	Z-test, t-test, ANOVA, multiple comparisons, LSD and DMRT, Chi-square test.	4
6.	Regression estimate, correlation coefficient.	4
7.	Experimental designs, data transformation.	4

<b>Sl. no.</b>	<b>Practical</b>	<b>Hrs</b>
1.	Analytical Problems / calculations	15

**JSS COLLEGE OF ARTS, COMMERCE AND SCIENCE**

**B.N ROAD, MYSORE.**

**DEPARTMENT OF ENVIRONMENTAL STUDIES**

**(3 Hrs Theory / week)**

**3 Credits (45 Hrs)**

**Environmental Studies (One-Semester Compulsory Core Module for B.Voc Programmes)**

**Unit 1: Environment and natural systems**

**4 hrs**

- Introduction to Environment and Environmental Studies
- Definition and Components of Environment, Relationship between the different components of Environment
- Man and Environment relationship
- Impact of technology on Environment, Environmental Degradation
- Multidisciplinary nature of the Environment studies
- Its scope and importance in the present day Education System

**UNIT 2: Ecology and Ecosystems:**

**7 hrs**

- Introduction: Ecology- Objectives and Classification
- Concept of an ecosystem- structure and functions of ecosystem
- Components of ecosystem- Producers, Consumers, Decomposers
- Bio-Geo- Chemical Cycles- Hydrologic Cycle, Carbon cycle, Energy Flow in Ecosystem, Food Chains, Food webs ,Ecological Pyramids
- Major Ecosystems: Forest Ecosystem, Grassland Ecosystem, Desert Ecosystem, Aquatic Ecosystem, Estuarine Ecosystem.

**Unit 3: Natural Resources**

**7 hrs**

Renewable and Nonrenewable resources, exploitation and conservation,

- Water resources: Surface and Ground water sources, Indian and Global scenario.  
Land as a resource, land use change and land degradation
- Forest resources: Definition and Classification of Forests  
Ecological and Economic importance and benefits of forest, Indian scenario,  
Deforestation: causes and effects, case studies remedial measures
- Food resources: Sources of food, Global and Indian food demand scenario,  
Limits of food production, Environmental effects of Agriculture
- Energy resources: Renewable and non renewable energy sources, use of alternate energy sources, growing energy needs, case studies
- Mineral resources: Definition and Classification of minerals, mining issues Case studies.
- Role of individual in conservation of natural resources.

**Unit 4 : Biodiversity and its Conservation**

**6 hrs**

- Biodiversity : Definition, Levels of biological diversity : genetic, species and ecosystem diversity
- Biogeographic zones of India
- Hot spots of biodiversity
- Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational values
- Biodiversity patterns
- India as a mega-biodiversity nation
- Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions.
- Endangered and endemic species of India
- Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

#### **UNIT 5: Environmental pollution:**

**9 hrs**

- Types of Environmental Pollution:
- Water Pollution: Introduction – Water Quality Standards, Sources of Water Pollution: Industrial Agricultural, Municipal; Classification of water pollutants, Effects of water pollutants, Eutrophication.
- b) Marine pollution: Causes, effects and control.
- c) Air Pollution: Composition of air, Structure of atmosphere, Ambient Air Quality Standards, Classification of air pollutants, Sources of common air pollutants like PM, SO<sub>2</sub>, NO<sub>x</sub>, Natural & Anthropogenic Sources, Effects of common air pollutants
- d) Soil Pollution: causes, effects and control.
- e) Noise Pollution: Introduction, Sound and Noise, Noise measurements, Causes and Effects
- f) Thermal Pollution: Causes, effects and control.
- g) Nuclear hazards and human health risks.
- Solid waste management: Control measures of urban and industrial waste.
- Role of individual in the prevention of pollution, Pollution case studies.

#### **UNIT 6: Sustainable development and Environmental issues and Policies.**

**7 hrs**

- Sustainable development: Meaning, changes in resource utilization, urbanization.
- Water conservation: watershed management and Rain water harvesting.
- Environmental issues: Climate change, global warming, acid rain, ozone layer depletion.
- Disaster management: floods, drought, earthquake, cyclones and landslides.
- Wasteland reclamation.
- Environment Protection Act: Air, Water, Wildlife (Prevention and Control of Pollution)
- Forest Conservation Act.
- Issues involved in enforcement of environmental legislation.
- Environment: rights and duties.

#### **Unit 7 : Human Population and the Environment**

**5 hrs**

- Population growth, Explosion, demographic variation among nations.

- Family welfare Program.
- Environment, human health and welfare; infectious and lifestyle diseases in contemporary world.
- Value Education: Environmental ethics.
- HIV/AIDS
- Women and Child welfare.
- Role of information technology in Environment and human health

### **Unit 8: Field visit**

**5 hrs**

- Field work Visit to an area to document environmental assets :river/ forest/ grassland/ hill/ mountain
- Visit to a local polluted site-Urban/Rural/Industrial/Agricultural.
- Visit to the solid waste treatment plant and water treatment plant.
- Video: The one degree • (Equal to 5 lectures)

### **REFERENCE BOOKS:**

1. Textbook of Environmental Studies for Undergraduate Courses by Erach Bharucha Second edition, 2013 Publisher: Universities Press (India) Private Ltd, Hyderabad.
2. Basics of Environmental Studies by Prof Dr N S Varandani, 2013 Publisher: LAP -Lambert Academic Publishing, Germany
3. Environmental Studies by Anindita Basak, 2009 Publisher: Drling Kindersley(India)Pvt. Ltd Pearson
4. Textbook of Environmental Studies by Deeksha Dave & S S Kateva , Cengage Publishers.
5. Environmental Sciences by Daniel B Botkin & Edward A Keller Publisher: John Wiley & Sons.
6. Environmental Studies by R. Rajagopalan, Oxford University Press
7. Environmental Studies by Benny Joseph, TMH publishers
8. Environmental Studies by Dr. Suresh K Dhameja, 2007 Published by : S K Kataria & Sons New Delhi
9. Basics of Environmental Studies by U K Khare, 2011 Published by Tata McGraw Hill.
10. Environmental Studies by N.Arumugam & V.Kumaresan, saras publication.

**TITLE: FUNDAMENTALS OF MICROBIOLOGY****UNIT-I****10Hrs**

- History: Contributions of - Antony van Leeuwenhoek, Edward Jenner, Louis Pasteur, Robert Koch, Dmitry Iwanowski, Alexander Fleming (in brief).  
Development and scope of Microbiology. Branches of Microbiology.
- Microscopy: Types of Microscope, Construction and working principle of bright field microscope. Dark field, fluorescence and phase contrast microscopy(application). Electron microscopy- Types, applications and their limitations.
- Staining technique: Types of stains, Principle of Simple, negative and differential staining techniques (gram's staining).

**UNIT-II****06hrs**

Sterilization technique: Definition – Sterilization, disinfection, antiseptic, antibiotics, Fungicide, Bactericide.

**A. Physical methods:**

- Heat –
  - Dry heat – Hot air
  - Moist heat method – Autoclave and Pressure cooker
- Filtration–Types of filters: Membrane filter, Hepa filter (e.g., Laminar air flow)
- Radiation methods – UV rays, Gamma rays and Cathode rays

**B. Chemical method:** Use and mode of action of- Alcohols, Aldehydes, Halogens and Phenols.

**UNIT-III****06hrs**

Media – Types, Pure culture and Cultural characteristics: Serial dilution, pure culture by isolation – Pour plate, Spread plate, Streak plate and Micromanipulator techniques . Colony characteristics – plate cultures/solid media and broth cultures/liquid media. Maintenance and Preservation of pure cultures – Sub culturing, overlaying with mineral oil, Refrigeration (4°C) Lyophilization and cryopreservation.

**UNIT-IV****08hrs**

Comparative account of Prokaryotic and eukaryotic cell. Systems of classification: Haeckel's three-kingdom, Whittaker's five-kingdom and Cavalier-Smith's eight kingdom classification.

- General characteristics of bacteria, fungi, actinomycete, virus, protozoa and algae. Organization of cell wall, cell membrane, flagella capsules and formation of spores in bacteria.
- Bacteriophages : Morphology and multiplication( T-4 phage)

**PRACTICALS****15 Hrs -1 Credit**

- Staining and mounting of algae and fungi **3Hrs x1**
- Simple, Negative and Gram's staining **3Hrs x1**
- Preparation of culture media- Nutrient agar, PDA and NB **3Hrs x1**
- Methods of obtaining pure cultures of microorganism-Spread plate, pour plate and streak plate and subculturing **3Hrs x1**
- Isolation of microorganisms from soil by serial dilution technique (Bacteria and Fungi) **3Hrs x1**

**TITLE: MICROBIAL GROWTH AND METABOLISM****UNIT: I****08Hrs**

1. Major nutritional type of Microorganisms.
2. Nutritional requirements of Microorganisms. Elementary nutrients: Carbon, Nitrogen, Sulphur, Oxygen and Energy sources, Vitamins and Growth factors.
3. Uptake of nutrients: Diffusion- Simple and Facilitated, Active transport (use of Proton motive force, ATP : ABC transporter), Group translocation, Iron uptake.

**UNIT: II****07Hrs**

1. Definition, Growth rate and generation time. The growth curve in batch culture - Phases of growth and their significance.
2. Physical and chemical factors affecting growth-Temperature, pH, Oxygen and saline (water activity) Requirements. Measurement of growth by cell number (Haemocytometer) and cell mass (Turbidometer).

**UNIT:III****05Hrs**

Microbial Enzymes: Definition, Nomenclature, Classification, Properties, Mode and Mechanism of enzyme action, Factors effecting enzyme action. Cofactors and Coenzymes.

**UNIT:IV****10Hrs**

**Aerobic respiration:** Definition, Sugar degradation pathways - EMP, HMP and ED pathways. Ultra structure of Mitochondrion, Formation of acetyl CoA from pyruvate, TCA cycle, Electron transport system and Oxidative phosphorylation

**Anaerobic respiration:** Introduction, Anerobic respiration with special reference to dissimilatory Nitrate reduction. (Denitrification; nitrate /nitrite and nitrate/ammonia respiration; fermentative nitrate reduction) Fermentation - Alcohol fermentation and Pasteur effect; Lactate fermentation (homofermentative and heterofermentative pathways).

**PRACTICALS****15 hours– 01 Credit**

1. Effect of temperature and pH on growth of bacteria. **3Hrs x1**
2. Acid and gas production from carbohydrates- Demonstration of fermentation of lactose **3Hrs x1**
3. Turbidimetric/spectrophotometric monitoring of growth using liquid cultures **3Hrs x1**
4. Cell counting by Haemocytometer **3Hrs x1**
5. Starch hydrolysis **3Hrs x1**

**TITLE: FOOD MICROBIOLOGY-1****UNIT:I****10Hrs**

- A. Introduction to Food Microbiology: Definition, Concept and Scope. Food as a substrate for microorganisms. Food as a substrate for microorganisms, Factors influencing microbial growth in foods (intrinsic and extrinsic factors).
- B. Contamination, preservation and spoilage in various foods viz. – fruits and vegetables, canned foods, cereals and cereal product (cereal grains, flour, bread, pasta, macroni), sugars & sugars products (Honey, Candy), Meat (Fresh meat, fish), Milk and Milk products (cheese, butter).

**UNIT:II****05Hrs**

- A. Methods of food preservation: Physical method – high temperature, low temperature, canning. Drying – solar drying, drum drying, spray drying. Radiation.
- B. Chemical methods – chemical preservatives – salient features of the chemical preservatives (propionates, benzoate, sorbates, nitrates and nitrites, sulphur dioxide and sulphates, sugar and salt)

**UNIT: III****05Hrs**

- A. Food borne intoxication and infection:  
Bacterial intoxication- Botulism & staphylococcal intoxication  
Bacterial infection- Salmonellosis.  
Mycotoxin – Origin, types and importance of toxins with reference to Aflatoxins.

**UNIT-IV****10 Hrs**

- A. Introduction to Dairy Microbiology: Source of milk contamination. Types of microorganisms in milk.
- B. Methods to detect microbial spoilage by SPC, Reductase test.
- C. Biochemical changes of milk - Souring, Gassy fermentation, Proteolysis, Lipolysis, and Ropiness.
- D. Fermented dairy products (a brief account of characteristic and therapeutic value). Acidophilus milk, Yoghurt, Butter milk, Srikhand. Types of cheese. Probiotics and their benefits.
- E. Preservation of milk and milk products – Pasteurization and Sterilization. Microbiological standard for milk and milk products (in brief).

**PRACTICALS****3hrsX5 practicals**

1. Isolation and enumeration of microorganisms from spoiled fruits and vegetables
2. Isolation and enumeration of Microorganisms present in food Utensils.
3. Detection of number of bacteria in milk by SPC
4. Turbidity test to detect boiled and unboiled milk.
5. Methylene blue reductase test to determine the quality of milk.

**Paper code: FPD520**

**MICROBIOLOGY  
II B.Voc., IV Semester**

**30hours-2 Credits**

**TITLE: FOOD MICROBIOLOGY-II**

**UNIT-I**

**06 Hrs**

**Food fermentations:** Bread, cheese, vinegar, fermented vegetables, Fermented dairy products: Kefir, Kumiss, sour cream, dahi & lassi. Experimental and Industrial production methods. Oriental Fermented foods, their quality standards and control.

**UNIT-II**

**06Hrs**

**Food produced by Microbes:** Microbial cells as food (single cell proteins)- mushroom cultivation. Bioconversions- production of alcohol, fermented beverages- beer and wine & types of wine. Genetically modified foods.

**UNIT-III**

**10Hrs**

**Detection of food-borne microorganisms:** Culture, Microscopic and Sampling methods. Chemical: Thermostable nuclease *Limulus* Lysate for Endotoxins, Nucleic Acid (DNA) probes, DNA Amplification (PCR), Adenosine- Triphosphate Measurement, Radiometry, Fluoro-and Chromogenic substrates. **Immunologic Methods:** Fluorescent Antibody, Enrichment Serology, Salmonella 1-2. Test, Radioimmunoassay, ELISA.

**UNIT-IV**

**08Hrs**

**Microbial indicators of food safety and quality control:** Principles of quality control and microbiological criteria, Indicators of product quality and microbiological safety of foods, Hazard analysis and critical control points (HACCP), Good manufacturing process (GMP) Microbiological standards Codex Alimentarius and Food legislation.

**PRACTICALS**

**3hrsX5=15 practicals**

1. Production of sauerkraut
2. Identification of Bacteria from idli batter and curds
3. Preparation of wine from grapes.
4. Role of yeast in bread making
5. Culturing of *Chlorella* / *Spirulina*.

**Unit –I**

**15hours**

- A. Brief history and developments in industrial microbiology
- B. Microorganisms of industrial importance; Isolation, Screening and Preservation of Industrial important microbes..
- C. Strain improvement of Microorganisms for industrial purposes.
- D. A brief account of production medium, inoculum medium, raw materials-Molasses, corn steep liquor, sulphite waste liquor, yeast extract and whey. Buffers, Precursors, Inhibitors and Antifoam agents.

**Unit-II**

**15 hours**

- A. Fermenters and fermentation process: Design, types and basic function of fermenters, sterilization, devices for aeration and agitation (in brief).
- B. Types of fermenters – laboratory, pilot-scale and production fermenters  
Components of a typical continuously stirred tank bioreactor  
Fermentation process – Surface, Submerged and Solid state fermentation. Types- Batch and Continuous fermentation.

**Unit-III**

**15 hours**

Downstream processing: Steps in recovery and purification of fermented products – Precipitation, Filtration, Centrifugation, Distillation, Cell disruption, Solvent recovery, chromatography, Drying and crystallization.

**UNIT: IV**

**15 hours**

**Industrial production**

- A. a. Organic acids – Citric acid.  
b. Antibiotics – Penicillin.  
c. Enzymes –Pectinase and amylase.  
d. Alcohol – Ethanol.  
e. Amino acid –Glutamic acid.
- B. Role of microorganisms in the production and recovery of minerals and petroleum.

**Practicals:**

1. Preparation of alcohol using jaggery or molasses.
2. Estimation of percentage alcohol in a given sample by specific gravity method.
3. Production of citric acid using *Aspergillus niger*
4. Cultivation of edible mushroom
5. Isolation of antibiotic/ amino acid/organic acid producing microbes and their preservation.
6. Production of penicillin in the Laboratory
7. Antibiotic sensitivity test by Kirby-Baner method
8. Study of fermenters –Seed tank and Pilot scale
9. Production of any vitamin and its quantification by bioassay.
10. Alcoholic fermentation and determination of total acidity and non-reducing sugars

**III B.Voc., VI Semester**

**TITLE: PATHOGENIC MICROBIOLOGY**

**UNIT-I**

**20 Hrs**

Introduction to important diseases caused by Streptococcus, Pneumococcus, Neisseria, Corynebacterium, Bacillus, Clostridium, Enterobacteriaceae (Proteus, Shigella, Salmonella), Vibrio, Yersinia, Hemophilus, Mycobacterium, The operative pathogenic mechanisms, laboratory diagnosis, prevention and control of these diseases.

**UNIT-II**

**15 Hrs**

Morphology, pathogenesis, life cycle, laboratory diagnosis, prevention and control of viral diseases viz. Rabies, Polio, Small pox, Herpes, Measles, Influenza and AIDS.

**UNIT-III**

**15 Hrs**

Introduction to Human mycotic infections viz Cryptococcosis, Dermatophytosis, Blastomycosis, Opportunistic Mycosis; Candidiasis and Aspergillosis.

**UNIT-IV**

**10 Hrs**

Life cycle, pathogenic, mechanisms and control of parasitic infections viz. amoebiasis, Kala-azar, toxoplasmosis, ascariasis, filarisis, hook worm infections.

**PRACTICALS**

**3 hrsX10 practicals**

- 1- 4. Identification of both gram positive and gram negative microorganisms on the basis of :
  - (i) Morphology.
  - (ii) Bio-chemical characteristics.
  - (iii) Serological reactions.
6. Stainings – Alberts, ZNCF.
- 6-7. Demonstration of pathogens (Viruses, fungi, parasites) through photographs/ permanent mounted slides.
- 8-9. Demonstration of cysts/ovas of protozoa/Helminths through photographs.
10. Isolation of dermatophytes from human skin.

**PATTERN OF QUESTION PAPER FOR B.VOC**  
**SUBJECT: MICROBIOLOGY**  
**(THEORY:I SEMESTER TO VI SEMESTER)**

Time: 3hours

Max marks: 70

I. Define/Explain any ten in one/two sentences: 3X10=30  
(Twelve questions to be given and ten to be answered)

- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10
- 11
- 12

II Answer any FOUR of the following: 4X4=16  
(Six questions to be given and four to be answered)-short answer type

- 13
- 14
- 15
- 16
- 17
- 18

III (Three essay type questions- with all internal choices) 8X3=24

- 19
- 20
- 21

Test+ Assessment (C-1+C-2) = 30 (15+

**Approved list of Paper setters**

<b>Sl No.</b>	<b>Name</b>	<b>College address</b>
1.	Dr..M .Seema	Chairperson, Dept. of Microbiology JSS College, Ooty road, Mysore
2.	Dr..K.Sumana	Assistant prof. Dept. of Microbiology JSS College, Ooty road, Mysore
3	Dr.S.Mahadevamurthy	Associate Prof & HOD Dept. of Microbiology Yuvaraja's college Mysore.
4	Dr.Syeda Kauser Fathima	Associate Prof. of Microbiology Maharani's Science College for women JLB road Mysore.
5	Dr. H.S. Jayanth.	Asso.Prof.of Microbiology Dept. of Microbiology Yuvaraja's college Mysore.
6	Dr.Nagarathnamma	Asso. Prof. of Microbiology Government women college Mandya
7	Dr. Mashooda Begum	Asso.Prof.of Microbiology Maharani's Science College for women JLB road, Mysore.
8	Sri. M. Girish	Assistant prof. Dept. of Microbiology JSS College for Women Saraswathipuram,Mysore
9	Dr. P.K.Maheshwar	Assistant Prof. Dept. of Microbiology Dept. of Microbiology Yuvaraja's college,Mysore.
10	Smt. M.S.Shobha	Assistant Prof, Dept. of Microbiology Maharani's Science College Mysore
11	Sri. Shankaregowda	Asso.Prof.of Microbiology Government Science College Mandya
12	Sri. R.A. Manjunath	Assistant Prof. Dept. of Microbiology Saradavilas College,Mysore
13	Dr.M.P. Ragavendra	Assistant Prof. Dept. of Microbiology Maharani's Science College,Mysore

14	Dr.K.Girish	Assistant Prof. Dept. of Microbiology Maharani's Science College, Mysore
15	Sri. G.S. Siddegowda	Assistant Prof. Dept. of Microbiology Maharani's Science College Mysore
16	Smt. M.S. Poornima	Assistant Prof. Dept. of Microbiology Yuvaraja's College,Mysore
17	Dr.N.S.Devaki	Assistant Prof. Dept. of Molecular Biology Yuvaraja's College , Mysore
18	Syeda Farahna Parveen	Assistant Prof. Dept. of Microbiology St.Philomina's College, Mysore

19	Smt. Vanitha	Assistant Prof. Dept. of Microbiology Maharani's Science College,Mysore
20	Smt. Revanamba	Assistant Prof. Dept. of Microbiology Maharani's Science College,Mysore

22	Mahadeva prasad	Assistant Prof. Dept. of Microbiology JSS College for Women Saraswathipuram,Mysore

## SEMESTER I

### Paper -I BIOMOLECULES

(30 hours -2 Credits)

#### SECTION-I : Amino Acids & Proteins:

09 Hrs

1. Introduction to Bio-chemistry.
2. **Amino Acids:** Definition, biological functions of Amino acids. Classification based on the nature of "R" groups (Polarity). Stereoisomerism and RS system of designating optical isomers (D & L rotation). Protein and non-protein amino acids. Specialized role of amino acids. Physical and Chemical properties of amino acids. Titration curve of amino acids.
3. **Proteins:** Peptide bond formation and structure, classification of proteins based on structure with examples. Secondary structure: -  $\alpha$ -Helix,  $\beta$ -sheet,  $\beta$ -barrel and  $\beta$ -turn. Tertiary structure – Fibrous proteins (collagen) and Globular proteins (Myoglobin). Quaternary Structure– hemoglobin. Denaturation and renaturation of proteins by Anfinsen's experiment. Salting in & salting out of proteins.

#### SECTION-II: Carbohydrates:

08 Hrs

1. Definition, classification and biological functions of carbohydrates.
2. Monosaccharides-Fischer and Haworth structures of monosaccharides. Derivatives of monosaccharides (Sugar acids, deoxysugars, amino sugars and their biological importance). Oligosaccharides (structure of maltose, lactose, sucrose, cellobiose, trehalose) and functions.
3. Homo-and hetero-polysaccharides (structures of starch, glycogen, cellulose, chitin). Polysaccharides of bacterial cell wall.

#### SECTION-III: Lipids

08 Hrs

1. Definition and classification and biological functions of lipids, fatty acids (saturated and unsaturated). Essential fatty acids and its functions. Physical properties of lipids- melting point, boiling point and their relation to molecular size. Fats as source of energy. Waxes.
2. Structures and functions of Lipids: Triacylglycerols, phospholipids: lecithins (PhosphatidylCholines), cephalins (Phosphatidylethanolamines), Phosphatidylserines, phosphatidyl inositol, sphingomyelins, plasmalogens), cerebrosides, gangliosides.
3. Lipoproteins—Composition, classification and biological functions.
4. Prostaglandins, Leukotrienes, Thromboxanes and their importance.

#### SECTION-IV: Nucleic Acid

05 Hrs

1. Nucleic Acids: Structure and properties of purine and pyrimidine bases. Nucleosides and nucleotides. Biologically important nucleotides. Double helical model of DNA. Denaturation of DNA. Physical and chemical properties of nucleic acids.

## **PRACTICALS**

**(15 Hrs -1 Credit)**

1. Calibration of volumetric glassware's (Burette, pipette). **3 Hrs**
2. Qualitative tests for : (a) Carbohydrates. (b) Amino acids and proteins (c) Cholesterol and lipids **3 Hrs X 2**
3. Estimation of amino acid by formal titration **3 Hrs**
4. Estimation of reducing sugars by DNS method **3 Hrs**

**ENZYMOLGY AND BIOENERGETICS****SECTION-I : Enzymology****08 hrs**

**Introduction to enzymes** - General characteristics of enzymes. Prosthetic group. Holoenzymes, apoenzyme and cofactors. Coenzymes and their biochemical functions, assay of enzyme activity, units of enzyme activity. Active sites(s) of enzymes. IUB system of nomenclature and classification of enzymes. Theories of enzymes catalysis: Acidbase catalysis, covalent catalysis.

**SECTION-II: Enzyme Purification :****08 hrs**

Isolation and purification of enzymes- Preliminary fractionation procedures and precipitation techniques. Chromatography methods: Principle, Construction and applications of Gel filtration, adsorption, ion exchange and affinity chromatography. Criteria of enzyme purity.

**SECTION-III : Enzyme Kinetics****09 hrs**

Factors affecting velocity of enzyme catalysed reactions (Enzyme concentration, pH and temperature). Michaelis –Menten equation. Determination of  $K_m$  and its significance. Enzyme inhibition- Reversible inhibition (competitive, uncompetitive, non-competitive). Antibiotics as inhibitors. Allosteric enzymes and enzyme regulation. Isoenzymes and their clinical significance.

**SECTION-IV: Bioenergetics****05 hrs**

Laws of thermodynamics, Entropy, Enthalpy, Gibbs free energy. Types of reactions- Endergonic & Endergonic. Structure and role of ATP & other high energy compounds (Phosphocreatine, phosphoenolpyruvate). Redox reactions, Redox potential and its applications. Commercial importance of enzymes

**PRACTICALS****(15 Hrs – 1 Credit)**

1. Assay of salivary amylase enzyme activity. **3 Hrs**
2. Effect of pH on enzyme activity. **3 Hrs**
3. Effect of temperature on enzyme activity **3 Hrs**
4. Effect of substrate concentration on enzyme activity and determination of  $K_m$  and  $V_{max}$  **3 Hrs**
5. Effect of activators (NaCl) on salivary enzyme activity **3 Hrs**

## Semester III

### Paper – III

(30 hours-2 Credits)

## **METABOLISM**

### **SECTION-I: Carbohydrate Metabolism**

**08 Hrs**

Digestion, Absorption and transport of Carbohydrates, Metabolic Pathways- Glycolysis, TCA cycle, Pentose Phosphate Pathway, Glucuronate pathway, Glycogenolysis & Glycogenesis, Gluconeogenesis. Diseases associated with carbohydrate metabolism.

### **SECTION-II: Lipid Metabolism**

**08 Hrs**

Digestion, absorption & Transport of Lipids,  $\beta$ -Oxidation of fatty acids.  $\alpha$  and  $\omega$  oxidation of fatty acids. Degradation of triglycerides and phospholipids. Formation and utilization of ketone bodies. Biosynthesis of saturated fatty acids, Biosynthesis of Cholesterol. Diseases associated with Lipid metabolism.

### **SECTION-III: Protein Metabolism**

**08 Hrs**

Digestion, absorption & transport of Proteins, General Reactions of Amino Acids : Deamination, transamination and decarboxylation. Urea cycle and its significance. Ketogenic and glucogenic amino acids. Biosynthesis of amino acids (Phenyl alanine and Glutamic acid) and their degradation. Diseases associated with Proteins metabolism.

### **SECTION-IV: Nucleic acid Metabolism**

**06 Hrs**

Degradation of purines and pyrimidines. Biosynthesis of purines, pyrimidine nucleotides. Catabolism of Heme & Formation of Bile pigments. Diseases associated with Nucleic acid metabolism.

## **PRACTICALS**

**(15 Hrs = 1 Credits)**

1. Estimation of protein by Biuret method. **3 Hrs**
2. Estimation of Ca<sup>+</sup> in serum. **3 Hrs**
3. Estimation of iron in drumsticks **3 Hrs**
4. Estimation of creatinine in serum **3 Hrs**
5. Estimation of uric acid in urine **3 Hrs**

## Semester IV

### Paper IV

(30 hours -2 Credits)

## BIOCHEMICAL TECHNIQUES

### SECTION-I: Spectroscopic Techniques 8 Hrs

:  
Beer-Lambert's Law. Light absorption and its transmittance. Determination and application of extinction coefficient. Principle and Applications of following spectroscopic techniques - U.V.- Visible, infra-red, Fluorescent emission and NMR spectroscopy.

### SECTION-II: Electrophoretic & Centrifugation Techniques 8 Hrs

Principles and applications of the following electrophoresis techniques. Paper electrophoresis, PAGE, SDS- PAGE.

Principle of differential and density gradient centrifugation. Ultra centrifuge – construction and applications

### SECTION-III: Chromatographic Techniques 8 Hrs

Principles of Adsorption and Partition chromatography. Techniques of ascending, descending, circular paper chromatography.

**Thin Layer Chromatography**-Technique and advantages over paper chromatography

**Column chromatography** – Principle and applications of Gel Filtration chromatography, ion – exchange chromatography.

### SECTION-IV: Radio Isotopic Techniques 6 Hrs

Properties of radioactive emissions. Units of radioactivity. Isotopes and their applications in biological studies -  $^3\text{H}$ ,  $^{14}\text{C}$ ,  $^{131}\text{I}$ ,  $^{60}\text{CO}$ , and  $^{32}\text{P}$ . Techniques used to measure radioactivity- GM counter. Biological hazards of radiation and safety measures in handling radioisotopes.

### PRACTICAL

(15 Hrs = 1 Credits)

- |  |              |
|--|--------------|
| 1. Identification of amino acids by circular paper chromatography. | <b>3 Hrs</b> |
| 2. Identification of amino acids by ascending Paper chromatography | <b>3 Hrs</b> |
| 3. Separation of phospholipids by thin layer chromatography.       | <b>3 Hrs</b> |
| 4. Separation of leaf pigments by column chromatography            | <b>3 Hrs</b> |
| 5. Separation of proteins by PAGE                                  | <b>3 Hrs</b> |
| 6. Estimation of protein by Lowry/BCA method.                      | <b>3 Hrs</b> |

## Semester V

### Paper V

(60 hours-4 Credits)

#### BIOCHEMISTRY AND NUTRITION-1

##### SECTION-I: Introduction

15 Hrs

Concept of Nutrition, Calorific value of foods and its determination (Bomb calorimeter), different components of energy expenditure, measurement of energy expenditure by direct and indirect calorimetric method (principles only) Energy expenditure at rest and work, respiratory quotient, Basal Metabolic Rate (BMR), determination of BMR by indirect calorimetric method, factors affecting BMR. Specific dynamic action of foods.

##### **Proximate analysis of food samples:**

Moisture, fiber, ash, proteins, carbohydrates, fats and their importance

**Water Metabolism:** Distribution in the body, factors maintaining water balance and factors influencing water balance

##### SECTION-II: Proteins

15 Hrs

Review of functions of proteins in the body, Digestion and absorption. Essential and Nonessential amino acids. Amino Acid Availability Antagonism, Toxicity and Imbalance, Amino acid Supplementation. Effects of deficiency. Food source and Recommended Dietary Allowances for different age group. Amino acid pool. NPU, Biological Value, Nitrogen balance. PEM and Kwashiorkor

##### SECTION-III: Vitamins

15 Hrs

Classification, example with structure, dietary sources, daily requirement, biological roles and deficiency disorders with symptoms– Thiamine, Riboflavin, Niacin, pantothenic acid, Pyridoxine, Biotin, Folic acid and Vitamin C .

Structures, dietary sources, daily requirement, biological roles and deficiency disorders with symptoms- Vitamin A, D, E & K. Hypervitaminosis.

##### SECTION-IV: Minerals

15 Hrs

Dietary sources, physiological functions, deficiency disorders, absorption, balance and excretion of Macro nutrients- Ca, P, Na, K, Cl and Micronutrients – Fe, Zn, Cu, I & Mg.

##### PRACTICAL

(30 Hrs = 2 Credits)

1. Estimation of haemoglobin in blood. 3Hrs
2. Identification of Sugars in fruit juice using paper chromatography. 3Hrs
3. Estimation of vitamin E in serum. 3Hrs
4. Determination of proteins by dye binding assay. 3Hrs
5. Proximate analysis of food samples- Moisture, fibre, protein fat and carbohydrate 3HrsX3
6. Detection of adulterants in food. 3Hrs
7. Estimation of Calcium in ragi. 3Hrs
8. Estimation of Vitamin – C in lemon or gooseberries by DPPH method 3Hrs

## SEMESTER VI

### Paper -VI

(60 hours -4 Credits)

#### BIOCHEMISTRY AND NUTRITION-2

##### **SECTION-I: Dietary Carbohydrates & Health**

**15 Hrs**

Review functions of carbohydrates. Digestion, absorption, utilization and storage, hormonal regulation of blood glucose. Dietary requirements and source of carbohydrates, Dietary fiber, role of fiber in lipid metabolism, colon function, blood glucose level and GI tract functions.

##### **SECTION-II : Dietary Lipid & Health**

**15 Hrs**

Review of classification, sources, functions, digestion, absorption, utilization and storage. Essential Fatty Acids; Functions of EFA, RDA, – excess and deficiency of EFA. Lipotropic factors, role of saturated fat, cholesterol, lipoprotein and triglycerides. Importance of the following: a) Omega – fatty acids. Omega 3/ omega 6 ratio b) Phospholipids c) Cholesterol in the body d) Mono, Polyunsaturated and Saturated Fatty Acids. Dietary implications of fats and oils, Combination ratios of n6 and n3, MUFA, PUFA and SFA

##### **SECTION-III : Digestion & Antinutritional factors**

**15 Hrs**

Gastrointestinal tract secretions - Composition and functions of Saliva, gastric, bile, pancreatic and intestinal Juices. Appetite, gastrointestinal tract hormones.

Digestion, absorption and transport of Proteins.

**Antinutritional factors:** Sources and harmful effects of anti vitamins (e.g.: avidin, dicumarol), Protease inhibitors, oxalates and fitates. Natural toxicants, (e.g.: Lathyrus sativa). Food adulterants- structure and harmful effects of - Butter yellow, lead chromate and malachite green.

##### **SECTION-IV- Assessment of Nutritional Status, Food & Drug Interactions**

**15 Hrs**

Anthropometric measurements; Z scores, BMI, skinfold, circumference ratios. Biochemical assessment; Basal metabolic panel, Comprehensive metabolic panel, CBC, Urine Analysis, Assessment of Anemia, ROS assessment, GTT and glycosylated Hb, Differential diagnosis of B12 and folate.

Nutrient interactions affecting ADME of drugs, Alcohol and nutrient deficiency, Antidepressants, psychoactive drugs and nutrient interactions, Appetite changes with drug intakes and malnutrition. Food as medicine.

## **PRACTICAL**

**(30 Hrs = 2 Credits)**

1. Estimation of DNA by diphenylamine method. **3Hrs**
2. Determination of saponification value of an oil or fat. **3Hrs**
3. Determination of Iodine value of an oil or fat. **3Hrs**
4. Determination of Acid value of an oil or fat. **3Hrs**
5. Estimation of SGPT in serum **3Hrs**
6. Estimation of SGOT in serum. **3Hrs**
7. Extraction of RNA from yeast and its estimation by Orcinol method. **3Hrs**
8. Determination of total protein and A/G ratio in serum. **3Hrs**
9. Estimation of serum phospholipids. **3Hrs**
10. Immobilization of enzymes/ cells by entrapment in alginate gel **3Hrs**
11. Demonstration of ELISA **3Hrs**

## SEMESTER VII

### Paper VII: Food Chemistry

Theory: 30 Hrs

Sl. No.		Hrs
1.	Introduction to food chemistry, its role in processing and food formulations	1
2.	Moisture in foods: Role and type of water in foods, Functional properties of water, role of water in food spoilage, Water activity and sorption isotherm, Molecular mobility and food stability.	2
3.	Dispersed systems of foods: Physicochemical aspects of food dispersion system: a) Sol b) gel c) foam d) emulsions.	1
4.	Carbohydrates: Functional characteristics of different carbohydrates. Maillard reaction, caramelization, methods to control non enzymatic reactions. Starch and Dietary fibres, Functional properties of polysaccharides, natural vegetable gums, carbohydrate composition of various natural foods.	5
5.	Proteins in foods: Protein content and composition in various foods- cereal grains, legumes and oilseed proteins, proteins of meat, milk, egg and fish. Functional properties of proteins in foods – water and oil binding, foaming, gelation, emulsification. Effect of processing on functional properties of proteins-heat processing alkali treatments, chilling, freezing, dehydration and radiations. Unconventional sources of proteins- SCP fish protein concentrates, leaf proteins	5
6.	Lipids in foods: Role and use of lipids /fat, occurrence, fat group classification, Physicochemical aspects of fatty acids in natural foods, hydrolysis, reversion,. Chemical aspects of lipolysis, auto-oxidation, antioxidants, Technology of fat and oil processing: Refining, Hydrogenations, Inter etherification, Safety use of oils and fats in food formulation.	5
7.	Vitamins and minerals, Dietary sources, requirements, Allowances, Enrichment, Restorations, Fortifications, Losses of vitamins and minerals, Optimization and retention of vitamins and minerals	2
8.	Enzymes in food industry, Carbohydrases (Amylases, cellulases, pectinases,) Proteases, Lipases and oxidases in food processing.	2
8.	Chemistry of food flavour: definitions of flavour, Flavourmatics / flavouring compounds, Sensory assessment of flavour, Technology for flavour retention.	2
9.	Food colours, natural and synthetic, Regulatory aspects –Natural and synthetic permitted food colours.	1
10.	Food toxicants – anti nutritional factors and their occurrence, effects and methods of elimination or inactivation- protease inhibitors, lectins, lathyrogens, phytates and flatulence factors.	2
11.	Food Contaminants, Pesticidal residues – permitted limits. Toxicology and	2

public health.

<b>Sl. No.</b>	<b>Practical</b>	<b>Hrs</b>
1.	Determination of moisture content of foods using different methods	3
2.	Determination of crude proteins by microkjeldahl method	3
3.	Determination of crude fat by soxlet method	3
4.	Sensory acceptability of food products: Physical Attributes (Appearance, color, texture, taste and overall acceptability).	3
5.	Determination of minerals and acid insoluble ash and estimation of Calcium and phosphorus	3
6.	Assay of amylases, papain and lipases	3
7.	Estimation of iron in drumsticks	3
8.	Determination of food colors	3

## **B.Voc Degree Examinations according to NEP 2021**

**60 : 40 pattern**

Theory papers: Total marks = 100 marks

C1= 20 marks(IA)C2= 20marks(IA)

C3= 60marks (Main exam.)

Practical papers: Total marks = 50 marks

C1= 10 marks (IA)

C2= 10 marks(IA) +05(Record)

C3= 25 marks (Main Exam.)

IA = Internal assessment (Assignment/seminar/test/viva-voce).

**MODEL QUESTION PAPER**

**BIOCHEMISTRY**

**TIME : 2.30 hrs**

**MAX. MARKS: 60**

**NOTE: ALL SECTIONS ARE COMPULSORY**

**SECTION – A**

1. Answer any FIVE of the following

5 x 2 = 10

- a.
- b.
- c.
- d.
- e.
- f.
- g.

**SECTION – B**

Answer any FOUR of the following

4x 5 =20

- 2.
- 3.
- 4.
- 5.
- 6.
- 7.

**SECTION – C**

Answer any THREE of the following

3 x 10 = 30

- 8.
- 9.
- 10.
- 11.
- 12.

**Note: section C may include sub questions a, b**

---

B.Voc DEGREE EXAMINATION

MODEL QUESTION PAPER (PRACTICALS)

BIOCHEMISTRY

**Time: 3 h**

**Max. Marks: 25**

1. Write the principle and procedure of \_\_\_\_\_ experiment 05
  2. Major experiment (Conduct and report the results) 15
  3. Viva-voce 05
-

# **JSS COLLEGE OF ARTS, COMMERCE & SCIENCE**

(An Autonomous College of University of Mysore)

Re-accredited by NAAC with 'A' grade

**OOTY ROAD, MYSORE-570 025, KARNATAKA**

ESTD-1964

## **SYLLABUS**

**B. Voc. (Food Processing & Engineering)**

**2021-22**

**DEPARTMENT OF COMPUTER SCIENCE**

**Revised Scheme of Instruction for B.Voc – Food Processing & Engineering 2016-17****General Education Component – Computer Science**

<b>Semester</b>	<b>Title</b>	<b>L: T: P</b>	<b>Theory Hrs</b>	<b>Tutorial Hrs</b>	<b>Practical Hrs</b>	<b>Total Hrs</b>	<b>Credits</b>
Semester I	COMPUTER FUNDAMENTALS & DOS	2:0:1	30	0	15	45	3
Semester II	C PROGRAMMING	2:0:1	30	0	15	45	3

**SEMESTER I**  
**COMPUTER SCIENCE**  
**PAPER - I**  
**COMPUTER FUNDAMENTALS & DOS**

(2 hrs theory / week)  
Credits

**30 hours - 2**

**SECTION- I**

**15 Hours**

**INTRODUCTION**

Computer, Characteristic of Computer, History of Computer, Generation of Computers, Components of Computer and Applications of Computers.

Key Factors of Computers: Hardware, Software - types of Software (Application and system), forms of software (firmware, shareware, freeware), Translator - Assembler, Compiler and Interpreters. Computer Application – Business, Scientific, Entertainment and educational.

**CLASSIFICATION OF COMPUTERS**

Mode of operations – Analog, Digital and hybrid Computers.

Size and capabilities – Micro, Mini, Main frame and Super computer.

**MEMORY UNITS**

Primary memory - RAM, ROM, PROM, EPROM, EEPROM, Flash memory, cache memory.

Secondary memory – Magnetic disk (Hard disk, Floppy disk, Zip disk, Jaz disk, Super disk), Optical disk (CD, CD – R, CD – RW, DVD).

**COMPUTER PERIPHERALS DEVICES AND INTERFACES**

Input devices – Working principle of Keyboard and mouse, Functional capabilities of Scanner, Digital Camera, OMR, OCR, touch pad, touch screen. Output Devices – Monitor, Printer, Plotter and projector.

**PROGRAMMING LANGUAGES**

Machine, Assembly language and High Level Language.

**INFORMATION SYSTEM**

Data and Information, types of information, what is an information System, Types of Information Systems — System development life cycle.

## **SECTION- II**

**15 Hours**

### **OPERATING SYSTEM AND THE USER INTERFACE**

Operating System– Functions, services, Types-Batch, Single, Multiprogramming, and Multiprocessing.

Operating System – the user interface –running programs –managing hardware –enchaining the operating system with utility software- typical operating systems in use

### **COMPUTERS AND COMMUNICATION**

Single user, multi-user, workstation, and client server systems. Computer networks, Types of Network LAN, WAN, Internet, Internet applications, WWW, Email, FTP, web browsers (Internet explorer, Google Chrome, Mozilla).

### **DISK OPERATING SYSTEM (DOS)**

Introduction, History & version of DOS. DOS basics – physical structures of disk, drive, Name, FAT, File & Directory structure and Naming Rules, Booting Process, DOS System files, role of config.sys file.

### **DOS COMMANDS**

Internal – DIR, MD, CD, RD, COPY, DEL, REN, VOL, DATE, TIME, CLS, PATH, TYPE etc.

External – CHKDSK, XCOPY, PRINT, DISK COPY, DISKCOMP, DOSKEY, TREE, MOVE, LABEL, APPEND, FORMAT, SORT, FDISK, BACKUP, EDIT, MODE, ATTRIB, HELP, SYS, WILD CARD Characters etc.

Executable V/S Non executable Files in DOS.

### **TEXT BOOKS:**

- Peter Norton’s ‘Introduction to Computers’, Second Edition, TMH
- Computer Fundamentals – P K Sinha, BPB

### **REFERENCE BOOKS :**

- Introduction to Computers – N Subramanian, TMH
- Understanding Computers – R Rajagopalan. TMH
- Computers Today – Donald Sanders, MGH

BCA Question Paper Pattern

Time 3 Hours

Max. Marks: 60

Part A

I. Answer any 2 sub questions from each main

3 X 10 = 30

1. A.  
B.  
C.

2 X 5 = 10

2. A.  
B.  
C.

2 X 5 = 10

3. A.  
B.  
C.

2 X 5 = 10

Part B

II. Answer all Questions from the following

3 X 10 = 30

4. A.  
B.

OR

10

10

5. A.  
B.

OR

10

10

6. A.  
B.

OR

10

10

(Note: one Question from each Unit and marks of Questions may have internal split-ups. )

BSc Question Paper Pattern

Time 3 Hours

Max. Marks: 60

Part A

I. Answer all Questions from the following

04 X 05 = 20

1. A.

05

OR

B.

05

2. A.

05

OR

B.

05

3. A.

05

OR

B.

05

4. A.

05

OR

B.

05

Part B

II. Answer all Questions from the following

04 X 10 = 40

5. A.

10

OR

B.

10

6. A.

10

OR

B.

10

7. A.

10

OR

B.

10

8. A.

10

OR

B.

10

(Note: one Question from each Unit and marks of Questions may have internal split-ups.)

BCA / B.Sc. Question Paper Pattern

Time 2 Hours

Max. Marks: 30

Part A

I. Answer any Five sub questions from the following

05 X 02 = 10

1. A.
- B.
- C.
- D.
- E.
- F.

Part B

II. Answer any Four questions from the following

04 X 05 = 20

1. A.
- B.
- C.
- D.
- E.

(Note: one Question from each Unit and marks of Questions may have internal split-ups. )

## **SYLLABUS**

### **B.VOC. (FOOD PROCESSING & ENGINEERING)**

**2021-2022**

### **DEPARTMENT OF FOOD PROCESSING AND ENGINEERING**

## General Component

### Semester - VII

Sl. no.	PRODUCT DEVELOPMENT AND ENTRPREUNERSHIP	Hrs
1	<p>Sensory evaluation of foods - Importance, need and application for product formulation, Basic tastes, threshold tests for basic tastes, Sensory panel, type, selection and training.</p> <p>Types of sensory tests- Subjective and objective sensory evaluation.</p> <p>Instrumental tests for sensory attributes – color, texture and odor.</p>	8
2	<p>Product Development - Designing new product – types and drawing forces, Need for product development.</p> <p>Stages of product development, Consumer research.</p> <p>Role of sensory evaluation in consumer product acceptance.</p>	5
3	<p>Entrepreneurship - Starting and managing an enterprise - Steps in preparing a business plan, Components of management, Developing managerial skills, Managing a food industry.</p> <p>Factors influencing entrepreneurship groups</p> <p>Qualities of an entrepreneur</p>	6
4	<p>Consumer Behaviour &amp; Marketing - Factors influencing food purchases, product acceptance, purchasing trends. Changing food trends.</p>	3
5	<p>Special food processing technologies and novel food ingredients – Membrane technology (reverse osmosis and ultra-filtration), agglomeration, agitation, air classification, extrusion, automation in food industries.</p>	8

<b>Sl. no.</b>	<b>Practical</b>	<b>Hrs</b>
1	Sensory analysis: Different types of sensory tests for basic tastes and sensory attributes of products.	5
2	Project on different sensory techniques and responses utilizing prepared food products, analysis and presentation of sensory data.	3
3	Stepwise development of a new food product, standardization, acceptability studies and submission of project report.	4
4	Survey on types of convenience foods / consumer behaviour / analysis of food labelling.	3

## General Component

### Semester – VIII

Sl. No.	Food Standards, Regulatory Affairs and IPR Issues	Hrs
1.	Introduction to concepts of food quality, food safety, food quality assurance and food quality management; objectives, importance and functions of quality control, Current challenges to food safety	3
2.	Principles of food quality assurance, total quality management (TQM)–good manufacturing/management practices, good hygienic practices, good lab practices, general awareness and role of management practices in quality control	3
3.	Microbial quality control: determination of microorganisms in foods by cultural, microscopic, physical, chemical methods. Statistical quality control in food industry Food adulteration, nature of adulterants, methods of evaluation of food adulterants and toxic constituents	3
4.	Food safety management, applications of HACCP in food safety, concept of food trace ability for food safety, Food safety and Standards Act 2006: salient provision and prospects	3
5.	Role of national and international regulatory agencies, Bureau of Indian Standards (BIS), AGMARK, Food Safety and Standards Authority of India (FSSAI)	3
6.	Introduction to WTO agreements: SPS and TBT agreements, Codex Alimentarius Commission, International organization for standards (ISO) and its standards for food quality and safety (ISO 9000 series, ISO 22000, ISO 15161, ISO 14000)	5
7.	Food safety in USA, USFDA, Legislation in Europe: Directives of the official journal of the EU, council regulations, food legislation in UK. Regulating methods for food analysis, case studies. Enforcers of Food Laws Approval Process for Food Additives, Nutritional Labeling	5
8.	Concept of property, rights, duties and their correlation; History and evaluation of IPR; Copyrights and related rights. Distinction among Various forms of IPR. Patent rights/protection and procedure; Infringement or violation; Remedies against infringement; Indian Patent Act 1970 and TRIPS; Geographical	5

	indication and Industrial design	
<b>Sl. No.</b>	<b>Practical</b>	<b>Hrs</b>
1.	<p>Study of food regulations in various countries ;</p> <p>study of nutritional labeling of packaged food items by visiting food market, Visit the websites of FSSAI, BIS, AGMARK, ISO, Codex Alimentarius Commission , USFDA</p> <p>Study of patent law in India and the procedure for grant of patent in India</p>	15

<b>B.Voc (Food Processing and Engineering) Syllabus</b>		
<b>Honours degree</b>		
<b>NSQF Level: 8 – Semester I &amp; II</b>		
<b>Sub Sector: Fruits &amp; Vegetables</b>		
<b>Job Role: Head of Production</b>		
<b>UNIT I</b>		
<b>Post Harvest Management of Fruits</b>		
<b>S.No</b>	<b>THEORY</b>	<b>Hrs</b>
1.	General Introduction of fruits-citrus, tropical and subtropical, pome, stone, soft, and berry fruits, melons and watermelons	1
2.	Importance and scope of post harvest management of fruits, Morphology, structure and composition of fruits	2
3.	Maturity Indices and standards for standards for selected fruits, methods of maturity determination	2
4.	Post-harvest physiological and biochemical changes in fruits; ripening of climacteric and non-climacteric fruits	2
5.	Harvesting and handling of important fruits. Harvesting tools; field heat removal/precooling of fruits. Sorting and grading at farm and cluster level; factors affecting post harvest losses	2
6.	Nature of post harvest deterioration; physiological change- physical damage; chemical injury-pathological decay; identification of diseases and disorders in fruit-nutritional disorders, respiratory disorders, temperature disorders and miscellaneous disorders. Classification of diseases and diseases organisms, types of diseases and agents of diseases in fruits.	4
7.	Pre-cooling of fruits and cold storage, zero energy cool chamber	3
8.	Shelf life enhancement- permitted chemicals for ripening, wax coating	3
9.	Storage practices: Refrigerated storage, modified atmospheric storage-novel MAP gases and their role, novel MAP applications, Applying high oxygen MAP; MAP of minimally processed fruits; controlled atmosphere storage/ultra low oxygen storage of fruits, recent advances in CAP and MAP	9
<b>TOTAL</b>		<b>28</b>
<b>S.No</b>	<b>PRACTICALS</b>	<b>Hrs</b>
1.	Familiarization of various fruits available in India and categorization of fruits used for pulping	3
2.	Studies on morphological features of some of the fruits	3
3.	Studies on maturity indices; Studies on harvesting of fruits	3
4.	Studies on permitted chemicals for ripening and enhancing the shelf life of fruits	3
5.	Studies on regulations of ripening of banana and mango	3
6.	Studies on physiological disorders like chilling injury of certain fruits	3
7.	Studies on pre cooling and storage of fruits and vegetables	3
8.	Demonstration on wax coating on apples, citrus and Mango	3
9.	Studies on various storage systems and structures;	3
10.	Studies on pre packaging of whole and cut vegetables	3
11.	MAP of minimally processed fruits & vegetables	3
12.	Visit to commercial packaging houses for mango, banana, pomegranate, grapes	3

13.	Visit to Controlled Atmospheric packaging centres	4
14.	Visit to commercial storage structures for onion and potato	4
15.	Visit to multi chamber cold storages for fruits and vegetables	4
16.	Visit to Fruit Orchards -Observations on Pruning, orchard Hygiene, Irrigation, Manuring, Insect Pests, Pathological Spoilages, Pre-harvest spray schedules to control pathological spoilages and insect infestation	4
17.	Visit to Fruit Orchards - Studies on Causes for pre and post harvest losses. Spoilage factors, post harvest field operations including methods to reduce the post harvest losses	4
<b>TOTAL</b>		<b>56</b>

## UNIT II

### Technology for processing of Fruit Pulp

S.No	THEORY	Hrs
1.	Process of receiving, ripening, checking raw material quality, sorting, washing, cutting/slicing, deseeding/destining, pulping, precooking/pasteurization, sterilizing, aseptic packaging or canning, retort pouching, sampling for quality analysis and storing	2
2.	Machineries and tools used for the fruit pulping process such as fruit washer, peeler, slicer, fruit pulper, steam jacketed kettles, packaging machines etc	2
3.	Quality assessment of packaging materials	2
4.	Enzymes in quality and processing of tropical and sub tropical fruits	3
5.	Non thermal processing methods-ultra violet light, high pressure processing, ultrasound, ozone application, irradiation, pulsed electric field	7
6.	Introduction, canning machineries, various steps involved in canning of fruit pulp, syrup preparation, pretreatment for canning operation	7
7.	Canning of various fruits, process flow diagram for canning, filling, exhausting, sealing and processing operations	5
<b>TOTAL</b>		<b>28</b>

S.No	PRACTICALS	Hrs
1.	Canning of mango pulp	5
2.	Canning of tomato pulp	5
3.	Preservation of tomato pulp by chemical preservation method	5
4.	Preservation of banana pulp by freezing method	5
5.	Canning of mango slices in syrup	5
6.	Canning of pineapple slices in syrup	5
7.	Canning of banana slices in syrup	5
8.	Visit to fruit processing units and collection of data on wastes and by products	5
9.	Visit to Aseptic packing units for fruit pulps & concentrates	8
10.	Visit to the pilot plants of CFTRI & DFRL Mysore	8
<b>TOTAL</b>		<b>56</b>

## UNIT III

### Food Quality and Food Microbiology

S.No	THEORY	Hrs
1.	Introduction – definition, historical development and significance of food microbiology; Microscope; Classification & morphology of microbes; Techniques of pure culture; Bacteriology of air & water; Anti-microbial agents – physical & chemical – mechanism & action	3
2.	Sources of Contamination: Air, Water, Soil, Sewage, Post processing	3

	Contamination. Intrinsic & extrinsic factors influencing the growth of Microorganisms in foods	
3.	Disinfection & disinfectants; Energy metabolism of aerobic & anaerobic microbes; Thermal inactivation of microbes; Concept, determination & importance of TDT, F, Z & D values; Factors affecting heat resistance; Pasteurization and sterilization	4
4.	Microbiology of Fruits and vegetables and their products like jam, jelly, sauce, juice/pulp	3
5.	Food Quality aspects of Fruits & vegetables; Introduction, Quality principles, Quality enhancement model. Application of quality enhancement model	3
6.	Food Waste Treatment : Liquid waste, Solid waste vessel containers & wrapping waste, Hazardous waste .Quality and Safety of Frozen Foods: Fruits, Vegetable	3
7.	Measuring and Controlling Devices: Role of transducers measurements in food processing; Humidity, Turbidity and Color, Food & Process temperature controller and indicators. Statistical Quality Control for food Industry : Food Quality System, Fundamentals, Process control implementing quality control program, six sigma, RSM	4
8.	Food additives – preservatives, antioxidants, sequestrates, surface active agents, stabilizers and thickeners, bleaching and maturing agents, starch modifies, buffers, acids, alkalis, food colors, artificial sweeteners, nutritional additives, flavoring agents.	5
	<b>TOTAL</b>	<b>28</b>
	<b>PRACTICALS</b>	<b>3</b>
1.	Determination of firmness of fruits	3
2.	Determination of moisture content	3
3.	Titrate acidity estimation	3
4.	Estimation of SO <sub>2</sub> in food sample	3
5.	Estimation of sodium benzoate in food sample	3
6.	Estimation of polyphenol and polyphenol oxidase	3
7.	Estimation of Reducing sugar, Non-reducing and total sugars	3
8.	Determination of organic acid content	3
9.	Ascorbic acid estimation	3
10.	Determination of pH in food products	3
11.	Determination of total Ash	3
12.	Determination of total soluble solids	3
13.	Estimation of ash content	3
14.	Estimation of crude fibre	3
15.	Estimation of pectin	3
16.	Flow process chart of food plant Waste utilization processes, various treatment for waste disposal analysis of cleaners & sanitizers, CIP Cleaning	11
	<b>TOTAL</b>	<b>56</b>
<b>UNIT IV</b>		
<b>Food Safety, Hygiene and Sanitation for Processing of Fruit Pulp</b>		
<b>S.No</b>	<b>THEORY</b>	<b>Hrs</b>
1.	Food safety, hygiene and sanitation for processing of fruit pulp: food safety standards and regulations for fruit pulp, definition of hygiene, hygiene practices and its importance at every stage of fruit pulp processing at industrial level; personal hygiene requirements; physical, chemical and biological hazards and methods for prevention of various hazards; CIP and	14

	COP methods and procedures, GHP, GMP and HACCP; waste management-pre and post production.	
2.	Microbiological aspect of Food; types of food microbes, causes of food spoilage, types of food spoilage/deterioration, criteria to check the food spoilage, need for food preservation, different types of food preservation methods, method of assessing the quality of products based on physical parameters	14
	<b>TOTAL</b>	<b>28</b>
<b>S.No</b>	<b>PRACTICALS</b>	<b>Hrs</b>
1.	Clean and maintenance of work area using appropriate sanitizers, ensure the work area safe and hygienic for fruit processing, disposal of waste material as per SOPs and industrial requirement	8
2.	Check the working and performance of machineries and tools for fruit pulp process, clean the machineries and tools used with recommended sanitizer, to place the necessary tools required for the process, to attend minor repair, faults of all machineries if required.	8
3.	Disassembling and assembling of machineries used in fruit pulp industry (Fruit mill, crusher etc)	8
4.	Demonstration of CIP and COP methods of cleaning the machines with approved sanitizers	8
5.	Visit to industry to learn about GHP, GMP, HACCP	12
6.	Visit to industry to learn about waste management pre and post production	12
	<b>TOTAL</b>	<b>56</b>
<b>S.No</b>	<b>UNIT V</b>	<b>Hrs</b>
<b>Plant Design, Plant Economics and Plant Management</b>		
1.	Food Industry management- location of plant land and building requirements, plant capacity, plant and machinery requirement, building and plant layout, utilities, byproducts, waste, energy and safety audit, manpower requirements	5
2.	Introduction to economics: Meaning, scope, and contribution to business decisions. Analysis of Demand: Law of demand, Utility function, Rate of commodity substitution, Maximization of utility, Demand functions, Indifference curve analysis, Substitution and income effects. Market demand and demand elasticities: concept of market demand, price and income elasticities of demand, importance of elasticity. Demand forecasting: causes and techniques of demand forecasting	6
3.	Analysis of supply and market equilibrium: Law of supply, price elasticity of supply, equilibrium of demand and supply. Theory of the Firm: Production function, returns to scale, Optimizing behavior, Input demands, Cost functions, Profit maximization, economics & diseconomies of scale, break even analysis. Market structures perfect competition: Profit maximization and equilibrium of firm and industry, Short run and long run supply curves; Price and output determination, practical applications	6
4.	Plant maintenance program; Role of maintenance staff and plant operators, Preventive maintenance; Guidelines for good maintenance & safety precautions; Lubrication & lubricants; Work place improvement through '5S'. Hygiene and sanitation requirement in food processing and fermentation industries; CIP methods, sanitizing & disinfestation, pest control in food processing; storage and service areas	6
5.	Supply chain management for fruits	5

		<b>TOTAL</b>	<b>28</b>
<b>PRACTICALS</b>			
1.	Visit to industry to learn the management system		16
2.	Visit to Fruit & Vegetable Processing Industries. Preparation of a Business Plan for setting up fruit & vegetable processing unit		40
		<b>TOTAL</b>	<b>56</b>

VI	<b>Hands on Training in Fruit Pulp Processing Industry and submission of report</b>		120

<b>2. Trainer Prerequisites</b>	<b><u>09</u></b>
<b>3. Annexure: Assessment Criteria</b>	<b><u>10</u></b>

# Fruit Pulp Processing Technician

## CURRICULUM / SYLLABUS

This program is aimed at training candidates for the job of a “Fruit Pulp Processing Technician”, in the “Food Processing” Sector/Industry and aims at building the following key competencies amongst the learner

<b>Program Name</b>	<b>Fruit Pulp Processing Technician</b>		
<b>Qualification Pack Name &amp; Reference ID. ID</b>	FIC/Q0106, v1.0		
<b>Version No.</b>	1.0	<b>Version Update Date</b>	12/01/2016
<b>Pre-requisites to Training</b>	Preferably Class 8 and 2-3 years' experience in a food processing unit		
<b>Training Outcomes</b>	The programme will help in building the following key competencies amongst the learner: Process fruits to produce fruit pulps manually or through machine operation; Plan, organize, prioritize, inspect, and calculate production requirements; Maintain process parameters to achieve the desired quality and quantity; Follow and maintain food safety and hygiene in the work environment		

This course encompasses 5 out of 5 National Occupational Standards (NOS) of “Fruit Pulp Processing Technician” Qualification Pack FIC/Q0106, Version 1.0 issued by Food Industry Capacity and Skill Initiative”.

Sr. No.	Module	Key Learning Outcomes	Equipment Required
1	<p><b>Introduction to the training program</b></p> <p><b>Theory Duration</b> (hh:mm) 00:30</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b> Bridge Module</p>	Introduce each other and build rapport with fellow participants and the trainer.	White board/Chart papers, marker
2	<p><b>Overview of the “Fruit Pulp processing technician” Role</b></p> <p><b>Theory Duration</b> (hh:mm) 01:00</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b></p>	<p>Understanding the roles and responsibilities of fruit pulp processing technician</p> <p>Awareness of the nature and availability of job opportunities</p>	Laptop/computer white board, marker, projector, chart papers
3	<p><b>Introduction to the Food Processing Industry</b></p> <p><b>Theory Duration</b> (hh:mm) 01:30</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b></p>	<p>Define food processing</p> <p>List the various sub sectors of food processing industry</p>	Laptop, white/black board, marker, chart papers, projector, Trainer’s guide, Student manual
4	<p><b>Introduction to Fruit &amp; Vegetable Processing</b></p> <p><b>Theory Duration</b> (hh:mm)</p>	<p>State the need for fruit and vegetable processing</p> <p>State the common methods of fruit and vegetable processing</p>	Laptop, white/black board, marker, chart papers, projector, trainer’s guide, student handbook, pictures/charts of

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	02:00  <b>Practical Duration</b> (hh:mm) 01:00  <b>Corresponding NOS Code</b>		different subsectors in fruit and vegetable processing e.g. pickle, jam and jelly, ketchup, juices, squashes, fruit pulp etc.
5.	<b>Overview of Fruit Pulp Processing</b>  <b>Theory Duration</b> (hh:mm) 03:00  <b>Practical Duration</b> (hh:mm) 01:00  <b>Corresponding NOS Code</b> FIC/N0120 FIC/N0121 FIC/N0122 FIC/N0123	Define fruit pulping List the various fruits used for pulping Describe the pulping process	Laptop/computer white board, marker, projector, chart papers, Trainer's guide , student handbook
6.	<b>Organizational standards and norms</b>  <b>Theory Duration</b> (hh:mm) 05:00  <b>Practical Duration</b> (hh:mm) 01:00  <b>Corresponding NOS Code</b> FIC/N0120 FIC/N0121 FIC/N0122 FIC/N0123 FIC/N9001	State the roles and responsibilities of a jam, jelly and ketchup processing technician State how to conduct yourself at the workplace State the personal hygiene and sanitation guidelines State the food safety and hygiene standards to follow in an organization	Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook, protective gloves, head caps, aprons, safety goggles, safety boots, mouth masks, sanitizer, safety manual
7.	<b>Prepare and Maintain Work Area and Process Machineries for pulp processing</b>  <b>Theory Duration</b> (hh:mm)	<ul style="list-style-type: none"> <li>Identify different equipments used in fruit pulp processing</li> <li>State the materials and equipments used in cleaning and maintenance of the work area and machineries</li> <li>State the cleaning processes used to clean the work area</li> </ul>	Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook, authorized sanitizers, cleansers, all equipments for demonstration

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	08:00  <b>Practical Duration</b> (hh:mm) 15:00  <b>Corresponding NOS Code</b> FIC/N0120 FIC/N0121 FIC/N0122 FIC/N0123 FIC/N9001	<ul style="list-style-type: none"> <li>• Demonstrate the use of different tools and machineries used for squash and juice</li> <li>• Demonstrate the appropriate method for cleaning and maintain a work area Ensure the work area is safe and hygienic for food processing</li> <li>• Identify and set the machines and tools required for production in working condition</li> <li>• Maintain cleanliness of the process machineries required for production using recommended sanitizers</li> </ul>	
8.	<b>Food Microbiology</b>  <b>Theory Duration</b> (hh:mm) 06:00  <b>Practical Duration</b> (hh:mm) 02:00  <b>Corresponding NOS Code</b>	State the types of food microbes State the causes of food spoilage State the process of food spoilage state the criteria to check food spoilage State the need for food preservation State different types of food preservation processes Explain the method of assessing the quality of produce based on physical parameters	Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook, samples of fresh and spoiled food
9..	<b>Prepare for production of fruit pulp</b>  <b>Theory Duration</b> (hh:mm) 06:00  <b>Practical Duration</b> (hh:mm) 12:00  <b>Corresponding NOS Code</b> FIC/N0121 FIC/N0122	Use basic mathematics for various calculations in day-to-day processes Plan the production schedule as per organizational standards and instructions Organize for raw materials, packaging materials, manpower, equipment and machineries for the scheduled production Identify the raw materials required for production as per production schedule and formation State the methods for storing raw materials for later use Plan the production sequence to maximize capacity, utilization of resources, manpower and machinery Calculate batch size and prioritize urgent orders based on the production schedule and machine capacity	SOP; pH meter(Digital); Thermometer (Digital); Beakers; Measuring Cylinder; Measuring flask; Brinometer; Salinometer, Hydrometer; Weighing Balance (Digital); Brix Meter/ Refractometer; Deep fridge; refrigerator; Gas burner with cylinder; Fruit tray; Stainless steel mug; Pilfer proof capping machine; Cutting knives; mixer/electric mixer; water tank; fruit slicing machine; sealing machine; Vacuum gauge; pressure gauge; seam checking gauge or screw gauge; pressure cooker; coring Knives; Pitting knives;

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<ul style="list-style-type: none"> <li>• Check the conformance of raw material quality to company standards</li> <li>• Organize quality raw material as per production process and company standards</li> <li>• Check the raw material quality and grade</li> <li>• Prepare the raw material for production</li> <li>• List the effect on pulp of manhandling fruits</li> </ul>	Juice extractor, crown corking machine; pulper; fruit mill; vacuum pan; mechanical peeler/ batch type of fruit and vegetable peeling; steam jacket kettle; baby boiler/ exhausting box; shredder for slicing of fruit and vegetable; liquid filling machine; Autoclaves S.S vessels with lids; micrometer; seam checking gauge; bottle brush washer;
10.	<p><b>Produce fruit pulp from various fruits</b></p> <p><b>Theory Duration</b> (hh:mm) 15:00</p> <p><b>Practical Duration</b> (hh:mm) 20:00</p> <p><b>Corresponding NOS Code</b> FIC/N0122</p>	<ul style="list-style-type: none"> <li>• Explain the process of pulping fruit</li> <li>• Define ripening</li> <li>• Explain fruit ripening process</li> <li>• Demonstrate the process of ripening, sorting, and deseeding fruit</li> <li>• State the procedures used to create the fruit pulp</li> <li>• Demonstrate the process of fruit pulping</li> <li>• State the methods of sterilizing fruit pulp</li> <li>• List the quality control parameters for checking fruit pulp</li> <li>• State the basic categories of packing</li> <li>• State the various types of packaging materials used for packing fruit pulp</li> <li>• State the factors for selecting packaging materials</li> <li>• Explain aseptic packaging in fruit processing industry</li> <li>• Define canning and its purpose</li> <li>• State the process of canning • Demonstrate the canning process of fruit pulp</li> <li>• State the methods for storing raw materials for later use</li> <li>• Explain the process of storing packaged fruit pulp</li> <li>• State the process of maintaining storage conditions</li> <li>• Demonstrate the process of cleaning the work area and machineries after production organizational standards</li> </ul>	SOP; pH meter(Digital); Thermometer (Digital); Beakers; Measuring Cylinder; Measuring flask; Brinometer; Salinometer, Hydrometer; Weighing Balance (Digital); Brix Meter/ Refractometer; Deep fridge; refrigerator; Gas burner with cylinder; Fruit tray; Stainless steel mug; Pilfer proof capping machine; Cutting knives; mixer/electric mixer; water tank; fruit slicing machine; sealing machine; Vacuum gauge; pressure gauge; seam checking gauge or screw gauge; pressure cooker; coring Knives; Pitting knives; Juice extractor, crown corking machine; pulper; fruit mill; vacuum pan; mechanical peeler/ batch type of fruit and vegetable peeling; steam jacket kettle; baby boiler/ exhausting box; shredder for slicing of fruit and

Sr. No.	Module	Key Learning Outcomes	Equipment Required
			vegetable; liquid filling machine; Autoclaves S.S vessels with lids; micrometer seam checking gauge; bottle brush washer; protective gloves, head caps, aprons, safety goggles, safety boots, mouth masks, sanitizer, safety manual
11.	<p><b>Complete documentation and record keeping</b></p> <p><b>Theory Duration</b> (hh:mm) 03:00</p> <p><b>Practical Duration</b> (hh:mm) 01:00</p> <p><b>Corresponding NOS Code</b> FIC/N0123</p>	<ul style="list-style-type: none"> <li>• State the need for documenting and maintaining records of raw materials, processes and finished products</li> <li>• State the method of documenting and recording the details of raw material to final finished product</li> <li>• Document daily records in the ERP system effectively</li> </ul>	Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook, logbooks, internal audit register, food safety manual, quality policy etc.
12.	<p><b>Food Safety, Hygiene and Sanitation</b></p> <p><b>Theory Duration</b> (hh:mm) 04:00</p> <p><b>Practical Duration</b> (hh:mm) 04:00</p> <p><b>Corresponding NOS Code</b> FIC/N9001</p>	<p>State the importance of safety, hygiene and sanitation in the baking industry</p> <p>Follow the industry standards to maintain a safe and hygiene workplace</p> <p>Follow HACCP principles to eliminate food safety hazards in the process and products</p> <p>Follow safety practices in the work area</p>	Laptop, white board, marker, chart papers, projector ,trainer's guide and student handbook, protective gloves, head caps, aprons, safety goggles, safety boots, mouth covers, sanitizer, safety manual ,logbooks etc.
13.	<p><b>Professional and Core Skills</b></p> <p><b>Theory Duration</b> (hh:mm) 04:00</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p>	<p>Undertake a self-assessment test</p> <p>Identify personal strengths and weaknesses</p> <p>Plan and schedule the work order and manage time effectively to complete the tasks assigned</p> <p>Prevent potential problems from occurring</p> <p>Resolve issues and problems using acquired knowledge and realize the importance of decision making</p>	Laptop, white/black board, marker, chart papers, projector ,Trainer's guide, Student manual

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<b>Corresponding NOS Code</b>	Identify potential problems and make sound and timely decision Improve your reading skills State the importance of listening	
14.	<b>IT Skills</b>  <b>Theory Duration</b> (hh:mm) 05:00  <b>Practical Duration</b> (hh:mm) 08:00  <b>Corresponding NOS Code</b>	Identify parts of the computer Use the computer keyboard effectively to type Use computer applications effectively to record day-to-day activities Use the word processor effectively Use the spreadsheet application effectively Use the computer to document day-to-day activities	Laptop, white/black board, marker, chart papers, projector, Trainer's guide, Student manual
15.	<b>Field Visits</b>  <b>Theory Duration</b> (hh:mm) 05:00  <b>Practical Duration</b> (hh:mm) 19:00  <b>Corresponding NOS Code</b>	Observe the factory location, layout and safety aspects of food processing Observe the storage facilities for raw materials and finished products Observe the various machineries used in pickle processing Observe the various machineries used in pickle processing Observe the cleaning methods and processes followed to maintain the process machineries and tools Observe the raw materials used and their storage procedures Observe the packaging and storage processes of raw material and finished product Observe the post-production cleaning and maintenance process followed in the industry	All the tools and equipment listed above must be available at the site of field visit
16.	<b>Revision</b>  <b>Theory Duration</b> (hh:mm) 05:00  <b>Practical Duration</b> (hh:mm) 01:00  <b>Corresponding NOS Code</b>	Revised the knowledge gained so far	All the tools and equipment listed above must be available at the time of revision
17.	<b>Evaluation</b>  <b>Theory Duration</b> (hh:mm) 08:00	Assess the knowledge and skills acquired by the participants	All the tools and equipment listed above must be available for evaluation

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<b>Practical Duration</b> (hh:mm) 10:00  <b>Corresponding NOS Code</b>		
18.	<b>On-the-job Training</b>  <b>Theory Duration</b> (hh:mm) 14:00  <b>Practical Duration</b> (hh:mm) 50:00  <b>Corresponding NOS Code</b>	Apply the skills and knowledge acquired in the training program in the field	All the tools and equipment listed above must be available on the site at the time of OJT
	<b>Total Duration</b> <b>240:00</b>  <b>Theory Duration</b> <b>95:00</b>  <b>Practical Duration</b> <b>145:00</b>	<b>Unique Equipment Required:</b> SOP; pH meter(Digital); Thermometer (Digital); Beakers; Measuring Cylinder; Measuring flask; Brinometer; Salinometer, Hydrometer; Weighing Balance (Digital); Brix Meter/ Refractometer; Deep fridge; refrigerator; Gas burner with cylinder; Fruit tray; Stainless steel mug; Pilfer proof capping machine; Cutting knives; mixer/electric mixer; water tank; fruit slicing machine; sealing machine; Vacuum gauge; pressure gauge; seam checking gauge or screw gauge; pressure cooker; coring Knives; Pitting knives; Juice extractor, crown corking machine; pulper; fruit mill; vacuum pan; mechanical peeler/ batch type of fruit and vegetable peeling; steam jacket kettle; baby boiler/ exhausting box; shredder for slicing of fruit and vegetable; liquid filling machine; Autoclaves S.S vessels with lids; micrometer seam checking gauge; bottle brush washer	

Grand Total Course Duration: **240Hours, 0 Minutes**

*(This syllabus/ curriculum has been approved by [SSC: Food Industry Capacity and Skill Initiative](#))*

## Trainer Prerequisites for Job role: “Fruit Pulp Processing Technician” mapped to Qualification Pack: “FIC/Q0106, v1.0”

Sr. No.	Area	Details
1	<b>Description</b>	To deliver accredited training service, mapping to the curriculum detailed above, in accordance with the Qualification Pack “FIC/Q0106”, Version 1.0
2	<b>Personal Attributes</b>	An aptitude for conducting training, and pre/ post work to ensure competent, employable candidates at the end of the training, and pre/post work to ensure competent, employable candidates at the end of the training. Strong communication skills, ability to work as part of a team; a passion for quality and for developing others; well-organized and focused, eager to learn and keep oneself updated with the latest in the mentioned fields.
3	<b>Minimum Educational Qualifications</b>	<ul style="list-style-type: none"> <li>B.Sc/B.Tech/BE in Food Technology or Food Engineering with 2-3 years of hand on experience in a Pulping Unit or Fruits/Vegetables Processing Unit.</li> </ul>
4a	<b>Domain Certification</b>	Certified for Job Role: “Fruit Pulp Processing Technician” mapped to QP: “FIC/Q0106, v1.0”. Minimum accepted score is 80%
4b	<b>Platform Certification</b>	Recommended that the Trainer is certified for the Job Role: “Trainer”, mapped to the Qualification Pack: “SSC/Q1402”. Minimum accepted SCORE IS 80 % as per FICSI guidelines.
5	<b>Experience</b>	<ul style="list-style-type: none"> <li>B.Sc/B.Tech/BE in Food Technology or Food Engineering with 2-3 years of hand on experience in a Pulping Unit or Fruits/Vegetables Processing Unit.</li> </ul>

### Annexure: Assessment Criteria

<b>Assessment Criteria</b>	
<b>Job Role</b>	<b>Fruit Pulp Processing Technician</b>
<b>Qualification Pack</b>	<b>FIC/Q0106, v1.0</b>
<b>Sector Skill Council</b>	<b>Food Processing</b>

<b>Sr. No.</b>	<b>Guidelines for Assessment</b>
1	Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2	The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3	Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre(as per assessment criteria below)
4	Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria
5	To pass the Qualification Pack, every trainee should score a minimum of 70% (overall) in every QP
6	The marks are allocated PC wise; however, every NOS will carry a weight age in the total marks allocated to the specific QP

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
<b>1. FIC/Q0120: Prepare and maintain work area and process machineries for pulp processing</b>	PC.1 Prepare, clean and maintain the cleanliness of the work area using approved sanitizers and keep it free from dust, waste, flies and pests	<b>100</b>	25	10	15
	PC2. Ensure that the work area is safe and hygienic for food		10	3	7
	PC3. Dispose waste materials as per defined SOPs and industry requirements		15	5	10
	PC4. Check the working and performance of all machineries and tools used for the pickle making process such as washer, peeler, vegetable cutter/slicer, blender, packaging machines etc.		15	5	10
	PC5. Clean the machineries and tools used with approved sanitizers following SOP		15	5	10
	PC6. Place the necessary tools required for process		5	2	3
	PC7. Attend the minor repairs/ faults of all machines, if required		15	5	10
	<b>Total</b>		<b>100</b>	<b>35</b>	<b>65</b>
<b>2. FIC/Q0121: Prepare for production of fruit pulp</b>	PC1. Read and understand the production order from supervisor	<b>100</b>	10	4	6
	PC2. Check the availability of raw materials, packaging materials, equipment availability and manpower		5	2	3
	PC3. Support in planning production sequence		15	5	10
	PC4. Calculate the batch size based on the production order and machine capacity		5	2	3
	PC5. Calculate the raw material requirement (considering the process loss) to produce the required quantity of finished		5	2	3
	PC6. Calculate the raw materials, packaging materials and manpower requirement for completing the order.		5	2	3
	PC7. Ensure the working and performance of each equipment required for the process		7	2	5
	PC8. Calculate the process time for effective utilization of machineries		7	2	5
	PC9. Plan batch size considering full capacity utilization of machineries		3	1	2
	PC10. Plan to utilize machineries for multiple products without affecting the quality of		3	1	2

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	the finished products, and to optimize production and save energy				
	PC11. Allot responsibilities and help to assistants and workers		5	1.5	3.5
	PC12. Refer the process chart for products produced		3	1	2
	PC13. Weigh the raw materials required for the batch		3	1	2
	PC14. Check the conformance of raw material quality to organization standards, through physical analysis and by referring the quality analysis report from the supplier/ internal lab analysis report		10	4	6
	PC15. Sharpen cutter blades and change the cutter/slicer blades		2	0.5	1.5
	PC16. Fix, change, clean filters and sieves of processing machinery		5	2	3
	PC17. Ensure working and performance of required machines and tools.		5	1	4
	PC18. Keep the tools assessable to repair in case of faults/ breakdown		2	0.5	1.5
	<b>Total</b>		<b>100</b>	<b>35</b>	<b>65</b>
<b>3. FIC/Q0122: Produce fruit pulp from various fruits</b>	PC1. Receive fruits from the supplier/vendor and check weight	<b>100</b>	1	0.5	0.5
	PC2. Check quality through physical parameters such as appearance, color, texture, maturity		1	0.5	0.5
	PC3. Load fruits in fruit ripening chamber, adjust controls to set required temperature, time, relative humidity to pre-cool the fruit, monitor temperature to ensure the fruit is cooled to required temperature		3	1	2
	PC4. Open and control the regulator of the ethylene generator or use PLC to introduce ethylene into the chamber to initiate ripening of fruit, monitor air circulation system for uniform ethylene flow for specified period, adjust controlling system to maintain required temperature, relative humidity, etc. for specified period, adjust ventilation system at periodic interval by controlling the speed of exhaust fan to remove carbon-di-oxide		3	1	2

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC5. Open ripening chamber after specified period, start fan to ventilate ethylene gas, stop fan after ventilation, unload the ripened fruit from the ripening chamber, check the quality of ripened fruit and transfer to processing area		2	0.5	1.5
	PC6. Open valves or start pump to fill water in washing tank and control water level, dump fruits into the washing tank for washing		2	0.5	1.5
	PC7. Switch on agitator of revolving screens/blades to immerse each fruit into water to remove dirt, soil, etc		2	0.5	1.5
	PC8. Start the ladder conveyor to lift fruits from the washing tank and transfer to the washing line conveyor		2	0.5	1.5
	PC9. Open valves of the high pressure spraying system for fresh water and adjust pressure to spray water on fruits for rinsing		2	0.5	1.5
	PC10. Adjust controls to transfer washed fruit to sorting/inspecting line, start and adjust speed of sorting/inspecting line conveyor to visually inspect and manually remove damaged, blemished and rotten fruits		2	0.5	1.5
	PC11. Dump sorted fruits in the peeler or corer (depending on the type of fruits), start machine, adjust speed to remove the peel or core of fruits (or) turn valves to introduce steam and adjust controls to maintain pressure for steam peeling		3	1	2
	PC12. Open valve or pump water or open spraying system to wash peeled fruits, observe fruits emerging from peeling/coring machine to ensure removal of peel/core		2	0.5	1.5
	PC13. Cut fruits manually (or) load the fruits in the chopper/cutter/slicer machine, adjust controls to cut fruits to required size, start machine, collect sliced fruits from the discharge chute		2	0.5	1.5
	PC14. In case of mangoes, start conveyor and control speed to allow washed mangoes to pass through mango tip cutting line, cut the mango tip manually, control conveyor speed to dump the tip cut mangoes into		2	0.5	1.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	destoner machine to remove seed and peel				
	PC15. Control speed of waste disposal conveyor to dispose waste following sop		1	0.5	0.5
	PC16. Adjust and maintain speed of pulper conveyor to allow fruits to pass through the pulper cum finisher/ pulper refiner machine for pulping fruits and sieving pulp to required fineness, adjust position of discharge outlet to collect refined pulp in collection tank, check collected pulp to ensure it is free from seeds and fiber		8	3	5
	PC17. Replace damaged or clogged filter screen of pulper cum finisher/ pulper refiner machine		2	0.5	1.5
	PC18. Start pump to transfer measured quantity of pulp from collection tank to steam jacketed kettle/ pre-cooking tank for cooking pulp, check pumped quantity through the level indicator and glass windows of the pre-cooking tank, adjust controls to set pressure, temperature, cooking time, stirrer speed, etc., open valve to allow steam to pass through kettle for pre-cooking/ pre-heating pulp to required temperature, examine pre-cooked fruits through feel/texture		8	3	5
	PC19. Open valves to allow pre-cooked pulp to pass through de-canter machine to remove black specks, set control of the machine such as speed of screw conveyor in machine and speed/ rotation and start machine to remove black specks (in case of mango)		5	2	3
	PC20. Collect the pre-cooked pulp in the collection tank/ holding tank, sample pulp and transfer to quality lab for analysis and conformance to organisation standards		2	0.5	1.5
	PC21. Set controls of de-aerator machine to remove air from pulp for extended shelf-life, start machine, open valves/ start pump to transfer measured quantity of pre-cooked pulp into de-aeration tank to de-aerate pulp		5	2	3

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC22. Set controls of evaporator like flow rate of pulp, temperature, residence time etc to concentrate pulp (for processing concentrated pulp), switch on machine to transfer measured quantity of de-aerated pulp into continuous evaporator for concentrating pulp		5	2	3
	PC23. Open valves/start pump to transfer measured quantity of precooked(or)de-aerated and concentrated pulp into sterilization tank to sterilize pulp before aseptic packing, adjust controls to set temperature, pressure, time, etc. and open valves to allow steam to pass through sterilization tank, switch on machine to start sterilization, observe through glass windows of the sterilization tank, monitor and maintain steam pressure by adjusting gauges to sterilize fruit pulp to organisation standards		4	1	3
	PC24. Set controls to allow the sterilized pulp to pass to the aseptic surge tank for filling, maintain temperature of product surge tank until filling, set controls of the product filler of aseptic filling machine for filling volume, pressure, temperature, etc		4	1	3
	PC25. Place plastic liners in the container (drums, cartons etc), date code aseptic bags with details like date of manufacture, date of expiry etc and place inside the liner for filling pulp, start conveyor and control speed to move the drum with aseptic bags under the aseptic (product) filling machine		2	1	1
	PC26. Fix the spout of the aseptic bag to the filling nozzle of the machine, set controls like pressure, temperature, filling volume etc and start machine to fill hot sterile product and automatically seal/ close with sterile closures		2	0.5	1.5
	PC27. Start conveyor to move the container with filled aseptic bags to the weighing area, check the weight of the container, label the container with details like batch number, date of manufacture, date of expiry, volume/weight etc		2	0.5	1.5
	PC28. Cover the aseptic bags with liner, place lid on drums, close and seal lid,		1	0.5	0.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	transfer to the storage area and store by maintaining storage conditions and following SOP				
	PC29. Operate can reformer, flanger, seamer, can body beader and embossing machines to form cans		1	0.5	0.5
	PC30. Press button to activate machine-lift that raises stacked cans and transfers them onto mechanical conveyor (in mechanical units), observe passing cans and remove defective/ damaged cans from conveyor and discard following SOP		1	0.5	0.5
	PC31. Start machine that automatically feeds empty cans onto conveyors leading to washing, filling and sealing machines (or) set controls like temperature, pressure, conveyor speed of empty can machine, place empty cans in the conveyor and start machine to sterilize cans, collect sterilized cans from other end of the conveyor and transfer to the filling machine		1	0.5	0.5
	PC32. Start conveyor to allow sterilized cans to pass through the filling line (or) place sterilized cans manually in the filling line conveyor		1	0.5	0.5
	PC33. Start pump to fill pre-cooked/preheated pulp into the filling tank, set temperature, volume etc and start machine to fill pulp in cans, control speed of conveyor to transfer filled cans to the can seaming machine (or) manually place lid over the filled cans and seal in cans in can seamer machine		2	0.5	1.5
	PC34. Load the canned product manually in metal baskets, start motor to lower the basket with cans in lager tank with hot water, allow steam to pass through tank to heat continuously to sterilize can to specified temperature and time, mechanically lift basket with sterilised cans from hot water tank and place in cold water tank, open valves to circulate cold water in tanks to cool cans, dry cans manually		2	1	1

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC35. Load the canned product into the retort manually or mechanically through push trucks, close retort door or lid, and turn wheels or moves levers to seal chamber, adjust controls to set pressure, temperature and time of the retort chamber to sterilize canned product following sop		2	0.5	1.5
	PC36. Set process parameters like pressure, temperature, sterilization time etc in the retort following SOP, turns valves to admit steam to retort, observe dials and gauges and adjust controls to maintain process parameters, turn valves to release steam and allow cool water into chamber to prevent overcooking		1	0.5	0.5
	PC37. Open retort and move the canned product to the cooling line conveyor, open valves of the water spraying system and adjust pressure to spray cold water on cans passing though cooling line conveyor, transfer cooled cans to drying line conveyor and start conveyor, set and control temperature and air flow to dry adhering water from the cooled cans		2	1	1
	PC38. Load labels in the packaging machine and set date coding machine for batch number, date of manufacture, date of expiry etc, start labeling machine and date coding machine to label and date code cans, sample canned product and transfer to quality lab for analysis, pack labeled cans into cartons and transfer to storage area and store maintaining storage conditions following SOP		1	0.5	0.5
	PC39. Report discrepancies/concerns to department supervisor for immediate action		1	0.5	0.5
	PC40. Clean the work area, machineries, equipment and tools using recommended cleaning agents and sanitizers		2	0.5	1.5
	PC4. Attend minor repairs/faults of all machines (if any)		1	0.5	0.5
	PC42. Ensure periodic (daily/weekly/monthly/quarterly/half yearly/annual) maintenance of all machines		1	0.5	0.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	and equipment following the SOP or following suppliers instructions/manuals				
	<b>Total</b>		<b>100</b>	<b>35</b>	<b>65</b>
<b>4. FIC/Q0123: Complete documentation and record keeping related to production of fruit pulp</b>	PC1. Document and maintain records of details of raw materials and packaging materials as per organizational standards	<b>100</b>	10	6	4
	PC2. Document and maintain record on observations (if any) related to raw materials and packaging materials		5	3	2
	PC3. Load the raw material details in ERP for future reference		5	3	2
	PC4. Verify the documents and track from finished products to raw materials, in case of quality concerns and during quality management system audits		5	3	2
	PC5. Document and maintain records of production plan with details		10	6	4
	PC6. Document and maintain records of process details for entire production in process chart or production log for all products produced		15	9	6
	PC7. Document and maintain records of batch size, production yield, wastage of raw materials, energy utilization and final product produced		10	6	4
	PC8. Document and maintain record of observations or deviations		5	3	2
	PC9. Load the production plan and process details in ERP for future reference		5	3	2
	PC10. Verify documents and track from finished product to ingredients, in case of quality concerns and for quality management system audit		5	3	2
	PC11. Document and maintain records of finished products		3	2	1
	PC12. Document and maintain records of the finished product details as per organizational standards		7	4	3
	PC13. Document and maintain record on observations or deviations related to finished products		5	3	2
	PC14. Load the finished product details in ERP for future reference		5	3	2
	PC15. Verify the documents and track from finished product to ingredients, in case of quality concerns and for quality management system audits		5	3	2

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	<b>Total</b>		<b>100</b>	<b>60</b>	<b>40</b>
<b>5. FIC/N9001: Food Safety, hygiene and sanitation for processing food products</b>	PC1. Comply with food safety and hygiene procedures followed in the organization	<b>100</b>	5	2	3
	PC2. Ensure personal hygiene by use of gloves, masks ,hair net, ear plugs, boots etc.		6	1	5
	PC3. Ensure hygienic production of food by inspecting raw materials, ingredients, finished products etc for compliance to physical, chemical and microbiological procedures		5	2	3
	PC4. Pack products in appropriate packaging material, label and store them in designated area free from pests, flies etc.		10	4	6
	PC5. Clean, maintain and monitor food processing equipments periodically, using it only for the specified purpose		5	2	3
	PC6. Use safety equipment such as fire extinguisher, eye wash unit, first aid kit when required		10	4	6
	PC7. Follow housekeeping practices by having designated area for machines/tools		5	2	3
	PC8. Follow industry standards like GMP, HACCP and product recall		10	4	6
	PC9. Attend training on hazard management to understand type of physical, chemical and microbiological hazards		5	1	4
	PC10. Identify, document and report problems such as rodents and pests to management		5	1	4
	PC11. Conduct workplace checklist audit before and after work to ensure safety and hygiene		5	1	4
	PC12. Document and maintain raw material, process, packaging material to maintain the effectiveness of quality system		4	1	3
	PC13. Determine the quality of food using criteria such as odor, color, taste and best before date and take immediate measures to prevent spoilage		5	2	3
	PC14. Store raw materials, finished products and allergens separately to prevent cross contamination		5	2	3

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC15. Label raw materials and finished products and store them in different 5 2 3 storage areas according to safe food practices				
	PC16. Follow stock rotation based on FEFO/FIFO		10	4	6

# Supervisor-Fruits and Vegetables Processing

## CURRICULUM / SYLLABUS

This program is aimed at training candidates for the job of a “Supervisor-Fruits and Vegetables processing”, in the “Food Processing” Sector/Industry and aims at building the following key competencies amongst the learner

<b>Program Name</b>	<b>Supervisor-Fruits and Vegetables Processing</b>		
<b>Qualification Pack Name &amp; Reference ID. ID</b>	FIC/Q0109, v1.0		
<b>Version No.</b>	1.0	<b>Version Update Date</b>	01/08/2018
<b>Pre-requisites to Training</b>	Preferably Class 12 and 2 years’ experience in fruit and vegetable processing unit		
<b>Training Outcomes</b>	<b>After completing this programme, participants will be able to:</b> <ul style="list-style-type: none"><li>• ensure preparation of work area and process machineries for fruit &amp; vegetable processing,</li><li>• execute production planning of fruits &amp; vegetable processing,</li><li>• supervise and coordinate activities of workers engaged in production of fruits &amp; vegetable products,</li><li>• perform documentation and record keeping of raw material, ingredients and the finished good,</li><li>• apply sanitation and hygiene practices in the work environment,</li><li>• manage and lead the team.</li></ul>		

This course encompasses 6 out of 6 National Occupational Standards (NOS) of “Supervisor-Fruits and Vegetables Processing” Qualification Pack issued by “Food Industry Capacity and Skill Initiative”.

Sr. No.	Module	Key Learning Outcomes	Equipment Required
1	<p><b>Introduction to Training Program and Overview of Food Processing Industry</b></p> <p><b>Theory Duration</b> (hh:mm) 07:00</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b> Bridge Module</p>	<ul style="list-style-type: none"> <li>• Define food processing</li> <li>• List the various sub sectors of food processing industry</li> <li>• Define fruits and vegetables Processing</li> <li>• List the various units within a fruits and vegetables processing industry</li> <li>• State the roles and responsibilities of supervisor-fruits and vegetables processing</li> </ul>	
2	<p><b>Organizational Standards and Norms</b></p> <p><b>Theory Duration</b> (hh:mm) 05:00</p> <p><b>Practical Duration</b> (hh:mm) 10:00</p> <p><b>Corresponding NOS Code</b> Bridge Module</p>	<ul style="list-style-type: none"> <li>• State the roles and responsibilities of a Supervisor-fruits and vegetables processing</li> <li>• State how to conduct yourself at the workplace</li> <li>• State the personal hygiene and sanitation guidelines</li> <li>• State the food safety hygiene standards to follow in a work environment</li> </ul>	Protective Gloves, Head Caps, Lab Coat, Safety Goggles, Safety Boots, Mouth Masks, Sanitizer, Food Safety Manual
3	<p><b>Ensure Preparation and Maintenance of Work Area and Process Machineries for Production of Fruit and Vegetable Products</b></p> <p><b>Theory Duration</b> (hh:mm) 10:00</p> <p><b>Practical Duration</b> (hh:mm) 20:00</p>	<ul style="list-style-type: none"> <li>• Check if the work area is cleaned using approved sanitizers</li> <li>• Describe the importance of cleanliness of the work area</li> <li>• Check if the work area is safe and hygienic for food production</li> <li>• Check the working and performance of all machineries and tools used for fruits and vegetables processing</li> <li>• Check if the equipment are washed with approved sanitizers</li> <li>• Check if the disposal of waste material is as per SOP</li> </ul>	Fruit Washer, Peeler, Fruit Pulper , Juice Extractor, Clarifier, Filter, Pasteurizer, Steam Jacketed Kettles, Packaging Machines, Protective Gloves, Head Caps, Lab Coat, Safety Goggles, Safety Boots, Mouth Masks, Sanitizer, Food Safety Manual

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<b>Corresponding NOS Code</b> FIC/N0131		
4.	<b>Execute production planning of Fruit and Vegetable Products</b>  <b>Theory Duration</b> (hh:mm) 10:00  <b>Practical Duration</b> (hh:mm) 20:00  <b>Corresponding NOS Code</b> FIC/N0132	<ul style="list-style-type: none"> <li>• Perform the grouping of ingredients for same type of products</li> <li>• Plan production sequence</li> <li>• Demonstrate the allotting of responsibilities</li> <li>• Perform calculation for raw material requirement</li> <li>• Perform a check on the availability of raw material, ingredients and packaging materials</li> </ul>	Fruit Washer, Peeler, Fruit Pulper , Juice Extractor, Clarifier, Filter, Pasteurizer, Steam Jacketed Kettles, Packaging Machines, Protective Gloves, Head Caps, Lab Coat, Safety Goggles, Safety Boots, Mouth Masks, Sanitizer, Food Safety Manual
5.	<b>Supervise Production of Fruit and Vegetable Products</b>  <b>Theory Duration</b> (hh:mm) 15:00  <b>Practical Duration</b> (hh:mm) 40:00  <b>Corresponding NOS Code</b> FIC/N0133	<ul style="list-style-type: none"> <li>• Perform a check if all the machineries are clean and in good working conditions</li> <li>• Demonstrate assembling of all components of machines</li> <li>• Perform a pre check on all machineries</li> <li>• Review of the production order</li> <li>• Check if the production area is clean for processing of fruits and vegetables</li> <li>• Check the quality report of fruits and vegetables to ensure conformance to the industry standards</li> <li>• Demonstrate the monitoring of control panel of each fruits and vegetables processing machinery</li> <li>• Co-ordinate with the maintenance team and ensure machine breakdowns are attended</li> <li>• Check for timely production of the food product</li> <li>• Complete all the documents related to production and pass them on to manager</li> <li>• Demonstrate cleaning the machineries used with recommended sanitizers following CIP (clean-in-place) procedure</li> <li>• Demonstrate cleaning the equipment and tools used using recommended cleaning agents and sanitizers</li> </ul>	Fruit Washer, Peeler, Fruit Pulper , Juice Extractor, Clarifier, Filter, Pasteurizer, Steam Jacketed Kettles, Packaging Machines, Protective Gloves, Head Caps, Lab Coat, Safety Goggles, Safety Boots, Mouth Masks, Sanitizer, Food Safety Manual
6.	<b>Complete Documentation and Record Keeping</b>	<ul style="list-style-type: none"> <li>• State the need for documenting and maintaining records of raw materials, processes and finished products</li> <li>• State the method of documenting and</li> </ul>	Food Safety Manual, Log Books.

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<p><b>Related to Packaging Food Products</b></p> <p><b>Theory Duration</b> (hh:mm) 06:00</p> <p><b>Practical Duration</b> (hh:mm) 05:00</p> <p><b>Corresponding NOS Code</b> FIC/N0134</p>	<p>recording the details of raw material to final finished product</p> <ul style="list-style-type: none"> <li>• Demonstrate the process of documenting records of production plan, process parameters, and finished products</li> </ul>	
7.	<p><b>Food Safety, Hygiene and Sanitation for Packaging Food Products</b></p> <p><b>Theory Duration</b> (hh:mm) 10:00</p> <p><b>Practical Duration</b> (hh:mm) 35:00</p> <p><b>Corresponding NOS Code</b> FIC/N9001</p>	<ul style="list-style-type: none"> <li>• State the importance of safety, hygiene and sanitation in the baking industry</li> <li>• Apply the industry standards to maintain a safe and hygiene workplace</li> <li>• Apply HACCP principles to eliminate food safety hazards in the process and products</li> <li>• Apply safety practices in the work area</li> </ul>	<p>Protective Gloves, Head Caps, Aprons, Safety Goggles, Safety Boots, Mouth Covers, Sanitizer, Food Safety Manual ,Log Books etc.</p>
8.	<p><b>Leadership Skills</b></p> <p><b>Theory Duration</b> (hh:mm) 04:00</p> <p><b>Practical Duration</b> (hh:mm) 10:00</p> <p><b>Corresponding NOS Code</b> FIC/N9004</p>	<ul style="list-style-type: none"> <li>• Perform a check if the team is aware about the schedule and expectations from them</li> <li>• Conduct regular meetings with the team members</li> <li>• Tell the team member to participate in various activities organized by the organization</li> <li>• Demonstrate counselling of team members</li> <li>• Conduct training of team members</li> <li>• Provide feedback to the team members</li> </ul>	<p>Computer/Laptop, Log Books</p>
9.	<p><b>Professional and Core Skills</b></p> <p><b>Theory Duration</b> (hh:mm) 04:00</p>	<ul style="list-style-type: none"> <li>• Plan a general aptitude self-assessment test</li> <li>• Identify personal strengths and weaknesses</li> <li>• Plan and schedule the work order</li> </ul>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<b>Practical Duration</b> (hh:mm) 10:00  <b>Corresponding NOS Code</b> Bridge Module	<ul style="list-style-type: none"> <li>• Manage time effectively to complete the tasks assigned</li> <li>• Identify and resolve potential problems and take preventive measure to prevent it</li> <li>• State the importance of decision making</li> <li>• State the importance of listening</li> </ul>	
10.	<b>IT Skills</b>  <b>Theory Duration</b> (hh:mm) 04:00  <b>Practical Duration</b> (hh:mm) 15:00  <b>Corresponding NOS Code</b> Bridge Module	<ul style="list-style-type: none"> <li>• Identify parts of the computer</li> <li>• Use the computer keyboard effectively to type</li> <li>• Use computer applications effectively to record day-to-day activities</li> <li>• Use the word processor effectively</li> <li>• Use the spreadsheet application effectively</li> <li>• Use the computer to document day-to-day activities</li> </ul>	Computer/Laptop
	<b>Total Duration</b> <b>240:00</b>  <b>Theory Duration</b> <b>75:00</b>  <b>Practical Duration</b> <b>165:00</b>	<b>Unique Equipment Required:</b> Fruit Washer, Peeler, Fruit Pulper , Juice Extractor, Clarifier, Filter, Pasteurizer, Steam Jacketed Kettles, Packaging Machines, Protective Gloves, Head Caps, Lab Coat, Safety Goggles, Safety Boots, Mouth Masks, Sanitizer, Food Safety Manual, Log Books, Computer/Laptop	

Grand Total Course Duration: **240Hours, 0 Minutes**  
 Recommend OJT Hours: **60Hours, 0 Minutes**

*(This syllabus/ curriculum has been approved by SSC: Food Industry Capacity and Skill Initiative)*

## Trainer Prerequisites for Job role: “Supervisor- Fruits and Vegetables Processing” mapped to Qualification Pack: “FIC/Q0109, v1.0”

Sr. No.	Area	Details
1	<b>Description</b>	To deliver accredited training service, mapping to the curriculum detailed above, in accordance with the Qualification Pack “ <u>FIC/Q0109</u> ”, Version 1.0
2	<b>Personal Attributes</b>	An aptitude for conducting training, and pre/ post work to ensure competent, employable candidates at the end of the training, and pre/post work to ensure competent, employable candidates at the end of the training. Strong communication skills, ability to work as part of a team; a passion for quality and for developing others; well-organized and focused, eager to learn and keep oneself updated with the latest in the mentioned fields.
3	<b>Minimum Educational Qualifications</b>	<ul style="list-style-type: none"> <li>• B.Sc/B.Tech/BE in Food Technology or Food Engineering with 2-3 years of hands on experience in a Fruits/Vegetables Unit</li> <li>• M.Sc/M.Tech/ME in Food Technology or Food Engineering with 1-2 years of hands on experience in a Fruits/Vegetables Unit</li> </ul>
4a	<b>Domain Certification</b>	Certified for Job Role: “ <u>Supervisor-Fruits &amp; Vegetables Processing</u> ” mapped to QP: “ <u>FIC/Q0109, v1.0</u> ”. Minimum accepted score is 80%
4b	<b>Platform Certification</b>	Recommended that the Trainer is certified for the Job Role: “Trainer”, mapped to the Qualification Pack: “MEP/Q0102”. Minimum accepted score is 80 % as per FICSI guidelines.
5	<b>Experience</b>	<ul style="list-style-type: none"> <li>• B.Sc/B.Tech/BE in Food Technology or Food Engineering with 2-3 years of hands on experience in a Fruits/Vegetables Unit</li> <li>• M.Sc/M.Tech/ME in Food Technology or Food Engineering with 1-2 years of hands on experience in a Fruits/Vegetables Unit</li> </ul>

## **Annexure: Assessment Criteria**

<b>Assessment Criteria</b>	
<b>Job Role</b>	<b>Supervisor-Fruits and Vegetables Processing</b>
<b>Qualification Pack</b>	<b>FIC/Q0109, v1.0</b>
<b>Sector Skill Council</b>	<b>Food Processing</b>

### **Guidelines for Assessment**

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, as well as the selected elective NOS/set of NOS.  
OR
4. Assessment will be conducted for all compulsory NOS, as well as the selected optional NOS/set of NOS.
5. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below)
6. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria
7. To pass the Qualification Pack, every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.
8. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

<b>Total Marks: 600</b>	<b>Compulsory NOS</b>				
<b>Assessable outcomes</b>	<b>Assessment criteria for outcomes</b>	<b>Total Marks</b>	<b>Out Of</b>	<b>Theory</b>	<b>Skills Practical</b>
<b>1. FIC/N0131: Prepare and maintain work area and process machineries for production of fruits &amp; vegetables</b>	PC.1 ensure work area is cleaned using approved sanitizers and cleanliness is maintained to keep it free from dust, waste, flies and pests	<b>100</b>	15	5	10
	PC2. Ensure that the work area is safe and hygienic for food processing		20	8	12
	PC3. ensure disposal of waste materials as per defined SOPs and industry requirements		15	6	9
	PC4. ensure the working and performance of all machineries and tools used for production of fruits and vegetable products like washer, peeler, slicer, pulper, pasteurizer, drier, refractometer, salinometer, double jacketed kettle, juice extractor, clarifier, evaporator, retort, packaging machines etc.		20	8	12
	PC5. ensure machineries and tools are cleaned using recommended sanitizers following the SOP		10	4	6
	PC6. ensure tools required for process are placed accessible, to use when necessary		5	1	4
	PC7. ensure minor repairs/ faults of all machines are attended		15	3	12
			<b>100</b>	<b>35</b>	<b>65</b>
<b>2. FIC/N0132: execute production planning of fruits &amp; vegetable products</b>	PC1. plan production sequence by <ul style="list-style-type: none"> <li>grouping products of same type (varieties of juices, pulps, jams, pickles etc)</li> <li>using same equipment and machinery for various products such that one product does not impact the quality of the other</li> <li>planning maximum capacity utilization of machineries</li> <li>considering the process time for each product</li> <li>planning efficient utilization of resources/manpower</li> <li>prioritizing urgent orders</li> </ul>		27	10	17
	PC2. calculate the batch size based on the production order and machine capacity		7	2	5
	PC3. calculate lead time for production of various products planned		11	3	8
	PC4. prepare shift schedule for assistants/technicians		5	2	3
	PC5. allot responsibilities work to the assistants/technicians and helpers		5	2	3
	PC6. calculate the raw material requirement		5	2	3

Total Marks: 600	Compulsory NOS				
Assessable outcomes	Assessment criteria for outcomes	Total Marks	Out Of	Theory	Skills Practical
	(considering the process loss) to produce finished product(s) as per production order				
	PC7. calculate the raw materials, packaging materials and manpower requirement for completing the order		5	2	3
	PC8. check the availability of raw materials, packaging materials, equipment and manpower		9	3	6
	PC9. prepare indent for issue of raw materials and packaging materials from store		3	1	2
	PC10. ensure transfer of raw materials and packaging materials from store production and packaging area through helpers		2	0.5	1.5
	PC11. ensure checking the weight of raw materials and packaging materials received from store and check its conformance of quality to organisation standards through physical parameters like appearance, colour, texture etc		8	2.5	5.5
	PC12. verify quality documents from supplier and internal lab to ensure its conformance to standards		9	4	5
	PC13. ensure raw materials (including ingredients, additives, preservatives etc) for the batch are weighed accurately following the formulations		4	2	2
			<b>100</b>	<b>35</b>	<b>65</b>
<b>3. FIC/N0133: Supervise production of fruit and vegetable products</b>	PC1. check and ensure cleanliness and sterilization of all fruit and vegetable processing machineries like washer, peeler, slicer, pulper, drier, juice extractor, juice clarifier, evaporator, retort, pasteurizer, steam jacketed kettle, packaging machines etc	<b>100</b>	2	0.5	1.5
	PC2. check and ensure maintenance has been carried out on all fruit and vegetable processing machineries and equipments		2	0.5	1.5
	PC3. check and ensure all process machineries are clean and in good mechanical condition		2	0.5	1.5
	PC4. check assembling of fittings like stirrer, blades, pipes and other parts to equipment and ensure all machineries are ready for production		5	0.5	4.5
	PC5. start each process machineries and ensure its working and performance and check if required tools are kept accessible to attend repairs/faults in case of breakdown		2	0.5	1.5

<b>Total Marks: 600</b>	<b>Compulsory NOS</b>				
<b>Assessable outcomes</b>	<b>Assessment criteria for outcomes</b>	<b>Total Mark s</b>	<b>Out Of</b>	<b>Theory</b>	<b>Skills Practical</b>
	PC6. review production orders or schedules to ascertain product details such as type of products to be produced, quantities, specifications of products and scheduled delivery dates in order to plan production operation		2	1	1
	PC7. check and ensure production area is safe and clean		2	0	2
	PC8. verify the quality report on raw materials to ensure its conformance to quality standards		2	1	1
	PC9. monitor control panel of each fruit and vegetable processing machinery and ensure applicable process parameters like temperature, pressure, time etc (as applicable) are set in accordance with standards for production of various fruit and vegetable products		3	1	2
	PC10. observe control points and equipments at regular intervals to ensure operational performance and optimum utilization		3	1	2
	PC11. stop production following stop procedure, in case of machine breakdowns during production		3	1	2
	PC12. co-ordinate with maintenance team and ensure machine breakdowns are attended to immediately in order to prevent operational delays		3	1	2
	PC13. suggest control measures and corrective actions for any problems related to production, process and products, if required consult with manager and resolve problems		4	1.5	2.5
	PC14. ensure product quality by establishing and enforcing organization standards in each stage of production process		3	1	2
	PC15. monitor packaging of finished products, perform random check on weight of packed products, check label details like date of manufacture, batch number, expiry date etc and ensure products are packed as per organisation and regulatory standards		4	1.5	2.5
	PC16. monitor production activities, coordinate with cross function team and ensure production is started and completed as scheduled		4	1.5	2.5
	PC17. ensure timely production with minimum or no wastage, and quality of products		4	1.5	2.5

<b>Total Marks: 600</b>	<b>Compulsory NOS</b>				
<b>Assessable outcomes</b>	<b>Assessment criteria for outcomes</b>	<b>Total Marks</b>	<b>Out Of</b>	<b>Theory</b>	<b>Skills Practical</b>
	produced meets organisation and regulatory standards				
	PC18. analyze production performance records and data, investigate issues related to fruit and vegetable products processing, discuss with manger and identify solutions to prevent/correct problems, and ensure to implement suggested corrective action		4	1.5	2.5
	PC19. evaluate new equipment and techniques while producing new products and on installation of new machineries		4	2	2
	PC20. maintain safe and clean work environment by educating team on procedures to maintain compliance		3	1.5	1.5
	PC21. monitor activities and performance of assistants, technicians, operators and helpers		7	3	4
	PC22. provide production information to the manager by compiling, sorting, and analysing production performance records of all shifts		4	1.5	2.5
	PC23. update manager on day-to-day activities, discuss problem, suggest or understand suggested preventive and corrective action, and implement corrective actions immediately		4	1	3
	PC24. update manager on day-to-day activities, discuss problem, suggest or understand suggested preventive and corrective action, and implement corrective actions immediately		6	2	4
	PC25. monitor cleaning of work area, equipments and tools using recommended cleaning agents and sanitizers		8	3	5
	PC26. ensure minor repairs/faults (if any) of all components and machines are attended to before the start of next production		4	1	3
	PC27. ensure periodic (daily/weekly/monthly/quarterly/half yearly/annual) maintenance of all machines and equipment following the sop or following suppliers instructions/manuals		6	3	3
			<b>100</b>	<b>35</b>	<b>65</b>
<b>4. FIC/N0134: Complete documentation</b>	PC1. Document and maintain records of details of raw materials type and variety, grown area, grown season, quantity,	<b>100</b>	10	6	4

Total Marks: 600	Compulsory NOS				
Assessable outcomes	Assessment criteria for outcomes	Total Marks	Out Of	Theory	Skills Practical
<b>and record keeping related to production of fruit and vegetable products</b>	vendor/supplier details, date of manufacture, expiry date, quality report from supplier and internal lab etc. as per organisation standards				
	PC2. Document and maintain record on observations (if any) related to raw materials and packaging materials		5	3	2
	PC3. Load the raw material details in ERP for future reference		5	3	2
	PC4. Verify the documents and track from finished products to raw materials, in case of quality concerns and during quality management system audits		5	3	2
	PC5. Document and maintain records of production plan with details such as product details, production sequence, equipments and machinery details, efficiency and capacity utilization of equipment		10	6	4
	PC6. Document and maintain records of process details for entire production in process chart or production log for all products produced		15	9	6
	PC7. Document and maintain records of batch size, production yield, wastage of raw materials, energy utilization and final product produced		10	6	4
	PC8. Document and maintain record of observations or deviations (if any) or deviations related to process and production		5	3	2
	PC9. Load the production plan and process details in ERP for future reference		5	3	2
	PC10. Verify documents and track from finished product to ingredients, in case of quality concerns and for quality management system audit		5	3	2
	PC11. Document and maintain records of finished products		3	2	1
	PC12. Document and maintain records of the finished product details as per organizational standards		7	4	3
	PC13. Document and maintain record on observations or deviations related to finished products		5	3	2
	PC14. Load the finished product details in ERP for future reference		5	3	2

<b>Total Marks: 600</b>	<b>Compulsory NOS</b>				
<b>Assessable outcomes</b>	<b>Assessment criteria for outcomes</b>	<b>Total Marks</b>	<b>Out Of</b>	<b>Theory</b>	<b>Skills Practical</b>
	PC15. Verify the documents and track from finished product to ingredients, in case of quality concerns and for quality management system audits		5	3	2
			<b>100</b>	<b>60</b>	<b>40</b>
<b>5. FIC/N9001: Food Safety, hygiene and sanitation for processing food products</b>	PC1. Comply with food safety and hygiene procedures followed in the organization	<b>100</b>	5	2	3
	PC2. Ensure personal hygiene by use of gloves, masks, hair net, ear plugs, boots etc.		6	1	5
	PC3. Ensure hygienic production of food by inspecting raw materials, ingredients, finished products etc for compliance to physical, chemical and microbiological procedures		5	2	3
	PC4. Pack products in appropriate packaging material, label and store them in designated area free from pests, flies etc.		10	4	6
	PC5. Clean, maintain and monitor food processing equipments periodically, using it only for the specified purpose		5	2	3
	PC6. Use safety equipment such as fire extinguisher, eye wash unit, first aid kit when required		10	4	6
	PC7. Follow housekeeping practices by having designated area for machines/tools		5	2	3
	PC8. Follow industry standards like GMP, HACCP and product recall		10	4	6
	PC9. Attend training on hazard management to understand type of physical, chemical and microbiological hazards		5	1	4
	PC10. Identify, document and report problems such as rodents and pests to management		5	1	4
	PC11. Conduct workplace checklist audit before and after work to ensure safety and hygiene		5	1	4
	PC12. Document and maintain raw material, process, packaging material to maintain the effectiveness of quality system		4	1	3
	PC13. Determine the quality of food using criteria such as odor, color, taste and best before date and take immediate measures to prevent spoilage		5	2	3
	PC14. Store raw materials, finished products and allergens separately to prevent cross contamination		5	2	3
	PC15. Label raw materials and finished products and store them in different storage areas according to safe food practices		5	2	3

<b>Total Marks: 600</b>	<b>Compulsory NOS</b>				
<b>Assessable outcomes</b>	<b>Assessment criteria for outcomes</b>	<b>Total Marks</b>	<b>Out Of</b>	<b>Theory</b>	<b>Skills Practical</b>
	PC16. Follow stock rotation based on FEFO/FIFO		10	4	6
			<b>100</b>	<b>35</b>	<b>65</b>
<b>6. FIC/N9004 (Manage and lead a team)</b>	PC1. ensure that the team is aware of the schedule and job expectations on a daily basis		12	4	8
	PC2. involve the team in regular meetings to communicate information intended for them		12	4	8
	PC3. ensure communication to the team on any changes in policies/ processes by the organization through required verbal/ written mechanisms		12	4	8
	PC4. ensure participation of the team in various engagement initiatives organized by the organization		8	2	6
	PC5. counsel and address issues among the team for any work related issues		12	4	8
	PC6. support the manager in deployment of the team as per production schedule and the organizational norms and guidelines		6	2	4
	PC7. ensure periodic training of the team and support the team by delivering trainings		6	3	3
	PC8. share knowledge of processes, techniques and products with the team to enhance their skill levels		6	3	4
	PC9. provide feedback to the manager pertaining to performance of the team		6	3	3
		PC10. motivate workers, initiate and develop cooperation within and between departments, develop personal growth opportunities		4	1
	PC11. maintain effective supervisor-worker relations, create safe work environment, establish effective communication methods, identify and solve employee problems, manage conflict, respond to grievances		4	2	2
	PC12. manage employees and team performance, provide new employee orientation, educate team on procedures to maintain compliance, train or provide adequate training and motivate employees		4	1	3
	PC13. coach, counsel and discipline employees, initiate, coordinate and enforce systems, policies and procedures through team		4	2	2
	PC14. evaluate, investigate complaints or performance concerns, implement		4	2	2

<b>Total Marks: 600</b>	<b>Compulsory NOS</b>

# Food Regulatory Affairs Manager

## CURRICULUM / SYLLABUS

This program is aimed at training candidates for the job of a “Food Regulatory Affairs Manager”, in the “Food Processing” Sector/Industry and aims at building the following key competencies amongst the learner

<b>Program Name</b>	<b>Food Regulatory Affairs Manager</b>		
<b>Qualification Pack Name &amp; Reference ID. ID</b>	FIC/Q9002, v1.0		
<b>Version No.</b>	1.0	<b>Version Update Date</b>	23/02/2016
<b>Pre-requisites to Training</b>	Master’s degree in food science with 8-10 years’ experience in food processing unit or food regulatory matters		
<b>Training Outcomes</b>	<p><b>After completing this programme, participants will be able to:</b></p> <ul style="list-style-type: none"> <li>Designing, developing, implementing and changing food regulatory systems in the organisation.</li> <li>Act as a liaison between organisation and government regulatory agencies</li> <li>Ensure that the products produced and distributed comply with regulatory standards.</li> </ul>		

This course encompasses 3 out of 3 National Occupational Standards (NOS) of “Food Regulatory Affairs Manager” Qualification Pack issued by “Food Industry Capacity and Skill Initiative”.

Sr. No.	Module	Key Learning Outcomes	Equipment Required
1	<p><b>Introduction to the training program</b></p> <p><b>Theory Duration</b> (hh:mm) 01:30</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b> Bridge Module</p>	<p>Introduce each other and build rapport with fellow participants and the trainer.</p>	<p>White board/Chart papers, marker</p>
2	<p><b>Overview of the “Food Regulatory Affairs Manager” Role</b></p> <p><b>Theory Duration</b> (hh:mm) 01:00</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b></p>	<p>Understanding the roles and responsibilities of food regulatory affairs manager</p> <p>Awareness of the nature and availability of job opportunities</p>	<p>Laptop/computer white board, marker, projector, chart papers</p>
3	<p><b>Introduction to the Food Processing Industry</b></p> <p><b>Theory Duration</b> (hh:mm) 01:00</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b></p>	<p>Define food processing</p> <p>List the various sub-sectors of food processing industry</p>	<p>Laptop, white/black board, marker, chart papers, projector, Trainer’s guide, Student manual</p>
4	<p><b>Introduction to the food regulations and affairs</b></p> <p><b>Theory Duration</b> (hh:mm) 05:00</p> <p><b>Practical Duration</b></p>	<p>List the terminology used in the food regulation process</p> <p>State various methods to ensure food regulation</p> <p>State the processes to oversee for ensuring that the food regulations are in compliance</p>	<p>Laptop, white/black board, marker, chart papers, projector, trainer’s guide, student handbook</p>

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	(hh:mm) 30:00 <b>Corresponding NOS Code</b>	Understand what are regulatory policies of an organization and follow them	
5	<b>Design, develop and implement regulatory system</b>  <b>Theory Duration</b> (hh:mm) 13:00  <b>Practical Duration</b> (hh:mm) 21:00  <b>Corresponding NOS Code</b> FIC/N9011	Understand food safety regulations and develop regulatory policies for the organisation with clear definitions to increase consistency, legal security and to provide high level of food safety Design regulatory system with focus on risk reduction, risk-based priorities, reflect integrated and economically feasible initiatives, and ensure high quality and transparency Design and develop regulatory system with intuitive approach to food safety such that problem are recognized, understood, dealt, and checked to ensure problem has been dealt efficiently and effectively Design regulatory system with contingency planning like product traceability and product recall in case of problems, procedures for handling containment, with clear attribution of roles like lines of authority and co-ordination mechanism across food chain (from procuring raw materials, production until product reaching consumers) Design regulatory system with improved communication on food safety information in marketing materials, product labels etc, providing science based information to clear up the unjustified fear among consumers Set food safety system involving food producers, processors, distributors, retailers and consumers to recognize their primary responsibility and to share a common goal of ensuring food safety at all stages Design food regulatory system involving GMP, GHP, and monitoring systems like HACCP Design regulatory system that improve efficiency and compliance, build consumer confidence in the safety and quality of food products	Laptop, white/black board, marker, chart papers, projector, trainer's guide, student handbook, quality manual, quality policy

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>produced, processed, marketed, distributed and sold</p> <p>Design and develop regulatory system ensuring food and health standards are followed in each stage of production and produce food products that meet national and international regulatory standards and protect the health of consumers</p> <p>Design regulatory system including provisions for the right of consumers to have access to accurate and sufficient information and make adequate choices</p> <p>Provide strategic advice and cost effective strategies on regulatory aspects/requirements to senior management and project managing teams throughout the development of a new product</p> <p>Interpret regulatory standards and develop organisation standards meeting national and international food safety regulations like FSSAI, FDA, EU food safety regulations, codex alimentarius etc for products produced, exported and imported, and labels of products packed by the organisation</p> <p>Develop and review standard operating procedures (SOPs) and ensure that they are in compliance with current regulatory requirements and provide regulatory support for corporate quality assurance efforts</p> <p>Develop organisation standards for labels of food products produced and packed, promotional marketing materials, products imported and exported by the organisation to meet national and international food regulatory</p> <p>Evaluate labels of packed food products to ensure it meets national and international food regulatory standards and provide approval or recommend changes</p> <p>Evaluate promotional and materials for regulatory impact and provide approval</p> <p>Provide support for review of essential documents, development and review of consent forms for submission to regulatory authorities for clearance</p>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>Initiate and contribute to process improvements which have an impact on regulatory affairs, quality assurance and other departments</p> <p>Conduct audits on food processing unit for compliance with regulatory, safety and hygiene standards implemented and followed in the organisation</p> <p>Conduct periodic audits to evaluate haccp plans and their implementation in the organisation and ensure it meets the regulatory standards</p> <p>Review internal and external audit reports to check the effectiveness of the present regulatory system and recommend necessary changes in the policies and procedures to reduce failures in the future</p> <p>Identify reason for consumer cases in court related to non-compliance of food products to regulatory standards, collect relevant information's and documents transmitting evidence to produce in court to assist prosecution</p> <p>Monitor company progress toward fulfillment of regulatory commitments</p> <p>Provide training to department managers on organisation policies on food and safety regulations, national and international food laws and regulations, methods and procedures for implementing regulations for procuring raw materials, producing food products, marketing and selling quality products to the consumers</p> <p>Provide training to all department managers on the importance of food regulatory standards and need for its compliance, statutory and regulatory requirements for the products produced, labels of packed products and promotional materials, and the consequences for not following the regulatory requirements</p> <p>Provide training on procedures for collecting evidence in case of problems/consumer complaints/consumer cases in court</p>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>and handling them with technical and scientific approach</p> <p>Provide training to all department managers on methods to implement and monitor regulatory system in their area of function, writing reports with relevant information and data to present to local food regulatory authorities for any concerns raised / clarification required, methods to approach and maintain relationship with food regulatory authorities</p> <p>Provide training on upgradation and changes in the food regulatory system and methods to implement, monitor and achieve them</p>	
6	<p><b>Manage change in food regulatory system</b></p> <p><b>Theory Duration</b> (hh:mm) 14:00</p> <p><b>Practical Duration</b> (hh:mm) 20:00</p> <p><b>Corresponding NOS Code</b> FIC/N9012</p>	<ul style="list-style-type: none"> <li>• Identify procedures, systems, structures that need to be changed for effective implementation of food regulatory system</li> <li>• Assess gaps in the current policies and procedures and analyze the future requirements</li> <li>• Identify and assess barriers to change in regulatory system, develop strategies and plans to overcome those barriers</li> <li>• Assess risks and benefits associated with the strategies and plans, and develop contingency arrangements design new work processes, procedures, systems, structures and roles to achieve planned changes in regulatory system</li> <li>• Ensure plan for change in regulatory system include short-term as well as longer-term deliverables</li> <li>• Develop system for monitoring and assessing regulatory system to assess progress in changes implemented</li> <li>• Develop reporting and communicating system to review the effectiveness of the changes in regulatory system and to obtain feedback</li> <li>• Provide training and support to implement changes planned in regulatory system</li> <li>• Communicate reasons, importance and benefits of implementing change in regulatory system, future that can be achieved through</li> </ul>	Laptop, white/black board, marker, chart papers, projector, trainer's guide, student handbook, quality manual, quality policy, regulatory policies

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>implementing and following the change, to management and concerned employees</p> <ul style="list-style-type: none"> <li>• Make the management and employees welcome change in regulatory system as an opportunity to deliver products of national and international quality</li> <li>• Make the management and employees understand the need and importance for change in regulatory system, result expected out of change and its effect on the organisation</li> <li>• Implement the strategies and plans for change in regulatory system with available resources</li> <li>• Make the managers responsible for implementing change in regulatory system understand their responsibilities and commitment, and use their influence and power over employees to implement change</li> <li>• Set and prioritize objectives for the change in regulatory system, identify and deal with obstacles to change, and support employees through the change process</li> <li>• Communicate progress achieved through change in regulatory system to everyone involved, and make them understand and enjoy achievement</li> <li>• Review reports on total quality management system to evaluate effectiveness of changes implemented in regulatory system of the organisation</li> <li>• Organize internal and external audit on total quality management system to evaluate effectiveness of the changes implemented in regulatory system</li> <li>• Monitor changes implemented in regulatory system , document and communicate the outcome of implemented change to the management</li> <li>• Recognize and reward employees and teams for implementing regulatory system and achieving results through new policies and procedures</li> </ul>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<ul style="list-style-type: none"> <li>Monitor and ensure changes implemented in regulatory system are effective and meet the requirements of the organisation and regulatory system laid by national and international regulatory bodies</li> </ul>	
7	<p><b>Prepare representations to regulatory authorities and for new product registrations</b></p> <p><b>Theory Duration</b> (hh:mm) 09:00</p> <p><b>Practical Duration</b> (hh:mm) 14:00</p> <p><b>Corresponding NOS Code</b> FIC/N9013</p>	<p>Prepare simple and complex regulatory documents in accordance with applicable FSSAI regulations by collecting, collating and evaluating scientific data that has been well researched on relevant aspects</p> <p>Review regulatory guidance and requirements pertaining to products produced in the organisation and prepare documents providing thoughtful and accurate comments</p> <p>Prepare regulatory documents to authorities that translate regulatory requirements into practical, workable plans with timelines for development and implementation</p> <p>Coordinate with food regulatory authorities to review disputed matters, negotiation and finalization on products and projects, and for comments and formal approvals</p> <p>Prepare documents that include check lists created and maintained to implement regulatory requirements, technical data, and declarations of conformity</p> <p>Interface with consultants, research organizations, partners, co-manufacturers etc. for preparation, review, compilation, finalization and submission of documents for regulatory approvals</p> <p>Prepare responses to communications and other requests from government food regulatory authorities</p> <p>Prepare safety reports and documents on raw materials, ingredients, additives, flavours etc used in the products produced and marketed by the organisation, for regulatory submissions and clearance</p> <p>Identify reasons related to non-compliance of food products to regulatory standards, collect relevant information's and data,</p>	<p>Laptop, white/black board, marker, chart papers, projector, trainer's guide, student handbook, quality manual, quality policy, audit documents, regulatory policies</p>

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>prepare technical documents with scientific facts and supporting evidence, and submit to relevant authorities, respond to communications from government authorities, and follow up regularly to revoke product ban</p> <p>Interact with various regulatory authorities during concept, development and industrialization stages of projects for clarification and approvals</p> <p>Interact with the notified bodies and competent authorities for developing and reviewing regulatory standards</p> <p>Coordinate with regulatory authorities for reporting, to comment on proposed regulations, and to represent company's interest in the development of standards and guidelines</p> <p>Discuss on the differences that exist in the regulations laid down by different governments and their interpretation by the regulatory agencies and ensure that efficient and economical regulatory standards are planned</p> <p>Identify possible threats or opportunities from upcoming regulations under FSSAI, consumer affairs, other government food policies and regulations and liaise with industry associations to tackle/manage them effectively</p> <p>Participate in seminar, workshops, conferences and meetings organised by FSSAI and other industry association, representing the organisation to maintain, strengthen and expand contacts</p> <p>Work closely with regulatory and trade associations like CII (confederation of indian industries), FICCI (federation of indian chambers of commerce and industries), CIFTI (confederation of indian food trade and industry), AIFPA (all india food processors association), ASSOCHAM(the associated chambers of commerce of india) etc on national and international regulatory changes and challenges that have impact on food products produced in the</p>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>organisation and to manage them proactively</p> <p>Develop and write clear arguments and explanations for new product license</p> <p>Prepare and present registration documents to regulatory authorities and notified bodies for new product approvals</p> <p>Present written representation for new products and carry out negotiations with regulatory authorities to obtain necessary approvals for new product production and marketing</p> <p>Evaluate, prepare and submit new product registration applications and follow through the application during the evaluation phase to achieve favorable outcome</p> <p>Prepare responses to letter/e-mail communications and other requests from government food regulatory bodies on new product approval</p> <p>Provide regulatory and product compliance report in the area of advertising and label claims for new products</p>	
8	<p><b>Field Visits</b></p> <p><b>Theory Duration</b> (hh:mm) 04:00</p> <p><b>Practical Duration</b> (hh:mm) 20:00</p> <p><b>Corresponding NOS Code</b></p>	<p>Observe the location, layout and safety aspects of food processing</p> <p>Observe the storage facilities for raw materials and finished products</p> <p>Observe the various machineries used in process</p> <p>Observe the various machineries used in process</p> <p>Observe the cleaning methods and processes followed to maintain the process machineries and tools</p> <p>Observe the raw materials used and their storage procedures</p> <p>Observe the packaging and storage processes of raw material and finished product</p> <p>Observe the post-production cleaning and maintenance process followed in the industry</p>	All the tools and equipment listed above must be available at the site of field visit
9	<p><b>Revision</b></p> <p><b>Theory Duration</b> (hh:mm) 01:00</p>	Revised the knowledge gained so far	All the tools and equipment listed above must be available at the time of revision

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<b>Practical Duration</b> (hh:mm) 01:00  <b>Corresponding NOS Code</b>		
10	<b>Evaluation</b>  <b>Theory Duration</b> (hh:mm) 06:00  <b>Practical Duration</b> (hh:mm) 28:00  <b>Corresponding NOS Code</b>	Assess the knowledge and skills acquired by the participants	All the tools and equipment listed above must be available for evaluation
11	<b>On-the-job Training</b>  <b>Theory Duration</b> (hh:mm) 08:00  <b>Practical Duration</b> (hh:mm) 24:00  <b>Corresponding NOS Code</b>	Apply the skills and knowledge acquired in the training program in the field	All the tools and equipment listed above must be available on the site at the time of OJT
	<b>Total Duration</b> <b>240:00</b>  <b>Theory Duration</b> <b>79:00</b>  <b>Practical Duration</b> <b>161:00</b>	<b>Unique Equipment Required:</b> Laptop, white/black board, marker, chart papers, projector, trainer's guide, student handbook, quality manual, quality policy, audit documents, regulatory policies	

Grand Total Course Duration: **240 Hours, 0 Minutes**

*(This syllabus/ curriculum has been approved by [SSC: Food Industry Capacity and Skill Initiative](#))*

## Trainer Prerequisites for Job role: “Food Regulatory Affairs Manager” mapped to Qualification Pack: “FIC/Q9002, v1.0”

Sr. No.	Area	Details
1	<b>Description</b>	To deliver accredited training service, mapping to the curriculum detailed above, in accordance with the Qualification Pack “FIC/Q9002”, Version 1.0
2	<b>Personal Attributes</b>	An aptitude for conducting training, and pre/ post work to ensure competent, employable candidates at the end of the training, and pre/post work to ensure competent, employable candidates at the end of the training. Strong communication skills, ability to work as part of a team; a passion for quality and for developing others; well-organized and focused, eager to learn and keep oneself updated with the latest in the mentioned fields.
3	<b>Minimum Educational Qualifications</b>	B.Sc/B.Tech/BE in Food Process Engineering/ Food Safety and Quality Management in Food Process Engineering with 5-6 years of hand on experience in QA/regulations of a food Processing Industry or M.Sc/M.Tech/ME or in Food Process Engineering/ Food Safety and Quality Management in Food Safety/Food Process Engineering with 3-4- years of hand on experience in QA/regulations of a food Processing Industry
4a	<b>Domain Certification</b>	Certified for Job Role: “ <u>Food regulatory affairs Manager</u> ” mapped to QP: “FIC/Q9002, v1.0”. Minimum accepted score is 80%
4b	<b>Platform Certification</b>	Recommended that the Trainer is certified for the Job Role: “Trainer”, mapped to the Qualification Pack: “SSC/Q1402”. Minimum accepted SCORE IS 80 % as per FICSI guidelines.
5	<b>Experience</b>	B.Sc/B.Tech/BE in Food Process Engineering/ Food Safety and Quality Management in Food Process Engineering with 5-6 years of hand on experience in QA/regulations of a food Processing Industry or M.Sc/M.Tech/ME or in Food Process Engineering/ Food Safety and Quality Management in Food Safety/Food Process Engineering with 3-4- years of hand on experience in QA/regulations of a food Processing Industry

## Annexure: Assessment Criteria

<b>Assessment Criteria</b>	
<b>Job Role</b>	<b>Food regulatory affairs manager</b>
<b>Qualification Pack</b>	<b>FIC/Q9002 v1.0</b>
<b>Sector Skill Council</b>	<b>Food Processing</b>

<b>Sr. No.</b>	<b>Guidelines for Assessment</b>
1	Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2	The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3	Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre(as per assessment criteria below)
4	Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria
5	To pass the Qualification Pack, every trainee should score a minimum of 70% (overall) in every QP
6	The marks are allocated PC wise; however, every NOS will carry a weight age in the total marks allocated to the specific QP

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
<b>1. FIC/N9011: Design, develop and implement regulatory system</b>	PC.1 understand food safety regulations and develop regulatory policies for the organisation with clear definitions to increase consistency, legal security and to provide high level of food safety	<b>100</b>	4	1.5	2.5
	PC2. design regulatory system with focus on risk reduction, risk-based priorities, reflect integrated and economically feasible initiatives, and ensure high quality and transparency		4	1.5	2.5
	PC3. design and develop regulatory system with intuitive approach to food safety such that problem are recognized, understood, dealt, and checked to ensure problem has been dealt efficiently and effectively		4	1.5	2.5
	PC4. design regulatory system with contingency planning like product traceability and product recall in case of problems, procedures for handling containment, with clear attribution of roles like lines of authority and co-ordination mechanism across food chain (from procuring raw materials, production until product reaching consumers		4	1.5	2.5
	PC5. design regulatory system with improved communication on food safety information in marketing materials, product labels etc, providing science based information to clear up the unjustified fear among consumers		4	1.5	2.5
	PC6. set food safety system involving food producers, processors, distributors, retailers and consumers to recognize their primary responsibility and to share a common goal of ensuring food safety at all stages		4	1.5	2.5
	PC7. design food regulatory system involving gmp, ghp, and monitoring systems like haccp		4	1.5	2.5
	PC8. design regulatory system that improve efficiency and compliance, build consumer confidence in the safety and quality of food products produced, processed, marketed, distributed and sold		4	1.5	2.5
	PC9. design and develop regulatory system ensuring food and health standards are followed in each stage of production and		4	1.5	2.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	produce food products that meet national and international regulatory standards and protect the health of consumers				
	PC10. design regulatory system including provisions for the right of consumers to have access to accurate and sufficient information and make adequate choices		4	1.5	2.5
	PC11. provide strategic advice and cost effective strategies on regulatory aspects/requirements to senior management and project managing teams throughout the development of a new product		4	1.5	2.5
	PC12. interpret regulatory standards and develop organisation standards meeting national and international food safety regulations like fssai, fda, eu food safety regulations, codex alimentarius etc for products produced, exported and imported, and labels of products packed by the organisation		4	1.5	2.5
	PC13. develop and review standard operating procedures (sops) and ensure sops are in compliance with current regulatory requirements and provide regulatory support for corporate quality assurance efforts		4	1.5	2.5
	PC14. develop organisation standards for labels of food products produced and packed, promotional marketing materials, products imported and exported by the organisation to meet national and international food regulatory		4	1.5	2.5
	PC15. evaluate labels of packed food products to ensure it meets national and international food regulatory standards and provide approval or recommend changes		4	1	3
	PC16. evaluate promotional and materials for regulatory impact and provide approval		4	1	3
	PC17. provide support for review of essential documents, development and review of consent forms for submission to regulatory authorities for clearance		3	1	2
	PC18. initiate and contribute to process improvements which have an impact on		3	1	2

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	regulatory affairs, quality assurance and other departments				
	PC19. conduct audits on food processing unit for compliance with regulatory, safety and hygiene standards implemented and followed in the organisation		3	1	2
	PC20. conduct periodic audits to evaluate haccp plans and their implementation in the organisation and ensure it meets the regulatory standards		3	1	2
	PC21. review internal and external audit reports to check the effectiveness of the present regulatory system and recommend necessary changes in the policies and procedures to reduce failures in the future		3	1	2
	PC22. identify reason for consumer cases in court related to non-compliance of food products to regulatory standards, collect relevant information's and documents transmitting evidence to produce in court to assist prosecution		3	1	2
	PC23. monitor company progress toward fulfillment of regulatory commitments		3	1	2
	PC24. provide training to department managers on organisation policies on food and safety regulations, national and international food laws and regulations, methods and procedures for implementing regulations for procuring raw materials, producing food products, marketing and selling quality products to the consumers		3	1	2
	PC25. provide training to all department managers on the importance of food regulatory standards and need for its compliance, statutory and regulatory requirements for the products produced, labels of packed products and promotional materials, and the consequences for not following the regulatory requirements		3	1	2
	PC26. provide training on procedures for collecting evidence in case of problems/consumer complaints/consumer cases in court and handling them with technical and scientific approach		3	1	2

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC27. provide training to all department managers on methods to implement and monitor regulatory system in their area of function, writing reports with relevant information and data to present to local food regulatory authorities for any concerns raised / clarification required, methods to approach and maintain relationship with food regulatory authorities		3	1	2
	PC28. provide training on upgradation and changes in the food regulatory system and methods to implement, monitor and achieve them		3	1	2
			<b>100</b>	<b>35</b>	<b>65</b>
<b>2. FIC/N9012: Manage change in food regulatory system</b>	PC1. identify procedures, systems, structures that need to be changed for effective implementation of food regulatory system	<b>100</b>	5	1	4
	PC2. assess gaps in the current policies and procedures and analyze the future requirements		5	1	4
	PC3. identify and assess barriers to change in regulatory system, develop strategies and plans to overcome those barriers		5	1	4
	PC4. assess risks and benefits associated with the strategies and plans, and develop contingency arrangements		5	1	4
	PC5. design new work processes, procedures, systems, structures and roles to achieve planned changes in regulatory system		5	1	4
	PC6. ensure plan for change in regulatory system include shortterm as well as longer-term deliverables.		4	1.5	2.5
	PC7. develop system for monitoring and assessing regulatory system to assess progress in changes implemented		5	2	3
	PC8. develop reporting and communicating system to review the effectiveness of the changes in regulatory system and to obtain feedback		5	2	3
	PC9. provide training and support to implement changes planned in regulatory system		4	2	2
	PC10. communicate reasons, importance and benefits of implementing change in regulatory system, future that can be achieved through implementing and		5	2	3

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	following the change, to management and concerned employees				
	PC11. make the management and employees welcome change in regulatory system as an opportunity to deliver products of national and international quality		4	1.5	2.5
	PC12. make the management and employees understand the need and importance for change in regulatory system, result expected out of change and its effect on the organisation		5	2	3
	PC13. implement the strategies and plans for change in regulatory system with available resources		5	2	3
	PC14. make the managers responsible for implementing change in regulatory system understand their responsibilities and commitment, and use their influence and power over employees to implement change		5	2	3
	PC15. set and prioritize objectives for the change in regulatory system, identify and deal with obstacles to change, and support employees through the change process		5	2	3
	PC16. communicate progress achieved through change in regulatory system to everyone involved, and make them understand and enjoy achievement		4	1.5	2.5
	PC17. review reports on total quality management system to evaluate effectiveness of changes implemented in regulatory system of the organisation		5	2	3
	PC18. organize internal and external audit on total quality management system to evaluate effectiveness of the changes implemented in regulatory system		5	2	3
	PC19. monitor changes implemented in regulatory system , document and communicate the outcome of implemented change to the management		5	2	3
	PC20. recognize and reward employees and teams for implementing regulatory system and achieving results thorough new policies and procedures		4	1.5	2.5
	PC21. monitor and ensure changes implemented in regulatory system are		5	2	3

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	effective and meet the requirements of the organisation and regulatory system laid by national and international regulatory bodies		100	35	65
<b>3. FIC/N9013: Prepare representations to regulatory authorities and for new product registrations</b>	PC1. prepare simple and complex regulatory documents in accordance with applicable FSSAI regulations by collecting, collating and evaluating scientific data that has been well researched on relevant aspects	100	5	1	4
	PC2. review regulatory guidance and requirements pertaining to products produced in the organisation and prepare documents providing thoughtful and accurate comments		5	1	4
	PC3. prepare regulatory documents to authorities that translate regulatory requirements into practical, workable plans with timelines for development and implementation		5	1	4
	PC4. coordinate with food regulatory authorities to review disputed matters, negotiation and finalization on products and projects, and for comments and formal approvals		5	1	4
	PC5. prepare documents that include check lists created and maintained to implement regulatory requirements, technical data, and declarations of conformity		4	1.5	2.5
	PC6. interface with consultants, research organizations, partners, co-manufacturers etc for preparation, review, compilation, finalization and submission of documents for regulatory approvals		4	1.5	2.5
	PC7. prepare responses to communications and other requests from government food regulatory authorities		4	1.5	2.5
	PC8. prepare safety reports and documents on raw materials, ingredients, additives, flavours etc used in the products produced and marketed by the organisation, for regulatory submissions and clearance		4	1.5	2.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC9. Identify reasons related to noncompliance of food products to regulatory standards, collect relevant information's and data, prepare technical documents with scientific facts and supporting evidence, and submit to relevant authorities, respond to communications from government authorities, and follow up regularly to revoke product ban		4	1.5	2.5
	PC10. prepare simple and complex regulatory documents in accordance with applicable fssai regulations by collecting, collating and evaluating scientific data that has been well researched on relevant aspects		5	2	3
	PC11. review regulatory guidance and requirements pertaining to products produced in the organisation and prepare documents providing thoughtful and accurate comments		5	2	3
	PC12. prepare regulatory documents to authorities that translate regulatory requirements into practical, workable plans with timelines for development and implementation		5	2	3
	PC13. coordinate with food regulatory authorities to review disputed matters, negotiation and finalization on products and projects, and for comments and formal approvals		5	2	3
	PC14. prepare documents that include check lists created and maintained to implement regulatory requirements, technical data, and declarations of conformity		4	1.5	2.5
	PC15. interface with consultants, research organizations, partners, co-manufacturers etc for preparation, review, compilation, finalization and submission of documents for regulatory approvals		4	1.5	2.5
	PC16. prepare responses to communications and other requests from government food regulatory authorities		5	2	3
	PC17. develop and write clear arguments and explanations for new product license		5	2	3

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC18. prepare and present registration documents to regulatory authorities and notified bodies for new product approvals		5	2	3
	PC19. present written representation for new products and carry out negotiations with regulatory authorities to obtain necessary approvals for new product production and marketing		5	2	3
	PC20. evaluate, prepare and submit new product registration applications and follow through the application during the evaluation phase to achieve favorable outcome		4	1.5	2.5
	PC21. prepare responses to letter/e-mail communications and other requests from government food regulatory bodies on new product approval		4	1.5	2.5
	PC22. Provide regulatory and product compliance report in the area of advertising and label claims for new products		4	1.5	2.5
	<b>Total</b>		<b>100</b>	<b>35</b>	<b>65</b>
	<b>Grand Total</b>	<b>300</b>	<b>300</b>	<b>200</b>	<b>100</b>
	<b>Percentage Weightage</b>		<b>100</b>	<b>60%</b>	<b>40%</b>

# Model Curriculum

## Production Manager

**SECTOR: FOOD PROCESSING**

**SUB-SECTOR: FRUIT & VEGETABLE, FOOD GRAIN  
OCCUPATION: MILLING (INCLUDING OILSEEDS), DAIRY  
PRODUCTS, MEAT & POULTRY, FISH & SEAFOOD,  
BREAD & BAKERY, ALCOHOLIC BEVERAGES,  
AERATED WATER/ SOFT DRINKS, SOYA FOOD,**

**PACKAGED FOOD  
PROCESSING**

**REF ID: FIC/Q9003, V1.0**

**NSQF LEVEL: 7**

<b>2. Trainer Prerequisites</b>	<b><u>09</u></b>
<b>3. Annexure: Assessment Criteria</b>	<b><u>10</u></b>

# Production Manager

## CURRICULUM / SYLLABUS

This program is aimed at training candidates for the job of a “Production Manager”, in the “Food Processing” Sector/Industry and aims at building the following key competencies amongst the learner

<b>Program Name</b>	<b>Production Manager</b>		
<b>Qualification Pack Name &amp; Reference ID. ID</b>	FIC/Q9003, v1.0		
<b>Version No.</b>	1.0	<b>Version Update Date</b>	30/03/2016
<b>Pre-requisites to Training</b>	Preferably Class 12 and 2-3 years' experience in a food processing unit		
<b>Training Outcomes</b>	<b>After completing this programme, participants will be able to:</b> Production of food products through the process of production planning, coordinating and controlling production process to achieve quantity and quality product Reviewing production process to minimize production cost and optimizing production.		

This course encompasses 3 out of 3 National Occupational Standards (NOS) of “Production Manager” Qualification Pack issued by “Food Industry Capacity and Skill Initiative”.

Sr. No.	Module	Key Learning Outcomes	Equipment Required
1	<p><b>Introduction to the training program</b></p> <p><b>Theory Duration</b> (hh:mm) 00:30</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b> Bridge Module</p>	<p>Introduce each other and build rapport with fellow participants and the trainer.</p>	<p>White board/Chart papers, marker</p>
2	<p><b>Overview of the “Production Manager” Role</b></p> <p><b>Theory Duration</b> (hh:mm) 01:00</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b></p>	<p>Understanding the roles and responsibilities of production manager</p> <p>Awareness of the nature and availability of job opportunities</p>	<p>Laptop/computer white board, marker, projector, chart papers</p>
3	<p><b>Introduction to the Food Processing Industry</b></p> <p><b>Theory Duration</b> (hh:mm) 01:30</p> <p><b>Practical Duration</b> (hh:mm) 00:00</p> <p><b>Corresponding NOS Code</b></p>	<p>Define food processing</p> <p>List the various sub sectors of food processing industry</p>	<p>Laptop, white/black board, marker, chart papers, projector, Trainer’s guide, Student manual</p>
4	<p><b>Introduction to food processing process</b></p> <p><b>Theory Duration</b> (hh:mm) 02:00</p> <p><b>Practical Duration</b> (hh:mm)</p>	<p>List the common machineries used in food processing</p> <p>Explain the process of testing food for accepted quality standards</p> <p>Demonstrate the test for checking the quality of food</p> <p>Describe the procedure for processing various food</p>	<p>Laptop, white board, marker, chart papers, projector, trainer’s guide and student handbook</p>

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	04:00 <b>Corresponding NOS Code</b>	Identify different equipment used in food industry	
5	<b>Organizational standards and norms</b>  <b>Theory Duration</b> (hh:mm) 04:00  <b>Practical Duration</b> (hh:mm) 02:00  <b>Corresponding NOS Code</b>	State the roles and responsibilities of a production manager State how to conduct yourself at the workplace State the personal hygiene and sanitation guidelines State the food safety hygiene standards to follow in a work environment	Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook, protective gloves, head caps, aprons, safety goggles, safety boots, mouth masks, sanitizer, safety manual
6	<b>Manage production process in food processing unit</b>  <b>Theory Duration</b> (hh:mm) 15:00  <b>Practical Duration</b> (hh:mm) 11:40  <b>Corresponding NOS Code</b> FIC/N9014	<ul style="list-style-type: none"> <li>• Communicate the organisation policies and goals clearly to the employees of production team, make them understand and commit their energy and expertise to achieve organisation goals</li> <li>• Achieve department targets and organisation goals by understanding the organisation and employees, developing a leadership style and applying them appropriately</li> <li>• Communicate with employees regularly and effectively, help them identify their strengths, provide support to overcome their weakness, listen to their grievances and provide appropriate solutions, and win their trust and support</li> <li>• Motivate and support employees to achieve their work and development objectives, and provide recognition when they are successful</li> <li>• Encourage employees to take responsibilities, to take own decisions within agreed boundaries, to take lead in their own areas of expertise for their development</li> <li>• Initiate personnel actions, such as promotions, transfers, discharges or disciplinary measures</li> <li>• Lead production department and team successfully through difficulties and challenges</li> <li>• Review the sales forecast for the week/month (or) monthly production</li> </ul>	Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>plan discussed with plant manager (or) customer requirement (as applicable) and identify production priorities to meet market requirement</p> <ul style="list-style-type: none"> <li>• Identify and confirm resource availability such as raw materials, packing materials, equipment availability and capacity, production capacity, manpower requirement and availability, stock level, storage capacity, transport capacity etc</li> <li>• Plan details of production in terms of output quantity and quality, cost, time and manpower requirements</li> <li>• Analyze the consequences of failing to meet production/delivery timelines to meet the schedule, notify relevant authorities of any possibility that demand cannot be met within required timeframe</li> <li>• Develop production schedule to meet market demands/priorities and delivery timelines within budget and with available resources, consult production plan with inter department heads and production supervisor, instruct supervisor to allocate work to production team</li> <li>• Communicate the production schedule to cross function heads through communication system followed by the organisation such as e-mail or upload in the ERP system</li> <li>• Identify and confirm equipment requirements to meet production target, share production schedule with equipment requirement to maintenance manager/supervisor for maintenance plan that aligns with production plan</li> <li>• Co-ordinate with maintenance manager/supervisor to understand materials, consumables and manpower requirement and availability for maintenance activities, for uninterrupted production</li> <li>• Understand equipment maintenance process and procedure and co-ordinate for maintenance activities during breakdown, emergency response, routine cleaning and servicing, etc.</li> <li>• Analyze equipment maintenance data to interpret equipment</li> </ul>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>performance and arrive at production capability of each process equipment</p> <ul style="list-style-type: none"> <li>• Co-ordinate with maintenance team to ensure reliable equipment performance with minimal disruption to production, to minimize down time during equipment breakdowns, and to optimize equipment efficiency to achieve production target</li> <li>• Lead and build team spirit between production and maintenance personnel through effective communication to enhance equipment performance and to identify production improvement opportunities</li> <li>• Ensure maintenance procedures are followed meet food safety and environmental requirements</li> <li>• Monitor production process for usage of raw materials, packaging materials, manpower, wastage against production plan and identify reason for variances against plan</li> <li>• Address the reason for variation in achieving production schedule, production target within allocated budget</li> <li>• Adjust production schedule in response to variables affecting achievement of production target</li> <li>• Monitor production output and cost, adjust processes and resources to minimize cost and to achieve quantity and quality product</li> <li>• Reschedule production plan in case of urgent requirement or any unforeseen event, to minimize wastage and to utilize materials/utilities and resources efficiently, discuss and negotiate changes with inter department team on time for their support and team work</li> <li>• Review production schedule and process, consult /discuss with supervisor, team and cross function teams identify opportunities for improvement and develop recommendations for improvement on production process</li> <li>• Set polices, plans and procedures, and take initiative to implement the identified improvement opportunities</li> </ul>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>to control cost and to achieve better yield and quality</p> <ul style="list-style-type: none"><li>• Monitor, review and ensure production details are documented to meet the documentation requirements of the organisation, and to meet audit requirements like ISO, HACCP, etc</li><li>• Understand objective of trial production, trial product processing method and specification, select production team for trial, discuss with cross function team like planning, QA, maintenance etc, clarify roles and responsibilities and level of authority to the team and cross function</li><li>• Prepare technical production procedures considering all engineering and process parameters for new product trial, educate and train supervisors and operators on trial procedure</li><li>• Identify and consider all possible hazards, prepare plan and procedures to prevent and control hazards, provide training to trial team to handle hazards</li><li>• Prepare detailed trial production schedule to manage production process without overlapping/affecting with regular production, and considering availability of raw materials and packaging materials, machine availability and capability, man power availability and competency etc</li><li>• Monitor trial production against plan to identify variances and factors that need to be adjusted to achieve product of required specification within the planned time</li><li>• Document and evaluate trial production data and identify process/parameters to be modified/changed to achieve product of required specification</li><li>• Prepare trial production report with recommendations on improvement opportunities, and share with cross function heads and relevant authorities for suggestion and consideration</li></ul>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
7	<p><b>Manage production optimization and cost efficiency</b></p> <p><b>Theory Duration</b> (hh:mm) 08:00</p> <p><b>Practical Duration</b> (hh:mm) 12:00</p> <p><b>Corresponding NOS Code</b> FIC/N9015</p>	<p>Review production reports and analyze equipment performance, process capability, change over time, maintenance, consumables, power etc, to identify factors that affect performance of production and recommend improvement opportunities</p> <p>Compile performance data on process and equipment to identify cause for lack of performance, evaluate opportunities to improve, identify cost saving options, propose changes in process, and implement proposal with proper approvals</p> <p>Review production process with supervisor and machine operators to identify reasons for slowdown or stop of production process, provide recommendations to overcome efficiency issues, take feedback, develop plans for implementing recommended changes, monitor changes implemented, and review changes and improvement</p> <p>Calculate utilities and energy usage in production area and for production process, identify methods to minimize usage</p> <p>Develop plans and procedures to minimize use of utilities and energy without affecting the production efficiency</p> <p>Identify energy and utility losses or sources of waste, analyze reason, recommend methods to improve efficient energy/utility application, ensure recommendations are implemented, and monitor improvement</p> <p>Identify areas where utilities and energy can be saved, and Identify methods to save energy like recycling energy and utilities such as steam, heat and water, following proper maintenance methods to avoid leaks and losses etc, and prepare efficient production schedule such that target is met with efficient utilization of energy and utility</p> <p>Analyze usage pattern of energy and other utilities in production area and process against budget allocation, identify cost effective options for</p>	<p>Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook ,</p>

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>minimizing wastage, and implement changes</p> <p>Identify system, production process that need to be changed, identify opportunities for implementing change in production process, analyze impact of change on product quality, impact on the team and present production process</p> <p>Communicate with relevant authorities/superiors the need for change, results and benefits expected out of change</p> <p>Design new processes, procedures, systems, structures with roles and responsibilities, key performance indicators, training needs, safety system, contingency plans, monitoring and reporting system to implement planned changes in production process</p> <p>Provide training and support to implement changes, develop a strategy to help teams implement change</p> <p>Monitor changes implemented in production process and ensure changes are effective and meet the organisation and regulatory requirements</p> <p>Document and communicate the progress achieved through implemented change to the management and everyone involved, and make them understand and enjoy achievement</p> <p>Recognize and reward employees and teams for implementing change in production system and achieving better efficiency</p> <p>Manage budget efficiently by managing production with available resource, by avoiding overtime and too many casual workers/helpers</p> <p>Plan effectively to secure, confirm and allocate required manpower to meet production target within budget, monitor resource utilization, to achieve production target within existing resource</p> <p>Identify situations where actual budget exceeds the approved budget, investigate reason for variance and take appropriate</p>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<p>corrective action to keep budget under control</p> <p>Identify the impact on budget of production-related decisions like scheduling holidays, adjusting production volume, scheduling equipment maintenance etc, before scheduling production, and identify opportunities to improve performance against budget</p> <p>Identify the causes for any significant variances in budget control, discuss with team and ensure prompt corrective action is taken to keep expenditure under control</p> <p>Encourage team to think and identify ways of reducing expenditure, analyse and pursue the suggested ideas</p>	
8	<p><b>Manage documentation system and implement safety and environmental policies</b></p> <p><b>Theory Duration</b> (hh:mm) 07:00</p> <p><b>Practical Duration</b> (hh:mm) 09:00</p> <p><b>Corresponding NOS Code</b> FIC/N9016</p>	<ul style="list-style-type: none"> <li>• Establish to production team the importance of documentation, provide training on documentation system, and ensure all documents are maintained systematically</li> <li>• Ensure all relevant records and documents are complete, up-to-date and accessible for audits on production process</li> <li>• During audit provide the auditor with access to all relevant information, records and documents</li> <li>• Ensure corrective actions recommended and implemented are documented to assure production process is carried in accordance with organisation and regulatory standards</li> <li>• Establish methods to track production information from documented and maintained records</li> <li>• Establish to production team importance of safety and environment requirements related to food processing unit, communicate information about safety and environmental policies and related procedures to the team</li> <li>• Co-ordinate with quality team to prepare policies and sops on safety and environment requirements related to production function, and ensure those procedure are followed in production area and during production process</li> </ul>	Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook, logbooks, internal audit register, food safety manual, quality policy etc.

Sr. No.	Module	Key Learning Outcomes	Equipment Required
		<ul style="list-style-type: none"><li>• Ensure safe work procedures are followed in production area and during production process</li><li>• Ensure policies and standard operating procedures on safety and environment requirements are accessible to all employees of production team, and are followed to meet the regulatory requirements</li><li>• Identify safety and environmental hazards relevant to production processes, implement system to handle risks</li><li>• Provide or organize training through relevant authorities on safety and environmental management system, to understand methods to control and prevent hazards</li><li>• Conduct inspections in work place on use of protective clothing and accessories, and to ensure safety system is followed during production process</li><li>• Conduct audits and review records on safety and environmental system to monitor if control systems are followed by production team, and address non-compliance following organisation standards</li><li>• Implement system on waste management in production area and process, monitor and confirm waste collection, treatment, recycling or disposal is carried out meeting industry requirements and environmental regulations</li><li>• Respond to environmental management hazard identification and incidents in an appropriate and timely way</li><li>• Review practice and procedures followed on safety, conduct risk assessments, identify non-compliance, and provide recommendations to address gaps and non-conformances</li><li>• Review environmental records documents maintained, analyze data to evaluate effectiveness of the environmental management system and identify areas for improvement, plan and implement improvements to meet regulatory requirements</li></ul>	

Sr. No.	Module	Key Learning Outcomes	Equipment Required
9	<b>Professional and Core Skills</b>  <b>Theory Duration</b> (hh:mm) 03:00  <b>Practical Duration</b> (hh:mm) 05:00  <b>Corresponding NOS Code</b>	Undertake a self-assessment test Identify personal strengths and weaknesses Plan and schedule the work order and manage time effectively to complete the tasks assigned Prevent potential problems from occurring Resolve issues and problems using acquired knowledge and realize the importance of decision making Identify potential problems and make sound and timely decision Improve your reading skills State the importance of listening	Laptop, white/black board, marker, chart papers, projector ,Trainer's guide, Student manual
10	<b>IT Skills</b>  <b>Theory Duration</b> (hh:mm) 05:00  <b>Practical Duration</b> (hh:mm) 07:00  <b>Corresponding NOS Code</b>	Identify parts of the computer Use the computer keyboard effectively to type Use computer applications effectively to record day-to-day activities Use the word processor effectively Use the spreadsheet application effectively Use the computer to document day-to-day activities	Laptop, white/black board, marker, chart papers, projector, Trainer's guide, Student manual
11	<b>Field Visits</b>  <b>Theory Duration</b> (hh:mm) 04:00  <b>Practical Duration</b> (hh:mm) 30:00  <b>Corresponding NOS Code</b>	Observe the factory location, layout and safety aspects of food processing Observe the storage facilities for raw materials and finished products Observe the various machineries used in process Observe the various machineries used in process Observe the cleaning methods and processes followed to maintain the process machineries and tools Observe the raw materials used and their storage procedures Observe the packaging and storage processes of raw material and finished product Observe the post-production cleaning and maintenance process followed in the industry	All the tools and equipment listed above must be available at the site of field visit
12	<b>Revision</b>  <b>Theory Duration</b> (hh:mm) 02:00	Revised the knowledge gained so far	All the tools and equipment listed above must be available at the time of revision

Sr. No.	Module	Key Learning Outcomes	Equipment Required
	<b>Practical Duration</b> (hh:mm) 02:00  <b>Corresponding NOS Code</b>		
13	<b>Evaluation</b>  <b>Theory Duration</b> (hh:mm) 08:00  <b>Practical Duration</b> (hh:mm) 20:00  <b>Corresponding NOS Code</b>	Assess the knowledge and skills acquired by the participants	All the tools and equipment listed above must be available for evaluation
14	<b>On-the-job Training</b>  <b>Theory Duration</b> (hh:mm) 30:00  <b>Practical Duration</b> (hh:mm) 65:00  <b>Corresponding NOS Code</b>	Apply the skills and knowledge acquired in the training program in the field	All the tools and equipment listed above must be available on the site at the time of OJT
	<b>Total Duration</b> <b>240:00</b>  <b>Theory Duration</b> <b>88:00</b>  <b>Practical Duration</b> <b>152:00</b>	<b>Unique Equipment Required:</b> Laptop, white board, marker, chart papers, projector, trainer's guide and student handbook, cleaning machines, destoner, pulverizer, kneader, mixer, roaster, dryer, oven, extruder, packaging machines flaker, machineries blender, Measurement Cane; Weighing balance, Timer, Gas with Burner; Knives, spatulas, packing wrap rolls, measuring cup and spoons, utensils, ladle, ladle with holes, digital hygrometer, Muslin Cloth; Weighing Machine; Milk Stirrer; Thermometer; Test Tube (Glass); Test Tube Holder; Gas with Burner,	

Grand Total Course Duration: **240Hours, 0 Minutes**

*(This syllabus/ curriculum has been approved by **SSC: Food Industry Capacity and Skill Initiative**)*

## Trainer Prerequisites for Job role: “Production Manager” mapped to Qualification Pack: “FIC/Q9003, v1.0”

Sr. No.	Area	Details
1	<b>Description</b>	To deliver accredited training service, mapping to the curriculum detailed above, in accordance with the Qualification Pack “FIC/Q9003”, Version 1.0
2	<b>Personal Attributes</b>	An aptitude for conducting training, and pre/ post work to ensure competent, employable candidates at the end of the training, and pre/post work to ensure competent, employable candidates at the end of the training. Strong communication skills, ability to work as part of a team; a passion for quality and for developing others; well-organized and focused, eager to learn and keep oneself updated with the latest in the mentioned fields.
3	<b>Minimum Educational Qualifications</b>	M.Sc/M.Tech/ME in Food Technology or Food Engineering with 5-6 years of hands on experience in a food industry B.Sc (home Sc) /B.Tech/BE in Food Technology or Food Engineering with 7-8 years of hands on experience in a food industry
4a	<b>Domain Certification</b>	Certified for Job Role: “Production Manager” mapped to QP: “FIC/Q9003, v1.0”. Minimum accepted score is 80%
4b	<b>Platform Certification</b>	Recommended that the Trainer is certified for the Job Role: “Trainer”, mapped to the Qualification Pack: “SSC/Q1402”. Minimum accepted SCORE IS 80 % as per FICSI guidelines.
5	<b>Experience</b>	M.Sc/M.Tech/ME in Food Technology or Food Engineering with 5-6 years of hands on experience in a food industry B.Sc (home Sc) /B.Tech/BE in Food Technology or Food Engineering with 7-8 years of hands on experience in a food industry

**Annexure: Assessment Criteria**

<b>Assessment Criteria</b>	
<b>Job Role</b>	<b>Production Manager</b>
<b>Qualification Pack</b>	<b>FIC/Q9003, v1.0</b>
<b>Sector Skill Council</b>	<b>Food Processing</b>

Sr. No.	Guidelines for Assessment
1	Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2	The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3	Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre(as per assessment criteria below)
4	Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria
5	To pass the Qualification Pack, every trainee should score a minimum of 70% (overall) in every QP
6	The marks are allocated PC wise; however, every NOS will carry a weight age in the total marks allocated to the specific QP

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
<b>1. FIC/N9014: Manage production process in food processing unit</b>	PC1. Communicate clearly the organisation policies and goals to the employees of production team, make them understand and commit their energy and expertise to achieve organisation goals	<b>100</b>	2.5	1	1.5
	PC2. Achieve department targets and organisation goals by understanding the organisation and employees, developing a leadership style and applying them appropriately		2.5	1	1.5
	PC3. Communicate with employees regularly and effectively, help them identify their strengths, provide support to overcome their weakness, listen to their grievances and provide appropriate solutions, and win their support		3	1	2
	PC4. Motivate and support employees to achieve their work and development objectives, and provide recognition when they are successful		2.5	1	1.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC5. Encourage employees to take responsibilities, to take own decisions within agreed boundaries, to take lead in their own areas of expertise for their development		2.5	1	1.5
	PC6. Initiate personnel actions, such as promotions, transfers, discharges or disciplinary measures		3	1	2
	PC7. Lead production department and team successfully through difficulties and challenges		3	1	2
	PC8. Review the sales forecast for the week/month (or) monthly production plan discussed with plant manager (or) customer requirement (as applicable) and identify production priorities to meet market requirement		3	1	2
	PC9. Identify and confirm resource availability like raw materials, packing materials, equipment availability and capacity, production capacity, manpower requirement and availability, stock level, storage capacity, transport capacity etc		3	1	2
	PC10. Plan details of production in terms of output quantity and quality, cost, time and manpower requirements		3	1	2
	PC11. Analyze the consequences of failing to meet production/delivery timelines to meet the schedule, notifying relevant authorities of any possibility that demand cannot be met within required timeframe		3	1	2
	PC12. Develop production schedule to meet market demands/priorities and delivery timelines within budget and with available resources, consult production plan with inter department heads and production supervisor, instruct supervisor to allocate work to production team		3	1	2
	PC13. Communicate the production schedule to cross function heads through communication system followed by the organisation like e-mail or upload in the erp system		2.5	1	1.5
	PC14. Identify and confirm equipment requirements to meet production target, share production schedule with equipment requirement to maintenance manager/supervisor for		2.5	1	1.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	maintenance plan that aligns with production plan				
	PC15. Co-ordinate with maintenance manager/supervisor to understand materials, consumables and manpower requirement and availability for maintenance activities, for uninterrupted production		3	1	2
	PC16. Understand equipment maintenance process and procedure and co-ordinate for maintenance activities during breakdown, emergency response, routine cleaning and servicing etc		2.5	1	1.5
	PC17. Analyze equipment maintenance data to interpret equipment performance and arrive at production capability of each process equipment		3	1	2
	PC18. Co-ordinate with maintenance team to ensure reliable equipment performance with minimal disruption to production, to minimize down time during equipment breakdowns, and to optimize equipment efficiency to achieve production target		3	1	2
	PC19. Lead and build team spirit between production and maintenance personnel through effective communication to enhance equipment performance and to identify production improvement opportunities		2.5	1	1.5
	PC20. Ensure maintenance procedures followed meet food safety and environmental requirements		2.5	1	1.5
	PC21. Monitor production process for usage of raw materials, packaging materials, manpower, wastage against production plan and identify reason for variances against plan		3	1	2
	PC22. Address the reason for variation in achieving production schedule, production target within allocated budget		3	1	2
	PC23. Adjust production schedule in response to variables affecting achievement of production target		3	1	2
	PC24. Monitor production output and cost, adjust processes and resources to minimize cost and to achieve quantity and quality product		3	1	2

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	PC25. Reschedule production plan in case of urgent requirement or any unforeseen event, to minimize wastage and to utilize materials/utilities and resources efficiently, discuss and negotiate changes with inter department team on time for their support and team work		3	1	2
	PC26. Review production schedule and process, consult /discuss with supervisor, team and cross function teams identify opportunities for improvement and develop recommendations for improvement on production process		3	1	2
	PC27. Set policies, plans and procedures, and take initiative to implement the identified improvement opportunities to control cost and to achieve better yield and quality		3	1	2
	PC28. Monitor, review and ensure production details are documented to meet the documentation requirements of the organisation, and to meet audit requirements like iso, haccp etc		3	1	2
	PC29. Understand objective of trial production, trial product processing method and specification, select production team for trial, discuss with cross function team like planning, qa, maintenance etc, clarify roles and responsibilities and level of authority to the team and cross function		3	1	2
	PC30. Prepare technical production procedures considering all engineering and process parameters for new product trial, educate and train supervisors and operators on trial procedure		3	1	2
	PC31. Identify and consider all possible hazards, prepare plan and procedures to prevent and control hazards, provide training to trial team to handle hazards		2.5	1	1.5
	PC32. Prepare detailed trial production schedule to manage production process without overlapping/affecting with regular production, and considering availability of raw materials and packaging materials,		3	1	2

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	machine availability and capability, man power availability and competency etc				
	PC33. Monitor trial production against plan to identify variances and factors that need to be adjusted to achieve product of required specification within the planned time		3	1	2
	PC34. Document and evaluate trial production data and identify process/parameters to be modified/changed to achieve product of required specification		3	1	2
	PC35. Prepare trial production report with recommendations on improvement opportunities, and share with cross function heads and relevant authorities for suggestion and consideration		3	1	2
<b>2. FIC/N9015: Manage production optimization and cost efficiency in food processing unit</b>	PC1. Review production reports and analyze equipment performance, process capability, change over time, maintenance, consumables, power etc, to identify factors that affect performance of production and recommend improvement opportunities	<b>100</b>	2	0.5	1.5
	PC2. Compile performance data on process and equipment to identify cause for lack of performance, evaluate opportunities to improve, identify cost saving options, propose changes in process, and implement proposal with proper approvals		3	0.5	2.5
	PC3. Review production process with supervisor and machine operators to identify reasons for slowdown or stop of production process, provide recommendations to overcome efficiency issues, take feedback, develop plans for implementing recommended changes, monitor changes implemented, and review changes and improvement		3	1	2
	PC4. Calculate utilities and energy usage in production area and for production process, identify methods to minimize usage		2	0.5	1.5
	PC5. Develop plans and procedures to minimize use of utilities and energy		2	0.5	1.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	without affecting the production efficiency				
	PC6. Identify energy and utility losses or sources of waste, analyze reason, recommend methods to improve efficient energy/utility application, ensure recommendations are implemented, and monitor improvement		2	0.5	1.5
	PC7. Identify areas where utilities and energy can be saved, and identify methods to save energy like recycling energy and utilities such as steam, heat and water, following proper maintenance methods to avoid leaks and losses etc, and prepare efficient production schedule such that target is met with efficient utilization of energy and utility		3	1	2
	PC8. Analyze usage pattern of energy and other utilities in production area and process against budget allocation, identify cost effective options for minimizing wastage, and implement changes		3	1	2
	PC9. Identify system, production process that need to be changed, identify opportunities for implementing change in production process, analyze impact of change on product quality, impact on the team and present production process		3	1	2
	PC10. Communicate with relevant authorities/superiors the need for change, results and benefits expected our of change		1	0.5	0.5
	PC11. Design new processes, procedures, systems, structures with roles and responsibilities, key performance indicators, training needs, safety system, contingency plans, monitoring and reporting system to implement planned changes in production process		1	0.5	0.5
	PC12. Provide training and support to implement changes, develop a strategy to help teams implement change		2	0.5	1.5
	PC13. Monitor changes implemented in production process and ensure		4	1.5	2.5

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	changes are effective and meet the organisation and regulatory requirements				
	PC14. Document and communicate the progress achieved through implemented change to the management and everyone involved, and make them understand and enjoy achievement		4	1.5	2.5
	PC15. Recognize and reward employees and teams for implementing change in production system and achieving better efficiency		5	2	3
	PC16. Manage budget efficiently by managing production with available resource, by avoiding overtime and too many casual workers/helpers		4	1.5	2.5
	PC17. Plan effectively to secure, confirm and allocate required manpower to meet production target within budget, monitor resource utilization, to achieve production target within existing resource		4	1.5	2.5
	PC18. Identify situations where actual budget exceeds the approved budget, investigate reason for variance and take appropriate corrective action to keep budget under control		1	0.5	0.5
	PC19. Identify the impact on budget of production-related decisions like scheduling holidays, adjusting production volume, scheduling equipment maintenance etc, before scheduling production, and identify opportunities to improve performance against budget		1	0.5	0.5
	PC20. Identify the causes for any significant variances in budget control, discuss with team and ensure prompt corrective action is taken to keep expenditure under control		3	1	2
	PC21. Encourage team to think and identify ways of reducing expenditure, analyze and pursue the suggested ideas		4	1	3
			<b>100</b>	<b>35</b>	<b>65</b>
<b>3. FIC/N9016: Manage documentation system and implement</b>	PC1. Establish to production team the importance of documentation, provide training on documentation system, and ensure all documents are maintained systematically	<b>100</b>	6	2	4

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
safety and environmental policies in food processing unit	PC2. Ensure all relevant records and documents are complete, up-to-date and accessible for audits on production process		6	2	4
	PC3. During audit provide the auditor with access to all relevant information, records and documents		6	3	3
	PC4. Ensure corrective actions recommended and implemented are documented to assure production process is carried in accordance with organisation and regulatory standards		6	2	4
	PC5. Establish methods to track production information from documented and maintained records		5	2	3
	PC6. Establish to production team importance of safety and environment requirements related to food processing unit, communicate information about safety and environmental policies and related procedures to the team		6	2	4
	PC7. Co-ordinate with quality team to prepare policies and sops on safety and environment requirements related to production function, and ensure those procedure are followed in production area and during production process		6	2	4
	PC8. Ensure safe work procedures are followed in production area and during production process		6	2	4
	PC9. Ensure policies and standard operating procedures on safety and environment requirements are accessible to all employees of production team, and are followed to meet the regulatory requirements		5	2	3
	PC10. Identify safety and environmental hazards relevant to production processes, implement system to handle risks		6	2	4
	PC11. Provide or organize training through relevant authorities on safety and environmental management system, to understand methods to control and prevent hazards		6	2	4
	PC12. Conduct inspections in work place on use of protective clothing and accessories, and to ensure safety		6	2	4

Assessable Outcome	Assessment Criteria	Total Mark (600)	Out Of	Marks Allocation	
				Theory	Skills Practical
	system is followed during production process				
	PC13. Conduct audits and review records on safety and environmental system to monitor if control systems are followed by production team, and address non-compliance following organisation standards		6	2	4
	PC14. Implement system on waste management in production area and process, monitor and confirm waste collection, treatment, recycling or disposal is carried out meeting industry requirements and environmental regulations		6	2	4
	PC15. Respond to environmental management hazard identification and incidents in an appropriate and timely way		6	2	4
	PC16. Review practice and procedures followed on safety, conduct risk assessments, identify non-compliance, and provide recommendations to address gaps and non-conformances		6	2	4
	PC17. Review environmental records documents maintained, analyze data to evaluate effectiveness of the environmental management system and identify areas for improvement, plan and implement improvements to meet regulatory requirements		6	2	4

**JSS MAHAVIDYAPEETHA**

ESTD-1964

**JSS COLLEGE OF ARTS, COMMERCE & SCIENCE**

(An Autonomous College of University of Mysore)

Re-accredited by NAAC with 'A' grade

**OOTY ROAD, MYSORE-570 025, KARNATAKA**

# Syllabus

**B. Voc in Animation and Multimedia**

**2018-19 To 2022-23**

**COMPUTER SCIENCE DEPARTMENT (UG)**

**B. Voc in Animation and Multimedia  
Certificate – Level 4- Character Designer  
(National Competency Certificate)**

**Semester 1  
Vocational Content**

**MES / N 0501 - Understanding the script**

Section – A

Pre-Production Techniques: Ideas, Themes, Concepts, Story Development. Script- Format, Storyboard. Short Film, Documentary, Feature Film. Script Terms, Understanding Genre, Different Types of Genres and Sub Genres, Read-through and Identifying

Character types. Understanding Narration Style, Time, Place and society condition status of the Character. Plot Interpretation. Three act Structure.

Introduction on how to make drawings for animation, Shapes and forms, About 2d and drawings, Clay modeling, Layout design according to a storyboard. Human anatomy, skeleton structure, animal anatomy and mythical creatures. Studying Human and animal movement through sequential drawings, gesture drawing, Caricaturing – fundamentals, Exaggeration, Attitude, Silhouettes, Boundary breaking exercises and warm ups, gesture drawing, Line drawing and quick sketches, Drawing from observation, memory and imagination.

Section – B

1. Story Reading (Read-through)
2. Group Discussion
3. Observation of Character development.
4. Acting (Read-through)

**MES / N 0502 - Ensuring consistency across all scenes**

Section – A

Introduction to Pencil Drawing- Introduction to basic drawing techniques including proportions and Line, Using Pencils for shading, People and Animals, Proportion in portrait drawing, Highlighting and shadows, Drawings with the help of basic shapes, understanding of the relationship of bones and muscles at rest and in movement to able to translate and maintaining correct volumes.

Introduction to Perspectives: Perspective in 1 point, Perspective in 2 point, Perspective in 3 point, Eye levels, Vanishing point, Significance of Perspective in animation and composition, Humans and animal forms in perspective, Perspective-blocks, boxes and shapes, Scale diagrams in perspective, Different viewpoints, Importance of eye level.

## Section – B

1. Drawing Basic shapes
2. Shapes in to forms
3. One-point Perspective - Table
4. Two-points Perspective - Exterior
5. Three-points perspective – Interior
6. Drawing simple characters using simple shapes
7. Drawing cartoons
8. Drawing male characters (6&7 Heads)
9. Drawing Female Characters (4&5 Heads)
10. Drawing an animal Character
11. Drawing a Hybrid Character (Fantasy)

## **MES / N 0503 - Design Characters**

### Section – A

Introduction on how to make drawings for animation, Shapes and forms, About 2d and drawings, Clay modeling, Layout design according to a storyboard. Human anatomy, skeleton structure, animal anatomy and mythical creatures.

Studying Human and animal movement through sequential drawings, gesture drawing, Caricaturing – fundamentals, Exaggeration, Attitude, Silhouettes, Boundary breaking exercises and warm ups, gesture drawing, Line drawing and quick sketches, Drawing from observation, memory and imagination.

Intro to Raster: Foreground & background, Changing Foreground and Background colors, using the large color selection Boxes and small color swathes, using the Eyedropper tool to sample Image color, changing the Foreground Color While using a Painting Tool. Using Brushes, Selecting the Brush Shape, drawing a vertical and Horizontal Straight lines with any brush, Drawing connecting Straight Lines (at any angle) with any brush, creating a New Brush, Saving Brushes, Loading Brushes, creating a Custom Brushes, Using the Painting Modes, Fade, Airbrush Options, Pencil Options.

Intro to Vector: Understanding paths, views, selection tools, fills and strokes, setting up preferences and color settings, Creating basic geometric shapes with the Shape tools, Using a grid and smart guides to aid symmetrical drawing, Using the Bezier Pen, Direct Selection tool, and Convert tool efficiently, Applying and editing color gradients to filled regions, Creating and using swatches, tints, gradients, and patterns on filled regions.

3D MODELING: Introduction to various 3D modeling Techniques: - Organic Modeling, Mechanical & Technical Modeling. Using Templates for Modeling. Polygon and Patch. Concept of edit meshes and edit poly. Low poly modeling. Modifiers and compound objects. How to manage vertex, faces and polygon selections.

Introduction to, curves, create a curve from a surface edge, isoparm, or curve-on-surface and Bezier curve editing curves, Surface tools, Trimming, Stitching. Sculpting NURBS surfaces, NURBS Modeling Reference, import vector data as curves or generate polygonal surfaces.

#### Section – B(1)

1. Perspective art.
2. Traditional designs.
3. 2D Character Designing
4. Photo Collage
5. Matt Painting
6. Digital painting
7. 2d Animation basics
8. Gif Animation.

#### Section – B(2)

1. Modeling an Apple.
2. Modeling a simple Robot Character.
3. Modeling a Human Face.
4. Modeling Human Body.
5. Modeling Prop for Character (Costume).
6. Modeling an animal character.
7. Modeling a Fantasy Character.

### **MES / N 0513 - Manage and store assets**

#### Section – A

Understanding Management, SOP, research appropriate tools, techniques, technologies and procedures for effective asset storage, Saving the work with appropriate names and/or naming conventions so that it can be identified easily. Storing the work in an appropriate place using appropriate storage techniques to ensure it is protected from damage.

Making backup copies at appropriate time intervals of any digital files. Routinely archive any work and store it securely in a second location, if required. Identify and retrieve previous work from storage, as required.

#### Section – B

1. Arranging Materials in order
2. Writing Logs
3. Group discussion on Assets Allocation.
4. Assets handling and Proper storage Techniques
5. Data storage techniques.

## **MES / N 0104 - Maintain workplace health and safety**

### Section – A

Understand and comply with the organization's current health, safety and security policies and procedures

Understand the safe working practices pertaining to own occupation. Understand the government norms and policies relating to health and safety including emergency procedures for illness, accidents, fires or others which may involve evacuation of the premises. Participate in organization health and safety knowledge sessions and drills

### Section – B

1. Identify the people responsible for health and safety in the workplace, including those to contact in case of an emergency.
2. Identify security signals e.g. fire alarms and places such as staircases, fire warden stations, first aid and medical rooms.
3. Identify aspects of your workplace that could cause potential risk to own and others health and safety.
4. Ensure own personal health and safety, and that of others in the workplace through precautionary measures.
5. Identify and recommend opportunities for improving health, safety, and security to the designated person.
6. Report any hazards outside the individual's authority to the relevant person in line with organizational procedures and warn other people who may be affected.
7. Follow organization's emergency procedures for accidents, fires or any other natural calamity in case of a hazard.
8. Identify and correct risks like illness, accidents, fires or any other natural calamity safely and within the limits of individual's authority.

**Semester 1**  
**General Content**

**L4 – Sem 1 - GC - Mathematics:**

Unit 1: Algebra

Quadratic and cubic equations – Progressions – Vectors-Scalar product- vector product – vector triple product – standard results and simple problems.

Unit 2: Analytical Geometry

Cartesian coordinate system – Distance formula – section formula – Equation of lines. simple problems – circles – parabola-ellipse-hyperbola-simple problems.

Unit 3: Trigonometry and Calculus

Trigonometric ratios- inverse trigonometric functions – simple problems . Limits – Rules of differentiation – simple problems.

**L4 – Sem 1 - GC – Physics:**

PHYSICAL WORLD

Physics: Scope and excitement of physics - Physics, technology and society -Mention of fundamental forces in nature - Nature of physical laws.

UNITS AND MEASUREMENTS

Unit of measurement - System of units - SI units - Fundamental and derived units - Length, mass and time measurements - Accuracy and precision of measuring instruments, Errors in measurement. Significant figures, Numerical problems.

SCALAR AND VECTORS

Scalars and Vectors – Position and displacement vectors - Equality of vectors - Multiplication of a vector by real number, Addition and subtraction of two vectors, Triangle method and parallelogram method.

List of Experiments:

- 1) To measure diameter of a small spherical body using Vernier Calipers.

- 2) To measure diameter of a small cylindrical body using Vernier Calipers.
- 3) To measure internal diameter and depth of a given beaker using Vernier Calipers and hence find its volume.
- 4) To measure internal diameter and depth of a given calorimeter using Vernier Calipers and hence find its volume.
- 5) To measure diameter of a given wire using screw gauge.
- 6) To measure thickness of a given sheet using screw gauge.
- 7) To measure volume of an irregular lamina using screw gauge.
- 8) To determine the masses of two different objects using a beam balance.

#### **L4 – Sem 1 – GC - Computer science:**

#### **L4-Sem-1-GC: COMPUTER SCIENCE – I**

##### Computer Fundamentals

##### Unit 1:

Knowing computer: What is Computer, Basic Applications of Computer; Components of Computer System, Central Processing Unit (CPU), VDU, Keyboard and Mouse, Other input/output Devices, Computer Memory, Concepts of Hardware and Software; Concept of Computing, Data and Information; Applications of IECT; Connecting keyboard, mouse, monitor and printer to CPU and checking power supply. Operating Computer using GUI Based Operating System: What is an Operating System; Basics of Popular Operating Systems; The User Interface, Using Mouse; Using right Button of the Mouse and Moving Icons on the screen, Use of Common Icons, Status Bar, Using Menu and Menu-selection, Running an Application, Viewing of File, Folders and Directories, Creating and Renaming of files and folders, Opening and closing of different Windows; Using help; Creating Short cuts, Basics of O.S Setup; Common utilities.

##### Unit 2:

##### Programming Development life cycle

Understanding Word Processing: Word Processing Basics; Opening and Closing of documents; Text creation and Manipulation; Formatting of text; Table handling; Spell check, language setting and thesaurus; Printing of word document.

Using Spread Sheet: Basics of Spreadsheet; Manipulation of cells; Formulas and Functions; Editing of Spread Sheet, printing of Spread Sheet.

Introduction to Internet, WWW and Web Browsers: Basic of Computer networks; LAN, WAN; Concept of Internet; Applications of Internet; connecting to internet; What is ISP; Knowing the Internet; Basics of internet connectivity related troubleshooting, World Wide Web; Web Browsing software's, Search Engines; Understanding URL; Domain name; IP Address; Using e-governance website.

Communications and collaboration: Basics of electronic mail; Getting an email account; Sending and receiving emails; Accessing sent emails; Using Emails;

Document collaboration; Instant Messaging; Netiquettes.

Small Presentation Making: Basics of presentation software; Creating Presentation; Preparation and Presentation of Slides; Slide Show; Taking printouts of presentation / handouts.

Computer today by Donald H. Sanders - McGraw-Hill, 1983

## **Semester 2**

### **Certificate – Level 5- Script Researcher**

(National Competency Certificate)

#### **Vocational Content**

#### **MES / N 3001 - Understand and detail the concept**

Section – A

What Is a Short Story? Finding a Story to Write, A Short Story's Basic Ingredients, Sitting Down to Write.

Choosing a Protagonist, choosing a Point of View, Bringing Your Characters to Life, Tip Sheet: Three-Dimensional Characters, Character's Bio Chart, Giving Your Characters a Voice, Tip Sheet: Dialogue

How Conflict Works in a Short Story, The Protagonist's Predicament, Bad Guys, Hurricanes, and Fatal Flaws, Conflict Equals Suspense.

Scriptwriting terminology: Action, Angle, BG close up, Exterior, fade in fade out, Pan, Parenthetical, POV, Scene Heading, Slug line, SFX, Sotto voce, track with, Voice over, Character name, Cast List, Dialogue, Script Length, Action Description, Extension, Dual-Column Dialogue, Act numbers, Scene Numbers, short lines, dialogue paragraphs, Character Arc.

Section - B

1. Exercises: Generating Ideas.
2. Exercises: Creating Characters.
3. Exercises: Finding Story Conflict.
4. Exercises: Constructing a Plot.
5. Exercises: Making a Setting Vivid.
6. Exercises: Discovering and Developing Your Voice.
7. Public domain material, Protecting the idea, Proof of ownership, Confidentiality agreement, Piracy, Animation Industry in India, Case Study.

#### **MES / N 3002 - Undertake research for scripts**

Section - A

Creating Your Own Show, Writing a TV Proposal, Drama and Comedy, Documentary and Reality, Formatting and Presentation, One hour Drama, Procedural, Serialized, Half-hour Comedy or Sitcom, Single-Camera Format, Multi-Camera Format, Limited Series or Miniseries.

Scriptwriting for both short film: Dialogue, Parenthetical, Extension, Shot Transition, Dual-Column Dialogue, Act numbers, Scene Numbers, Cast List, short lines, dialogue paragraphs, Script Styles & Types, Script Length Scene Heading Action Description , Character Name, Dialogue, Parenthetical, Extension, Transition, Shots.

#### Section - B

1. Do a Research.
2. Understanding the impact on the society.
3. Finding the common interest.
4. Creating the effective narration format.

#### **MES / N 3005 - Assist in drafting scripts**

#### Section – A

Scriptwriting for feature film: Dialogue split by Action, Emphasis in Action, Abbreviations, Short Lines, Dialogue Paragraphs, Montage & Series of Shots, Supers - Titles, Signs, etc, Phone Calls and Intercuts Two people talking at the same time.

Introduction to storyboard: Introduction, Multimedia Storyboarding Tools, The Advantages of Storyboarding, Interactive Storyboarding, Using Interactive Storyboarding to Speed-up the Content-writing Phase, Using Interactive Storyboarding to Speed-up Report Document Production.

Steps of storyboard writing: Storyboard table, Topic, Timeline, Sketches, color scheme, text attributes, Audio, camera angle, Interaction of buttons and text.

#### Section - B

Understanding Camera terms: Extreme Lon Shot, Long Shot, Mid Shot, Close-up, Extreme Close-up, Over the shoulder. Panning, Tilt, Dolly shot, Crane Shot, Moving Shot.

#### **MES / N 0104 - Maintain workplace health and safety**

#### Section – A

Understand and comply with the organization's current health, safety and security policies and procedures

Understand the safe working practices pertaining to own occupation. Understand the government norms and policies relating to health and safety including emergency procedures for illness, accidents, fires or others which may involve evacuation of the premises. Participate in organization health and safety knowledge sessions and drills

#### Section – B

1. Identify the people responsible for health and safety in the workplace, including those to contact in case of an emergency.
2. Identify security signals e.g. fire alarms and places such as staircases, fire warden stations, first aid and medical rooms.

3. Identify aspects of your workplace that could cause potential risk to own and others health and safety.
4. Ensure own personal health and safety, and that of others in the workplace through precautionary measures.
5. Identify and recommend opportunities for improving health, safety, and security to the designated person.
6. Report any hazards outside the individual's authority to the relevant person in line with organizational procedures and warn other people who may be affected.
7. Follow organization's emergency procedures for accidents, fires or any other natural calamity in case of a hazard.
8. Identify and correct risks like illness, accidents, fires or any other natural calamity safely and within the limits of individual's authority.

## **Semester 2** **General Content**

### **L5 – Sem 2 - GC - Communication English:**

**AIMS:** 1) To familiarize students with basic English  
2) To enable them to develop listening & speaking skills

**OBJECTIVES:** Students should be able to \_\_\_\_

- 1) Write English without grammatical errors
- 2) Speak English Language Effectively and Accurately
- 3) Listen and understand public announcements and news on TV & Radio

### **Module – 1 Grammar**

1. Subject and Verb Agreement
2. Voice
3. Articles
4. Speech
5. Question tag
6. Framing of Questions

### **Module – 2 Writing Skills**

1. Letter Writing  
Letter of Application/Letter of Grievances/Resume Preparation
2. Comprehension
3. Essay Writing

### **Module – 3 Speaking Skills**

1. Greeting
2. Requesting
3. Enquiring
4. Explaining
5. Reporting

6. Permission
7. Thanking

### **L5 – Sem 2 - GC - Mathematics:**

Section – A

Unit 1: Algebra

Sets –Relation - functions- Mathematical logic and Graph theory, Matrices and determinants –invertible matrices (only  $2 \times 2$  matrices) - Characteristic equations and Eigen values (only  $2 \times 2$  matrices).

Unit 2: Quadric Surfaces

Sphere - Ellipse –Cone-Ellipsoid-Paraboloid-Hyperboloid of one and two sheets – Intersection of Quadric surface and plane – Tetrahedron.

Unit 3: Integration and differential equations

Indefinite and definite integrals –simple problems – Differential equations of first order – separation of variables.

### **L5 – Sem 2 - GC - Physics:**

Section – A

**THERMODYNAMICS:**

Definition of temperature, heat, change of state, green-house effect, first law of thermodynamics, thermal equilibrium, classification of thermodynamic system, zeroth law of thermodynamics, internal energy, work, isothermal process, adiabatic process, isochoric, Isobaric Process, Second law of thermodynamics, reversible and irreversible process.

**MOTION IN A STRAIGHT LINE:**

Rest, motion, Position and frame of reference - Definitions of path length and displacement - Definitions of average speed and average velocity, instantaneous speed and instantaneous velocity & uniform and non-uniform motion – Uniformly accelerated motion.

## Section – B

### List of Experiments:

- 1) Using a simple pendulum, plot L-T and L-T<sup>2</sup> graphs, hence find the effective length of second's pendulum using appropriate graph.
- 2) To find the weight of a given body using parallelogram law of vectors.
- 3) To determine the coefficient of viscosity of a given liquid by measuring the terminal velocity of a spherical body by stoke's method.
- 4) To determine Surface tension of Water by capillary rise method.
- 5) Interfacial between Water and Kerosene.
- 6) Verification of Lami's theorem.
- 7) Verification of Gaussian distribution and calculation of standard deviation in a Monte Carlo experiment.
- 8) Determination of the moment of inertia of an irregular body using Torsional pendulum.

### L5 – Sem 2 - GC - Computer Science:

#### Section - A

1. Concepts of object oriented programming: object class. Encapsulation data hiding Inheritance. Polymorphism. Analysis and design of system using Object Oriented Approach.
2. Structure of a C++Program: Include files, Declaration of an object, Main function, I/O streams.
3. Classes: Class Declaration: Data Members, Member Functions, Private and Public members. Data hiding and encapsulation, arrays within a class. Class function Defection, scope resolution operator, Private and Public member function, Nesting of member functions.
4. Objects: Creating Objects, accessing class data members, Accessing member functions. Arrays of Objects, Objects as function arguments: Pass by value by Reference, Pointers, to Objects.

#### Section - B

5. Constructors and Destructors: Constructors: Declaration and Definition, Default Constructors, Parameterized Constructors, Copy Constructors. Destructors: Definition and use.

#### Section - C

6. Function Overloading: Function Overloading: Declaration and definition.
7. Inheritance – Extending Classes: Concept of inheritance, base, derived class, defining derived, classes, visibility modes, private, public, protected; sinle inheritance: private and protected members by member functions of a derived class, multilevel inheritance, nesting of classes.

**Reference Books:**

Object Oriented Programming with C++ By Balagurusamy- McGraw-Hill,

Object Oriented Programming And C++ By R. Rajaram

PRACTICAL: Practical's based OBJECT ORIENTED PROGRAMING (USING C++)

Objective

**Semester 3**  
**Certificate – Level 6 – Animation Director(A)**  
(National Competency Certificate)

**Vocational Content**

**MES / N 1304 - Communicate requirements to the team**

Section - A

Introduction to Communication, Verbal Communication, Face to Face communication, Tone of Voice, Body Language, Physical Communication.

Introduction to Listening Skills, Self-Awareness, Active Listening, Listening in Difficult Situations, Shades of Meaning. Formal Communication, and Informal communication.

Effective Communication: Voice with Emotions, Speaking what you thinking, Having a group discussions, Making Teams and Dividing responsibility.

Section – B

1. Writing Letter

- a. Writing a letter for Long leave
- b. Writing a letter for Pramotion

2. Improvising the Content

- a. Adding an emotional touch to your letter.
- b. Correcting the meaning.

3. Group Discussion and Games for Communication.

- a. Wordless Acting
- b. Famous Pair
- c. Listen, Interpret, Draw
- d. Role-playing and Conflict Resolution
- e. y-o-u-r-n-a-m-e

4. Communication Through Activities.

- a. Listening with Intention
- b. Record/Watch yourself talk
- c. DPR on Given Content.

## **MES / N 1306 - Direct the animation process**

### Section – A

**Basic Principles in animation:** Squash and stretch, Anticipation, Staging, straight ahead and pose to pose, follow through and overlapping action, Slow in and slow out, Arcs, Secondary action, Timing, Exaggeration, Solid drawing, Appeal, Mass and weight, Character acting, Volume, Line of action, Path of action, Walk cycles- animal and human.

**Introduction to Sculpting software interface:** Mesh Manipulation, Using different, applying strokes, Projection mapping, Dynamic topology, Adding detail to poly mesh, Using symmetry tool, Exporting the mesh.

**Introduction to basic material types & procedurals:** Study of concepts:- opacity, smoothness, specularly and color. Drawing 2D art templates, Creating complex effects like water fire and smoke. Unwrapping the map for various 3D characters.

**Introduction to the mapping and advanced texturing techniques.** Shadow maps, Raytraced shadows & radiosity. Concept of lighting system and shadows. Introduction to 3 point, 2 point and dramatic lighting. Creating photo real environments and textures. Applying on to a 3D objects. Understanding how to produce final output, rendering the scene, rendering the effects, network rendering.

**Introduction to advance lighting effects:** Mental ray rendering and Toon shade rendering. Creating various outputs as per the end user requirements and maintaining the resolution.

**Introduction to Character setup:** Riggers role, Criteria for a good rig, Joints and skeletons, Creating skeleton hierarchy, Constraints, Forward(FK) and Inverse kinematics(IK), FK, IK joint structures, Animation controllers, Blend shapes, Clusters, Biped Rig- Analyzing reference, Anatomy of human body, Bone placements, Setting up Torso, Biped Arms, Fingers, Legs/Foot controls, Skinning, Facial Rig- Anatomy of a face, The Facial Action Coding System(FACS), Mouth shapes, Phonemes, Animation controllers for Face, Character GUI.

**Introduction to Fur, Procedural textures:** Inclination, roll and polar, Fur volume and Noise, Painting fur attributes, modifying fur direction, Modifying color of a

fur descriptions, Creating nCloth collision, Constraints, Hair System: Artisan, Hair system components, Modify curve tools, Paintfx with hair, Hair collision, Hair system caching, Hairstyles.

**Muscle systems Introduction to 3D Muscle system:** Components of Muscle, Capsules, Spline based muscle system, Stretch based muscle systems, Muscle Objects and skins, Assigning weights to Muscle skin, Muscle Builder, Muscle Parameters, Custom muscle systems, Wrinkles, fold, jiggle, Slide, Collide, Muscle control.

#### Section – B(1)

1. Exercises: Ball Bounce (Heavy & Light).
2. Exercises: pendulum.
3. Exercises: Walk Cycle.
4. Exercises: Run.
5. Exercises: Vanilla Walk.
6. Exercises: Animal Walk Cycle.

#### Section – B(2)

1. Exercises: Human Nose sculpt.
2. Exercises: Human Eyes Sculpt.
3. Exercises: Human Mouth Sculpt.
4. Exercises: Human Ears Sculpt.
5. Exercises: Human Character planning.
6. Exercises: Human Character body sculpting.
7. Exercises: Human Character Face sculpting.

#### Section – B(3)

1. Exercises: Shading networks.
2. Exercises: Tire Texturing.
3. Exercises: Rusty Automotive Texturing.
4. Exercises: Human Skin Texturing.
5. Exercises: Animal Skin Texturing.
6. Exercises: 2 Point lighting.
7. Exercises: 3 Point lighting.
8. Exercises: Interior lighting (Lamps, Bulbs).

#### Section – B(4)

1. Exercises: Rigging with Deformers.
2. Exercises: Rigging simple vehicle.
3. Exercises: Rigging cartoon character-Legs.
4. Exercises: Rigging cartoon character- Arms.
5. Exercises: Rigging cartoon character- Face rigging.
6. Exercises: Face expressions using Blend shapes.

#### Section – B(5)

1. Exercises: Creating fur.
2. Exercises: Creating Hair.

3. Exercises: Simulating Sparks.
4. Exercises: Jiggle animation.
5. Exercises: Adding Muscle System to a human Arm.
6. Exercises: Muscle Weight Paint.

## **Semester 3** **General Content**

### **L6-Sem 3 – GC – Physics:**

#### LAWS OF MOTION

Newton's first law of motion: Concept of inertia and force – Concept of momentum - Newton's second law of motion - Impulse, impulsive force and examples - Newton's third law of motion: Identification of action and reaction pairs with examples in everyday life.

Collisions: Elastic and inelastic collisions

#### SYSTEMS OF PARTICLES AND ROTATIONAL MOTION

Definitions of a rigid body, translator motion and rotatory motion - Centre of mass of a two-particle system - Mention of expression for position coordinates of centre of mass of (a) n particle system (b) a rigid body and (c) a uniform thin rod.

Section – B

List of Experiments:

- 1) To study the relation between force of limiting friction and normal reaction and to find the coefficient of friction between surface of a moving block and horizontal surface.
- 2) To find the downward force, along an inclined plane, acting on a roller due to gravity and study its relationship with the angle of Inclination by plotting graph between force and  $\sin\theta$
- 3) Determination of the Moment of inertia of rectangular lamina by using torsional pendulum.
- 4) Determination of the Moment of inertia of circular lamina by using torsional

pendulum.

5) Determination of the acceleration due to gravity and the radius of gyration by using Bar pendulum(Graphical method)

6) Determination of the Moment of inertia of irregular body by using torsional pendulum.

7) To find the force constant and effective mass of a helical spring by plotting  $T^2 - m$  graph using the method of oscillation.

8) To study the relationship between the temperature of a hot body and time by plotting a cooling curve.

### **L6-Sem 3 – GC – Electronics:**

#### **Unit 1: Introduction to Electronics**

AC and DC sources.

Ohm's law – statement and limitations, numerical as applicable. Definition of power and unit. Kirchhoff's laws- statement and explanation, numerical.

Passive components

Resistors – types, fixed resistors – definition and example. Colour code. Variable resistors – definition and example. Combination of resistors in series and parallel (no derivation) numerical.

Capacitors- Types – fixed Capacitors – definition and example, Variable Capacitors – definition and example. Equivalent of capacitors in series and parallel combination (no derivation) numerical.

Inductors – types – fixed inductor - definition and example. Equivalent of inductors in series and parallel combination (no derivation) numerical.

(15 hrs)

#### **Unit 2: Semiconductor devices**

Classification of solids, Introduction to semiconductors – Intrinsic and extrinsic Semiconductors, PN Junction diodes - characteristics.

Mention of Zener diode, tunnel diode, photo diode and LED and their applications.

(15 hrs)

### **L6-Sem 3 – GC – Computer Science:**

Section – A

Unit 1:Python: Introduction, features, First Step with Python, Interactive Mode, Script Mode, Variables and Types, Mutable and Immutable Variables, Keywords, Operators and Operands, Expression and Statements, Input and Output, Comments.

Functions: Introduction, Module, Built in Function, Composition, User Defined Functions, Parameters and Arguments, Scope of Variables, ways of defining Functions.

Conditional and Looping Construct: Control Flow Structure, Looping Constructs.

Strings: introduction, Creating and initializing strings, Strings are immutable,

Traversing a string, Strings Operations & string Slicing, String methods & built in functions, Regular expressions and Pattern matching

Section - B

Unit 2:

Lists: Introduction, creating a list, accessing an element of list, traversing a List, Appending in the list, Updating array elements, Deleting Elements, Other functions & methods, List as arguments, Matrix implementation using list, Functions with list, Function call.

Dictionaries: What is dictionary? Key-value pair, Creation, initializing and accessing the elements in a Dictionary, Traversing a dictionary, Creating, initializing values during run time (Dynamic allocation), Appending values to the dictionary, Merging dictionaries: An update, Removing an item from dictionary, Dictionary functions and methods.

Tuples: What is a Tuple? Tuple Creation, Add new element to Tuple, Tuple Assignment, Tuple Slices, Tuple Functions

Reference Books:

Beginning Programming with Python for Dummies by stef Maruch & Aahz Maruch.

### **L6-Sem 3 – GC – Indian Constitution:**

#### **UNIT I**

Preamble of the Indian Constitution

- a) Salient features of Indian Constitution

#### **UNIT II**

- a) Fundamental Rights
- b) Fundamental Duties
- c) Directive principles of State Policy

#### **UNIT III**

- a) President – Election Method, Powers and Functions
- b) The Role of the Prime Minister
- c) The Parliament – Structure, Power and Functions(Lok Sabha and Rajya Sabha)
- d) Supreme Court – Organization and Jurisdiction

#### **UNIT IV**

- a) The Role of Governor in the Administration of State
- b) Powers and Functions of the Chief Minister
- c) Composition, Powers and Functions of both the Houses of State Legislature
- d) High Court – Organization and Jurisdiction

**Semester 4**  
**Certificate – Level 6 – Animation Director (B)**  
(National Competency Certificate)

**Vocational Content**

**MES / N 1307 - Direct the post-production process**

**Advanced Dynamics and pyrotechnics:** Introduction to Dynamics, and Dynamic solver, Particles, Emitters, Fields: Air, Drag, Gravity, Newton, Turbulence, Vortex, Volume, Particle collisions, Particle cache, Goals, Soft bodies, Springs, Rigid bodies, Constraints, Effect: Fire, Smoke, Fireworks, Lightning, Shatter, Curve flow, Surface flow, Rendering particles and effects, Maya Paint Effects, baking simulations, Render types. UNIT – 2 Fluid Effects Introduction to Fluids, Fluid field interaction, Fluid attributes, , Creating a non-dynamic 3d fluid effects, Creating dynamic 3D effect, Creating fire and smoke using Fluid dynamics, creating an ocean.

**Introduction to nParticles and Nucleus solver,** Nucleus node, Nucleus forces, Nucleus plane, Nucleus attributes, nParticles interaction, nConstraints, nCloth: simulations, nCloth dynamics properties, Working with nConstraints, Tearing cloth, Dynamic Property maps, Simulating cloth on moving character, nParticle caching, nConstraints, Creating Smoke simulations in nParticles, Creating liquid simulations in nParticles, Introduction to nHair, Creating Basic hair style, Creating a dynamic curve simulations.

**Introduction to Video Compositing techniques and Colour Keying** advanced 2D compositing and Ink paint techniques. Creating color models as per the model sheets. Creating color pallets as required paint and ink fields. Understand the dope sheets / X- sheets in production level. Arranging and adjusting the layers as per X- sheet. Advanced panning of camera and background, multiple cameras for showing depth in-between background, over lay and character layers. Introduction to compositing special effects into a scene using 3d graphics and 3d special effects in 2d layers. Concepts for Broadcast animation for logos, channel IDs and montages. Multi-Layer Compositing, Special Effects, Superimposition and Titling. Exporting various file format outputs as per the end user requirements.

**Introduction to Audio Editing** sound design in animated films, including recording, gathering audio, editing, mixing, and audio design principles, high-end Pro Tools editing, including use of plug-ins to premix a soundtrack, sound is a catalyst for the imagination, master/slave relationship of picture/sound, sound and memory, psychological implications of sound. Psycho-acoustics and the physics of sound. voice-over, musical composition, psychological role of Sound and aesthetic

**3D Compositing and Color Grading:** Compositing in Z axis, Creating camera and lights in compositing program, Creating shadows and reflections using layers, Blending videos, Roto Paint, using particles and advanced effects, 3D camera tracking and polishing, Integrating 3 D elements. Using Color correction tools, curve tool, masking and Isolating elements, Using adjustment layer for color grading, Noir theme, color and its meaning and impact on audience.

**Advanced Video Editing and Visual Story Narration:** post-production strategies, narrative structure, editing rhythms and cutting for performance logging and organization exercises; cutting a short scene provided by the instructor; analysis of editing in a feature film; and active participation in class discussions of student.

#### Section – B(1)

1. Exercises: 3d Disintegration/Shattering effects.
2. Exercises: Smoke Simulation and Rendering.
3. Exercises: Creating Ocean and waves.
4. Exercises: Creating Fire Blast Simulation-Configuring Container and emitter properties.
5. Exercises: Creating Fire Blast Simulation-Creating Debris.
6. Exercises: Creating Rain and fog.

#### Section – B(2)

1. Exercises: Video stabilization.
2. Exercises: Chroma Keying & Matte.
3. Exercises: 2D Camera Tracking.
4. Exercises: 3D Camera Tracking.
5. Exercises: 3D Camera Tracking and Alignment.
6. Exercises: Motion Graphics-Planning and Asset preparation
7. Exercises: Motion graphics- Final Animation
8. Exercises: Rotoscopy-Biped
9. Exercises: Rotoscopy-Quadraped.

#### Section – B(3)

1. Exercises: Adding BG Music.
2. Exercises: Mixing two tracks.
3. Exercises: Recording audio.
4. Exercises: Noise reduction Process.
5. Exercises: Adding Effects.
6. Exercises: Creating Physiological Effects
7. Exercises: Foley Lab.

#### Section – B(4)

1. Exercises: 3D camera tracking and exporting to 3D Program.
2. Exercises: adjusting Track Points.
3. Exercises: Set extension.

4. Exercises: Match Moving.
5. Exercises: matching Lighting

#### Section – B(5)

1. Creating Titles using text and images.
2. Storytelling with images.
3. Editing using video effects.
4. 180-degree dialogue shot editing.
5. Editing a Montage (Future, Past).
6. Shooting and editing a documentary- Shoot/Acquiring a footage
7. Shooting and Editing a documentary-Rough cuts
8. Shooting and Editing a documentary-Syncing Audio and Video
9. Shooting and Editing a documentary-Final cut and Export to media format.

## **Semester 4** **General Content**

### **L6 – Sem 4 – GC – Physics:**

#### Section – A

##### OPTICS:

Reflection, Refraction, Spherical mirror, Concave mirror, refractive index, Relation between focal length and radius of curvature. Laws of Refraction, Snell's law, Dispersion, wave front, interference, diffraction.

##### CURRENT ELECTRICITY:

Resistance, Capacitance and Inductance, Ohm's law, Current and Voltage, Conductors, Insulators, Semiconductors and Super conductors and their applications, Alternating current and Direct current, Transformers and their constructions, rectification.

#### Section – B

##### **List of Experiments:**

- 1) To find the focal length of a convex mirror, using a convex lens.
- 2) To find the refractive index of glass.
- 3) To find the refractive index of water.
- 4) To find the focal length of a concave mirror.
- 5) Verification of ohm's law.
- 6) To determine effective resistance of two resistances connected in series.
- 7) To determine effective resistance of two resistances connected in parallel.
- 8) To determine resistance per unit length of the wire.

## **L6 – Sem 4 – GC – Physics:**

### **Unit 1: Number Systems, Boolean algebra and Logic gates**

**Number Systems:** Introduction to decimal, binary Inter – Conversion. Addition, Subtraction, Multiplication and Division in binary Number system.

1's and 2's Complement method in binary number system. Subtraction using 1's and 2's compliment

**Boolean Algebra:** Laws of Boolean Algebra, Logic gates - AND gate, OR gate, NOT gate, NAND gate and NOR gate Logic symbol and truth table

De – Morgan's theorem, simplification of Boolean expressions. Logic circuit for Boolean expressions and vice versa.

Universal gates - NAND gate and NOR gate.

### **Unit 2: Logic circuit and Memories**

**Combinational logic circuit:** Half adder, Full adder, half subtractor, Full subtractor.

**Sequential logic circuit:** Flip – flop: RS, D, JK, and T flip - flop.

**Shift registers:** SIPO, SISO, PISO and PIPO.

**Digital computer:** Block diagram of digital computer and function of each block.

**Semiconductor Memories:** Idea of different types of semiconductor memories (RAM, ROM, PROM, EPROM and EEPROM).

## **L6 – Sem 4 – GC – Computer Science:**

Section – A

Unit 1:

Classes in Python: Introduction, Namespaces, Scope Rules, LEGB Rule, Defining Classes, Importance of self, Class Attributes v/s Instance Attributes, Instances attributes, Adding methods dynamically, Accessing Attributes and methods, Accessing Methods, Built in class attributes, Private Members - Limited Support, Data Hiding, Static methods, Destroying Objects (Garbage Collection) Inheritance: Introduction, types of Inheritance, Method-I- By using super() function, Method-II- By using name of the super class, Multiple Inheritance, Overriding Methods, Abstract Methods,

Unit 2:

Linear List Manipulation- Data Structures, Implementation of List in memory, Sequential Memory Allocation, List Operations, Traversal in a List, Insertion of an element in a sorted list, Searching Techniques, Sorting a list.

Stacks and Queues in List: Stack , Push operation, Pop operation, Traversal in a stack, Expression- Conversion of an infix expression to postfix expression, Evaluation of Postfix Expression

Queue- Queue operations,

Data File Handling: Introduction, File access modes:

Exception Handling & Generator Functions: Generator Functions, Advantages of using generator

**Reference Books:**

Beginning Programming with Python for Dummies by stef Maruch & Aahz Maruch.

**Semester 5**  
**Certificate – Level 7 – Live Action Director(A)**

**Vocational Content**

**MES / N 1301 (Evaluate production concepts and ideas)**

**SECTION A**

**Unit-I:** Film as a Storytelling Device- The history of Storytelling - Plays vs. novels vs. film - What is a “story”? - The “idea” vs. “story” vs. “screenplay”. Structure of Screen play

**Unit -II:** The three act screenplay - The scene - Plot points. Script writing formats - Master Scene script format - Split page format – Fiction Script writing - Dramatic structure - Nonfiction forms and formats-Characterization

**Unit- III:** Narrative, tone, contrast, coincidence, Surprise, Suspense, tension techniques. Nature of protagonists, antagonists. Genres of screenplays. Principles of Characterisation.

**Unit-IV** Director’s preparation. Directors role in film. Introduction to scene study and staging. Beats, fulcrum, dramatic blocks. Scene analysis. Art direction - location - floor management - out- doors and indoors.

**Unit-V:** Planning - pre-production- Concept, Story development - Casting, Locations, Financing. Production –Shooting, Direction and Cinematography. Distribution and Exhibition.

**References:**

- ✓ Writing the Script by Wells Root ,Jan 15, 1980
- ✓ Secrets of Film Writing by Tom Lazarus Jun 2, 2001

✓ Arora: Encyclopedia of Indian Cinema

## **SECTION B**

### **Exercises**

- 1. Story Development (Conceptualization)**
- 2. Script Improvisation (Shooting Script)**
- 3. Casting and Team building**
- 4. Location Scouting**
- 5. Working out the finance**
- 6. Presentation of full production planning(by PPT)**

## **MES / N 1302 (Sourcing financiers)**

### **SECTION A**

**UNIT 1: Film business:** distribution and exhibition of films - the basic mechanism of distribution and its relationship to various exhibition platforms. How the entrepreneurship of production relates to the distribution and exhibition.

**UNIT 2: Publicity platforms:** the who's/when/how's of publicity and a brief exposition of the various platforms available now.

**Certification:** a brief history and the current structure of central board of film certification. The procedure to go about film certification in India.

**UNIT 3:** Organizational structure of indian film industry: an overview of the different bodies that regulate and monitor the various constituents directly involved in making and marketing of films in india.

Budgeting for different types of films: relationship between budget, cost and time frame.

### **SECTION B**

#### **Producing practical:**

location study: creative/logistics, script breakdown, mix-n-match

Budget top sheet, scheduling & call sheet preparation.

## **MES / N 1303 (Conceptualise the creative vision)**

### **SECTION A**

**Unit I:** Vision and visualisation - The social conditions and effects of visual objects. Visual culture. Critical visual methodology- Metaphor and metonymy – codes – semiology of the television medium

**Unit II:** An introduction to compositional interpretation - Colour - Spatial organization – Light - Expressive content- the Oedipus complex – id, ego, super ego – symbols – defence mechanisms – Dreams – Aggression and guilt – psychoanalytic analysis of the media

**Unit III:** Cultural analysis of visual – semiotics, denotation, connotation and iconography.

**Unit IV:** Analysis of film and television – six levels of analysis - psychoanalytic understanding of visual images.

**Unit V:** Selling magic – Breaking the advertising code – commercials and anxiety – Laconian gaze: other ways of seeing -Laura Mulvey and visual pleasure.

## **SECTION B**

**Practical Assignment:** Actuality - field trip and writing observation report, and write a short film script on its basis. Produce photos of trip.

## **MES / N 1304 (Communicate requirements to the team)**

### **SECTION A**

**Unit I:** Introduction to Communication: Purpose of Communication; Process of Communication; Importance of Communication in Business; Differences between Technical and General Communication; Barriers to Communication; Measures to Overcome the Barriers to Communication.

**Unit 2:** Types of Communication: Types of Communication; Verbal Communication- Importance of verbal communication- Advantages of verbal communication- Advantages of written communication; Significance of Non-verbal Communication  
**Listening Skills:** Listening Process; Classification of Listening; Purpose of Listening; Common Barriers to the Listening Process; Measures to Improve Listening; Listening as an Important Skill in Work Place.

**Unit 3:** Language for Communication: Language and Communication; General Principles of Writing; Improving Writing Skills, Essentials of good style, Expressions and words to be avoided; Grammar and Usage

**Unit 4:** Communication in Organizations: Internal Communication; Stake Holders in Internal Communication; Channels of Internal Communication; External

Communication; Stake Holders in External Communication; Channels of External Communication.

Communication Network: Scope and Types of Communication Network; Formal and Informal Communication Network; Upward Communication; Downward Communication; Horizontal Communication; Diagonal Communication.

### **SECTION B:**

Practical Assignment:

1. Reading Skills: Reading Skill; Purpose of Reading; Types of Reading; Techniques for Effective Reading.

2. Team Co-ordination: Create small teams of students and assign them in different production role and ask them to prepare a PPT of there production planning.

## **Semester 5** **General Content**

### **L7 – Sem 5 – GC – Advertising-Concepts and Principles:**

#### **Section – A**

**Unit I:** Advertising - Definition, Nature, scope, Origin and Growth. Roles of advertising:

Social, Communication, Marketing and Economic.

**Unit II:** Functions of advertising. - Advertising in marketing mix - Types of advertising - merits and demerits - advertising and consumers - buying systems - target plans.

**Unit III:** Advertising objectives - Advertising campaign. Conceptualization of Advertising for TV, Radio and Print. Copy, Slogans and Writings.

Media planning - developing media objectives - media budget - selection of media - implementing media plans - pre-testing and launch.

131

**Unit IV:** PR Definition, Elements of PR – functions of PR – Need of PR – Growth of PR in India, - Publicity, propaganda and public opinion Corporate Communication with the public – internal and external - Community Relations.

**Unit V:** Advertising agencies, Luminaries of Advertising, Advertising Ethics. Corporate Social Responsibilities and Advertising case studies.

### **SECTION B:**

Practical Exercise: Each Student Should Choose a product and have to Create

1. Print Ad
2. Flier
3. Poster
4. Handouts

- 5. CD Cover
- 6. Ad video

**L7 – Sem 5 – GC – Photography and Cinematography:**

**Section – A**

**Unit I:** History of Photography, Painting and Photography, Types of Cameras – parts and functions of camera

**Unit II:** Lens and types of lenses for photography - Short, medium and long focal lengths. Exposure – Focusing, aperture, shutter speed, depth of field. Points of View, Composition and perspectives.

**Unit III:** Kinds of light- indoor and outdoor - Electronic flash and artificial lights. Capturing Colours. Light meters. Accessories and equipments for photography. Aesthetics and Technology.

**Unit IV:** Photo journalism – Basics of News Photography, specialization of Photography - Nature – Wild life – everyday life - People and places - Sports - Advertising - object photography.

**Unit V:** Ethical issues in Photography – Codes of Ethics for photographers. Tragedy image, digital improvements, privacy, moral rights of subjects etc., – Basic software of Photo Editing tools.

**SECTION B:**

**Practical Assignments:**

1. Intro to DSLR
2. Portrait Photography
3. Landscape Photography
4. Rule of third
5. Shot Composition
6. Camera moments

**Reference:**

## **L7 – Sem 5 – GC – Introduction to television broadcasting:**

### **Section – A**

**Unit I:** Origin and Development of Electronic Journalism – Broadcasting System UK, US and other developed and Third World Nations – Comparison.

**Unit II:** Indian Broadcasting Policy – Major recommendations of committees and working groups – Prasar Bharathi Bill – Question of autonomy.

**Unit III:** Planning and Production of TV, Radio Programmes – General and Special audience Programmes – Principles of writing for radio – Language – Different formats of radio programmes – Features, Debate, Talks, Drama, Interview etc.,

**Unit IV:** Planning and Production of TV Programmes – TV crews – Writing for TV –

Visualization – Anatomy of News Cast & News Gathering – Various Programmes – General and Special Audience Programmes - Various formats of TV Programmes – ETV – News, Soaps, Epics, Sports, Talk Shows etc., - TV Commercials – Sponsors – TV News Agencies – Private Channels.

**Semester 6**  
**Certificate – Level 7 – Live Action Director(B)**

**Vocational Content**

**L7 - Sem 6 – SC - MES / N 1305 (Direct the production process)**

**SECTION A**

**Unit I: Direction** : Role of a contemporary director, screen grammar, spatial connections, temporal connections, mise-en-scene.

**Unit II:** Principles of film, narrative form, non-narrative films, dividing a feature film into parts and Genres.

**Unit III:** Planning, pre-production- Concept / Story development, Scripting / Screen play writing, Budgeting, Casting – Locations - Financing.

**Unit IV:** Basics of mise-en-scene. Space and time, narrative aspect of mise-en-scene. Cinematographer – set properties - composition, duration of the shot, scene and sequences.

**Unit V:** Production – Shooting – Shots and scenes. Direction & Cinematography. Post production- Editing, Editing Equipments Sound recording, Dubbing, Special effects, Graphics & final editing.

**Unit V:** Architecture of the film's style and plot patterning, Codified formal system of narration devices. Ideological Constraints.

133

**SECTION B:**

Practical Assignment: Students should Submit a Short Film or a Documentary of 5

Minutes  
in team or individually.

## **L7 - Sem 6 – SC - MES / N 1307 (Direct the post-production process)**

### **SECTION A**

**Unit I: Direction :** Role of a contemporary director, screen grammar, spatial connections, temporal connections, mise-en-scene.

**UNIT II :** Bird's-eye view of the modern editing process and modern editing terminology

Principles of Video Editing: Various principles of Editing like Contrast, Parallelism, Symbolism, Simultaneity Continuity, Making an edit invisible, Motivation for every edit, Delivering a message, Bearing audio in mind, editing is creating, Control of Overuse technique or Visual effects.

Editing setup:-efficient editing habit, factory-standard systems to support the editing process

Non-Linear Editing (NLE) Concept.

The Three-Point Edit: Understanding Three-Point Editing, Overview of the Three-Point Editing Process, Different Ways to Do Three-Point Editing.

Working in the Timeline / Transitions / Key framing / Applying Filters / NLE

Compositing / ColorCorrection & Color Grading / Titling / Final Review &Project.

**UNIT III:** Stabilizing a Shot , Controlling shaky video, Cropping the borders efficiently, Analysing and Tracking a Point in the footage, The Tracker Panel & Motion Tracker Options, Corner Pin Tracking, Exporting Track data, Introduction to Masks, Animating Masks, Working with Mask Interpolation, Basics of Rotoscopy, Analysing the shot for Rotoscopy, Using Masks for Position Key frames, Creating a Simple Rotoscopic Animation.

**UNIT IV:** Introduction to Particle Playground, Filters, Plugins, Understanding the Gravity, Mass, Vortex, Turbulance, Color, Fields etc.

Animating the Emitter, Key frame animation, Path Animation, Basic expressions, BASIC COMPOSITING, Applying Layer Blending Modes, Creating a Track Matte,

Keying & Key light, Compound Effects: Gradient Wipe Displacement Map, Wave World & Caustics, Pre-composing & Nesting.

## **SECTION B:**

Practical Assignment :

1. Arrange the previously shot Rushes in Sequence (Rough cut 1)
2. Dubbing the audio (Recording the audio)
3. Aligning the audio with the Rushes (Rough Cut 2)
4. Compositing the Shots
5. Match moving
6. Finalizing the Edit and Adding Title Card and Credits
7. Rendering the Edit (Exporting)

## **L7 - Sem 6 – SC - MES / N 1 308 (Manage the production's marketing and release)**

### **SECTION A**

**Unit I:** Concept of Brand: Introduction, Role of brand, Advantages of Branding, Core Values of Brand. Brand Equity: Concept, Brand elements. Principles of Branding, Communication Mix Strategy. Brand Media: Communication Channels and techniques, Advertising, Brand Perception.

**UNIT II:** Role of media, selection of media for advertising, formulation of message, art of copywriting. Branding and packaging strategies: Brand equity, image and personality, packaging decisions, perceptual mapping of customers, control aspects of advertising, advertising budget.

**UNIT III:** Strategic marketing- GAP analysis, Porter's five force model, Ansoff's matrix, SWOT analysis, customer relation management.

### **SECTION B:**

Practical Assignment:

Attend a Film Launch event and write a brief Note on it with Photographic reference.

### **MES / N 0104 - Maintain workplace health and safety**

#### Section – A

Understand and comply with the organization's current health, safety and security policies and procedures

Understand the safe working practices pertaining to own occupation. Understand the government norms and policies relating to health and safety including emergency procedures for illness, accidents, fires or others which may involve evacuation of the premises. Participate in organization health and safety knowledge sessions and drills

#### Section – B

1. Identify the people responsible for health and safety in the workplace, including those to contact in case of an emergency.
2. Identify security signals e.g. fire alarms and places such as staircases, fire warden stations, first aid and medical rooms.
3. Identify aspects of your workplace that could cause potential risk to own and others health and safety.
4. Ensure own personal health and safety, and that of others in the workplace through precautionary measures.
5. Identify and recommend opportunities for improving health, safety, and security to the designated person.
6. Report any hazards outside the individual's authority to the relevant person in line with organisational procedures and warn other people who may be affected.
7. Follow organisation's emergency procedures for accidents, fires or any other natural calamity in case of a hazard.
8. Identify and correct risks like illness, accidents, fires or any other natural calamity safely and within the limits of individual's authority.

## **Semester 6** **General Content**

### **L7 – Sem 6 – GC – Film Aesthetics and appreciation:**

#### **Section – A**

**Unit I:** Introduction - Genres of films – Film History - language, style, grammar, syntax. Film perception: levels of understanding – Film as a medium: Development of cinema as a medium of art and communication.

**Unit II:** Understanding basic elements of Film: Aesthetics, Acting, Costume, Music Cinematography, Mise-en scene, Sound, Editing, Visual Effects and roles of artists. Film and Meaning.

**Unit-III:** Classic Film theory and semiotics – Sociology of films - film language - film and psycho – analysis. Post Modernism and structuralism and deconstruction. Post Colonial theory. Impressionism, expressionism, and surrealism - Subjectivity, causality and time and various schools of thoughts.

**Unit-IV:** Concepts of films – identities and issues - narrative form - non-narrative form- Film style: French New Wave, Soviet Montage Cinema, Asian Cinema.

**Unit- V:** Indian Classic Cinema. Indian Luminaries of Film and their films. Trend setters. Tamil Cinema and trends - Impact in politics, culture and economy. Film and post modernism - Film and cultural identity: Criticism and Film Review Writing.

#### **Section – B**

Practical Assignment: Students must watch select a genre and watch at least 10 movies of that genre and rank them from 1 to 10 with a brief note.

**L7 – Sem 6 – GC – Introduction to modern media:****Section – A**

**Unit I:** Communication – Technology – Genesis – Application of Scientific Advancements – Electronic Revolution – Elementary Idea and about Electronic Devices – Valves – Transmitters, Integrated Circuits etc., Amplifiers – Oscillators – Modulators – Antenna etc.,

**Unit II:** Basic Block Diagram of Telecommunication Systems – Telegraphy – Telephone Exchange – Fax etc., - Telecommunication Networks – Policies.

**Unit III:** Principles of Radio Communication – Working of Radio Transmitters and Receivers  
Elements of Radio Transmitters – Receivers – FM / AM Radio Systems – Narrowcasting.

**Unit IV:** Printing Technology – Type Faces – Fonts – Point System – Method of Composing Machine, Photo, Computers – VDT – DTP – Printing Methods – Traditional and Modern Methods of Electronic Scanners – Laser Printers – Facsimile.

**Unit V:** Computers – Digital – Computer Networks – E-Mail – Teleconferencing – Internet  
Optical Fiber – Interactive Video – CD ROM – Transponder Data Flows – New Communication Technologies and Social Implications, Social Media, Blogging, Micro Blogging. Etc.,

**SECTION B:**

Practical Assignment:

Each student should create a Blog and a YouTube Channel.

## **L7 – Sem 6 – GC – Media Ethics, Laws And Censorship:**

### **Section – A**

**Unit I:** Nature and Principles of Constitution of India (a) Fundamental Rights (b) Rights to Information (c) Freedom of Expression (d) and Freedom of Press in various political setup (i) in Capitalistic (ii) in socialistic Countries (iii) India before and after Independence.

**Unit II:** Constitutional restrictions on Media – Privileges of Media Personnel – The Indian Penal Code, Indian Evidence Act – Libel – Slander – Defamation – Contempt of Court. The Press Registration of Books Act 1867 – Copy Right Act – Periodical Changes – Post and Telegraphy Act – Official Secrets Act of 1923.

**Unit III:** Press Council – Working Journalists Act – MRPTC (Monopolies and Restrictive Trade Practice Commission) – Industrial Dispute Act – Incident Representation of Women Act of 1989. Rights and Abilities of the Editor, Printer and Publisher – Editorial autonomy and Independence – Government Information Services and their controls – PIB.

**Unit IV:** Code of Ethics in Different media – Morality of the Press and Cinema as Private Sectors - Radio and TV as States owned – Public utility undertakings. Evolution of code of ethics for media – Historical Perspectives & details.

**Unit V:** Freedom and Social Responsibility of Media - Tabloid Journalism – Investigative Journalism. Cable Media, its regulation and laws governing cable media – Internet as a media and the governing of rules of internet.

## **Program Outcomes:**

**By the end of the program the students will be able to:**

**(Refer to literature on outcome-based education (OBE) for details on Program Outcomes)**

1. **PO. 1:** To create enthusiasm among students for chemistry and its application in various fields of life.
2. **PO. 2:** To provide students with broad and balanced knowledge and understanding of key concepts in chemistry
3. **PO. 3:** To develop in students a range of practical skills so that they can understand and assess risks and work safely measures to be followed in the laboratory.
4. **PO. 4:** To develop in students the ability to apply standard methodology to the solution of problems in chemistry
5. **PO. 5:** To provide students with knowledge and skill towards employment or higher education in Analytical chemistry or multi-disciplinary areas involving chemistry.
6. **PO.6:** To provide students with the ability to plan and carry out experiments independently and assess the significance of outcomes and to cater to the demands of chemical Industries of well-trained graduates
7. **PO. 7:** To develop in students the ability to adapt and apply methodology to the solution of unfamiliar types of problems.
8. **PO. 8:** To instill critical awareness of advances at the forefront of chemical sciences, to prepare students effectively for professional employment or research degrees in chemical sciences and to develop an independent and responsible work ethics.

## GENERAL REQUIREMENTS AND OTHER INFORMATIONS.

### Scheme of Instructions

1. **Title and Commencement:** As per the university guidelines (12 Ref.letterUA2/379/2016-17).

2. Undergraduate programme offered with multiple entry and exit options

Faculty of Science–

Certificate – 2 semesters

Diploma– 4semesters

Bachelor of Science (B.Sc. 6 Semesters)

Bachelor of Science. Honors (B.Sc.Hons, 8 Semesters)

3. **Semester and Programme Structure:**

The credit pattern for the course is L:P

3. **Subject Combinations:** As per the university guidelines (Ref. letterUA2/379/2016-17).

4. **Eligibility for Admission.**

For B.Sc program only those students who have completed PUC with chemistry or its equivalent examination with science subjects are eligible.

5. **Medium of Instruction:** The medium of instruction shall be English/Kannada.

6. **Scheme of the Program:** As per the university guidelines (Ref.letterUA2/379/2016-17).

7. **Course Registration:** As per the university guidelines (9.1 to 9.6 Ref.letterUA2/379/2016-17).

8. **Attendance:** As per the university guidelines (10.1 and 10.2 Ref.letterUA2/379/2016-17)

9. **Valuation:** As per the university guidelines (Ref.letterAC2(S)/151/2021-22, dated 18/08/2021

10. If the student has passed in the practical exam by securing prescribed marks need not reappear for the practical exam if he/she has failed in the theory exam.

11. **Passing Criteria**

A student is considered to have passed the course, only on securing a minimum of 40% from internal assessment and end examination marks put together.

A student can take end exam irrespective of the marks scored in internal assessment of a particular course

In case a student secures less than 30% in end exam or absent for end examination, the student is said to have not completed the course. The student shall complete the course by reappearing only the end examination conducted by the university.

Makeup examination: As per the university guidelines (16. Ref. letterUA2/379/2016-17).

**Percentage and Grading:** As per the university guidelines (17 Ref. letter UA2/379/2016-17). **18 to 22.** As per the university guidelines (Ref. letterUA2/379/2016-17)

**Scheme of Examination for DSC 1 and 2  
(I and II Semester)**

Credits L : P		Theory	Practical	Maximum marks
4 : 0	<b>Internal assessment</b>	<b>40</b> C1 = 10 + 10 =20 C2= 10 + 10 =20 (test and assignment)	<b>25</b> C1= 10 C2 =10 + Record 5	
0 : 2	<b>Summative Assessment</b>	<b>60</b> (C3)	<b>25</b>	
Duration of the end examination		2 hours	4 hours	
		<b>100</b>	<b>50</b>	<b>150</b>

**Examination and Evaluation**

**Question paper pattern for DSC 1 and 2  
(I and II Semester)**

<b>Duration:</b> 2 hours		<b>Max. Marks:</b> 60
<b>The question paper contains 3 parts</b>		
Part-A	Answer any 6 out of 8 questions <b>(two questions from each unit)</b>	6 X 2 = 12
Part-B (Inorganic Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-C (Organic Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-D (Physical Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-E (Analytical Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
<b>Pattern:</b> (3 + 3) / (4 + 2)/(2+2+2)		

### Scheme of Examination for Open elective

Credits L : P	Theory	Maximum marks
3: 0	Internal assessment	<b>40</b> C1 = 10 + 10 = 20 C2 = 10 + 10 = 20 (test and assignment)
	Summative assessment	<b>60</b> (C3)
Duration of the end examination		2 hours
		100

### Question paper pattern for Open elective (I to IV Semester)

<b>Duration:</b> 2 hours		<b>Max. Marks:</b> 60
<b>The question paper contains 2 parts</b>		
Part-A	Answer any 6 out of 8 questions	6 X 2 = 12
Part-B	Answer any 8 out of 10 questions	8 x 6 = 48
<b>Pattern: Pattern: (3 + 3) / (4 + 2)/(2+2+2)</b>		

## I SEMESTER

### DSC-1: Chemistry-1

**CLASS DURATION – THEORY: 04 HOURS/WEEK**

**Theory and Practicals: Total Credits-06 (Theory-04, Practicals-02)**

#### **UNIT –I – Analytical chemistry**

Language of analytical chemistry: Definitions of analysis, determination, measurement, techniques and methods. Classification of analytical techniques. Choice of an analytical method - accuracy, precision, sensitivity, selectivity, method validation. Figures of merit of analytical methods and limit of detection (LOD), Limit of quantification (LOQ), linear dynamic range (working range).

Errors and treatment of analytical data: Limitations of analytical methods – Errors: Determinate and indeterminate errors, absolute error, relative error, minimization of errors. Statistical treatment of finite samples -mean, median, range, standard deviation and variance. External standard calibration - regression equation (least squares method), correlation coefficient (R<sup>2</sup>).

Numerical problems

Basic laboratory practices, calibration of glassware (pipette, burette and volumetric flask), Sampling (solids and liquids), weighing, drying, dissolving, Acid treatment, Rules of work in analytical laboratory, General rule for performing quantitative determinations (volumetric and gravimetric), Safety in Chemical laboratory, Rules of fire prevention and accidents, First aid. Precautions to be taken while handling toxic chemicals, concentrated/fuming acids and organic solvents.

#### **UNIT-II: Inorganic Chemistry**

Bohr's theory, its limitations and atomic spectrum of hydrogen atom. Wave mechanics: de Broglie equation, Heisenberg's Uncertainty Principle and its significance, Schrödinger's wave equation, significance of  $\psi$  and  $\psi^2$ . Quantum numbers and their significance.

Normalized and orthogonal wave functions. Sign of wave functions. Radial and angular wave functions for hydrogen atom. Radial and angular distribution curves. Shapes of s, p, d and f orbitals. Contour boundary and probability diagrams.

Pauli's Exclusion Principle, Hund's rule of maximum multiplicity, Aufbau's principle and its limitations- Electronic configurations of the elements (Z=1-30), effective nuclear charge, shielding/screening effect, Slater's rules. Variation of effective nuclear charge in Periodic Table. **[14Hours]**

#### **UNIT-II: Organic Chemistry**

Classification and nomenclature of organic compounds, Hybridization, Shapes of organic molecules, Influence of hybridization on bond properties.

Nature of bonding in Organic molecules

Formation of Covalent bond, Types of chemical bonding, localized and delocalized, conjugation and cross conjugation, concept of resonance, electronic displacements: Inductive effect, Electromeric effect, Resonance and Hyper conjugation, cross conjugation explanation with examples. Concept of resonance, aromaticity, Huckel rule, anti-aromaticity explanation with examples. Strengths of Organic acid and bases: Comparative study with emphasis on factors effecting pK values. Relative strength of aliphatic and aromatic carboxylic acids-Acetic acid and chloroacetic acid, acetic acid and propionic acid, acetic acid and Benzoic acid. Steric effect- Relative stability of trans and cis-2-butene.

## Mechanisms of Organic Reactions

Notations used to represent electron movements and directions of reactions- curly arrows, formal charges. Types of bonds breaking- homolytic and heterolytic. Types of reagents- Electrophiles, nucleophiles, nucleophilicity and basicity. Types of organic reactions- substitution, addition, elimination, rearrangement and pericyclic reactions, explanation with examples.

Chemistry of Aliphatic hydrocarbons, Carbon-Carbon Sigma bonds

Chemistry of alkanes: Formation of alkanes, Wurtz reaction, Wurtz-Fittig reaction, Free radical substitution, Halogenation- relative reactivity and selectivity

Carbon-carbon pi bonds

Formation of alkenes and alkynes by elimination reaction. Mechanism of E1, E2, E1cb reaction. Saytzeff and Hofmann eliminations. Addition of HBr to propene, Free radical addition of HBr to propene.

Addition of halogens to alkenes- carbocation and halonium ion mechanism. Stereospecificity of halogen addition. Ozonolysis mechanism - ozonolysis of propene. Addition of hydrogen halides to alkenes, mechanism, regioselectivity and relative rates of addition. Hydrogenation, hydration, hydroxylation and epoxidation of alkenes, explanation with examples, 1,2 and 1,4- addition reactions in conjugated dienes. Diels-Alder reaction, Allylic and benzylic bromination and mechanism in propene, 1-butene, 1-toluene and ethylbenzene.

[14 hours]

## UNIT-III: Physical Chemistry

### Gaseous State

Elementary aspects of kinetic theory of gases, Ideal and real gases. Boyle temperature (derivation not required), Molecular velocity, collision frequency, collision diameter, Collision cross section, collision number and mean free path and coefficient of viscosity, calculation of  $\sigma$  and  $\eta$ , variation of viscosity with temperature and pressure.

Maxwell's Boltzmann distribution law of molecular velocities (Most probable, average and root mean square velocities). Relation between RMS, average and most probable velocity and average kinetic energies. (Mathematical derivation not required), law of equipartition of energy.

Behaviour of real gases: Deviation from ideal gas behaviour. Compressibility factor (Z) and its variation with pressure for different gases. Causes of deviation from ideal behaviour, vander Waals equation of state (No derivation) and application in explaining real gas behaviour. Critical phenomena - Andrews isotherms of CO<sub>2</sub>, critical constants and their calculation from van der Waals equation, Continuity of states, Law of corresponding states. Numerical problems.

### Liquid State

**Surface Tension:** Definition and its determination using stalagmometer, effect of temperature and solute on surface tension

**Viscosity:** Definition, Coefficient of viscosity. Determination of viscosity of a liquid using Oswald viscometer. Effect of temperature, size, weight, shape of molecules and intermolecular forces.

**Refraction:** Specific and molar refraction- definition and advantages. Determination of refractive index by Abbe's Refractometer. Additive and constitutive properties.

**Parachor:** Definition, Atomic and structure parachor, Elucidation of structure of benzene and benzoquinone. Viscosity and molecular structure. Molar refraction and chemical constitution. Numerical Problems.

[14Hours]

**I Semester Practicals**  
**CHEMISTRY-DSC 1 LAB: 04HOURS/WEEK**

**Content of Practical Course 1: List of Experiments**

**PART-A Inorganic Chemistry**

1. Preparation of standard sodium carbonate solution and standardization of hydrochloric acid solution (methyl orange indicator). Estimation of sodium hydroxide present in the solution using phenolphthalein indicator.
2. Determination of carbonate and hydroxide present in a mixture.
3. Determination of oxalic acid and sodium oxalate in a given mixture using standard  $\text{KMnO}_4/\text{NaOH}$  solution
4. Estimation of ferrous and ferric iron in a given mixture using standard potassium dichromate solution
5. Preparation of standard oxalic acid solution and standardization of potassium permanganate solution. Estimation of hydrogen peroxide present in the solution.
6. Preparation of standard oxalic acid solution and standardization of potassium permanganate solution. Estimation of ferrous ammonium sulphate present in the solution.

**PART-B Organic Chemistry**

1. Preparation of acetanilide from aniline using  $\text{Zn}/\text{acetic acid}$  (Green method).
2. Synthesis of p-nitro acetanilide from acetanilide using nitrating mixture.
3. Bromination of acetanilide
4. Hydrolysis of methyl m-nitrobenzoate to m-nitrobenzoic acid (Conventional method)
5. Synthesis of diazoaminobenzene from aniline (conventional method).
6. Preparation of dibenzalacetone (Green method).

## LEARNING OUTCOMES / COURSE OUTCOMES

### Chemistry as Discipline Specific Course (DSC)

#### B.Sc. Semester – I

#### CHEMISTRY:1

- The concepts of chemical analysis, accuracy, precision and statistical data treatment
- Prepare the solutions after calculating the required quantity of salts in preparing the reagents/solutions and dilution of stock solution.
- Describe the dual nature of radiation and matter; dual behavior of matter and radiation, de Broglie's equations, Heisenberg uncertainty principle and their related problems.
- Quantum mechanics. Derivation of Schrodinger's wave equation. Radial and angular Orbital shapes of s, p, d and f atomic orbitals, nodal planes. Electronic configurations of the atoms.
- Pauli's exclusion principle, Hund's rule, Aufbau's principle and its limitation.
- The concepts of Organic reactions and techniques of writing the movement of electrons, bond breaking, bond forming
- The Concept of aromaticity, resonance, hyper conjugation, etc.
- Explain bond properties, electron displacement effects (inductive effect, electrometric effect, resonance effect and Hyper conjugation effect). steric effect and their applications in explaining acidic strength of carboxylic acids, basicity of amines.
- Understand basic concept of organic reaction mechanism, types of organic reactions.
- Understand the preparation and reactions of alkanes.
- Understand the stability and conformational analysis of cycloalkanes.
- Understand the concept of resonance, aromaticity and antiaromaticity.
- Describe relative strength of aliphatic and aromatic carboxylic acids.
- Explain the existence of different states of matter in terms of balance between intermolecular forces and thermal energy of the particles. Explain the laws governing behavior of ideal gases and real gases. Understand cooling effect of gas on adiabatic expansion
- Understand the conditions required for liquefaction of gases. Realize that there is continuity in gaseous and liquid state.
- Understand the properties of liquids in terms of intermolecular attractions.
- Understand the existence of different states of matter in terms of balance between

intermolecular forces and thermal energy of the particles. Explain the laws governing behavior of ideal gases and real gases. Understand cooling effect of gas on adiabatic expansion

- Understand the conditions required for liquefaction of gases. Realize that there is continuity in gaseous and liquid state.
- Understand the properties of liquids in terms of intermolecular attractions.

### **CHEMISTRY LAB (volumetric (inorganic) and Organic preparations):P-1**

After studying this course and performing the experiments set in it student will be able to:

1. Basic concepts involved in titrimetric analysis, primary standard substances, preparation of standard solutions.
2. Explain the principles of acid-base, redox and iodometric titrations.
3. Work out the stoichiometric relations based on the reactions involved in the titrimetric analysis.
4. Describe the significance of organic quantitative analysis.
5. Understand the preparation of organic compounds involving addition, substitution, hydrolysis, diazotization and condensation reactions.

## II SEMESTER

### DSC-2: Chemistry-2

CLASS DURATION – THEORY: 04 HOURS/WEEK

Theory and Practicals: Total Credits-06 (Theory-04, Practicals-02)

#### **UNIT-I: Analytical Chemistry**

Titrimetric analysis: Basic principle of titrimetric analysis. Classification, Preparation and dilution of reagents/solutions. Normality, Molarity and Mole fraction. Use of  $N_1V_1 = N_2V_2$  formula, Preparation of ppm level solutions from source materials (salts), conversion factors.

Acid-base titrimetry: Titration curves for strong acid vs strong base, weak acid vs strong base and weak base vs strong acid titrations. Titration curves, Quantitative applications – selecting and standardizing a titrant, inorganic analysis - alkalinity, acidity.

Complexometric titrimetry: Indicators for EDTA titrations - theory of metal ion indicators, titration methods employing EDTA - direct, back, displacement and indirect determinations, Application-determination of hardness of water.

Redox titrimetry: Balancing redox equations, calculation of the equilibrium constant of redox reactions, titration curves, Theory of redox indicators, calculation of standard potentials using Nernst equation. Applications.

Precipitation titrimetry: Titration curves, titrants and standards, indicators for precipitation titrations involving silver nitrate- Volhard's and Mohr's methods and their differences.

Gravimetric Analysis: Requisites of precipitation, mechanism of precipitation, Factors influencing precipitation, Co-precipitation, post-precipitation, Advantages of organic reagents over inorganic reagents, reagents used in gravimetry (8-hydroxy quinoline (oxine) and dimethyl glyoxime (DMG)).

Numerical problems on all the above aspects.

[14 hours]

#### **Unit – II Inorganic chemistry**

s, p, d and f-block elements, the long form of periodic table. Detailed discussion of the following properties of the elements, with reference to s and p-block elements:

(a) Atomic radii (van der Waals)

(b) Ionic and crystal radii.

(c) Covalent radii

(d) Ionization enthalpy, successive ionization enthalpies and factors affecting ionization energy. Applications of ionization enthalpy.

(e) Electron gain enthalpy, trends of electron gain enthalpy.

(f) Electronegativity, Pauling's/ Mulliken's/ Allred Rachow's/ and Mulliken-Jaffé's electronegativity scales. Variation of electronegativity with bond order, partial charge, hybridization, group electronegativity.

Trends in the chemistry of the compounds of groups 13 to 17 (hydrides, carbides, oxides and halides) are to be discussed.

[14 hours]

#### **Unit – III Organic chemistry**

Nucleophilic substitution at saturated carbon. Mechanism of  $S_N1$  and  $S_N2$  reactions with suitable

examples. Energy profile diagrams, Stereochemistry and factors effecting SN1 and SN2 reactions. Aromatic Electrophilic substitution reactions, Mechanisms,  $\sigma$  and  $\pi$  complexes, Halogenation, Nitration, Sulphonation, Friedel Crafts alkylation and acylation with their mechanism. Activating and deactivating groups. Orientation influence, Ortho-para ratio. Aromatic nucleophilic substitution reaction: SNAr and Benzyne mechanism with suitable examples

[14 hours]

### **Unit – IV Physical Chemistry**

#### **Liquid Crystals**

Explanation, classification with examples- Smectic, nematic, cholesteric, discs shaped and polymeric. Structures of nematic and cholesteric phases-molecular arrangements in nematic and cholesteric liquid crystals. Applications of liquid crystals in LCDs and thermal sensing.

#### **Solids**

Forms of solids: Unit cell and space lattice, anisotropy of crystals, size and shape of crystals, Laws of Crystallography: Law of constancy of interfacial angles, Law of rational indices, Law of symmetry (Symmetry elements), Crystal systems, Bravais lattice types and identification of lattice planes. Miller indices and its calculation, X-Ray diffraction by crystals: Bragg's law and derivation of Bragg's equation, Single crystal and powder diffraction methods. Defects in crystals, glasses and liquid crystals. Numerical problems.

#### **Distribution Law**

Nernst Distribution Law - Statement and its derivation. Distribution constant, factors affecting distribution constant, validity of Distribution Law, Modification of distribution law when molecules undergo a) Association b) Dissociation. Application of Distribution Law in Solvent extraction. Derivation for simple and multiple extraction. Principles of distribution law in Parkes Process of desilverisation of lead. Numerical Problems.

[14 hours]

## **II Semester Practicals**

### **CHEMISTRY-DSC 2 LAB: 04HOURS/WEEK**

#### **Content of Practical Course 2: List of Experiments**

##### **PART-A Physical Chemistry**

1. Determination of density using specific gravity bottle and viscosity of liquids using Ostwald's viscometer (Ethyl acetate, Toluene, Chloroform, Chlorobenzene or any other non-hazardous liquids)
2. Determination of the density using specific gravity bottle and surface tension of liquids using Stalagmometer (Ethyl acetate, Toluene, Chlorobenzene, any other non-hazardous liquids)
3. Determination of the composition of liquid mixture by refractometry. (Toluene & Alcohol, Water & Sucrose)
4. Determination of partition/distribution coefficient - i) Acetic acid in water and cyclohexane. ii) Acetic acid in Water and Butanol. iii) Benzoic acid in water and toluene.

5. Determination of rate constant of decomposition of  $\text{H}_2\text{O}_2$  catalyzed by  $\text{FeCl}_3$
6. Determination of percentage composition of  $\text{NaCl}$  solution by determining miscibility temperature of phenol-water system.

### **PART-B Analytical Chemistry**

1. Determination of alkali present in soaps/detergents using standard  $\text{HCl}$
2. Determination of iron(II) using potassium dichromate
3. Determination of oxalic acid using standard potassium permanganate solution
4. Determination of hardness of water Standardized EDTA solution
5. Determination of alkali content in antacids using standard  $\text{HCl}$  solution.
6. Determination of chlorine in bleaching powder by iodometry (standard solution to be given)

### **LEARNING OUTCOMES / COURSE OUTCOMES**

#### **Chemistry as Discipline Specific Course (DSC)**

#### **B.Sc. Semester II**

#### **CHEMISTRY:2**

- Understand principles of titrimetric analysis.
- Understand principles of different types of titrations. Titration curves for all types of acids – base titrations.
- Gain knowledge about balancing redox equations, titration curves, theory of redox indicators and applications.
- Understand titration curves, indicators for precipitation titrations involving silver nitrate- Volhard's and Mohr's methods and their differences.
- Indicators for EDTA titrations - theory of metal ion indicators. Determination of hardness of water.
- Understand periodic table, classification and properties of s p d and f block elements
- Understand different scales for the measurement of electro-negativity and factors affecting it.
- Understand the chemistry of the hydrides, carbides, oxides and halides of group 13 to 17
- Understand nucleophilic substitution at saturated carbon, energy profile diagram stereochemistry and factors affecting  $\text{S}_\text{N}^1$  and  $\text{S}_\text{N}^2$  reactions.
- Aromatic electrophilic substitution reactions like nitration sulphonation Friedel-Crafts reactions etc
- Understand liquid crystals, classification with examples
- Understand the different forms of solids, laws of crystallography, Miller indices and its calculation, X-ray diffraction studies. Bragg's law and its equation

- Defects in solids , properties of glasses and concept of liquidcrystals

### **CHEMISTRY LAB (volumetric (inorganic) and Organic preparations): P-1**

After studying this course and performing the experiments set in it student will be able to:

1. Basic concepts involved in titrimetric analysis, primary standard substances, preparation of standardsolutions.
2. Explain the principles of acid-base, redox and iodometric titrations.
3. Describe the significance of inorganic quantitative analysis.
4. Determine of density followed by the determination of viscosity and surface tension of different liquidsamples.
5. Determination of partition coefficient of different liquidmixtures
6. Determination of rate constant in the decomposition reaction of hydrogenperoxide

1. Organic Chemistry - L. Ferguson, Von Nostrand,1985.
2. Organic Chemistry - M. K. Jain, Nagin& Co.,1987.
3. Organic Chemistry- Mehta and Mehta, PHI Learning Pvt. Ltd, NewDelhi,2005.

### **Physical Chemistry**

1. Barrow, G.M. Physical Chemistry, Tata McGraw-Hill,2007.
2. Castellan, G.W. Physical Chemistry, 4th Ed. Narosa,2004.
3. Kotz, J.C., Treichel, P.M. & Townsend, J.R. General Chemistry Cengage Learning IndiaPvt. Ltd., New Delhi,2009.
4. P.W. Atkins: Physical Chemistry,2002.
5. W.J. Moore: Physical Chemistry,1972.
6. Text Book of Physical Chemistry - P. L. Soni, S. Chand & Co.,1993.
7. Text Book of Physical Chemistry - S. Glasstone, Mackmillan India Ltd.,1982.
8. Principles of Physical Chemistry - B. R. Puri, L. R. Sharma and M. S. Patania, S. L. N. Chand & Co.1987.
9. Physical Chemistry - Alberty R. A. and Silbey, R. J. John Wiley and sons,1992.
10. Physical Chemistry - G. M. Barrow, McGraw Hill,1986.
11. Physical Chemistry (3<sup>rd</sup> Edition) - Gilbert W. Castilian, Narosa Publishing House,1985.
12. Chemical Kinetics by K. J. Laidler, Tata McGraw Hill Publishing Co., NewDelhi.
13. Kinetics and Reaction Mechanisms by Frost and Pearson, Wiley, New York,1981.

### **Analytical Chemistry**

1. Jeffery, G.H., Bassett, J., Mendham, J.& Denney,R.C.
2. Vogel's Textbook of Quantitative Chemical Analysis, John Wiley & Sons,1989.
3. Willard, H. H., Merritt, L.L., Dean, J. & Settle, F.A. Instrumental Methods of Analysis, 7<sup>th</sup> Ed. Wadsworth Publishing Company Ltd., Belmont, California, USA, 1988.
4. Christian, G.D; Analytical Chemistry, VI Ed. John Wiley & Sons, New York,2004.
5. Harris, D. C. Exploring Chemical Analysis, Ed. New York, W.H. Freeman,2001.
6. Skoog, D. A. Holler F.J. &Nieman, T.A. Principles of Instrumental Analysis,Cengage Learning India Ed,2017.
7. Ditts, R.V. Analytical Chemistry; Methods of Separation, van Nostrand,1974.

## Open Elective Course - Semester – I

### Title of the Course: OE-1: CHEMISTRY IN DAILY LIFE

#### Unit- I

Dairy Products: Composition of milk and milk products. Analysis of fat content, minerals in milk and butter. Estimation of added water in milk. Beverages: Analysis of caffeine in coffee and tea, detection of chicory in coffee, chloral hydrate in toddy, determination of methyl alcohol in alcoholic beverages. Food additives, adulterants, and contaminants- Food preservatives like benzoates, propionates, sorbates, disulphites. Artificial sweeteners: Aspartame, saccharin, dulcin, sucralose, and sodium cyclamate. Flavors: Vanillin, alkyl esters (fruit flavors), and monosodium glutamate. Artificial food colorants: Coal tar dyes and non-permitted colors and metallic salts. Analysis of pesticide residues in food. [14 hours]

#### Unit- II

Vitamins: Classification and Nomenclature. Sources, deficiency diseases, and structures of Vitamin A1, Vitamin B1, Vitamin C, Vitamin D, Vitamin E & Vitamin K1. Oils and fats: Composition of edible oils, detection of purity, rancidity of fats and oil. Tests for adulterants like argemone oil and mineral oils. Halphen test. Soaps & Detergents: Definition, classification, manufacturing of soaps and detergents, composition and uses [14 hours]

#### Unit- III

Chemical and Renewable Energy Sources: principles and applications of primary & secondary batteries and fuel cells. Basics of solar energy, future energy storers. Polymers: Basic concept of polymers, classification and characteristics of polymers. Applications of polymers as plastics in electronic, automobile components, medical fields, and aerospace materials. Problems of plastic waste management. Strategies for the development of environment-friendly polymers. [14 hours]

## COURSE OUTCOMES OEC-1 Chemistry

On completion of the course students will be able to:

1. Understand the chemical constituents in various day to day materials using by a commonman.
2. Understand the chemical constituents in vitamins, soaps and detergents
3. Understand the renewable chemical energy resources
4. Understand different types of polymers and their applications.

### Reference Books

## Open Elective Course - Semester – II

### Title of the Course: OE-2: Molecules of Life

#### UNIT I

##### Carbohydrates

Classification of carbohydrates, reducing and non-reducing sugars, General properties of glucose and fructose, their open chain structures.Epimers, mutarotation and anomers.

Linkage between monosaccharides, structure of disaccharides (sucrose, maltose, lactose) and polysaccharides (starch and cellulose) excluding their structure elucidation.

##### Amino Acids, Peptides and Proteins

Classification of amino acids, Zwitterion structure and Isoelectric point. Overview of Primary, Secondary, Tertiary and Quaternary structure of proteins.Determination of primary structure of peptides.

#### UNIT II

##### Enzymes and correlation with drug action

Mechanism of enzyme action, factors affecting enzyme action, Co-enzymes and cofactors and their role in biological reactions, Specificity of enzyme action (including stereospecificity),

Enzyme inhibitors and their importance, phenomenon of inhibition (Competitive and Non competitive inhibition including allosteric inhibition).

Drug action-receptor theory. Structure–activity relationships of drug molecules, binding role of –OH group, -NH<sub>2</sub> group, double bond and aromatic ring

##### Lipids

Introduction to lipids, classification.Biological importance of triglycerides, phospholipids, glycolipids, and steroids (cholesterol).

### UNIT III

#### **Nucleic Acids**

Components of nucleic acids: Adenine, guanine, thymine and cytosine (Structure only), other components of nucleic acids, Nucleosides and nucleotides (nomenclature), Structure of polynucleotides; Structure of DNA (Watson-Crick model) and RNA (types of RNA), Genetic Code, Biological roles of DNA and RNA: Replication, Transcription and Translation.

#### **Concept of Energy in Biosystems**

Calorific value of food. Standard caloric content of carbohydrates, proteins and fats. Oxidation of foodstuff (organic molecules) as a source of energy for cells. Introduction to Metabolism (catabolism, anabolism), ATP: the universal currency of cellular energy, ATP hydrolysis and free energy change. Conversion of food into energy. Outline of catabolic pathways of Carbohydrate- Glycolysis, Fermentation, Krebs Cycle. Overview of catabolic pathways of Fats and Proteins. Interrelationships in the metabolic pathways of Proteins, Fats and Carbohydrates

#### **Course Outcome / Learning Outcome:**

After studying this paper the student would be able to

1. Acquire knowledge about different types of sugars and their chemical structures.
2. Identify different types of amino acids and determine the structure of peptides.
3. Explain the actions of enzymes in our body and interpret enzyme inhibition.
4. Predict action of drugs. Depict the biological importance of oils and fats. Importance of lipids in the metabolism. Differentiate RNA and DNA and their replication. Explain production of energy in our body.

#### **Reference Books:**

2. Finar, I. L. Organic Chemistry (Volume 1), Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
3. Finar, I. L. Organic Chemistry (Volume 2), Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
4. Nelson, D. L. & Cox, M. M. Lehninger's Principles of Biochemistry 7th Ed.,
5. W. H. Freeman. Berg, J.M., Tymoczko, J.L. & Stryer, L. Biochemistry, 2002.

# III & IV SEMESTER

### III

### SEMESTER

#### DSC-3: Chemistry-III

(L:T:P = 4:0:0)

Contact Hours: 56

Credits: 4

Workload: 4 Hours/Week

#### *Course Objectives:*

1. Inter relationship among frequency, wavelength and wave number and importance of validation parameters of an instrumental method will be taught.
2. Principle, instrumentation and applications of spectrophotometry, nephelometry and turbidometry will be taught.
3. Inter relationship among frequency, wavelength and wave number and importance of validation parameters of an instrumental method will be taught.
4. The concept of mechanism and its importance will be taught to the student.
5. Concept and importance of intermediates in organic chemistry will be taught taking proper examples.
6. The various techniques for identification of reaction mechanism will be taught to the student taking proper examples.
7. Different types of bonding in molecules/compounds/ions.
8. The theoretical and experimental aspects of chemical kinetics including basic theories of reaction rates and methods of determining order.
9. Electrochemistry dealing with electrolytes in solution. Conductance measurements and applications. Concept of ionic mobility and their determination.

**Course Specific Outcomes:** After the completion of this course, the student would be able to;

1. Understand the importance of fundamental law and validation parameters in chemical analysis.
2. Apply solvent extraction method for quantitative determination of metal ions in different samples.
3. Utilize the ion-exchange chromatography for domestic and industrial applications.
4. Explain mechanism for a given reaction.
5. Predict the probable mechanism for a reaction.
6. Explain the importance of reaction intermediates, its role and techniques of generating such intermediates.
7. Predict the nature of the bond formed between different elements.
8. Identify the possible type of arrangements of ions in ionic compounds.
9. Write Born - Haber cycle for different ionic compounds.
10. Relate different energy parameters like, lattice energy, entropy, enthalpy and solvation energy in the dissolution of ionic solids.
11. Explain covalent nature in ionic compounds.
12. Understand the concept of rate of a chemical reaction, integrated rate equations, energy of activation and determination of order of a reaction based on experimental data.
13. Know different types of electrolytes, usefulness of conductance and ionic mobility measurements and to determine the transport numbers.

## DSE-3: Chemistry III

(L:T:P = 4:0:0)

Contact Hours: 56

Credits: 4

Workload: 4 Hours/Week

### Unit-I:

#### Separation methods:

**Fundamentals of chromatography:** General description, definition, terms and parameters used in chromatography, classification of chromatographic methods, criteria for selection of stationary and mobile phase and nature of adsorbents. Principles of paper, thin layer, column chromatography. Column efficiency, factors affecting the column efficiency, vanDeemter's equation and its modern version. **3 Hrs.**

**Paper chromatography:** Theory and applications

**Thin layer chromatography (TLC):** Mechanism, R<sub>f</sub> value, efficiency of TLC plates, methodology—selection of stationary and mobile phases, development, spray reagents, identification and detection, qualitative applications. **4 Hrs.**

**Solvent Extraction:** Types- batch, continuous, efficiency, selectivity, distribution coefficient, Nernst distribution law, derivation, factors affecting the partition, relationship between % extraction and volume fraction, Numerical problems on solvent extraction. Solvent extraction of iron and copper. **4 Hrs.**

**Ion exchange chromatography:** resins, types with examples- cation exchange and anion exchange resins, mechanism of cation and anion exchange process and applications of ion-exchange chromatography (softening of hard water, separation of lanthanides, industrial applications). **3 Hrs.**

### Unit-II:

**Structure and Bonding-I: The ionic bond:** Structures of ionic solids. Radius ratio rules, Calculation of some limiting radius ratio values, Coordination number 3 (planar triangle), Coordination number 4 (tetrahedral and square planar), Coordination number 6 (octahedral), Close packing. **3 Hrs.**

#### Classification of ionic structures:

Ionic compounds of the type AX (ZnS, NaCl, CsCl), Ionic compounds of the type AX<sub>2</sub> (Calcium fluoride (fluorite) and Rutile structure Layer structures CdI<sub>2</sub>, Cadmium iodide structure. Limitations of radius ratio concept **2 Hrs.**

Lattice energy and Born-Haber cycle, Derivation of Born-Landé equation and its drawbacks, Kapustinskii equation, solvation energy and solubility of ionic solids, polarizing power and polarizability, Fajan's rules with applications. Numerical problems **5 Hrs.**

**Covalent bond:** Valence bond theory, The Lewis theory, The octet rule, Exceptions to the octet rule, Sidgwick-Powell theory. Valence shell electron pair repulsion (VSEPR) theory, Effect of lone pairs, electronegativity, isoelectronic principle, Examples using VSEPR theory: BF<sub>3</sub> and BF<sub>4</sub><sup>-</sup>, NH<sub>3</sub> and NH<sub>4</sub><sup>+</sup>, H<sub>2</sub>O, PCl<sub>5</sub>, ClF<sub>3</sub>, SF<sub>4</sub>, I<sub>3</sub><sup>-</sup> and I<sub>3</sub><sup>+</sup>, SF<sub>6</sub>, and IF<sub>7</sub>. Limitations of VSEPR. **7 Hrs.**

### Unit-III:

**Reaction Intermediates:** Generation, structure, stability and reactions involving;

- i. **Carbocations:** Dienone-phenol and Pinacol-Pinacolone Rearrangement.
- ii. **Carbanions:** Perkin Reaction, Aldol condensation, Claisen-Schmitt condensation.
- iii. **Free Radicals:** Chlorination of methane, formation of gamma-xene (lindane).
- iv. **Carbenes:** Singlet and triplet states, their relative stability. Riemeier-Tiemann, and Wolff rearrangement.
- v. **Nitrenes:** Singlet and triplet states, their relative stability. Hoffman and Curtius reactions.
- vi. **Arynes:** Formation, detection. Bromobenzene to aniline, (4+2) cycloaddition reaction.

**8 Hrs.**

**Methods for Identifying Reaction Mechanism:** Product analysis, Isolation and Identification of Intermediates, Stereochemical Evidences, Effect of Catalyst, crossover Experiments, Isotopic studies, Kinetic Studies. **6 Hrs.**

**Unit-IV:**

**Chemical Kinetics:** Introduction, rate of reaction, order and molecularity with examples. Rate constant-definition and explanation. Differential and integrated form of rate expressions up to second order reactions, Derivation of expression of rate constant of second order reaction ( $a=b$  and  $a \neq b$ ), Problems on rate constant ( $a=b$ ), Methods of determination of order of a reaction (half-life method, isolation method), temperature dependence of reaction rates; Arrhenius equation, activation energy, Numerical problems on Arrhenius equation in calculating energy of activation and rate constants. Collision theory of reaction rates, Lindemann's mechanism, qualitative treatment of the theory of absolute reaction rates. Experimental determination of kinetics of (i) inversion of cane sugar by polarimetric method (ii) spectrophotometric method for the reaction between potassium persulphate and potassium iodide. **7 Hrs.**

**Electrochemistry – I:** Introduction, strong and weak electrolytes, definition with examples. Arrhenius theory of electrolytic dissociation. Merits and Demerits, Conductance, Specific conductance, equivalent and molar conductivity and their variation with dilution. Molar conductivity at infinite dilution. Numerical problems.

Kohlrausch's law of independent migration of ions and its applications, Debye-Hückel-Onsager equation. Ionic mobilities and their determinations, transference numbers and their relation to ionic mobility's, determination of transference numbers using Hittorf and Moving Boundary methods.

**Applications of conductance measurement:** (i) Degree of dissociation of weak electrolytes (ii) ionic product of water (iii) solubility and solubility product of sparingly soluble salts (iv) conductometric titrations (acid base titrations only) and (v) Hydrolysis constants of salts. Numerical problems. **7 Hrs.**

\*\*\*\*\*

### DSC-3: Chemistry-III Practical

(L:T:P = 0:0:2)    Contact Hours: 56    Credits: 2    Workload:4Hours/Week

**Course objectives:** To attain practical knowledge about:

1. Analytical skills in detecting the constituents present in unknown samples by systematically carrying out the qualitative analysis.
2. The methods of determining rates of chemical reactions.
3. Designing electrochemical cells and making measurements related to it.
4. Determination of physical characteristics of electrolytes using conductivity measurements in solution.
5. Adsorption phenomenon, mechanism and basic models to explain adsorption.
6. Simple techniques like conductometry to obtain physicochemical parameters of electrolytes.

**Course Specific outcomes:** At the end of the course student would be able to;

1. Understand the chemical reactions involved in the detection of cations and anions.
2. Explain basic principles involved in classification of ions into groups in semi-micro qualitative analysis of salt mixture
3. Carryout the separation of cations into groups and understand the concept of commonion effect.
4. Understand the choice of group reagents used in the analysis.
5. Analyze a simple inorganic salt mixture containing two anions and cations
6. Use instruments like conductivity meter to obtain various physicochemical parameters.
7. Apply the theory about chemical kinetics and determine the velocity constants of various reactions.
8. Learn about the reaction mechanisms.
9. Interpret the behavior of interfaces, the phenomena of physisorption and chemisorption's and their applications in chemical and industrial processes.
10. Learn to fit experimental data with theoretical models and interpret the data

#### **Part A: Inorganic Chemistry Practicals**

Qualitative semi-micro analysis of mixtures containing 2 anions and 2 cations. Emphasis should be given to the understanding of different reactions.

The following cations and anions are suggested.

**Cations:**  $\text{NH}_4^+$ ,  $\text{Pb}^{2+}$ ,  $\text{Bi}^{3+}$ ,  $\text{Cu}^{2+}$ ,  $\text{Al}^{3+}$ ,  $\text{Fe}^{3+}$ ,  $\text{Co}^{2+}$ ,  $\text{Cr}^{3+}$ ,  $\text{Ni}^{2+}$ ,  $\text{Zn}^{2+}$ ,  $\text{Mn}^{2+}$ ,  $\text{Ba}^{2+}$ ,  $\text{Ca}^{2+}$ ,  $\text{Sr}^{2+}$ ,  $\text{Mg}^{2+}$ ,

$\text{Na}^+$ ,  $\text{K}^+$  and  $\text{Li}^+$ .

**Anions:**  $\text{CO}_3^{2-}$ ,  $\text{CH}_3\text{COO}^-$ ,  $\text{Cl}^-$ ,  $\text{Br}^-$ ,  $\text{I}^-$ ,  $\text{NO}_3^-$ ,  $\text{BO}_3^{3-}$ ,  $\text{SO}_4^{2-}$ ,  $\text{C}_2\text{O}_4^{2-}$  and  $\text{PO}_4^{3-}$ .

Spot tests and flame tests to be carried out wherever possible.

#### **Part B: Physical Chemistry Practicals**

1. Determination of the enthalpy of neutralization of a strong acid with strong base.
2. Verification of Freundlich and Langmuir isotherms for adsorption of acetic acid on

- activated charcoal.
3. The study of kinetics of potassium persulphate and potassium iodide volumetrically.
  4. Determination of velocity constant for acid catalyzed hydrolysis of methyl acetate volumetrically.
  5. Determination of velocity constant for the saponification of ethyl acetate ( $a = b$ ) volumetrically.
  6. Determination of equivalent conductivity of strong electrolyte and verification of DHO equation using meter bridge.
  7. Determination of dissociation constant of weak acid by conductivity method using meter bridge.
  8. Conductometric titration of strong acid and strong base.
  9. Conductometric titration of weak acid and strong base.
  10. Determination of the hydrolysis constant of aniline hydrochloride by conductometric method.
  11. Determination of solubility product of sparingly soluble salt by conductometric method.

\*\*\*\*\*

## SEMESTER IV

### DSC-4: Chemistry-IV

**(L:T:P = 4:0:0)    Contact Hours: 56    Credits: 4    Workload: 4 Hours/Week**

#### **Course Objectives:**

1. Principle, instrumentation and applications of spectrophotometry, nephelometry and turbidometry will be taught.
2. Principle, types and applications of solvent extraction will be taught.
3. Concept of stereochemistry and its importance will be taught.
4. The various projection formulae and the techniques of designating the molecules in to R,S, D, L will be taught taking proper examples.
5. The theory and concept of Cis-, Trans- isomerism and its importance and the techniques to differentiate between them will be taught taking examples.
6. The structures of molecules/compounds/ions based on different models/theories.
7. Properties of compounds based on bonding and structure.
8. The fundamentals of thermodynamics including the laws, the concept of entropy and free energy functions and their applications.
9. The concepts of surface chemistry, catalysis and their applications.

**Course Specific Outcomes:** After the completion of this course, the student would be able to;

1. Understand the importance of fundamental law and validation parameters in chemical analysis.

2. Know how different analytes in different matrices (water and real samples) can be determined by spectrophotometric, nephelometric and turbidimetric methods.
3. Explain the importance of Stereochemistry in predicting the structure and property of organic molecules.
4. Predict the configuration of an organic molecule and able to designate it.
5. Identify the chiral molecules and predict its actual configuration.
6. Write the M.O. energy diagrams for simple molecules.
7. Differentiate bonding in metals from their compounds.
8. Learn important laws of thermodynamics and their applications to various thermodynamic systems.
9. Understand adsorption processes and their mechanisms and the function and purpose of a catalyst.
10. Apply adsorption as a versatile method for waste water purification.

### **Unit-I:**

**Quantitative analysis-Instrumental methods:** Electromagnetic spectrum, absorption of electromagnetic radiation, Definition and units of frequency, wavelength, wave number, Beer's law, Beer-Lambert law derivation, deviations from Beer's law, limitations, construction of calibration graph (Plot of absorbance versus concentration), Evaluation Procedures- standard addition, Internal standard addition, validation parameters- detection limits, sensitivity, dynamic/linearity range, Instrumentation, single beam and double beam spectrophotometers, quantitative applications of colorimetry (determination of Fe, Mo, Cu, Ti and  $\text{PO}_4^{3-}$ ) and numerical problems on application of Beer's law. **10 Hrs.**

**Nephelometry and Turbidimetry:** Introduction, principle, instrumentations of nephelometry and turbidimetry; effects of concentration, particle size and wavelength on scattering; choice between nephelometry, applications of nephelometry & turbidimetry (determination of  $\text{SO}_4^{2-}$  and  $\text{PO}_4^{3-}$ ). **4 Hrs.**

### **Unit-II:**

#### **Structure and Bonding -II:**

Concept of resonance, resonance energy, hybridization, types of hybridization,  $sp$ ,  $sp^2$ ,  $sp^3$ ,  $dsp^2$ ,  $dsp^3$ ,  $d^2sp^3$ ,  $sp^3d^2$  with one example each, and energetics of hybridization. Bent's rule, Limitations of Valence Bond Theory. **3 Hrs.**

**Molecular Orbital theory:** LCAO concept: s-s, s-p, p-p, p-d and d-d combinations of orbitals, bonding, nonbonding and antibonding molecular orbitals, non-bonding combinations of orbitals, Rules for linear combination of atomic orbitals.

Examples of molecular orbital treatment for homonuclear diatomic molecules:  $\text{H}_2$  molecule,  $\text{H}_2^+$  molecule ion,  $\text{He}_2$  molecule,  $\text{He}_2^+$  molecule ion,  $\text{Li}_2$  molecule,  $\text{Be}_2$  molecule,  $\text{B}_2$  molecule,  $\text{C}_2$  molecule,  $\text{N}_2$  molecule,  $\text{N}_2^+$  molecule ion,  $\text{O}_2$  molecule,  $\text{O}_2^-$  and  $\text{O}_2^{2-}$  molecule ions.

M.O. Energy diagrams of heteronuclear diatomic molecules with examples ( $\text{NO}$ ,  $\text{NO}^+$ ,  $\text{CO}$  and  $\text{HCl}$ ). Calculation of bond order, relationship between bond order, bond energy, and bond length, magnetic properties based on MOT. **7 Hrs.**

Metallic Bonding: General properties of metals-conductivity, lustre, malleability and cohesive force. Crystal structures of metals and Bond lengths.

Theories of bonding in metals: Free electron theory, valence bond theory, molecular orbital or band theory of solids. Prediction of conducting properties of conductors, insulators and semiconductors, extrinsic and intrinsic semiconductors using M.O. theory.

*4 Hrs.*

### **Unit-III:**

#### **Structure and Stereochemistry of Organic Compounds:**

Concept of isomerism, types of isomerism. Projection formulae of chiral molecules-Fischer (glyceric acid), Newman (2,3-dibromobutane), Sawhorse (2,3-dibromobutane) and Fly- wedge (glyceric acid) projection formulae. Interconversion of projection formulae: Conversion of; Fisher into Sawhorse projection (tartaric acid), Sawhorse into Fisher projection (2,3-dibromobutane), Sawhorse to Newman to Fisher projection (3-amino-3-bromo-2-chlorobutan-2-ol), Fisher to Newman to Sawhorse (3-chloro-2,4-dihydroxybutanal), Fisher into Fly-wedge formula and vice-versa (2-bromo propanoic acid),

**4 Hrs.**

**Geometrical isomerism:** Cause of geometrical isomerism. Cis-trans isomerism (cinnamic acid, but-2-enedioic acid) and syn-anti isomerism (benzaldoxime, ethyl methyl ketoxime), E/Z notations with examples following C.I.P rules.

**Optical Isomerism:** Optical activity, conditions for optical activity-Elements of symmetry (plane, centre,  $C_2$ -axis, rotation-reflection with examples). Specific rotation, Chirality/Asymmetry, Enantiomers-definition with examples, properties, Molecules with two or more chiral centres, Diastereoisomers-definition with examples (threo and erythro isomers), properties. Meso compounds- definition with examples. optical isomerism in tartaric acid, and biphenyls. Asymmetric synthesis, Walden inversion. Racemic modification- Definition with examples. Resolution-definition with examples, chemical and biochemical methods of resolution, Relative and absolute configuration, D/L convention, limitations, and R/S designations-CIP rules with examples.

**10 Hrs.**

### **Unit-IV:**

**First Law of Thermodynamics:** Introduction, system, surroundings, types of systems. Thermodynamic Processes (isothermal, adiabatic, isochoric, isobaric and cyclic), Nature of Heat and Work, Internal Energy, First Law of Thermodynamics, Enthalpy of a System, Work done in isothermal and adiabatic expansion of an ideal gas, Numerical problems, Joule - Thomson Expansion, Relation between Joule-Thomson coefficient and other thermodynamic parameters.

**Second law of Thermodynamics:** Limitations of first law of thermodynamics. Reversible and Irreversible Processes, Concept of entropy, thermodynamic scale of temperature, Statements of the Second Law of Thermodynamics, molecular and statistical interpretation of entropy, Calculation of entropy change for reversible and irreversible processes, Free Energy Functions: Gibbs and Helmholtz energy, variation of S, G, A with T, V and P, Numerical problems, Free energy change and spontaneity, Gibbs-Helmholtz equation.

**Third Law of Thermodynamics:** Statement of third law, concept of residual entropy, calculation of absolute entropy of molecules. **10 Hrs.**

**Surface Chemistry Adsorption:** Introduction, types of adsorptions with examples. Types of adsorption isotherms. Freundlich adsorption isotherm (only equation), its limitations. Langmuir adsorption isotherm (derivation to be done) and BET equation (derivation not included).

**Catalysis:** Types of Catalysis (positive, negative, auto and induced), characteristics of catalysis, and theories with examples (intermediate compound theory and adsorption theory), Theory of acid base catalysis, Michaelis-Menten mechanism. Heterogeneous catalysis: surface reactions, unimolecular, bimolecular surface reactions. Autocatalysis with examples. Applications: Design process to removal of toxic compounds from industrial wastewater and treatment of portable water requirements. **4 Hrs.**

\*\*\*\*\*

### **DSC-4: Chemistry-IV Practical**

**(L:T:P = 0:0:2)    Contact Hours: 56    Credits: 2    Workload:4Hours/Week**

#### ***Course objectives:***

1. To impart skills related to preparation of stock and working solutions and handling of instrumental methods.
2. To know the principle of colorimetric analysis and construction of calibration plot.
3. To understand the chemistry involved in colorimetric determination of metal ions and anions.
4. To determine R<sub>f</sub> values of different metal ions present in a mixture.
5. To impart knowledge on the importance of functional groups in organic compounds.
6. Techniques to identify the functional groups in a compound by performing physical and chemical tests.
7. To record its melting point/boiling point.
8. To prepare suitable derivative for that compound and to characterize it.

**Course Specific outcomes:** After the completion of this course, the student be able to

1. Understand the importance of instrumental methods for quantitative applications.
2. Apply colorimetric methods for accurate determination of metal ions and anions in water or real samples.
3. Understand how functional group in a compound is responsible for its characteristic properties.
4. Learn the importance of qualitative tests in identifying functional groups.
5. Learn how to prepare a derivative for particular functional groups and how to purify it.

#### ***PART-A: Analytical Chemistry Practicals***

1. Colorimetric determination of copper using ammonia solution.
2. Colorimetric determination of iron using thiocyanate solution.

3. Colorimetric determination of nickel using DMG solution.
4. Colorimetric determination of titanium using hydrogen peroxide.
5. Colorimetric determination of nitrite in a water sample (diazo coupling Reaction/Griess reagent).
6. Colorimetric determination of phosphate as ammonium phosphomolybdate.
7. Determination of R<sub>f</sub> values of two or three component systems by TLC.
8. Separation of different metal ions by paper chromatography/ Solvent extraction of iron using oxine solution (demonstration).

### ***PART-B: Organic Chemistry Practical***

Qualitative analysis of mono and bifunctional Organic compounds: Benzoic acid, Salicylic acid, *p*-Nitro benzoic acid, Anthranilic acid, *p*-Chloro benzoic acid, *o*-Cresol, *p*-Cresol, Resorcinol, *o*- Nitrophenol, *p*-nitrophenol, *o*-Nitro aniline, *p*-Nitroaniline, *p*-Toluidine, *p*-Chloroaniline, *p*- Bromoaniline, Ethyl Salicylate, Salicylaldehyde, Acetophenone, Urea, Thiourea, Aniline, Benzaldehyde, acetanilide, Naphthalene, Chlorobenzene, *p*-Dichlorobenzene, *p*-Nitro toluene, Benzamide etc. (At least 6-8 compounds to be analyzed in a semester).

## OPEN ELECTIVE COURSE

### III SEMESTER

#### OE-3: Atomic Structure, Bonding and Concepts in Organic Chemistry

(L:T:P = 3:0:0)    Contact Hours: 42    Credits: 3    Workload:3Hours/Week

#### *Course Objectives:*

1. To develop an understanding of principles of atomic structure.
2. To know the importance of quantum numbers, writing of electronic configurations and representation of orbitals.
3. To develop an understanding of the periodic trends.
4. To understand the nature of bonding and to predict the shapes of molecules.
5. To construct MO energy level diagrams and predict the properties of molecules.
6. To understand the formation of sigma and pi bonds and the bond strength.
7. To study the classification of organic reactions.
8. To learn nomenclature preparation and reactions of alkanes, alkenes, alkynes and stability of alicyclic compounds.

**Course Specific Outcomes:** On completion of the course the student will learn and be able to understand/explain;

1. The concept of atomic structure, significance of quantum numbers, filling of electrons of atoms/ions in various orbitals as per rules.
2. The trends in periodic properties.
3. The structures of ionic solids, applications of B-H cycle, solubility of compounds and consequences of polarization of ions.
4. The shapes of molecules/ions based on VSEPR theory.
5. The construction of MO energy level diagrams and prediction of properties of molecules/ions like bond order, bond energies, bond lengths and magnetic properties.
6. The formation of sigma and pi bonds and the bond strength.
7. The classification of organic reactions.
8. Nomenclature preparation, and reactions of alkanes, alkenes, alkynes and stability of alicyclic compounds.

### ***Unit I: Atomic Structure and Periodic Properties***

History of an atom. Idea of de Broglie matter waves. Heisenberg uncertainty principle. Schrödinger wave equation, significance of wave functions, Bohr's model of hydrogen atom and its limitations. Quantum numbers and their importance, atomic orbitals and shapes of s, p, d orbitals, multi-electron atoms, Aufbau and Pauli exclusion principle and Hund's multiplicity rule- Electronic configurations of the elements (atomic no. up to 30), effective nuclear charge and shielding. **8 Hrs.**

**Periodic Properties:** Atomic radius, Covalent, ionic and van der Waal radii-explanation with examples. Definition and periodicity of the following properties - ionic radii, ionization potential, electron affinity and electronegativity, methods of determination of electronegativity. Factors affecting the values of ionization energy. **6 Hrs.**

### ***Unit II: Chemical Bonding:***

Ionic Solids- Ionic structures (NaCl, CsCl, TiO<sub>2</sub>, ZnS), radius ratio rule and coordination number, limitation of radius ratio rule, lattice energy and Born-Haber cycle, solvation energy and solubility of ionic solids, polarizing power and polarizability of ions, Fajan's rule and their consequences. **4 Hrs.**

Covalent Bond - Valence bond theory and its limitations, directional characteristics of covalent bond, various types of hybridization with examples and shapes of simple inorganic molecules and ions. Shapes of NH<sub>3</sub>, I<sub>3</sub><sup>+</sup>, I<sub>3</sub><sup>-</sup>, SF<sub>4</sub>, ClF<sub>3</sub>, IF<sub>5</sub>, ICl<sub>2</sub><sup>-</sup> and H<sub>2</sub>O using valence shell electron pair repulsion (VSEPR) theory, linear combination of atomic orbitals (LCAO), bonding, nonbonding and antibonding molecular orbitals, physical picture of bonding and antibonding wave functions. Applications of MO theory to explain the stability of homo dinuclear (He<sub>2</sub>, N<sub>2</sub>, O<sub>2</sub>, F<sub>2</sub>, C<sub>2</sub>) and hetero dinuclear (NO and CO) molecules. Comparison of M.O. and V.B. Models. **7 Hrs.**

Metallic bond-free electron, Band theory-electrical properties of metals, semiconductors

and insulators. Weak interactions – Hydrogen bonding and its consequences, van der Waals forces. **3 Hrs.**

**Unit III: Bonding and molecular structure and hydrocarbons**

**Bonding and molecular structure:** Introduction to organic chemistry, atomic orbitals, sigma and pi bond formation-molecular orbital [MO] method, sp, sp<sup>2</sup> and sp<sup>3</sup> hybridization, bond length, bond dissociation energies and bond angles (open chain and cyclic compounds). Electronegativity and polarity of the bonds. Classification and reactions of organic compounds (with examples). **7 Hrs.**

**Alkanes, Alkenes and Alkynes:** Definition, Nomenclature, preparations (any two methods). Reactions: Electrophilic, nucleophilic and free radical addition reactions.

**Alicyclic compounds:** Nomenclature, preparation and stability of cyclopropane, cyclobutane, cyclopentane and cyclohexane. **7 Hrs.**

\*\*\*\*\*

4. Inorganic Chemistry, Shriver, D.F. & Atkins, P.W. Oxford University Press.
5. Schaum's Outline Series Theory and Problems of Organic Chemistry.SI (metric) Ed Herbert Meislich, Howard Nechamkin and Jacob Sharefkin.
6. Organic chemistry. Robert T. Morrison Robert N. Boyd, 6<sup>th</sup> Ed.
7. Organic Chemistry Volume-1, I.L. Finar.

\*\*\*\*\*

**OPEN ELECTIVE COURSE  
IV SEMESTER**

**OEC-4: Electrochemistry, Corrosion and Metallurgy**

**(L:T:P = 3:0:0) Contact Hours: 42 Credits: 3 Workload:3Hours/Week**

**Course Objectives:** This course will deal with

1. Types of conductance, concept of electrolytes, electrolysis, redox reactions and EMF.
2. Concept of different types of electrochemical cells, Types of electrodes and electrode potential. Application of electrochemical series.
3. Basic principles and applications of conductometric, potentiometric and pH titrations.
4. Different types of Batteries their principle construction and working - lead-acid storage and lithium ion battery. Study of Fuels cells.
5. Concept of corrosion, types of corrosion and its prevention by different methods. Introduction to electroplating.
6. Introduction to ores and minerals, extraction of metals from their ores, and

purification. Eg., Manganese, Titanium and Uranium. Study of alloys, classification, production and uses of alloys.

**Course Specific Outcomes:** Upon completion of the course students will be able to;

1. Understand the concept of conductance in electrolytic solutions, electrolysis and redox reactions involved in electrode reactions.
2. Learn the different types of electrochemical cells, their symbolical representation and application of electrochemical series.
3. Apply conductometric, potentiometric and pH titrations.
4. Know the principle, construction and working of batteries.
5. Understand different types of corrosion and its prevention by different methods.
6. Learn the methods of extraction of metals from their ores and purification.

**Unit I: Electrochemistry:** Conductance, specific and molar conductance Types of Electrolytes, Conductivity in electrolytic solution, Electrolysis, Kohlrausch's law and its application, Equivalent Conductance of Weak electrolyte at Infinite dilution.

Oxidation -reduction reactions, electrode potential, EMF of an electrochemical cell, cell reaction, Daniel cell, dry Cells - electrolytic and Galvanic cell, Representation of a cell. Standard electrode potential, Nernst equation (No derivation) and its application to chemical cell, Electrochemical series and its importance. Types of Electrodes.

Basic Principles of (i) Conductometric titrations- HCl Vs NaOH, CH<sub>3</sub>COOH Vs NaOH

Potentiometric titrations: Acid-base titration HCl Vs NaOH, Redox titration (FAS Vs K<sub>2</sub>Cr<sub>2</sub>O<sub>7</sub>)

Determination of PH using glass electrode.

**12 Hrs.**

Batteries- Primary and Secondary batteries, Battery components and their role. Working of the following Batteries- Lead acid, Lithium Storage, Batteries, Fuel cells.

**2 Hrs.**

**Unit II: Corrosion:** Introduction, definition, Types of Corrosion, Corrosion rate, Factors affecting corrosion rate, Metallic factor-purity, electrode potential of metal, hydrogen over voltage, nature of corrosion product. Environmental Factors-Temperature, pH of the medium, humidity, presence of impurities, electrical conductivity of the medium, velocity of the medium, concentration of the medium.

Prevention of Corrosion: Material selection - Metals and alloys, metal purification, non-metallic, Alteration of environment - Changing media, inhibitors, Design-wall thickness, design rules, Coating-Metallic and other inorganic coatings, organic coating.

Electroplating: Introduction, Electroplating of chromium (hard and decorative). Electroless plating: Introduction, distinction between electroplating and electroless plating processes.

Electroless plating of copper.

**14 Hrs.**

**Unit III: Metallurgy:** Introduction: Ore, minerals, important ores of some common elements in India, General Principles of pyrometallurgy, roasting, Calcination, Gangue, Smelting, Flux, Gravity separation, Froth flotation process, leaching. Techniques employed for Purification of metal (Distillation process, Bessemerization, Electro-refining, Van Arkel

and De Boer's Filament. **7 Hrs.**

**Extraction of metals:** Extraction of Manganese (Pyrolusite), Titanium (Ilmanite) and Uranium. **4 Hrs.**

**Alloys:** Introduction, Classification of alloys, commercially important alloys, gold karats,

**Production of Ferro alloys;** Ferrochrome, Ferro Manganese, Uses of alloys. **4 Hrs.**

\*\*\*\*\*

#### Scheme of Examination for DSC-3 and DSC-4 (III and IV Semesters): Credits (4:0:0)

Continuous Internal Assessment	Marks		
	Assignment	Test	Total
C1	10	10	20
C2	10	10	20
<b>Semester End Examination</b>	<b>Duration: 02 Hours</b>		
C3			60
<b>Total Marks</b>			<b>100</b>

**Question Paper pattern for DSC-3 and DSC-4 (III and IV Semesters)**

Duration: 02 Hours		Max. Marks: 60
Part-A	Answer any six out of eight questions (Two questions from each unit)	6 x 2 = 12
Part-B (Analytical Chemistry)	Answer any two out of three questions	2 x 6 = 12
Part-C (Inorganic Chemistry)	Answer any two out of three questions	2 x 6 = 12
Part-D (Organic Chemistry)	Answer any two out of three questions	2 x 6 = 12
Part-E (Physical Chemistry)	Answer any two out of three questions	2 x 6 = 12
Sub-questions Pattern: (3 + 3)/(4 + 2)/(2 + 2 + 2)		

**Scheme of Examination for DSC-3 and DSC-4 practical (III and IV Semesters) Credits (0:0:2)**

Continuous Internal Assessment	Marks			
	Test	Continuous assessment/ Attendance	Record	Total
C1	10	-	--	10
C2	--	10	05	15
Semester End Examination	Duration: 04 Hours			
C3				25
<b>Total Marks</b>				<b>50</b>

\*\*\*\*\*

**Scheme of valuation: Practical**

***III Semester: Inorganic and Physical Chemistry Practical***

**Part-A: Semimicro Qualitative Inorganic Analysis** **13 Marks**  
(Two acid radicals and two basic radicals be given, two radicals in a group be avoided)

<b>DISTRIBUTION OF MARKS</b>		
<b>Preliminary tests:</b> State, color, solubility		1 Mark
<b>Identification of 2 anions:</b>	Group Identification: 1 + 1 Mark	2 Mark
	Confirmatory tests: 1 + 1 Mark	2 Mark
<b>Group Separation of cations</b>	Group Identification: 1 + 1 Mark	2 Mark
<b>Identification of 2 cations:</b>	Confirmatory tests: 2 + 2 Mark	4 Mark
	Ionic equations for CT tests: 1 + 1 Mark	2 Mark

**Part-B: Physical Chemistry Practical****12 Marks**

The following experiments be given, but not more than two candidates be given the same experiment.

1. The study of kinetics of potassium persulphate and potassium iodide volumetrically.
2. Determination of velocity constant for acid catalyzed hydrolysis of methyl acetate.
3. Determination of velocity constant for the saponification of ethyl acetate(a = b) volumetrically.
4. Determination of equivalent conductivity of strong electrolyte and verification of DHO equation.
5. Determination of dissociation constant of weak acid by conductivity method.
6. Conductometric titration of strong acid and strong base.
7. Conductometric titration of weak acid and strong base.

<b>DISTRIBUTION OF MARKS (For Experiments 1, 2 and 3)</b>		
<b>k values</b>	5 Constant values	7 Marks
	4 Constant values	6 Marks
	3 Constant values	5 Marks
	Any other values	3 Marks
Graph (straight line)		2 Marks
Unit of k		1 Mark
Calculation		2 Marks

<b>DISTRIBUTION OF MARKS (For Experiments 4 and 5)</b>	
Determination of cell constant	3 Marks
Determination of specific conductance	2 Marks
Determination of equivalent conductance	3 Marks
SI unit of k and $\lambda$ (1 + 1 Mark)	2 Marks
Verification of DHO or $k_a$ Calculations	2 Marks

<b>DISTRIBUTION OF MARKS (For Experiments 6 and 7)</b>		
<b>Deviation</b>	$\pm 0.2 \text{ cm}^3$	8 Marks
	$\pm 0.3 \text{ cm}^3$	6 Marks
	$\pm 0.4 \text{ cm}^3$	4 Marks
	Any other value	3 Marks
Graph		2 Marks
Calculation of Normality		1 Mark
Calculation of weight/dm <sup>3</sup>		1 Mark

## IV Semester: Analytical and Organic Chemistry Practical

### Part-A: Analytical Chemistry Experiments

13 Marks

Any one of the Colorimetric determination experiments be given, but not more than two candidates be given the same experiment.

- Colorimetric determination of copper using ammonia solution.
- Colorimetric determination of iron using thiocyanate solution.
- Colorimetric determination of nickel using DMG solution.
- Colorimetric determination of titanium using hydrogen peroxide.
- Colorimetric determination of nitrite in a water sample (diazo coupling Reaction/Griess reagent).
- Colorimetric determination of phosphate as ammonium phosphomolybdate.

<b>DISTRIBUTION OF MARKS</b> (For all colorimetric determinations)		
Preparation of solutions		4 Marks
Determination of $\lambda_{\max}$		2 Marks
<b>Accuracy</b>	$\pm 5\%$	5 Marks
	$\pm 10\%$	3 Marks
	Any other value	2 Marks
Graph		2 Marks

### Part-B: Qualitative Organic Analysis

12 Marks

<b>DISTRIBUTION OF MARKS</b>	
Preliminary tests	2 Marks
Physical constant	1 Mark
Detection of elements (one each)	3 Marks
Solubility (complete chart/table)	2 Marks
Functional group tests (minimum two important tests)	3 Marks
Naming and structure	1 Mark

\*\*\*\*\*

## Examination and Evaluation

### Question paper pattern for DSC I & II Semester (I & II Semester)

<b>Duration:</b> 2 hours		<b>Max. Marks:</b> 60
<b>The question paper contains 3 parts</b>		
Part-A	Answer any 6 out of 8 questions <b>(two questions from each unit)</b>	6 X 2 = 12
Part-B (Inorganic Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-C (Organic Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-D (Physical Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-E (Analytical Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
<b>Pattern:</b> (3 + 3) / (4 + 2)/(2+2+2)		

### Question paper pattern for DSC III & IV Semester (III & IV Semester)

<b>Duration:</b> 2 hours		<b>Max. Marks:</b> 60
<b>The question paper contains 3 parts</b>		
Part-A	Answer any 6 out of 8 questions <b>(two questions from each unit)</b>	6 X 2 = 12
Part-B (Analytical Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-C (Inorganic Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-D (Organic Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
Part-E (Physical Chemistry)	Answer any 2 out of 3 questions	2 x 6 = 12
<b>Pattern:</b> (3 + 3) / (4 + 2)/(2+2+2)

## **DEPARTMENT OF CHEMISTRY**

### **Programme Outcome for Bachelor of Science in Physics, Chemistry and Mathematics:**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1. Demonstrate proficiency in Mathematics and the Mathematical concepts needed for a proper understanding of Physics.
- PO2. Demonstrate the ability to justify and explain their thinking and/or approach.
- PO3. Demonstrate the ability to think, express and present in a clear, logical and succinct arguments.
- PO4. Develop state-of-the-art laboratory skills and professional communication skills.
- PO5. Apply the scientific method to design, execute, and analyze an experiment and also to explain their scientific procedures as well as their experimental observations.
- PO6. Appreciate the role of chemistry in the society
- PO7. Use this as a basis for ethical behaviour in issues facing chemists /drugs.
- PO8. Understand chemistry as an integral part for addressing social, economic, and environmental problems.
- PO9. Develop and understand the value of Mathematical proof and demonstrate proficiency in writing and understanding proofs.
- PO10. Investigate and apply mathematical problems and solutions in aspects of science and technology.
- PO11. Gain experience investigating the real world problems
- PO12. Apply mathematical ideas and models to those problems.

## **Program Specific Outcome:**

### **Bachelor of Science in Physics, Chemistry and Mathematics**

After completing the graduation in Physics, Chemistry and Mathematics the students are able to:

PSO1. Find career opportunities and develop competence to write competitive examinations.

PSO2. Develop proficiency in the analysis of complex physical problems and the use of mathematical or other appropriate techniques to solve them.

PSO3. Apply appropriate techniques for the qualitative and quantitative analysis of chemicals in laboratories and in industries.

PSO4. Create a hypothesis and appreciate how it relates to broader theories.

PSO5. Demonstrate skills in the use of Computers.

## **Programme Outcome for Bachelor of Science in Chemistry, Zoology and Biotechnology:**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1. Demonstrate the ability to justify, explain, and/or approach the concept both in written and oral forms
- PO2. Demonstrate the ability to present clear, logical and succinct arguments
- PO3. Develop state-of-the-art laboratory skills and professional communication skills.
- PO4. Apply the scientific method to design, execute, and analyze an experiment.
- PO5. Appreciate the central role of chemistry in the society and use this as a basis for ethical behaviour in issues facing chemists/drugs.
- PO6. Understand Chemistry as an integral part for addressing social, economic, and environmental problems.
- PO7. Identify the major groups of organisms with an emphasis on animals and plants.
- PO8. Compare and contrast the characteristics of animals that differentiate themselves from other living and non-living creatures.
- PO9. Give specific examples of physiological adaptations.
- PO10. Design and develop solution to Biotechnology problems keeping in mind the safety measures for environment and society.
- PO11. Support Biotechnology research activity with strong technical background knowledge.

## **Programme Specific Outcome for Bachelor of Science in Chemistry, Zoology and Biotechnology:**

After completing the graduation in Chemistry, Zoology and Biotechnology the students are able to:

- PSO1. Find jobs at all level of chemical, pharmaceutical, food products and life oriented material Industries
- PSO2. Apply appropriate techniques for the qualitative and quantitative analysis of chemicals in laboratories and in industries.
- PSO3. Recognize the relationship between different structures and functions at different levels.
- PSO4. Characterize the biological, chemical and physical features of environments that Animals inhabit.
- PSO5. Demonstrate effectively the applications of biochemical and biological sciences.
- PSO6. Know and apply appropriate tools and techniques in biotechnological manipulation
- PSO7. Understand his or her responsibilities in biotechnological practices.

## **Programme Outcome for Bachelor of Science in Chemistry, Botany, Zoology:**

After completing the graduation in the Bachelor of Science the students are able to:

- PO1. Demonstrate the ability to justify, explain, and/or approach the concept both in written and oral forms
- PO2. Demonstrate the ability to present clear, logical and succinct arguments
- PO3. Develop state-of-the-art laboratory skills and professional communication skills.
- PO4. Apply the scientific method to design, execute, and analyze an experiment.
- PO5. Appreciate the central role of chemistry in the society and use this as a basis for ethical behaviour in issues facing chemists/drugs.
- PO6. Identify the taxonomic position of plants using required principles and methods.
- PO7. Understand the impact of the plant diversity in societal and environmental context, and demonstrate the knowledge of, and need for sustainable development.
- PO8. Use interdisciplinary approaches with quantitative skills to work on biological problems.
- PO9. Understand Chemistry as an integral part for addressing social, economic, and environmental problems.
- PO10. Identify the major groups of organisms with an emphasis on animals and plants.

## **Programme Specific Outcome**

### **Bachelor of Science in Chemistry, Botany and Zoology**

After completing the graduation in the Bachelor of Science the students are able to:

- PSO1. Find jobs at all level of chemical, pharmaceutical, food products, life oriented material industries, etc.
- PSO2. Apply appropriate techniques for the qualitative and quantitative analysis of chemicals in laboratories and in industries.
- PSO3. Explicate ecological interconnectedness of life
- PSO4: Analyze the avenues and remedies for burning environmental issues
- PSO5. Recognize the relationship between different structures and functions at different levels.
- PSO6. Characterize the biological, chemical and physical features of environments that Animals inhabit.

**INORGANIC MATERIALS OF INDUSTRIAL IMPORTANCE**

**Theory: 60 Lectures**

**Course outcome:**

After completion of the course the student is able to:

- CO1: Understand the synthesis and applications of glass and ceramics, vitamins, hormones, soaps and detergents; and higher aspects of spectroscopy.
- CO2: Understand the types and manufacture of different fertilizers.
- CO3: Understand the different methods of prevention of corrosion.

**CHEMISTRY-DSE:**

**Silicate Industries**

**Glass:** Rawmaterials, Glassy state and its properties, classification (silicate and non-silicate glasses). Manufacture and processing of glass. Composition and properties of the following types of glasses: Soda lime glass, lead glass, armoured glass, safety glass, borosilicate glass, fluorosilicate, coloured glass, photosensitive glass.

**Ceramics:** Important clays and feldspar, ceramic, their types and manufacture. Hightechnology ceramics and their applications, superconducting and semiconducting oxides, fullerenes carbon nanotubes and carbon fibre.

**Cement:** Classification of cement, ingredients and their role, Manufacture of cement and the setting process, quick setting cements.

**Abrasives:** Definition, classification with examples – hardness, manufacture and applications of carborundum, alundum and tungsten carbide.

**Refractories:** Definition, properties, classification with examples. Different steps involved in the manufacture of refractories. Applications of refractories.

**Inorganic polymers:**

Definition – examples, general properties, comparison with organic polymers, glass transition temperature Silicones: Definition, nomenclature, preparation (linear, cross-linked and cyclic). Factors affecting the nature of silicon polymers, properties (chemical and thermal stabilities( chemical properties) uses of silicon polymers, silicon fluids/oils – uses, silicon elastomers / rubbers, silicon resins (preparation and uses)

**Phosphazenes:** Definition, types, structures, preparation, properties and uses. Crystalline polymetaphosphates – Maddrell's and Kuroll's salts – properties and uses. Nature of bonding in phosphazenes.

**Fluorocarbons:** Definition, examples, preparation, properties and uses of Freon-12, Freon-22, PTFE and poly per fluorovinyl chloride.

**Non-aqueous solvents:**

**Liquid ammonia-** Reasons for the solvent properties, typical reactions- solubility of alkali metals; acid-base, precipitation, ammonolysis, Ionization of weak acids,

advantages and disadvantages.

**Liquid SO<sub>2</sub>**- Reasons for the solvent properties, typical reactions-acid-base, solvolysis, precipitation, amphoteric and redox reactions **(25 Lectures)**

**Fertilizers:**

Different types of fertilizers. Manufacture of the following fertilizers: Urea, ammonium nitrate, calcium ammonium nitrate, ammonium phosphates; polyphosphate, superphosphate, compound and mixed fertilizers, potassium chloride, potassium sulphate. **(5 Lectures)**

**Surface Coatings:**

Objectives of coatings surfaces, preliminary treatment of surface, classification of surface coatings. Paints and pigments-formulation, composition and related properties. Oil paint, Vehicle, modified oils, Pigments, toners and lakes pigments, Fillers, Thinners, Enamels, emulsifying agents. Special paints (Heat retardant, Fire retardant, Eco-friendly paint, Plastic paint), Dyes, Wax polishing, Water and Oil paints, additives, Metallic coatings (electrolytic and electroless), metal spraying and anodizing.

**(10 Lectures)**

**Batteries:**

Primary and secondary batteries, battery components and their role, Characteristics of Battery. Working of following batteries: Pb acid, Li-Battery, Solid state electrolyte battery. Fuel cells, Solar cell and polymer cell.

**(4 Lectures)**

**Alloys:**

Classification of alloys, ferrous and non-ferrous alloys, Specific properties of elements in alloys. Properties and applications of steel. Manufacture of Steel (removal of silicon decarbonization, demanganization, desulphurization dephosphorisation) and surface treatment (argon treatment, heat treatment, nitriding, carburizing). Composition and properties of different types of steels. Production of Ferro alloys: Ferro chrome and Ferro manganese.

**(8 Lectures)**

**Catalysis:**

General principles and properties of catalysts, homogenous catalysis (catalytic steps and examples) and heterogenous catalysis (catalytic steps and examples). Theories of catalysis, Auto catalyst. Industrial applications, Deactivation or regeneration of catalysts. Phase transfer catalysts, application of zeolites as catalysts.

**(4 Lectures)**

**Chemical explosives:**

Origin of explosive properties in organic compounds, Classification with examples, preparation and explosive properties of lead azide, PETN, cyclonite (RDX). Introduction to rocket propellants.

**(4 Lectures)**

DSE!B

SEMESTER V

## INDUSTRIAL CHEMICALS AND ENVIRONMENT

Theory: 60 Lectures

### Course outcome:

After completion of the course the student is able to:

- CO1: Understand the environmental issues
- CO2: Know about the metallurgy of metals
- CO3: Understand the hazards and handling certain gases and chemicals

### Industrial Gases and Inorganic Chemicals

*Industrial Gases:* Large scale production, uses, storage and hazards in handling of the following gases: oxygen, nitrogen, argon, neon, helium, hydrogen, acetylene, carbon monoxide, chlorine, fluorine, sulphur dioxide and phosgene.

*Inorganic Chemicals:* Manufacture, application, analysis and hazards in handling the following chemicals: hydrochloric acid, nitric acid, sulphuric acid, caustic soda,

common salt, borax, bleaching powder, sodium thiosulphate, hydrogen peroxide, potash alum, chrome alum, potassium dichromate and potassium permanganate.

(10 Lectures)

### Industrial Metallurgy

Preparation of metals (ferrous and nonferrous) and ultrapure metals for semiconductor technology

(4 Lectures)

### Environment and its segments

Ecosystems. Biogeochemical cycles of carbon, nitrogen and sulphur.

Air Pollution: Major regions of atmosphere. Chemical and photochemical reactions in atmosphere. Air pollutants: types, sources, particle size and chemical nature; Photochemical smog: its constituents and photochemistry. Environmental effects of ozone, Major sources of air pollution

Pollution by SO<sub>2</sub>, CO<sub>2</sub>, CO, NO<sub>x</sub>, H<sub>2</sub>S and other foul smelling gases. Methods of estimation of CO, NO<sub>x</sub>, SO<sub>x</sub> and control procedures

Effects of air pollution on living organisms and vegetation. Greenhouse effect and Global warming, Ozone depletion by oxides of nitrogen, chlorofluorocarbons and Halogens, removal of sulphur from coal. Control of particulates

*Water Pollution:* Hydrological cycle, water resources, aquatic ecosystems, Sources and nature of water pollutants, Techniques for measuring water pollution, Impacts of water pollution on hydrological and ecosystems

Water purification methods: Effluent treatment plants (primary, secondary and tertiary treatment). Industrial effluents from the following industries and their treatment: electroplating, textile, tannery, dairy, petroleum and petrochemicals, agro, fertilizer, etc. Sludge disposal.

Industrial waste management, incineration of waste. Water treatment and purification (reverse osmosis, electro dialysis, ion exchange). Water quality parameters for waste water, industrial water and domestic water

**(30 Lectures)**

### **Energy & Environment**

Sources of energy: Coal, petrol and natural gas. Nuclear Fusion / Fission, Solar energy, Hydrogen, geothermal, Tidal and Hydel, etc.

Nuclear Pollution: Disposal of nuclear waste, nuclear disaster and its management.

**(10 Lectures)**

### **Biocatalysis**

Introduction to biocatalysis: Importance in “Green Chemistry” and Chemical Industry.

**(6 Lectures)**

### **Reference:**

**ORGANOMETALLICS, BIOINORGANIC CHEMISTRY,  
POLYNUCLEAR HYDROCARBONS AND UV, IR SPECTROSCOPY**

**Theory: 60 Lectures**

**Course outcome:**

After completion of the course the student is able to:

- CO1: Understand the techniques involved in metallurgy.  
CO2: Understand the role of ions in different biological systems.  
CO3: Understand the applications of spectroscopy.

**DSE-1A:**

**Section A: Inorganic Chemistry-4**

**(30 Lectures)**

**Metallurgy:** Terms and principles involved in metallurgy, Ellingham's diagram, Types of metallurgy: Pyro metallurgy- extraction of Nickel by sulphide ore- general metallurgy followed by Mond's process ( purification, Manganese from oxides ores- Reduction by the Aluminothermite process- refining by electrolytic process.

Hydro metallurgy: Extraction of Gold from native ore by cyanide process, and refining by quaternary process.

Electro metallurgy: Extraction of Lithium by fusion method Followed by electrolysis of lithium chloride.

Powder metallurgy: Importance, metal powder production & applications. Production of Tungsten powder. Principles of Electroplating. **(10 Lectures)**

**Organometallic Compounds**

Definition and Classification with appropriate examples based on nature of metal-carbon bond (ionic, s, p and multicentre bonds). Structures of methyl lithium, Zeiss salt and ferrocene. Preparation, properties, bonding and applications of alkyls and aryls of Li, Al, Hg, Sn and Ti.

Nature of M-CO bonding in carbonyls. Preparation, properties and structures of mononuclear and binuclear metal carbonyls- $\text{Ni}(\text{CO})_4$ ,  $\text{Cr}(\text{CO})_6$ ,  $\text{Fe}(\text{CO})_5$ ,  $\text{Mn}_2(\text{CO})_{10}$ ,  $\text{Co}_2(\text{CO})_8$ . Applications of EAN rule to mononuclear metal carbonyls.

Behaviour of carbon monoxide. Synergic effects (VB approach)- (MO diagram of CO can be referred to for synergic effect to IR frequencies). **(10 Lectures)**

**Chemistry of nonmetals:**

Boron: Boron hydrides – Diborane – preparation, properties, uses and structure Carbon: Fullerenes- Production, structure of  $\text{C}_{60}$  and  $\text{C}_{70}$ . Diamond and Graphite- Properties and structure.

Silicon: Structure of silica. Silicates- types of silicates with examples.

Nitrogen: Preparation (any two methods), properties, uses, structure of hydrazine, hydroxyl amine and hydrazoic acid.

Sulphur: Preparation, properties, structures and applications of thionyl chloride, sulphuryl chloride and SF<sub>6</sub>.

Halogens: Preparation, properties and structure of bleaching powder.

Pseudo halogens: preparation, properties and structure of cyanogens, thiocyanogen, tellurocyanogen and oxocyanogen. (any one method of preparation and any three properties to be discussed). **(5 Lectures)**

### **Bio-Inorganic Chemistry**

A brief introduction to bio-inorganic chemistry. Essential and trace elements in biological process. Role of metal ions present in biological systems with special reference to Na<sup>+</sup>, K<sup>+</sup> and Ca<sup>2+</sup>, Mg<sup>2+</sup> ions: Na/K pump; Role of Mg<sup>2+</sup> ions in energy production and chlorophyll. Role of Ca<sup>2+</sup> in blood clotting, Enzymatic role of Iron in Hemoglobin and myoglobin, Magnesium in Chlorophyll, Cobalt in Vitamin B12.

Stabilization of protein structures and structural role (bones).

Biological functions and toxicity of Cr, Mn, Co, Ni, I, Hg, Mo, and Se. **(5 Lectures)**

### **Section B: Organic Chemistry-4**

**(30 Lectures)**

#### **Polynuclear and heteronuclear aromatic compounds:**

Polynuclear Hydrocarbons: Resonance structures of Naphthalene, anthracene and Phenanthracene.

Structural elucidation of naphthalene. Reactions of naphthalene- oxidation, reduction and electrophilic substitution reactions

**Heterocyclic Compounds:** Definition, classification with examples, synthesis of Furan, thiophene, pyrrole, pyridine, indole (Fischer method), quinoline (Skrap's synthesis), isoquinoline, pyrimidine (one method each). Aromaticity and basicity of pyrrole and pyridine. Electrophilic substitution reactions of pyrrole and pyridine.

**Uric acid-** Structure, Synthesis. Conversion of uric to purine and caffeine

**Dyes:** Colour and Constitution, Witt's theory, Classification of dyes based on structures with examples, synthesis of Methyl orange, Bismark brown, indigo and malachite green, structural elucidation of alizarin and its synthesis.

**Drugs:** Chemotherapy and chemotherapeutic agents, definition of drugs, types of drugs, antipyretics, analgesics, anaesthetics, sedatives, narcotics, antiseptics, antibacterials, antibiotics, antimalarials and sulphadiazine with examples. Synthesis of paracetamol, sulphanilamide, sulphaguanidine **(13 lectures)**

**Active methylene compounds:** Definition, Ethyl acetoacetate and diethyl malonate preparation, Mechanism of Claisen condensation, keto-enol tautomerism and its evidence. Synthetic applications of EAA and DEM:- Synthesis of mono carboxylic acids, dicarboxylic acids-succinic acid, adipic acid, antipyrine, Barbituric acid, acetyl acetone, Crotonic acid and Cinnamic acid. **(4 lectures)**

#### **Application of Spectroscopy to Simple Organic Molecules**

Application of visible, ultraviolet and Infrared spectroscopy in organic molecules. Electromagnetic radiations, electronic transitions,  $\lambda_{max}$ , chromophore, auxochrome, bathochromic and hypsochromic shifts. Woodward rules for calculating  $\lambda_{max}$  of conjugated dienes

**IR-Spectroscopy:** Introduction, functional group region and finger print region stretching frequency, Graphical representation of IR spectra of benzoic acid and methyl benzoate. Absorption frequencies of Simple functional groups

**NMR Spectroscopy:** Basic principles of proton magnetic resonance , nuclear magnetic spin quantum number I, influence of the magnetic field on the spin of nuclei, magnetic resonance-chemical shift (  $\delta$  value), use of TMS as reference, nuclear shielding effects, equivalent and non-equivalent protons, spin-spin splitting.

NMR spectra of Simple organic molecules (like ethyl alcohol, ethane, propane, benzene, toluene, acetone, and methyl chloride) to be discussed.. **(13 Lectures)**

**QUANTUM CHEMISTRY, SPECTROSCOPY & PHOTOCHEMISTRY**

Theory: 60 Lectures

**COURSE OUTCOME:**

After completion of the course the student is able to:

- CO1: Understand the concepts in quantum chemistry  
 CO2: Know about photochemistry  
 CO3: Know the concept of spectroscopy with applications

**Quantum Chemistry**

Postulates of quantum mechanics, quantum mechanical operators, Schrödinger equation and its application to free particle and “particle-in-a-box” (rigorous treatment), quantization of energy levels, zero-point energy and Heisenberg Uncertainty principle; wavefunctions, probability distribution functions, nodal properties, Extension to two and three dimensional boxes, separation of variables, degeneracy.

Qualitative treatment of simple harmonic oscillator model of vibrational motion: Setting up of Schrödinger equation and discussion of solution and wavefunctions. Vibrational energy of diatomic molecules and zero-point energy.

Angular momentum: Commutation rules, quantization of square of total angular momentum and z-component.

Rigid rotator model of rotation of diatomic molecule. Schrödinger equation, transformation to spherical polar coordinates. Separation of variables. Spherical harmonics. Discussion of solution.

Qualitative treatment of hydrogen atom and hydrogen-like ions: setting up of Schrödinger equation in spherical polar coordinates, radial part, quantization of energy (only final energy expression). Average and most probable distances of electron from nucleus.

Setting up of Schrödinger equation for many-electron atoms (He, Li). Need for approximation methods. Statement of variation theorem and application to simple systems (particle-in-a-box, harmonic oscillator, hydrogen atom).

Chemical bonding: Covalent bonding, valence bond and molecular orbital approaches, LCAO-MO treatment of  $H_2$  + . Bonding and antibonding orbitals. Qualitative extension to  $H_2$ . Comparison of LCAO-MO and VB treatments of  $H_2$  (only wavefunctions, detailed solution not required) and their limitations. Refinements of the two approaches (Configuration Interaction for MO, ionic terms in VB). Qualitative description of LCAO-MO treatment of homonuclear and heteronuclear diatomic molecules (HF, LiH). Localised and non-localised molecular orbitals treatment of triatomic ( $BeH_2$ ,  $H_2O$ ) molecules. Qualitative MO theory and its application to  $AH_2$  type molecules.

**(24 Lectures)****Molecular Spectroscopy:**

Interaction of electromagnetic radiation with molecules and various types of spectra; BornOppenheimer approximation.

Rotation spectroscopy: Selection rules, intensities of spectral lines, determination of bond lengths of diatomic and linear triatomic molecules, isotopic substitution.

Vibrational spectroscopy: Classical equation of vibration, computation of force constant, amplitude of diatomic molecular vibrations, anharmonicity, Morse potential, dissociation energies, fundamental frequencies, overtones, hot bands, degrees of freedom for polyatomic molecules, modes of vibration, concept of group frequencies. Vibration-rotation spectroscopy: diatomic vibrating rotator, P, Q, R branches.

Raman spectroscopy: Qualitative treatment of Rotational Raman effect; Effect of nuclear spin, Vibrational Raman spectra, Stokes and anti-Stokes lines; their intensity difference, rule of mutual exclusion.

Electronic spectroscopy: Franck-Condon principle, electronic transitions, singlet and triplet states, fluorescence

and phosphorescence, dissociation and predissociation, calculation of electronic transitions of polyenes using free electron model.

Nuclear Magnetic Resonance (NMR) spectroscopy: Principles of NMR spectroscopy, Larmor precession, chemical shift and low resolution spectra, different scales, spin-spin coupling and high resolution spectra, interpretation of PMR spectra of organic molecules.

Electron Spin Resonance (ESR) spectroscopy: Its principle, hyperfine structure, ESR of simple radicals.

**(24 Lectures)**

### **Photochemistry**

Characteristics of electromagnetic radiation, Lambert-Beer's law and its limitations, physical significance of absorption coefficients. Laws, of photochemistry, quantum yield, actinometry, examples of low and high quantum yields, photochemical equilibrium and the differential rate of photochemical reactions, photosensitised reactions, quenching. Role of photochemical reactions in biochemical processes, photostationary states, chemiluminescence.

**(12 Lectures)**

## SEC1A

## FUEL CHEMISTRY

### SKILL ENHANCEMENT COURSE-SEC

30 Lectures

#### Course outcome:

After completion of the course a student is able to:

- CO1: Understand soil sample for calcium and magnesium content.
- CO2: Understand water parameters.
- CO3: Identify food adulterants.
- CO4: Understand chromatography.

Review of energy sources (renewable and non-renewable). Classification of fuels and their calorific value

**Coal:** Uses of coal (fuel and nonfuel) in various industries, its composition, carbonization of coal. Coal gas, producer gas and water gas—composition and uses. Fractionation of coal tar, uses of coal tar bases chemicals, requisites of a good metallurgical coke, Coal gasification (Hydro gasification and Catalytic gasification), Coal liquefaction and Solvent Refining.

**Petroleum and Petrochemical Industry:** Composition of crude petroleum, Refining and different types of petroleum products and their applications.

Fractional Distillation (Principle and process), Cracking (Thermal and catalytic cracking), Reforming Petroleum and non-petroleum fuels (LPG, CNG, LNG, bio-gas, fuels derived from biomass), fuel from waste, synthetic fuels (gaseous and liquids), clean fuels Petrochemicals: Vinyl acetate, Propylene oxide, Isoprene, Butadiene, Toluene and its derivatives Xylene.

**Lubricants:** Classification of lubricants, lubricating oils (conducting and non-conducting) Solid and semisolid lubricants, synthetic lubricants.

Properties of lubricants (viscosity index, cloud point, pour point) and their determination.

**DME24601/ DME24605/ DME24608**

## SEC1B

### BASIC ANALYTICAL CHEMISTRY

30 Lectures

## Course outcome:

After completion of the course a student is able to:

- CO1: Analyze food products
- CO2: Analyze soil sample
- CO3: Determine the contaminants in water
- CO4: Study about chromatography

**Introduction:** Introduction to Analytical Chemistry and its interdisciplinary nature. Concept of sampling. Importance of accuracy, precision and sources of error in analytical measurements. Presentation of experimental data and results, from the point of view of significant figures.

**Analysis of soil:** Composition of soil, Concept of pH and pH measurement, Complexometric titrations, Chelation, Chelating agents, use of indicators

- a. Determination of pH of soil samples.
- b. Estimation of Calcium and Magnesium ions as Calcium carbonate by complexometric titration.

**Analysis of water:** Definition of pure water, sources responsible for contaminating water, water sampling methods, water purification methods.

- a. Determination of pH, acidity and alkalinity of a water sample.
- b. Determination of dissolved oxygen (DO) of a water sample.

**Analysis of food products:** Nutritional value of foods, idea about food processing and food preservations and adulteration.

- a. Identification of adulterants in some common food items like coffee powder, asafoetida, chilli powder, turmeric powder, coriander powder and pulses, etc.
- b. Analysis of preservatives and colouring matter.

**Chromatography:** Definition, general introduction on principles of chromatography, paper chromatography, TLC etc.

- a. Paper chromatographic separation of mixture of metal ion ( $\text{Fe}^{3+}$  and  $\text{Al}^{3+}$ ).
- b. To compare paint samples by TLC method. **Ion-exchange:** Column, ion-exchange chromatography etc.  
Determination of ion exchange capacity of anion / cation exchange resin (using batch procedure if use of column is not feasible).

**Analysis of cosmetics:** Major and minor constituents and their function

- a. Analysis of deodorants and antiperspirants, Al, Zn, boric acid, chloride, sulphate.
- b. Determination of constituents of talcum powder: Magnesium oxide, Calcium oxide, Zinc oxide and Calcium carbonate by complexometric titration.

**Suggested Applications (Any one):**

- a. To study the use of phenolphthalein in trap cases.
- b. To analyze arson accelerants.

- c. To carry out analysis of gasoline.

**Suggested Instrumental demonstrations:**

- a. Estimation of macro nutrients: Potassium, Calcium, Magnesium in soil samples by flame photometry. 104
- b. Spectrophotometric determination of Iron in Vitamin / Dietary Tablets.
- c. Spectrophotometric Identification and Determination of Caffeine and Benzoic Acid in Soft Drink.

## **Chemistry Syllabus for practicals for B.Sc Course**

**Note: Students should be trained to use both chemical and electronic balances (three digit)  
DMA24101/ DMA24105/ DMA24108**

**V Semester: Practical 5A**

**3 hours per week**

**DME24101/ DME24105/ DME24108**

**Part 1: Gravimetric estimation**

1. Gravimetric estimation of Barium as Barium sulphate.
2. Gravimetric estimation of Iron as Iron(III) oxide

3. Gravimetric estimation of copper as copper thiocyanate
4. Gravimetric estimation of Nickel as nickel dimethyl glyoximate
5. Gravimetric estimation of magnesium as magnesium hydroxyl quinolate

**Part 2 : Volumetric estimations**

1. Estimation of iron in the given sample of haematite by dichromate method.
2. Estimation of percentage of calcium in limestone by oxalate method
3. Estimation of manganese in the given sample of pyrolusite.
4. Estimation of magnesium in the given sample of dolomite by EDTA method.
5. Determination of % purity of copper in the given sample of copper wire.

**V Semester: Practical 5B**

**3 hours per week**

**DME24301/ DME24305/ DME24308**

1. Determination of dissolved oxygen in water.
2. Determination of Chemical Oxygen Demand (COD)
3. Determination of Biological Oxygen Demand (BOD)
4. Percentage of available chlorine in bleaching powder.
5. Measurement of chloride, sulphate and salinity of water samples by simple titration method (AgNO<sub>3</sub> and potassium chromate).
6. Estimation of total alkalinity of water samples (CO<sub>3</sub><sup>2-</sup>, HCO<sub>3</sub><sup>-</sup>) using double titration method.
7. Measurement of dissolved CO<sub>2</sub>.
8. Study of some of the common bio-indicators of pollution.
9. Estimation of SPM in air samples.
10. Preparation of borax/ boric acid.

**VI Semester : Practical 6 A**

**3 hours per week**

**DMF24101/ DMF24105/ DMF24108**

**Part 1: Physical chemistry experiments (instrumental)**

1. Determination of Equivalent conductance of the given electrolyte(both strong and weak electrolyte)
2. Determination of percentage composition of benzene and carbon tetra chloride by using Abbe's refractrometer.
3. Determination of concentration of an acid/ base by conductometric method.
4. Potentiometric titration of Ferrous ammonium sulphate and K<sub>2</sub>Cr<sub>2</sub>O<sub>7</sub>.
5. Determination of PKa of weak acid by potentiometric method
6. PH titration of strong acid and strong base.
7. Calorimetric estimation of Fe<sup>3+</sup> ion using Ammonium thiocyanate
8. Calorimetric estimation of Cu<sup>2+</sup> ion using NH<sub>4</sub>OH
9. Calorimetric estimation of Aspirin using FeCl<sub>3</sub>

## Part 2 : Isolation of organic compounds from natural products

1. Isolation of hesperidins from orange peels
2. Isolation of caffeine from Tea leaves
3. Isolation of Nicotine from Tobacco leaves.

## **VI Semester : Practical 6B**

**3 hours per week**

**DMF24301/ DMF24305/ DMF24308**

### **DSE LAB**

#### UV/Visible spectroscopy

1. Study the 200-500 nm absorbance spectra of  $\text{KMnO}_4$  and  $\text{K}_2\text{Cr}_2\text{O}_7$  (in 0.1 M  $\text{H}_2\text{SO}_4$ ) and determine the  $\lambda_{\text{max}}$  values. Calculate the energies of the two transitions in different units ( $\text{J molecule}^{-1}$ ,  $\text{kJ mol}^{-1}$ ,  $\text{cm}^{-1}$ , eV).
2. Study the pH-dependence of the UV-Vis spectrum (200-500 nm) of  $\text{K}_2\text{Cr}_2\text{O}_7$ .
3. Record the 200-350 nm UV spectra of the given compounds (acetone, acetaldehyde, 2-propanol, acetic acid) in water. Comment on the effect of structure on the UV spectra of organic compounds.
  - i. Colourimetry
4. Verify Lambert-Beer's law and determine the concentration of  $\text{CuSO}_4/\text{KMnO}_4/\text{K}_2\text{Cr}_2\text{O}_7$  in a solution of unknown concentration
5. Determine the concentrations of  $\text{KMnO}_4$  and  $\text{K}_2\text{Cr}_2\text{O}_7$  in a mixture.
6. Study the kinetics of iodination of propanone in acidic medium
7. Determine the amount of iron present in a sample using 1,10-phenanthroline.
8. Determine the dissociation constant of an indicator (phenolphthalein).
9. Study the kinetics of interaction of crystal violet/ phenolphthalein with sodium hydroxide.
10. Analyse the given vibration-rotation spectrum of  $\text{HCl}(\text{g})$

**Pattern of question paper for DSC/DSE  
I to VI semesters**

**Time : 3.00hrs**

**Max marks: 70**

**PART-A**

I. Answer the following questions

1x10=10

- a)
- b)
- c)
- d)

- e)
- f)
- g)
- h)
- i)
- j)

**PART-B**

II Answer any three questions

(Questions carrying 4,4,2- 3,3,4- 6,4 and 5,5 marks may be given)

3x10=30

- 2)
- 3)
- 4)
- 5)

**PART-C**

III Answer any three questions

(Questions carrying 4,4,2- 3,3,4- 6,4 and 5,5 marks may be given)

3x10=30

- 6)
- 7)
- 8)
- 9)

**Pattern of question paper for SEC**

**Time : 2 hrs**

**Max marks: 35**

**PART-A**

I. Answer the following questions

1x5=5

- a)
- b)

- c)
- d)
- e)

## PART-B

II Answer any three questions

(Questions carrying 4,4,2- 3,3,4- 6,4 and 5,5 marks may be given)

3x10=30

- 2)
- 3)
- 4)
- 5)

### **Panel of Examiners**

1. Smt J S Vidya  
Chairperson, JSS College,

58. Sowmya, JSS College, Chamarajnagar

**JSS COLLEGE OF ARTS, COMMERCE AND SCIENCE**  
(Autonomous)

**Ooty Road, Mysuru-570025**

**Model Curriculum Structures for  
Bachelor of Science (Basic and Honours) Programme  
with Computer Science as Major & Minor Course  
Model Syllabus for I and II Semesters  
and  
Open Elective Courses in Computer Science**

**As per  
NATIONAL EDUCATION POLICY - 2020  
(NEP-2020)**

**2021-22**

**DEPARTMENT OF COMPUTER SCIENCE**

## **The objectives of the B.Sc. - Computer Science Program**

1. The primary objective of this program is to provide a foundation of computing principles for effectively using information systems and enterprise softwares.
2. It helps students analyze the requirements for system programming and exposes students for information systems
3. This programme provides students with options to specialize in various software system.
4. To produce outstanding Computer Scientists who can apply the theoretical knowledge into practice in the real world and develop standalone live projects themselves
5. To provide opportunity for the study of modern methods of information processing and its applications.
6. To develop among students the programming techniques and the problem- solving skills through programming
7. To prepare students who wish to go on to further studies in computer science and related subjects.
8. To acquaint students to Work effectively with a range of current, standard, Office Productivity software applications.

## **Program Outcomes:**

1. **Discipline knowledge:** Acquiring knowledge on basics of Computer Science and ability to apply to design principles in the development of solutions for problems of varying complexity
2. **Problem Solving:** Improved reasoning with strong mathematical ability to Identify, formulate and analyze problems related to computer science and exhibiting a sound knowledge on data structures and algorithms.
3. **Design and Development of Solutions:** Ability to design and development of algorithmic solutions to real world problems.
4. **Programming a computer:** Exhibiting strong skills required to program a computer for various issues and problems of day-to-day scientific applications.
5. **Application Systems Knowledge:** Possessing a minimum knowledge to practice existing computer application software.
6. **Communication:** Must have a reasonably good communication knowledge both in oral and writing.
7. **Ethics on Profession, Environment and Society:** Exhibiting professional ethics to maintain the integrality in a working environment and also have concern on societal impacts due to computer-based solutions for problems.
8. **Lifelong Learning:** Should become an independent learner. So, learn to learn ability.
9. **Motivation to take up Higher Studies:** Inspiration to continue educations towards advanced studies on Computer Science.

## **Additional Program Outcomes for B. Sc. (Hons) in Computer Science**

The four years Bachelors in Computer Science (Hons) program enables students to attain the following additional attributes besides the afore-mentioned attributes:

1. Apply standard Software Engineering practices and strategies in real -time software project development
2. Design and develop computer programs/computer-based systems in the areas related to AI, algorithms, networking, web design, cloud computing, IoT and data analytics.
3. Acquaint with the contemporary trends in industrial/research settings and thereby innovate novel solutions to existing problems
4. The ability to apply the knowledge and understanding noted above to the analysis of a given information handling problem.
5. The ability to work independently on a substantial software project and as an effective team member.

**IIIA. Model Program Structures for the Under-Graduate Programs in Universities and Colleges in Karnataka**  
**Bachelor of Science (Basic/Hons.) in subjects with practical with both subjects as majors**

Sem.	Discipline Core (DSC) (Credits) (L+T+P)	Discipline Elective (DSE) / Open Elective (OE) (Credits) (L+T+P)	Ability Enhancement Compulsory Courses (AECC),		Skill Enhancement Courses (SEC)			Total Credits
					Skill based credits (L+T+P)	Value based (Credits) (L+T+P)		
I	Discipline A1(4+2) Discipline B1(4+2)	OE-1 (3)	L1-1(3), L2-1(3) (4 hrs. each)	Environmental Studies (3)		Physical Education for fitness (1) (0+0+2)	Health & Wellness (1) (0+0+2)	25

# Model Syllabus for BSc (Basic and Honors), Semesters I and II

## Semester: I

Course Code: DSC-1	<b>Course Title:</b> Computer Fundamentals and Programming in C
Course Credits: 04	Hour of Teaching/Week: 04
Total Contact Hours: 52	Formative Assessment Marks: 40
Exam Marks: 60	Exam Duration: 03

### Course Outcomes (COs):

After completing this course satisfactorily, a student will be able to:

- Confidently operate Desktop Computers to carry out computational tasks
- Understand working of Hardware and Software and the importance of operating systems
- Understand programming languages, number systems, peripheral devices, networking, multimedia and internet concepts
- Read, understand and trace the execution of programs written in C language
- Write the C code for a given problem
- Perform input and output operations using programs in C
- Write programs that perform operations on arrays

### Course Content

Content	Hours
<b>Unit - 1</b>	
<b>Fundamentals of Computers:</b> Introduction to Computers - Computer Definition, Characteristics of Computers, Evolution and History of Computers, Types of Computers, Basic Organisation of a Digital Computer; Number Systems – different types, conversion from one number system to another; Computer Codes – BCD, Gray Code, ASCII and Unicode; Boolean Algebra – Boolean Operators with Truth Tables; Types of Software – System Software and Utility Software; Computer Languages - Machine Level, Assembly Level & High Level Languages, Translator Programs – Assembler, Interpreter and Compiler; Planning a Computer Program - Algorithm, Flowchart and Pseudo code with Examples. <b>Introduction to C Programming:</b> Over View of C; History and Features of C; Structure of a C Program with Examples; Creating and Executing a C Program; Compilation process in C.	13
<b>Unit - 2</b>	
<b>C Programming Basic Concepts:</b> C Character Set; C tokens - keywords, identifiers, constants, and variables; Data types; Declaration & initialization of variables; Symbolic constants. <b>Input and output with C:</b> Formatted I/O functions - <i>printf</i> and <i>scanf</i> , control stings and escape sequences, output specifications with <i>printf</i> functions; Unformatted I/O functions to read and display single character and a string - <i>getchar</i> , <i>putchar</i> , <i>gets</i> and <i>puts</i> functions. <b>C Operators &amp; Expressions:</b> Arithmetic operators; Relational operators; Logical operators; Assignment operators; Increment & Decrement operators; Bitwise operators; Conditional operator; Special operators; Operator Precedence and Associativity; Evaluation of arithmetic expressions; Type conversion.	13
<b>Unit - 3</b>	
<b>Control Structures:</b> Decision making Statements - <i>Simple if</i> , <i>if_else</i> , <i>nested if_else</i> , <i>else_if ladder</i> , <i>Switch-case</i> , <i>goto</i> , <i>break</i> & <i>continue</i> statements; Looping Statements - Entry controlled and Exit controlled statements, <i>while</i> , <i>do-while</i> , <i>for</i> loops, Nested loops.	13

Arrays: One Dimensional arrays - Declaration, Initialization and Memory representation; Two Dimensional arrays - Declaration, Initialization and Memory representation. Strings: Declaring & Initializing string variables; String handling functions - <i>strlen</i> , <i>strcmp</i> , <i>strcpy</i> and <i>strcat</i> ; Character handling functions - <i>tolower</i> , <i>isalpha</i> , <i>isnumeric</i> etc.	
<b>Unit - 4</b>	
<b>Pointers in C:</b> Understanding pointers - Declaring and initializing pointers, accessing address and value of variables using pointers; Pointers and Arrays; Pointer Arithmetic; Advantages and disadvantages of using pointers; <b>User Defined Functions:</b> Need for user defined functions; Format of C user defined functions; Components of user defined functions - return type, name, parameter list, function body, return statement and function call; Categories of user defined functions - With and without parameters and return type. <b>User defined data types:</b> Structures - Structure Definition, Advantages of Structure, declaring structure variables, accessing structure members, Structure members initialization, comparing structure variables, Array of Structures; Unions - Union definition; difference between Structures and Unions.	13

### Text Books

1. Pradeep K. Sinha and Priti Sinha: Computer Fundamentals (Sixth Edition), BPB Publication
2. E. Balgurusamy: Programming in ANSI C (TMH)

### References

1. Kamthane: Programming with ANSI and TURBO C (Pearson Education)
2. V. Rajaraman: Programming in C (PHI – EEE)
3. S. ByronGottfried: Programming with C (TMH)
4. Kernighan & Ritchie: The C Programming Language (PHI)
5. Yashwant Kanitkar: Let us C
6. P.B. Kottur: Programming in C (Sapna Book House)

Course Code: <b>DSC-1L</b>	<b>Course Title: C Programming Lab</b>
Course Credits: 02	Hour of Teaching/Week: 04
Total Contact Hours: 52	Formative Assessment Marks: 25
Exam Marks: 25	Exam Duration: 03

### Practice Lab

The following activities be carried out/ discussed in the lab during the initial period of the semester.

1. Basic Computer Proficiency a. Familiarization of Computer Hardware Parts
  - b. Basic Computer Operations and Maintenance.
  - c. Do's and Don'ts, Safety Guidelines in Computer Lab
2. Familiarization of Basic Software – Operating System, Word Processors, Internet Browsers, Integrated Development Environment (IDE) with Examples.
3. Type Program Code, Debug and Compile basic programs covering C Programming fundamentals discussed during theory classes.

### Programming Lab

#### Part A:

1. Write a C Program to read radius of a circle and to find area and circumference
2. Write a C Program to read three numbers and find the biggest of three

3. Write a C Program to demonstrate library functions in *math.h*
4. Write a C Program to check for prime
5. Write a C Program to generate n primes
6. Write a C Program to read a number, find the sum of the digits, reverse the number and check it for palindrome
7. Write a C Program to read numbers from keyboard continuously till the user presses 999 and to find the sum of only positive numbers
8. Write a C Program to read percentage of marks and to display appropriate message (Demonstration of else-if ladder)
9. Write a C Program to find the roots of quadratic equation (demonstration of switch-case statement)
10. Write a C program to read marks scored by n students and find the average of marks (Demonstration of single dimensional array)
11. Write a C Program to remove Duplicate Element in a single dimensional Array
12. Program to perform addition and subtraction of Matrices

**Part B:**

1. Write a C Program to find the length of a string without using built in function
2. Write a C Program to demonstrate string functions.
3. Write a C Program to demonstrate pointers in C
4. Write a C Program to check a number for prime by defining *isprime( )* function
5. Write a C Program to read, display and to find the trace of a square matrix
6. Write a C Program to read, display and add two m x n matrices using functions
7. Write a C Program to read, display and multiply two m x n matrices using functions
8. Write a C Program to read a string and to find the number of alphabets, digits, vowels, consonants, spaces and special characters.
9. Write a C Program to Reverse a String using Pointer
10. Write a C Program to Swap Two Numbers using Pointers
11. Write a C Program to demonstrate student structure to read & display records of n students.
12. Write a C Program to demonstrate the difference between structure & union.

Note: Student has to execute a minimum of 10 programs in each part to complete the Lab course

**Evaluation Scheme for Lab Examination**

Assessment Criteria		Marks
Program – 1 from Part A	Flowchart / Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Program -2 from Part B	Flowchart/Algorithm	02
	Writing the Program	05
	Execution and Formatting	03
Viva Voice based on C Programming		05
<b>Total</b>		<b>25</b>

## Semester: II

Course Code: <b>DSC-2</b>	<b>Course Title:</b> Data Structures using C
Course Credits: 04	Hour of Teaching/Week: 04
Total Contact Hours: 52	Formative Assessment Marks: 40
Exam Marks: 60	Exam Duration: 03 Hours

### Course Outcomes (COs):

After completing this course satisfactorily, a student will be able to:

- Describe how arrays, records, linked structures, stacks, queues, trees, and graphs are represented in memory and used by algorithms
- Describe common applications for arrays, records, linked structures, stacks, queues, trees, and graphs
- Write programs that use arrays, records, linked structures, stacks, queues, trees, and graphs
- Demonstrate different methods for traversing trees
- Compare alternative implementations of data structures with respect to performance
- Describe the concept of recursion, give examples of its use
- Discuss the computational efficiency of the principal algorithms for sorting and searching

### Course Content

Content	Hours
<b>Unit - 1</b>	
Introduction to data structures: Definition; Types of data structures - Primitive & Non-primitive, Linear and Non-linear; Operations on data structures. Algorithm Specification, Performance Analysis, Performance Measurement Recursion: Definition; Types of recursions; Recursion Technique Examples - Fibonacci numbers, GCD, Binomial coefficient ${}^nC_r$ , Towers of Hanoi; Comparison between iterative and recursive functions.	13
<b>Unit - 2</b>	
Arrays: Basic Concepts – Definition, Declaration, Initialisation, Operations on arrays; Types of arrays; Arrays as abstract data types (ADT); Representation of Linear Arrays in memory; Traversing linear arrays; Inserting and deleting elements; Sorting – Selection sort, Bubble sort, Quick sort, Insertion sort; Searching - Sequential Search, Binary search; Iterative and Recursive searching; Multidimensional arrays; Representation of multidimensional arrays; Sparse matrices. Dynamic memory allocation: Static & Dynamic memory allocation; Memory allocation and de-allocation functions - <i>malloc</i> , <i>calloc</i> , <i>realloc</i> and <i>free</i> .	13
<b>Unit - 3</b>	
Linked list: Basic Concepts – Definition and Representation of linked list, Types of linked lists - Singly linked list, Doubly linked list, Header linked list, Circular linked list; Representation of Linked list in Memory; Operations on Singly linked lists – Traversing, Searching, Insertion, Deletion; Memory allocation; Garbage collection. Stacks: Basic Concepts – Definition and Representation of stacks; Operations on stacks; Applications of stacks; Infix, postfix and prefix notations; Conversion from infix to postfix using stack; Evaluation of postfix expression using stack; Application of stack in function calls.	13

Unit - 4	
Queues: Basic Concepts – Definition and Representation of queues; Types of queues - Simple queues, Circular queues, Double ended queues, Priority queues; Operations on Simple queues; Trees: Definition; Tree terminologies –node, root node, parent node, ancestors of a node, siblings, terminal & non-terminal nodes, degree of a node, level, edge, path, depth; Binary tree: Type of binary trees - strict binary tree, complete binary tree, binary search tree and heap tree; Array representation of binary tree. Traversal of binary tree; <i>preorder</i> , <i>inorder</i> and <i>postorder</i> traversal; Reconstruction of a binary tree when any two of the traversals are given.	13

#### Text Books

1. Satraj Sahani: Fundamentals of Data Structures

#### References

1. Tanenbaum: Data structures using C (Pearson Education)
2. Kamathane: Introduction to Data structures (Pearson Education)
3. Y. Kanitkar: Data Structures Using C (BPB)
4. Kottur: Data Structure Using C
5. Padma Reddy: Data Structure Using C
6. Sudipa Mukherjee: Data Structures using C – 1000 Problems and Solutions (McGraw Hill Education, 2007))

Course Code: <b>DSC-2Lab</b>	<b>Course Title: Data Structures Lab</b>
Course Credits: 02	Hour of Teaching/Week: 04
Total Contact Hours: 52	Formative Assessment Marks: 25
Exam Marks: 25	Exam Duration: 03

#### Programming Lab

##### Part A:

1. Write a C Program to find GCD using recursive function
2. Write a C Program to display Pascal Triangle using binomial function
3. Write a C Program to generate n Fibonacci numbers using recursive function.
4. Write a C Program to implement Towers of Hanoi.
5. Write a C Program to implement dynamic array, find smallest and largest element of the array.
6. Write a C Program to create two files to store even and odd numbers.
7. Write a C Program to create a file to store student records.
8. Write a C Program to read the names of cities and arrange them alphabetically.
9. Write a C Program to sort the given list using selection sort technique.
10. Write a C Program to sort the given list using bubble sort technique.

##### Part B:

1. Write a C Program to sort the given list using insertion sort technique.
2. Write a C Program to sort the given list using quick sort technique.
3. Write a C Program to sort the given list using merge sort technique.
4. Write a C Program to search an element using linear search technique.
5. Write a C Program to search an element using recursive binary search technique.
6. Write a C Program to implement Stack.
7. Write a C Program to convert an infix expression to postfix.

8. Write a C Program to implement simple queue.
9. Write a C Program to implement linear linked list.
10. Write a C Program to display traversal of a tree.

**Evaluation Scheme for Lab Examination**

<b>Assessment Criteria</b>		<b>Marks</b>
Program – 1 from Part A	Flowchart / Algorithm	02
	Writing the Program	05
	Execution and Formatting	03

## **Open Elective courses offered by the Department of Computer Science**

### **Open Elective 1: Office Automation**

#### **Course Outcomes (COs):**

- Be familiar various office automation tools.
- Create and format a document.
- Create and analyse data using Excel.
- Create and customize a presentation for a specific topic.

#### **Unit-1**

**14 Hrs**

Introduction, Block diagram of a computer, Input and output devices, memory and storage devices, Types of software, Introduction to operating system – functions, types of operating system and examples.

Introduction to word processing – creating and saving a document, formatting a document – Line spacing, paragraph, Fonts, inserting symbols, header and footer, shape, Tables, Find and replace, Mail merge, saving a document in different formats.

#### **Unit-3**

**14 Hrs**

Introduction to spread sheet – entering different types of data like text, numbers, date, , functions and formulae- different categories of functions, chart-creating and formatting a chart, filter, working with single and multiple work books, cell referencing, printing and previewing a document.

#### **Unit-3**

**14 Hrs**

Introduction to presentation tools-creating and viewing a presentation, applying design template, formatting options, inserting different objects in a presentation, customize a presentation, adding audio to a presentation, Slide animation, preview Slide transitions Slide show options, adding effect to presentation.

#### **Reference books**

1. Computer Basics with Office Automation- Archana Kumar, Dreamtech press, First Edition.
2. The Handbook of Office Automation- Ralph Tomas Reilly, Iuniverse publication, First Edition.

## **Open Elective-2: C Programming Concepts**

Course Outcomes (COs): After completing this course satisfactorily, a student will be able to

- Confidently operate Desktop Computers to carry out computational tasks.
- Understand working of Hardware and Software and the importance of operating systems.
- Understand programming languages, number systems, peripheral devices, networking, multimedia and internet concepts.
- Read, understand and trace the execution of programs written in C language.
- Write the C code for a given problem.
- Perform input and output operations using programs in C.
- Write programs that perform operations on arrays.

### **Unit-1**

**14 Hrs**

Fundamentals of Computers: Introduction to Computers -Hardware, software System software, Application software, Utility software, Operating System; Computer Languages – Machine Level, Assembly Level & High-Level Languages, Translator Programs – Assembler, Interpreter and Compiler; Planning a Computer Program – Algorithm and Flowchart with Examples.

Introduction to C Programming: Over View of C; History and Features of C; Structure of a C Program with Examples; Creating and Executing a C Program; Compilation process in C. C Programming Basic Concepts: C Character Set; C tokens - keywords, identifiers, constants, and variables; Data types; Declaration & initialization of variables; Symbolic constants.

### **Unit-2**

**14 Hrs**

Input and output with C: Formatted I/O functions - printf and scanf, control stings and escape sequences, output specifications with printf functions; Unformatted I/O functions to read and display single character and a string - getchar, putchar, gets and puts functions, C Operators & Expressions: Arithmetic operators; Relational operators; Logical operators; Assignment operators; Increment & Decrement operators; Bitwise operators; Conditional operator; Special operators; Operator Precedence and Associativity; Evaluation of arithmetic expressions; Type conversion. Control Structures: Decision making Statements - Simple if, if\_else, nested if\_else, else\_if ladder, Switch-case, goto, break & continue statements; Looping Statements - Entry controlled and Exit controlled statements, while, do-while, for loops, Nested loops.

### **Unit-3**

**14 Hrs**

User Defined Functions: Need for user defined functions; Format of C user defined functions; Components of user defined functions - return type, name, parameter list, function body, return statement and function call; Categories of user defined functions - With and without parameters and return type.

Arrays: One Dimensional arrays - Declaration, Initialization and Memory representation; Two Dimensional arrays - Declaration, Initialization and Memory representation. Strings: Declaring & Initializing string variables; String handling functions - strlen, strcmp, strcpy and strcat; Character handling functions - toascii, toupper, tolower, isalpha, isnumeric etc. Basics of Pointers in C: Understanding pointers - Declaring and initializing pointers, accessing address and value of variables using pointers; Pointer Arithmetic; Advantages and disadvantages of using pointers;

3. S. ByronGottfried: Programming with C (TMH)
4. Kernighan & Ritchie: The C Programming Language (PHI)
5. Yashwant Kanitkar: Let us C 6. P.B. Kottur: Programming in C (Sapna Book House)

## Course Content

Semester: I / II

Course Title: **Digital Fluency**

Course Credits: 2

Total Contact Hours: 15 hours of theory and 30 hours of practical's

Duration of ESA:

Formative Assessment Marks: **50 marks**

Summative Assessment Marks: 50 marks

Model Syllabus Authors:

### Course Outcomes (COs):

At the end of the course the student should be able to:

(Write 3-7 course outcomes. Course outcomes are statements of observable student actions that serve as evidence of knowledge, skills and values acquired in this course)

1. Have an intelligent conversation on the key concepts and applications of Artificial Intelligence (AI), Big Data Analytics (BDA), Internet of Things (IoT), Cloud Computing, and Cybersecurity
2. Develop holistically by learning essential skills such as effective communication, problem-solving, design thinking, and teamwork
3. Build his/her personal brand as an agile and expansive learner – one who is interested in horizontal and vertical growth?

### Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

**This mapping needs to be done considering POs of respective programs.**

### Course Outcomes (COs) / Program Outcomes (POs)

**1 2 3 4 5 6 7 8 9 10 11 12**

1. Have an intelligent conversation on the key concepts and applications of AI, BDA, IoT, Cloud Computing, and Cybersecurity
2. Develop holistically by learning essential skills such as effective communication, problem-solving, design thinking, and teamwork
3. Build his/her personal brand as an agile and expansive learner – one who is interested in horizontal and vertical growth

Course Articulation Matrix relates course outcomes of course with the corresponding program outcomes whose attainment is attempted in this course. Mark 'X' in the intersection cell if a course outcome addresses a particular program outcome.

### Course Content (Digital 101)

#### Details of topic

#### Module 1: Emerging Technologies

**Duration**

05 hours

Overview of Emerging Technologies:

- i. Artificial Intelligence, Machine Learning, Deep Learning,
- ii. Database Management for Data Science, Big Data Analytics,
- iii. Internet of Things (IoT) and Industrial Internet of Things (IIoT)
- iv. Cloud computing and its service models & v. Cyber Security and Types of cyber attack

**Module 2: Applications of Emerging Technologies**

05 hours

Applications of emerging technologies:

- i. Artificial Intelligence
- ii. Big Data Analytics
- iii. Internet of Things
- iv. Cloud Computing
- v. Cyber Security

**Module 3: Building Essential Skills Beyond Technology**

05 hours

Importance of the following:

- i. Effective Communication Skills
- ii. Creative Problem Solving & Critical Thinking
- iii. Collaboration and Teamwork Skills
- iv. Innovation & Design Thinking
- v. Use of tools in enhancing skills

**References to learning resources:**

1. The learning resources made available for the course titled “Digital 101” on Future Skills Prime Platform of NASSCOM

## **SEMESTER V**

**Course code: CME25002**

**DSE 3A: Elective: Computer Science – V**

**Database Management Systems**

**Credits: Theory - 04, Practical - 01**

**Theory: 60 Lectures**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Understand the characteristics of DBMS with examples
- CO2. Deliberate the details of types of database languages with examples
- CO3. Learn the details of ER- Diagrams and Relationship
- CO4. Understand in depth Basic concepts of Relational Model
- CO5. Learn in details with examples MYSQL Commands
- CO6. Learn in details with examples in PL-SQL

**Unit - 1**

**(15 Lectures)**

**Introduction to Database Management Systems:** Definition of Data, Information, DBMS, Data base system application, Purpose of database systems, Characteristics of DB – Self describing nature, Insulation between programs, data and data Abstraction (data Independence), support of multiple views of the data, sharing of data and multiples transaction processing, Storage management, Database language – DDL, DML,DCL.

File processing system v/s DBMS, Data models, Levels of Abstraction in a DBMS, Three Schema architecture,Characteristics of database approach,, data models,DBMS architecture and data independence.

**Unit - 2**

**(15 Lectures)**

**Entity Relationship and Enhanced ER Modeling:** Entity types,Entity Sets, Attributes, and Keys, Relationships, Relationship Types, Roles, and Structural Constraints,Weak Entity Types, ER Diagrams, Naming Conventions ,SQL99:Schema Definition, constraints, and object modeling

## UG-Computer Science - CBCS Scheme

### Unit - 3

(15 Lectures)

**Relational Data Model:** Basic concepts, Relational Constraints and Relational Database Schemas, Update Operations and Dealing with Constraint Violations, Basic Relational Algebra Operations.

**Database design:** ER and EER to relational mapping, functional dependencies, normal forms-first normal form, second normal forms, third normal form BCNF

### Unit - 4

(15 Lectures)

**MYSQL (SQL/PL-SQL) :** SQL VS. SQL \* PLUS: SQL COMMANDS AND DATA TYPES, OPERATORS AND EXPRESSIONS, INTRODUCTION TO SQL \* PLUS.

#### **MANAGING TABLES AND DATA:**

- CREATING AND ALTERING TABLES (INCLUDING CONSTRAINTS)
- DATA MANIPULATION COMMAND LIKE INSERT, UPDATE, DELETE
- SELECT STATEMENT WITH WHERE, GROUP BY AND HAVING, ORDER BY, DISTINCT, SPECIAL OPERATOR LIKE IN, ANY, ALL BETWEEN, EXISTS, LIKE
- JOIN, BUILT IN FUNCTIONS OTHER DATABASE OBJECTS
- VIEW • SYNONYMS, INDEX TRANSACTION CONTROL STATEMENTS
- COMMIT, ROLLBACK, SAVEPOINT INTRODUCTION TO PL/SQL
- SQL V/S PL/SQL • PL/SQL BLOCK STRUCTURE
- LANGUAGE CONSTRUCT OF PL/SQL (VARIABLES, BASIC AND COMPOSITE DATA TYPE, CONDITIONS LOOPING ETC.)
- % TYPE AND % ROWTYPE
- USING CURSOR (IMPLICIT, EXPLICIT)

#### **Reference:**

2. R. Ramakrishanan, J. Gehrke, Database Management Systems 3rd Edition, McGraw-Hill, 2002.
3. A. Silberschatz, H.F. Korth, S. Sudarshan, Database System Concepts 6th Edition, McGraw Hill, 2010.
4. R. Elmasri, S.B. Navathe Database Systems Models, Languages, Design and application Programming, 6th Edition, Pearson Education, 2013.

**Database Management Systems Lab**

**Software Lab based on Database Management Systems**

The following concepts must be introduced to the students: **Note:** MS Access/MySQL may be used.

**DDL Commands**

- Create table, alter table, drop table

**DML Commands**

- Select, update, delete, insert statements
- Condition specification using Boolean and comparison operators (and, or, not, =, <, >, <=, >=, <=)
- Arithmetic operators and aggregate functions (Count, sum, avg, Min, Max)
- Multiple table queries (join on different and same tables) • Nested select statements
- Set manipulation using (any, in, contains, all, not in, not contains, exists, not exists, union, intersect, minus, etc.)
- Categorization using group by.....having
- Arranging using order by

1. Create tables with relevant foreign key constraints
2. Populate the tables with data
3. Perform the following queries on the database :

## UG-Computer Science - CBCS Scheme

- a. Display all the details of all employees working in the company.
  - b. Displayssn, lname, fname, address of employees who work in department no 7.
  - c. Retrieve the birthdate and address of the employee whose name is 'Franklin T. Wong'
4. Retrieve the name and salary of every employee
  5. Retrieve all distinct salary values
  6. Retrieve all employee names whose address is in 'Bellaire'
  7. Retrieve all employees who were born during the 1950s
  8. Retrieve all employees in department 5 whose salary is between 50,000 and 60,000(inclusive)
  9. Retrieve the names of all employees who do not have supervisors
  10. Retrieve SSN and department name for all employees
  11. Retrieve the name and address of all employees who work for the 'Research' department
  12. For every project located in 'Stafford', list the project number, the controlling department number, and the department manager's last name, address, and birthdate.
  13. For each employee, retrieve the employee's name, and the name of his or her immediate supervisor.
  14. Retrieve all combinations of Employee Name and Department Name
  15. Make a list of all project numbers for projects that involve an employee whose last name is 'Narayan' either as a worker or as a manager of the department that controls the project.
  16. Increase the salary of all employees working on the 'ProductX' project by 15%.  
Retrieve employee name and increased salary of these employees.
  17. Retrieve a list of employees and the project name each works in, ordered by the employee's department, and within each department ordered alphabetically by employee first name.
  18. Select the names of employees whose salary does not match with salary of any employee in department.
  19. Retrieve the name of each employee who has a dependent with the same first name and same sex as the employee.
  20. Retrieve the employee numbers of all employees who work on project located in Bellaire, Houston, or Stafford.
  21. Find the sum of the salaries of all employees, the maximum salary, the minimum salary, and the average salary. Display with proper headings.
  22. Find the sum of the salaries and number of employees of all employees of the 'Marketing' department, as well as the maximum salary, the minimum salary, and the average salary in this department
  23. Select the names of employees whose salary is greater than the average salary of all employees in department 10.
  24. For each department, retrieve the department number, the number of employees in the department, and their average salary.
  25. For each project, retrieve the project number, the project name, and the number of employees who work on that project.

## UG-Computer Science - CBCS Scheme

26. Change the location and controlling department number for all projects having more than 5 employees to 'Bellaire' and 6 respectively.
27. For each department having more than 10 employees, retrieve the department no, no of employees drawing more than 40,000 as salary.
28. Insert a record in Project table which violates referential integrity constraint with respect to Department number. Now remove the violation by making necessary insertion in the Department table.
29. Delete all dependents of employee whose ssn is '123456789'.
30. Delete an employee from Employee table with ssn = '12345'( make sure that this employee has some dependents, is working on some project, is a manager of some department and is supervising some employees). Check and display the cascading effect on Dependent and Works on table. In Department table MGRSSN should be set to default value and in Employee table SUPERSSN should be set to NULL
31. Perform a query using alter command to drop/add field and a constraint in Employee table.

## **SEMESTER V**

**Course code: CME25202**

**DSE3B: Elective:Computer Science - V  
Computer Networks**

**Credits: Theory - 04, Practical - 01**

**Theory: 60 Lectures**

### **Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Understand the Elements of Data Communications and network Systems
- CO2. Learn in depth Transmission Media
- CO3. Understand in details with examples Network Models
- CO4. Understanding the various classifications and characteristics of Protocols
- CO5. Learn in depth Error Detection and Corrections Algorithms
- CO6. Learn in detail of Network Security

### **Unit - 1**

**(15 Lectures)**

**Basic concepts:** Components of data communication, standards and organizations, Network Classification, Network Topologies ; network protocol; layered network architecture; overview of OSI reference model; overview of TCP/IP protocol suite.

### **Unit - 2**

**(15 Lectures)**

**Physical Layer:** Cabling, Network Interface Card, Transmission Media Devices- Repeater, Hub, Bridge, Switch, Router, Gateway.

**Data Link Layer:** Framing techniques; Error Control; Flow Control Protocols; Shared media protocols - CSMA/CD and CSMA/CA.

### **Unit - 3**

**(15 Lectures)**

## **UG-Computer Science - CBCS Scheme**

**Network Layer:** Virtual Circuits and Datagram approach, IP addressing methods – Subnetting; Routing Algorithms (adaptive and non-adaptive)

**Transport Layer:** Transport services, Transport Layer protocol of TCP and UDP

**Unit - 4** **(15 Lectures)**

**Application Layer:** Application layer protocols and services – Domain name system, HTTP, WWW, telnet, FTP, SMTP

**Network Security:** Common Terms, Firewalls, Virtual Private Networks.

### **Reference:**

1. B.A. Forouzan: Data Communication and Networking, 4th Edition, Tata McGraw Hill, 2007.
2. D.E. Comer, Internetworking with TCP/IP, Vol. I, Prentice Hall of India, 1998.
3. W. Stalling, Data & Computer Communication, 8th edition, Prentice Hall of India, 2006.
4. D. Bertsekas, R. Gallager, Data Networks, 2nd edition, Prentice Hall of India, 1992.

## **Computer Networks Lab**

### **Software Lab based on Computer Networks:**

Implement the concepts of Computer Networks such as:

1. Simulate Checksum Algorithm.
2. Simulate CRC Algorithm
3. Simulate Stop & Wait Protocol.
4. Simulate Go-Back-N Protocol.
5. Simulate Selective Repeat Protocol.and so on....

## **SEMESTER V**

**Course code:** CME25402

### **DSE 3C: Elective: Computer Science - V Software Engineering**

**Credits: Theory - 04, Practical - 01**

**Theory: 60 Lectures**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Understand in details with examples Concepts of Software process
- CO2. Specify the details of Software requirements and analysis
- CO3. Learn in depth Design concepts and principles of software engineering
- CO4. Understand in depth software Configuration Management and Project Management
- CO5. Learn in details with examples Software Testing
- CO6. Specify in depth trends in software engineering

#### **Unit - 1**

**(15 Lectures)**

**Software Process:** Introduction ,S/W Engineering Paradigm , life cycle models (water fall, incremental, spiral, evolutionary, prototyping, object oriented) , System engineering, computer based system, verification, validation, life cycle process, development process, system engineering hierarchy.

**Software requirements:** Functional and non-functional, user, system, requirement engineering process, feasibility studies, requirements, elicitation, validation and management, software prototyping, prototyping in the software process, rapid prototyping techniques, user interface prototyping, S/W document.

#### **Unit - 2**

**(15 Lectures)**

Analysis and modeling, data, functional and behavioral models, structured analysis and data dictionary.

**Design Concepts and Principles:** Design process and concepts, modular design, design heuristic, design model and document, Architectural design, software architecture, data design, architectural design, transform and transaction mapping, user interface design, user interface design principles. Real time systems, Real time

## **UG-Computer Science - CBCS Scheme**

software design, system design, real time executives, data acquisition system, monitoring and control system.

### **Unit - 3**

**(15 Lectures)**

**Software Configuration Management:** The SCM process, Version control, Change control, Configuration audit, SCM standards.

**Software Project Management:** Measures and measurements, S/W complexity and science measure, size measure, data and logic structure measure, information flow measure. Estimations for Software Projects, Empirical Estimation Models, Project Scheduling.

### **Unit - 4**

**(15 Lectures)**

**Testing:** Taxonomy of software testing, levels, test activities, types of s/w test, black box testing, testing boundary conditions, structural testing, test coverage criteria based on data flow, mechanisms, regression testing, testing in the large. S/W testing strategies, strategic approach and issues, unit testing, integration testing, validation testing, system testing and debugging.

**Trends in Software Engineering:** Reverse Engineering and Re-engineering – wrappers – Case Study of CASE tools.

### **Reference:**

1. Roger S.Pressman, Software engineering- A practitioner's Approach, McGraw-Hill
2. Ian Sommerville, Software engineering, Pearson education Asia, 6th edition, 2000.

Carlo Ghezzi, Mehdi Jazayari and Dino Mandrioli, "Fundamentals of Software Engineering", Prentice Hall of India, New Delhi, 1991.

## **Software Engineering Lab**

### **Lab based on Software Engineering**

1. Practical Title
  - Problem Statement,
  - Process Model
2. Requirement Analysis
  - Creating a Data Flow
  - Data Dictionary,
  - Use Cases
3. Project Management
  - Computing FP
  - Effort
  - Schedule, Risk Table, Timeline chart
- 1 Design Engineering
  - Architectural Design
  - Data Design, Component Level Design
5. Testing
  - Basis Path Testing

#### **Sample Projects**

- DTC Route Information: Online information about the bus routes and their frequency and fares
- Car Pooling: To maintain a web based intranet application that enables the corporate employees within an organization to avail the facility of carpooling effectively.
- Patient Appointment and Prescription Management System
- Organized Retail Shopping Management Software
- Parking Allocation System
- Wholesale Management System

## **SEMESTER V**

**Course code: CME38002**

**SEC 4A: Elective: Computer Application (Practical)  
Office Automation**

**Credits: Theory - 00,**

**Practical - 01**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Understand the details of fundamentals of Computer
- CO2. Learn in depth Hardware and Software
- CO3. Learn the details of Computer Peripherals
- CO4. Understand the details of Programming Languages
- CO5. Deliberate in details with examples office automation Tools
- CO6. Deliberate in depth Operating System and the User Interface
- CO7. Understand in details of Internet and its usages

**Practical List for WORD:**

1. Create a **telephone directory**.
  - The heading should be 16-point Arial Font in bold
  - The rest of the document should use 10-point font size
  - Other headings should use 10-point Courier New Font.
  - The footer should show the page number as well as the date last updated.
2. Design a time-table form for your college.
  - The first line should mention the name of the college in 16-point Arial Font and should be bold.
  - The second line should give the course name/teacher's name and the department in 14-point Arial.
  - Leave a gap of 12-points.
  - The rest of the document should use 10-point Times New Roman font.
  - The footer should contain your specifications as the designer and date of creation.
3. Create the following document: A newsletter with a headline and 2 columns in portrait orientation, including at least one image surrounded by text.

**Practical List for EXCEL:**

1. Create a student worksheet containing roll numbers, names and total marks. Open a document in Word and insert the excel worksheet using:-

## UG-Computer Science - CBCS Scheme

- i) Copy/Paste
  - ii) Embedding
  - iii) Linking
2. The term wise marks for APS class of 20 students are stored in 3 separate sheets named term1, term2 and term3. Create 4<sup>th</sup> worksheet that contains student names and their total and average marks for the entire year. Give proper headings using headers. Make the column headings bold and italic. The 4<sup>th</sup> worksheet should contain college name as the first line. Make it bold, italic and center it.
3. Consider the following employee worksheet:-

Full Name (First Last)	Grade 1/2/3	Basic Salary	HRA	PF	Gross	Net	(VA)VehicleAllowance

HRA is calculated as follows:

Grade	HRA %(of Basic)
1	40%
2	35%
3	30%

Gross = Basic + HRA + VA

Net = Gross - PF

PF is 8% for all Grades

VA is 15000, 10000 and 7000 for Grades 1, 2 and 3.

- i) Find max, min and average salary of employees in respective Grade
  - ii) Count no. of people where VA>HRA
  - iii) Find out most frequently occurring grade.
  - iv) Extract records where employee name starts with "A" has HRA>10000
  - v) Print Grade wise report of all employees with subtotals of net salary and also grand totals. Use subtotal command.
  - vi) Extract records where Grade is 1 or 2 and salary is between 10000 and 20000 both inclusive.
4. In a meeting of a marketing department of an organization it has been decided that price of selling an item is fixed at Rs40. It was resolved to increase the sell of more of more items and getting the profit of Rs40,000/. Use Goal Seek of find out how many items you will have to sell to meet your profit figure.

5. Consider the following worksheet for APS 1<sup>st</sup> year students:-

S.No.	Name	PH	CH	BY	MT	CS	Total Marks	%	Grade
1									
2									

Grade is calculated as follows:-

## UG-Computer Science - CBCS Scheme

If %  $\geq 90$       Grade A

If %  $\geq 80$  &  $< 90$       Grade B

If %  $\geq 70$  &  $< 80$       Grade C

If %  $\geq 60$  &  $< 70$       Grade D

Otherwise students will be declared fail.

- i) Calculate Grade using if function
- ii) Sort the data according to total marks
- iii) Apply filter to display the marks of the students having more than 65% marks.
- iv) Draw a pie chart showing % marks scored in each subject by the topper of the class.
- v) Draw the doughnut chart of the data as in (iv)
- vi) Enter the S.No. of a student and find out the Grade of the student using VLOOKUP.
- vii) Extract all records where name
  - a) Begins with "A"
  - b) Contains "A"
  - c) Ends with "A"

### Practical List for Power Point:

- 2 Create five Power point slides. Each slide should support different format. In these slides  
Explain areas of applications of IT. Make slide transition time as 10 seconds.
- 3 Create five Power Point slides to give advantages/disadvantages of computer, application  
of computers and logical structure of computer.
- 4 Create five Power Point slides detailing the process of internal assessment. It should be a  
self-running demo.

## **SEMESTER V**

**Course code:** CME38202

**SEC 4B: Elective: Computer Application (Practical)**  
**Elective:XML Programming**

**Credits: Theory - 00, Practical - 01**

### **Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Understand the details of Elements of XML Programming
- CO2. Write down in details with examples DTD
- CO3. Deliberate in details with examples XML Schemas
- CO4. Deliberate the characteristics of CSS
- CO5. Learn in details with application CSS
- CO6. Deliberate in details with examples XSL
- CO7. Learn the details of XML Security
- CO8. Learn in details with examples XML and JAVA
- CO9. Learn in details with examples XML and ASP.Net

### **Software Lab Based on XML:**

#### **Exercise #1 - Information Structure**

In this exercise, student will practice identifying the structure of an information object.

For the sample document provided below:

Label the information structures you see, including containing structures.

12. Draw a tree representation of the structure.

#### **Exercise 2# Deconstructing an XML Document**

## UG-Computer Science - CBCS Scheme

In this exercise, student will practice identifying the explicit structure within an XML document. In a sense, this is the reverse of what you did in Exercise #1. For the sample XML markup below, create a document-like representation (or a simple drawing) for the content contained within the XML tags:

```
<book>
<coverInfo>
<title>The XML Handbook</title>
<author>Charles F. Goldfarb</author>
<author>Paul Prescod</author>
<edition>Second</edition>
<description>The definitive XML resource: applications, products, and
technologies. Revised and expanded—over 600 new pages.
</description>
</coverInfo>
</book>
```

### Exercise #3 - Creating XML Markup

In this exercise, create some XML markup based on the tree representation from Exercise #1 above, and the content from the original sample document.

### Exercise #4 - Well-Formedness

This exercise checks your understanding of the constraints for well-formedness. Are the following document instances well-formed? Explain any NO answers.

```
<list><title>The first list</title><item>An item</list>
<item>An item</item><item>Another item</item>
<para>Bathing a cat is a <emph>relatively</emph> easy task as long as
the cat is willing.</para>
<bibl><title>How to Bathe a Cat<author></title>Merlin
Bauer<author></bibl>
```

### Exercise #5-Well Formedness

This exercise is a bit more challenging than the previous example. Here is a fragment of an XML document instance. Identify all the places where it fails to match the constraints for well-formedness.

```
<PROCEDURE><TITLE>How to Bathe a Cat</TITLE>
<OVERVIEW>
This procedure tells you how to bathe a cat. <WARNING></OVERVIEW>Cats
don't like to take baths. You could get hurt doing this. Be sure to obtain all
the required protective gear before you start.
</WARNING><EQUIPEMENT><ITEM>Hockey Mask <ITEM>Padded Full-body
Kevlar Armor</ITEM><ITEM>Tub full of warm water</ITEM><ITEM>Towels
</ITEM><ITEM>First Aid kit</ITEM><ITEM>Cat
Shampoo</ITEM><EQUIPEMENT><INSTRUCTIONS><STEP> Locate the cat,
```

## UG-Computer Science - CBCS Scheme

who by now is hiding under the bed.</STEP><STEP>Place the cat in the tub of water.</STEP><ITEM>Using the First Aid kit, repair the damage to your head and arms.</STEP><STEP>Place the cat back in the tub and hold it down.</STEP><STEP>Wash it really fast, then make an effort to dry it with the towels.</STEP><STEP>Decide not to do this again.</STEP></INSTRUCTIONS>

**Note: Cover more exercises based on XML Programming theory concepts.**

## **SEMESTER V**

**Course code:** CME38402

### **SEC 4C: Elective: Computer Application (Practical) R Programming**

**Credits: Theory - 00, Practical - 01**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn in depth Elements of R Programming
- CO2. Understand the details of R programming Packages
- CO3. Understand in details with examples of Data Management
- CO4. Deliberate the characteristics of Data Management
- CO5. Understand in depth Graphical Procedures
- CO6. Deliberate in depth Portability Distribution
- CO7. Software Lab Based on R Programming

1. Write a program that prints 'Hello World' to the screen.
2. Write a program that asks the user for a number n and prints the sum of the numbers 1 to n
3. Write a program that prints a multiplication table for numbers up to 12.
4. Write a function that returns the largest element in a list.
5. Write a function that computes the running total of a list.
6. Write a function that tests whether a string is a palindrome.
7. Implement the following sorting algorithms: Selection sort, Insertion sort, Bubble Sort
8. Implement linear search.
9. Implement binary search.
10. Implement matrices addition, subtraction and Multiplication

## **SEMESTER VI**

**Course code: CMF25002**

**DSE6A: Elective:Computer Science - VII  
Internet Technologies**

**Credits: Theory - 04, Practical - 01**

**Theory: 60 Lectures**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn the details of HTML tags
- CO2. Understand the details of Basic CSS and implements
- CO3. Understand the details of Basic Concepts of Java Scripts
- CO4. Learn the Core Java Programming
- CO5. Write down in details with application and Usage of JDBC
- CO6. Learn in detail of JSP Environment

**Unit - 1**

**(15 Lectures)**

**Introduction to Web Design:** Introduction to hypertext markup language (html) document type definition, creating web pages, graphical elements, lists, hyperlinks, tables, web forms, inserting images, frames.

**Customized Features:** Cascading style sheets, (css) for text formatting and other manipulations.

**JavaScript:** Data types, operators, functions, control structures

**Unit - 2**

**(15 Lectures)**

Java Script events and event handling.

**Java:** Use of Objects, Array and Array List class, Designing classes, Inheritance, Input/Output, Exception Handling.

**Unit - 3**

**(15 Lectures)**

**JDBC:** JDBC Fundamentals, Establishing Connectivity and working with connection interface, Working with statements, Creating and Executing SQL Statements, Working with Result Set Objects.

## **UG-Computer Science - CBCS Scheme**

**JSP:** Introduction to JavaServer Pages, HTTP and Servlet Basics, The Problem with Servlets, The Anatomy of a JSP Page, JSP Processing, JSP Application Design with MVC

### **Unit - 4**

**(15 Lectures)**

Setting Up the JSP Environment, Implicit JSP Objects, Conditional Processing, Displaying Values, Using an expression to Set an Attribute, Declaring Variables and Methods, Error Handling and Debugging, Sharing Data Between JSP Pages, Requests, and Users, Database Access.

#### **Reference Books:**

1. Web Enabled Commercial Application Development Using Html, Dhtml, javascript, Perl CgiBy Ivan Bayross, BPB Publications, 2009.
2. BIG Java Cay Horstmann, Wiley Publication , 3rd Edition., 2009
3. Java 7 ,The Complete Reference, Herbert Schildt, 8th Edition, 2009.
4. The Complete Reference J2EE, TMH, Jim Keogh, 2002.
5. Java Server Pages, Hans Bergsten, Third Edition, O'Reilly Media December 2003.

## **Internet TechnologiesLab**

### **Software Lab based on Internet Technologies**

#### **JAVA Script**

1. Create a student registration form. Create functions to perform the following checks:
  - a. Roll number is a 7-digit numeric value
  - b. Name should be an alphabetical value (String)
  - c. Non-empty fields like DOB
2. Implement a static password protection.
3. Write a java script
  - a. To change the colour of text using setTimeout()
  - b. To move an image across screen using setInterval()

#### **JAVA Programs**

1. WAP to find the largest of n natural numbers.
2. WAP to find whether a given number is prime or not.
3. WAP to print the sum and product of digits of an Integer and reverse the Integer.
4. Write a program to create an array of 10 integers. Accept values from the user in that array. Input another number from

## UG-Computer Science - CBCS Scheme

the user and find out how many numbers are equal to the number passed, how many are greater and how many are less than the number passed.

5. Write java program for the following matrix operations:
  - a. Addition of two matrices
  - b. Summation of two matrices
  - c. Transpose of a matrixInput the elements of matrices from user
6. Write a java program that computes the area of a circle, rectangle and a Cylinder using function overloading.

### JDBC

1. Create a table 'Student' and 'Teacher' in 'College' database and insert two rows in this newly created table using JDBC API and do the following:
  - a. Update an already created table 'Teacher' in 'College' database by updating a teacher's name, with "Dr." appended before the name, whose name is "Rita".
  - b. Repeat the same thing for all the teachers using PreparedStatement.
  - c. Delete the student with ID=3 from 'Student' database.
  - d. Insert two students to the ResultSet returned by the query which selects all students with FirstName="Ayush". The database must also get updated along with ResultSet.
2. Create a procedure in MySQL to count the number of Rows in table 'Student'. Use Callable Statement to call this method from Java code.

### JSP Practical list

1. Display the pattern:

1

1 2

1 2 3

Take 'n' in a textbox from user. Display this pattern using

- Scriptlets
  - <c:forEach> loop
2. Make two files as follows:
    - a. main.html: shows 2 text boxes and 3 radio buttons with values "addition", "subtraction" and "multiplication"

## UG-Computer Science - CBCS Scheme

b. operate.jsp: depending on what the user selects perform the corresponding function (Give two implementations: using request.getParameter() and using expression language)

3. Validate User input entered in a form. The input must include Name, DOB, Email ID, Lucky Number, Favorite food etc. (Refer Chapter 8)

4. Display Good Morning <uname>, Good Afternoon <uname> or Good Evening <uname> based on the current time of the day.

5. Create your custom library which contains two tags: <hello>, <choco>.

Usage of the tags:

- <hello name="Ajay">: Output should be Hello Ajay. It contains a mandatory attribute 'name' which can accept Dynamic value.

- <choco texture="Chewy">: Output should be FiveStar, BarOne.

- <choco texture="Crunchy">: Output should be Munch. KitKat.

That means the mandatory attribute must accept a value, and

based on the attributes value, it should give output. You must use

a bean ChocoBean for this purpose.

## **SEMESTER VI**

**Course code: CMF25202**

### **DSE6B: Elective:Computer Science - VI Mobile Applications**

**Credits: Theory - 04, Practical - 01**

**Theory: 60 Lectures**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Deliberate the details of Concepts of Event Driven Programming
- CO2. Learn in details with examples issues of Mobile applications
- CO3. Specify the details of Mobile applications Development tools and Frameworks
- CO4. Deliberate in details with examples common Mobile device UI's
- CO5. Write down in depth Data persistence Remote data storage and communication

**CO6.** Learn in details with examples Code signing

#### **Unit - 1**

**(15 Lectures)**

**Event Driven Programming:** UI event loop, Threading for background tasks, Outlets / actions, delegation, notification, Model View Controller (MVC) design pattern.

**Mobile application issues:** limited resources (memory, display, network, file system), input / output (multi-touch and gestures), sensors (camera, compass, accelerometer, GPS)

#### **Unit - 2**

**(15 Lectures)**

**Development tools:** Apple iOS toolchain: Objective-C, Xcode IDE, Interface Builder, Device simulator.

**Frameworks:** Objective-C and Foundation Frameworks, Cocoa Touch, UIKit, Others: Core Graphics, Core Animation, Core Location and Maps, Basic Interaction.

## **UG-Computer Science - CBCS Scheme**

### **Unit - 3**

**(15 Lectures)**

**Common UI's for mobile devices:** Navigation Controllers, Tab Bars, Table Views, Modal views, UI Layout.

**Data Persistence:** Maintaining state between application invocations, File system, Property Lists, SQLite, Core Data.

### **Unit - 4**

**(15 Lectures)**

**Remote Data-Storage and Communication:** "Back End" / server side of application, RESTful programming, HTTP get, post, put, delete, database design, server side JavaScript / JSON.

**Code signing:** security, Keychain, Developers and App Store License Agreement (6L)

#### **Reference:**

5. Christian Crumlish and Erin Malone, Designing Social Interfaces, O'Reilly Media, 2009.
6. James E Smith, Ravi Nair, "Virtual Machines", Morgan Kaufmann Publishers, 2006.

## **Mobile Applications Lab**

### **Software Lab based on Mobile Applications:**

1. Installing Android Environment
2. Create Hello World Application
3. Sample Application about Android Resources
4. Sample Application about Layouts

## **UG-Computer Science - CBCS Scheme**

5. Sample Application about Intents
6. Sample Application I about user interfaces
7. Sample Application about Animations
8. Make a Project based on above labs
9. Sample Application about Android Data
10. Sample Application about SQLite I
11. Sample Application about SQLite II
12. Project Presentation

## **SEMESTER VI**

**Course code: CMF25402**

**DSE6C: Elective:Computer Science - VI  
Cloud Computing**

**Credits: Theory - 04, Practical - 01**

**Theory: 60 Lectures**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn in depth Fundamentals of Cloud Computing
- CO2. Understand the details of Cloud Services and File System
- CO3. Learn in depth Concept of Collaborating with Cloud
- CO4. Understand the details of Virtualization in cloud
- CO5. Learn the classification and characteristics of Security challenges in Cloud Computing
- CO6. Specify the classification and characteristics of Security challenges in Cloud Computing
- CO7. Understand the details of Security challenges in Cloud Computing
- CO8. Understand the Common standards of Cloud Computing
- CO9. Deliberate in details with examples Various Application of Cloud Computing

**Unit - 1**

**(15 Lectures)**

**Cloud Introduction:** Cloud Computing Fundamentals: Cloud Computing definition, Types of cloud, Cloud services: Benefits and challenges of cloud computing, Evolution of Cloud Computing, usage scenarios and Applications, Business models around Cloud– Major Players in Cloud Computing - Issues in Cloud - Eucalyptus - Nimbus - Open Nebula, CloudSim.

**Cloud Services And File System:** Types of Cloud services: Software as a Service - Platform as a Service – Infrastructure as a Service - Database as a Service - Monitoring as a Service –Communication as services.

## **UG-Computer Science - CBCS Scheme**

### **Unit - 2**

**(15 Lectures)**

Service providers- Google App Engine, Amazon EC2, Microsoft Azure, Sales force.

**Collaborating With Cloud:**Collaborating on Calendars, Schedules and Task Management –Collaborating on Event Management, Contact Management, Project Management –Collaborating on Word Processing , Databases – Storing and Sharing Files- Collaborating via Web-Based Communication Tools – Evaluating Web Mail Services – Collaborating via Social Networks – Collaborating via Blogs and Wikis. 185 CS-Engg&Tech-SRM-2013

### **Unit - 3**

**(15 Lectures)**

**Virtualization For Cloud:** Need for Virtualization – Pros and cons of Virtualization – Types of Virtualization – System Vm, Process VM, Virtual Machine monitor – Virtual machine properties - Interpretation and binary translation, HLL VM - Hypervisors – Xen, KVM , VMWare, Virtual Box, Hyper-V.

### **Unit - 4**

**(15 Lectures)**

**Security, Standards, And Applications:** Security in Clouds: Cloud security challenges - Software as a Service Security, Common Standards: The Open Cloud Consortium - The Distributed management Task Force - Standards for application Developers - Standards for Messaging - Standards for Security, End user access to cloud computing, Mobile Internet devices and the cloud.

## **Cloud Computing Lab**

### **Software Lab based on Cloud Computing:**

1. Create virtual machines that access different programs on same platform.
2. Create virtual machines that access different programs on different platforms.
3. Exploring Google cloud for the following
  - a) Storage
  - b) Sharing of data
  - c) Manage your calendar, to-do lists,
  - d) A document editing tool
4. Exploring Open source cloud (Any two)

## **SEMESTER VI**

**Course code:** CMF38002

**SEC4A: Elective:Computer Science - VII**  
**Android Programming**

**Credits: Theory - 01, Practical - 01**

**Theory: 15 Lectures**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn the details of Overview of Android
- CO2. Understand in details with examples Concepts of OOP's Using JAVA
- CO3. Learn in depth Development Tools
- CO4. Understand in depth User Interface Architecture
- CO5. Learn the details of User Interface Design
- CO6. Understand in depth SQLite Database Connectivity

**Unit - 1**

**(15 Lectures)**

**Introduction:** History of Android, Introduction to Android Operating Systems, Android Development Tools, Android Architecture.

**Overview of object oriented programming using Java:** OOPs Concepts: Inheritance, Polymorphism, Interfaces, Abstract class, Threads, Overloading and Overriding, Java Virtual Machine.

**Development Tools:** Installing and using Eclipse with ADT plug-in, Installing Virtual machine for Android sandwich/Jelly bean (Emulator), configuring the installed tools, creating a android project – Hello Word, run on emulator, Deploy it on USB-connected Android device.

**User Interface Architecture:** Application context, intents, Activity life cycle, multiple screen sizes.

**User Interface Design:** Form widgets, Text Fields, Layouts, Button control, toggle buttons, Spinners (Combo boxes), Images, Menu, and Dialog.

**Database:** Understanding of SQLite database, connecting with the database.

## Android Programming Lab

### Software Lab Based on Android Programming:

1. Create “Hello World” application. That will display “Hello World” in the middle of the screen in the emulator. Also display “Hello World” in the middle of the screen in the Android Phone.
2. Create an application with login module. (Check username and password).
3. Create spinner with strings taken from resource folder (res >> value folder) and on changing the spinner value, Image will change.
4. Create a menu with 5 options and selected option should appear in text box.
5. Create a list of all courses in your college and on selecting a particular course teacher-in-charge of that course should appear at the bottom of the screen.
6. Create an application with three option buttons, on selecting a button colour of the screen will change.
7. Create and Login application as above. On successful login, pop up the message.
8. Create an application to Create, Insert, update, Delete and retrieve operation on the database.

## **SEMESTER VI**

**Course code:** CMF38202

**SEC4B: Elective:Computer Science - VII**

**PHP Programming**

**Credits: Theory - 01, Practical - 01**

**Theory: 15 Lectures**

### **Course Outcome:**

After successful completion of the course, the student is able to

- CO1. Learn in depth Elements of PHP
- CO2. Learn in depth Interaction Methods Between HTML and PHP
- CO3. Understand in depth PHP function
- CO4. Understand in depth String Manipulation
- CO5. Learn the characteristics of Regular Expression
- CO6. Learn the details of Developing PHP Web Application

### **Unit - 1**

**(15 Lectures)**

**Introduction to PHP:** PHP introduction, inventions and versions, important tools and software requirements (like Web Server, Database, Editors etc.), PHP with other technologies, scope of PHP, Basic Syntax, PHP variables and constants, Types of data in PHP , Expressions, scopes of a variable (local, global),, PHP Operators : Arithmetic, Assignment, Relational , Logical operators, Bitwise , ternary and MOD operator.

PHP operator Precedence and associativity

**Handling HTML form with PHP:** Capturing Form Data, GET and POST form methods Dealing with multi value fields, Redirecting a form after submission, PHP conditional events and Loops: PHP IF Else conditional statements ( Nested IF and Else) Switch case, while ,For and Do While Loop, Goto , Break ,Continue and exit

**PHP Functions:** Function, Need of Function , declaration and calling of a function, PHP Function with arguments, Default Arguments in Function, Function argument with call by value, call by reference, Scope of Function Global and Local

## **UG-Computer Science - CBCS Scheme**

**String Manipulation and Regular Expression:** Creating and accessing String , Searching & Replacing String, Formatting, joining and splitting String , String Related Library functions, Use and advantage of regular expression over inbuilt function, Use of preg\_match(), preg\_replace(), preg\_split()

**functions in regular expression Array:** Anatomy of an Array ,Creating index based and Associative array ,Accessing array, Looping with Index based array, with associative array using each() and foreach(),Some useful Library function

### **Reference:**

2. Valentino Lee, Heather Schneider, and Robbie Schell, Mobile Applications: Architecture, Design, and Development, Prentice Hall, 2004.
3. Brian Fling, Mobile Design and Development, O'Reilly Media, 2009. Maximiliano
4. Firtman, Programming the Mobile Web, O'Reilly Media, 2010.
5. Christian Crumlish and Erin Malone, Designing Social Interfaces, O'Reilly Media, 2009.

## **PHP Programming Lab**

### **Software Lab Based on PHP:**

1. Create a PHP page using functions for comparing three integers and print the largest number.
2. Write a function to calculate the factorial of a number (non-negative integer). The function accept the number as an argument.
3. WAP to check whether the given number is prime or not.
4. Create a PHP page which accepts string from user. After submission that page displays the reverse of provided string.
5. Write a PHP function that checks if a string is all lower case.
6. Write a PHP script that checks whether a passed string is palindrome or not? ( A palindrome is word, phrase, or sequence that reads the same backward as forward, e.g., madam or nurses run)

## UG-Computer Science - CBCS Scheme

7. WAP to sort an array.
8. Write a PHP script that removes the whitespaces from a string.  
Sample string : 'The quick " " brown fox'  
Expected Output :Thequick""brownfox
9. Write a PHP script that finds out the sum of first n odd numbers.
10. Create a login page having user name and password. On clicking submit, a welcome message should be displayed if the user is already registered (i.e.name is present in the database) otherwise error message should be displayed.
11. Write a PHP script that checks if a string contains another string.
12. Create a simple 'birthday countdown' script, the script will count the number of days between current day and birth day.
13. Create a script to construct the following pattern, using nested for loop.

```
*  
* *  
* * *  
* * * *  
* * * * *
```

14. Write a simple PHP program to check that emails are valid.
15. WAP to print first n even numbers.
16. \$color = array('white', 'green', 'red')

Write a PHP script which will display the colors in the following way :

Output :

white, green, red,

- green
- red
- white

## **UG-Computer Science - CBCS Scheme**

17. Using switch case and dropdown list display a “Hello” message depending on the language selected in drop down list.
18. Write a PHP program to print Fibonacci series using recursion.
19. Write a PHP script to replace the first 'the' of the following string with 'That'.

Sample : 'the quick brown fox jumps over the lazy dog.'

Expected Result : That quick brown fox jumps over the lazy dog.

## **SEMESTER VI**

**Course code: CMF38402**

**SEC4C: Elective:Computer Science - VII  
System Administration and Maintenance**

**Credits: Theory - 01, Practical - 01**

**Theory: 15 Lectures**

**Course Outcome:**

After successful completion of the course, the student is able to

- CO1. System Administration & Maintenance
- CO2. Understand in details of Networking OS Environment
- CO3. Deliberate in depth Basic LINUX Commands
- CO4. Deliberate in details with examples Basic Windows Commands
- CO5. Learn the details of Server Configuration and Maintenance

**Unit - 1**

**(15 Lectures)**

**Part I - Linux/Unix:**Basics of operating system, services,Installation and configuration, maintenance. What is linux/unix Operating systems?, Kernel, API, cli, gui,Difference between linux/unix and other operating systems, Features and Architecture, Linux features, advantages, disadvantages

**Part II - Windows:**Windows as operating system, history, versions. PC hardware, BIOS, Devices and drivers, Kernal Configuration and building, Application installation, configuration and maintenance, Server services and Client services, Difference between WindowsXP/windows7 and windows server 2003/2008.

**Reference:**

1. Evi Nemeth, Garth Snyder and others,Unix and Linux System Administration Handbook, 4th Ed,Pearson Education, 2016.
2. PDaniel J. Barrett, Linux Pocket Guide: Essential Commands, 3rd Edition,Shroff/O'Reilly; Second edition 4 June 2012
3. Woody Leonhard,Windows 7 All-in-One For Dummies,2009

**System Administration and Maintenance Lab**

## **UG-Computer Science - CBCS Scheme**

### **Linux:**

Linux Desktop tour. Configuring desktop environment and desktop settings.

Basic Commands : Terminal, shell, Cat, ls, cd, date, cal, man, echo, pwd, Mkdir, rm, rmdir Ps, kill

Package Installation

Synaptic package manager

### **Windows:**

Creating users – Admin and regular.

Path of their personal files. Adding and changing passwords.

Difference between workgroup and domain. Concept of roles.

user profiles – creating and roaming Concept of Active Directory. Creating active directory in windows 2003/2008.

Process and Disk management

Windows Task manager. File systems – NTFS, FAT.

Services

Control Panel

C:/program Files, C:/system C:/windows

Add /remove new hardware (like printer ), Add/remove new programmes.

Network Administration

Ipconfig, Ping, tracert, route, hostname, net, netstat, whoami

Set manual IP address, check connectivity – ipv4, ipv6

Administrator Tools

Control Panel -> Administrative Tools

Computer Management, Local security Policy, Performance Monitor, Task Scheduler, Antivirus and firewall.

Misc

Start->Accessories->System tools ->All options (Remote desktop, backup/restore etc.)

LAN - sharing printer, files and folder over the network.

**Question Paper Pattern  
Theory (4 Credits)**

Time: 3 Hours

Max. Marks: 70

**Part – A**

**I. Answer any Eleven Question out of given Twelve Questions. 11 X 2 = 22**

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.
- 11.
- 12.

**Note: Three Questions each from the Units 1, 2, 3, and 4**

**Part - B**

**II. Answer any Two SubQuestions from each main Question.**

- |        |            |
|--------|------------|
| 13. A) | 2 X 6 = 12 |
| B)     |            |
| C)     |            |
| 14. A) | 2 X 6 = 12 |
| B)     |            |
| C)     |            |
| 15. A) | 2 X 6 = 12 |
| B)     |            |
| C)     |            |
| 16. A) | 2 X 6 = 12 |
| B)     |            |
| C)     |            |

## **UG-Computer Science - CBCS Scheme**

**Note: Each Main questions contains 3 sub questions carries 06 Marks (may have internal Split-ups) and from Units 1, 2, 3 and 4 respectively**

### **Question Paper Pattern**

#### **Theory (1 Credit)**

Time: 2 Hours

Max. Marks: 50

#### **Part – A**

#### **I. Answer all Questions.**

**05 X 02 = 10**

- 1.
- 2.
- 3.
- 4.
- 5.

#### **Part - B**

#### **II. Answer any Four Questions out of given Five Questions.**

**4 X 10 = 40**

- 1.
- 2.
- 3.
- 4.
- 5.

**Note: Each Main questions contains 3 sub questions carries 06 Marks (may have internal Split-ups) and from Units 1, 2, 3 and 4 respectively**

## **UG-Computer Science - CBCS Scheme**

### **Question Paper Pattern**

#### **Practical / Project (1 or 1.5 or 2 Credits)**

Time: 3 Hours

Max. Marks: 70

#### **Practicals**

1. Two Experiments/ Programs 20 Marks Each 2 x 20 = 40 Marks
  - a. Write-ups 10 Marks
  - b. Conducting & Results 10 Marks ( Any One for 2 Hours of Practical's)
2. Viva – Voice 10 Marks
3. Record 10 Marks

#### **Project**

1. Project Presentation 15 Marks
2. Project Demo 20 Marks
3. Viva – Voice 10 Marks
4. Record 25 Marks

### **Question Paper Pattern**

#### **Practical (1 Credit)**

Time: 2 Hours

Max. Marks: 50

- a. Experiment/ Programs 30 Marks Each 30 Marks
- b. Conducting & Results 10 Marks
2. Viva – Voice 10 Marks
3. Record 10 Marks

**Note:**

1. In lieu of the research project, two additional elective papers/ Internship may be offered.
2. One Hour of Lecture is equal to 1Credit
3. Two Hours of Practical is equal to 1Credit
4. One Hour of Tutorial is equal to 1 Credit (Except Languages)

## EXECUTIVE SUMMARY

Economics is the study to understand the ways to make accurate choices. By studying economics one can make the efficient choices in managing scarce resources such as money and time. It is not only helpful to increase the standard of living of the individual and their households and also in the policy decisions for the economic development of the Nation. Overall, the objective of Economics is to improve well-being of Indians and thereby developing Indian Economy, since it serves as a centre for developing ideas and innovations.

The economic graduates will be trained to make the best choices among these seemingly infinite possibilities. These rigourously trained economists will play a vital role in the Economic Development of the Nation.

The implementation of NEP 2020 has given the great opportunity to make the structure and syllabus of Economics more dynamic and rigorous. Hence the Curriculum committee in Economics has prepared the model structure and syllabus for the first two semesters as the first step towards it.

The committee though has taken the confidence and suggestions of the BOS chairperson so fall the state Universities, it is reiterated that the complete autonomy to the respective BOS of the Universities/Institutes remains intact even as per HEC. The committee has identified different category of courses to be studied by the **Economics Students namely Discipline Specific Core Course (DSCC), Ability Enhancement Courses (AECC), Skill Enhancement Courses (SEC), (Generic Electives), Discipline Specific Electives (DSE) etc., by keeping wide choices by considering the present context.**

The members of the committee strongly felt that rigorous training, continuous assessment is the key to improve the quality of the economics students and the fellow fraternity members should leave no stone unturned to ensure it in total.

## **Introduction**

Economics is a popular and much sought-after course owing to its policy relevance and application to business as well as real life situations. However, in the conventional graduate programmes, Economics education was more class-room based with very less practical orientation. Further, with changing technology, emergence of newer issues like uncertainty, pandemics, climate change and business data analytics; the skill requirements are changing. New business models demand newer skills to successfully manage the change. Therefore, keeping in mind the aspirations of the NEP, the emerging skill matrix and the progression of the student at various levels, the Curriculum Committee of Economics finalized the following programme structure to be taught for BA (Basic and Honours).

### **Program Outcome**

The four-year Bachelor of Arts (B.A. Basic/Honours) in Economics programme and MA in economics is designed with option for multiple entry and exit. The students will be taught theory as well as the practical aspects of Economic Science. They would begin with fundamental concepts and then as they progress to higher semesters they would be introduced to more sophisticated and intricate concepts.

The main focus would be on conceptual clarity and practical usage of the knowledge gained. To make the students to ‘think like an economist’ is the main motto of the curriculum. They will also be exposed to quantitative approaches and tools to understand the economic relationships and also to analyse the data for framing as well as evaluating socio-economic policies. With varied electives and approaches to study socio-economic problems and policies, the graduates will be prepared to review and evaluate policies. The whole process aims at making them more inquisitive about the economic phenomena. After graduation, the students can apply their knowledge, skills and competencies across a broad range of occupations. They enjoy a rewarding career in academic, business, corporate, science, health care, government, or any field that uses the information to answer critical questions and inform decision-making.

### **Learning Objectives**

The Graduates will demonstrate:

- ✓ Knowledge of the principles, methodologies, value systems, and thought processes employed in understanding economic behaviour of human beings;
- ✓ Ability to solve problems in microeconomics and macroeconomics;

- ✓ Understanding of contemporary economic issues and the impact of public and social policies to resolve them;
- ✓ Understanding of markets and how they function;
- ✓ Ability to identify, formulate and solve problems related to global, national and local socio-economic development.
- ✓ Ability to design and conduct social and behavioural experiments.
- ✓ Ability to design Questionnaires and other Survey tools.
- ✓ Ability to structure and analyse economic data with statistical tools, software and equipment;
- ✓ Ability to critically evaluate academic and policy research in economics;
- ✓ Ability to visualize and work on multidisciplinary tasks;
- ✓ knowledge of professional and ethical responsibilities;
- ✓ Ability to communicate effectively in both verbal and written form;
- ✓ Confidence for self-education and ability for life-long learning.
- ✓ Participation and success in competitive examinations like UPSC/KPSC Civil Services, Indian Economic Services etc.;
- ✓ Ability to prepare and understand simple financial statements

### **Program Outcomes**

The Programme outcomes (POs) are expected to be as under:

- Students will be able to understand economic vocabulary, methodologies, tools and analysis procedures.
- Students will be familiar with the knowledge and application of micro economics for the formulation of policies and planning.
- Students will learn to apply economic theories and concepts to contemporary social issues, as well as analysis of policies.
- Students will be able to understand the impact of government policies and will be able to assess the consequences of the policies on the parties involved.
- As the programme along with economics contains like statistics, mathematics, it enhances them to compute and assess the real situation of the economy including the size and changes of population, income pattern, and rate of development with pattern of savings and investments and social security measures adopted in the country.
- Understand the basics of Quantitative techniques their applications

- Critically evaluate the ongoing economic developments in India and abroad
- Understand research methods in economics
- Student develops an awareness of career choices and the option for higher studies.

### **NEED FOR CURRICULUM DEVELOPMENT**

As per the NEP 2020 initiatives, it is intended to formulate Curriculum to eliminate the disparities among the students studying in different Universities/Institutes. The need for the curriculum development in Economics emerges due to the following reasons

1. **Changing Economic Scenario;** The Indian Economy is witnessing a radical amount of the changes in the economic policies since the introduction of the New Economic policy in 1991, followed by second and third generation reforms. India is not only inviting the FDI but at the same time also promoting Atmanirbhar Abhiyaan (A Self-reliant India). Market economy has expanded creating new opportunities and hence a new economics curriculum is prepared which helps the student to utilize the emerging.
2. **Credit transfer:** Credit transfer is approved by the UGC and the Government that allows the students to transfer course from their existing university to a new UGC approved university. The same number of credits in all the Universities in Karnataka is the first step to towards the credit transfer from University to University.
3. **Skill Enhancement:** The new curriculum focuses more on hands on training, internship and thereby enhancing the skills of the students. The papers like data **analytics etc further helps to develop the skills in the students.**

## **PEDAGOGY**

The goal of economics pedagogy is to awaken a student's critical consciousness and empower them with economic tools that help them in taking the crucial decision which helps them with economic tools through which they can make the efficient choices in managing scarce resources such as resources, money and time.

2. **Importance to theory as well as application:** All these years economics curriculum was concentrating more on teaching theoretical aspects, but the new curriculum gives importance to application through many hands-on training, case studies, empirical studies etc.
3. **Utilization of ICT:** in order to make the Critical and creative thinking among the students better the ICT tools will be used. It includes case studies of research-led teaching, via presentations, websites and other media
4. **Research-based and research-led teaching:** The theories will be explained with application. In order to give more hands-on training, the Projects and internships are introduced in the economics curriculum. The students will do the research project of their choice under the supervision of the research guide.
5. **Exposure to mathematics and statistics:** in today's world, economics is using more of statistics and mathematics in economic analysis. Hence the curriculum is designed in such a way which gives more exposure to mathematics and statistic straining.
6. **Brain Storming Approach:** Students will be deliberately involved either in groups or as individuals to deliberately discuss the possible implications or solutions to the Indian economic problems. The teacher will guide the process and help the students to think in right perspective and direction. This will help the teachers understand the extent of the student understanding and take corrective steps, but also helps in student involvement in the curriculum.
7. **Prominence to Indian economic contribution and Indian examples;** The western economic theories were taught ignoring the contribution of Indian economists. The new curriculum also emphasis on the Indian economist contribution, their theories and application. The teachers may highlight the Indian economic contribution and Indian examples in the pedagogy.

**Exit Options and Credit Requirements:**

A Certificate / Diploma/ Bachelor Degree or Bachelor Degree with Honours in Economics (BA in Economics) is awarded at the completion of every progressive year.

<b>Exit Option with</b>	<b>Certificate/ Diploma/ Degree/ Honors</b>
Successful completion of First year (two semesters) of the four years multidisciplinary undergraduate degree programme.	Certificate in Economics (Arts)
Successful completion of second year (four semesters) of the four years multidisciplinary undergraduate degree programme	Diploma in Economics (Arts)
Successful completion of three year (six semesters) of the four years multidisciplinary undergraduate degree Programme	Bachelor of Arts Degree in Economics
Successful completion of four years (eight semesters) of the four years multidisciplinary undergraduate degree Programme	Bachelor of Arts Degree with Honours in Economics
Successful completion of Five years (Ten semesters) of the five years multidisciplinary degree programme	Master of Arts Degree with Honours in Economics

A student will be allowed to enter/re-enter only after the odd semester and they can only exit after even semester. Re-entry at various as lateral academic programmes based on the above mentioned earned proficiency test records.

The validity of the earned credit will be for a maximum period year or as specified by the academic bank of credits (ABC).

## CONTINUOUS INTERNAL EVALUATION AND SEMESTER EXAMINATION

Total marks for each course shall be based on continuous assessments and term end examinations. As per the decision of the Karnataka State Higher Education Council, it is necessary to have uniform pattern of 40:60 for CIA and Semester End examinations respectively, among all the Universities, their affiliated and autonomous colleges.

The committee deliberated on the same and suggested the following pattern for the CIEMarks.

Sl. No.	Parameters for the Evaluation	Marks
	<b>Continuous Internal Evaluation (CIE)</b>	
A	<b>Continuous &amp; Comprehensive Evaluation (CCE)</b>	<b>20</b>
B	<b>Internal Assessment Tests (IAT)</b>	<b>20</b>
	<b>Total of CIE (A+B)</b>	<b>40</b>
C	<b>Semester End Examination (SEE)</b>	<b>60</b>
	<b>Total of CIE and SEE (A+B+C)</b>	<b>100</b>

### Evaluation process of IA marks may be as follows:

- The first component (C1), of assessment is for 20 marks. This shall be based on test, assignment, seminar, case study, field work, project work etc. This assessment and score process should be completed after completing 50% of syllabus of the course/s and within the first half of the semester.
- The second component (C2), of assessment is for 20 marks. This shall be based on test, assignment, seminar, case study, field work, internship / industrial practicum / project work etc. This assessment and score process should be based on completion of the remaining 50 percent of syllabus of the courses of the semester.
- During the 17<sup>th</sup> – 20<sup>th</sup> week of the semester, a semester end examination of Two and Half hours (2.30) duration shall be conducted by the University for each Course. This forms the third and final component of assessment (C3) and the maximum marks for the final component will be 60%.
- In case of a student who has failed to attend the C1 or C2 on a scheduled date, it shall be deemed that the student has dropped the test. However, in case of a student who could not take the test on scheduled date due to genuine reasons, such a candidate may appeal to the concerned teacher/ Program Coordinator / HOD and suitable decision taken accordingly.

- For assignments, tests, case study analysis etc., of C1 and C2, the students should bring their own answer scripts (of A4 size), graph sheets etc., required for such tests / assignments and these be stamped by the concerned department using their department seal at the time of conducting tests / assignment / work etc.

The outline for continuous assessment activities for Component-I (C1) and Component-II (C2) of a course shall be as under:

**Outline for continuous assessment activities for C1 and C2**

<b>Activities</b>	<b>C1</b>	<b>C2</b>	<b>Total Marks</b>
Session Test	10 marks	10 marks	20
Case study / Assignment / Field work / Project work/ Academic Quiz/ Review of the Book/ etc.	10 marks	---	10
Case study / Assignment / Field work / Project work/ Academic Economics Quiz/ Review of the Book/ etc	---	10 marks	10
<b>Total</b>	20 marks	20 marks	40

**Suggestive Template for IAT**

**Internal Assessment Test BA  
In  
Economics**

Course Code:  
Duration: 60 Minutes

Name of the Paper:  
Total Marks: 10

**OPTION-A**

Answer any two of the following questions. (Questions for testing conceptual clarity)  
(5 X 2= 10)

- 1.
- 2.
- 3.

**OPTION- B**

Answer any one of the following questions. (Questions for testing the knowledge of theories and application)  
(10X1=10)

- 1.
- 2.

Note: 1. After the completion of 50% of the syllabus, C1 test has to be conducted followed by this C2 test has to be conducted after completion of the syllabus.

**SYLLABUS FOR TWO YEARS OR FOUR SEMESTERS OF  
B.A.(Basic/Honours)  
IN  
ECONOMICS**

**BA (Basic/Honours)**  
**Economics**  
**Semester - 1**

**DSC 1.1: Basic Economics – I (Economic Analysis -I) 3 credits**

**Course Outcomes:**

By the end of the course the student will be able to:

1. Identify the facets of an economic problem.
2. Learn basic economic concepts and terms.
3. Explain the operation of a market system;
4. Analyse the production and cost relationships of a business firm;
5. Evaluate the pricing decisions under different market structures; and
6. Use basic cost-benefit calculations as a means of decision making (i.e., thinking like an economist)

Content of Basic Economics 1	42 Hrs
<b>Unit– 1 Basic Concepts in Economics:</b>	14
<b>Chapter No. 1 Nature and Scope of Economics:</b> <ul style="list-style-type: none"> <li>• Meaning of Economics</li> <li>• Nature of Economics</li> <li>• Scope of Economics</li> <li>• Methods of Economics</li> <li>• Why Study Economics?</li> </ul>	5
<b>Chapter No. 2 Thinking Like an Economist:</b> <ul style="list-style-type: none"> <li>• Thinking Like an Economist</li> <li>• The Economist as Scientist</li> <li>• The Economist as Policy Adviser</li> <li>• Economic Policy</li> </ul>	4
<b>Chapter No. 3 Economic System:</b> <ul style="list-style-type: none"> <li>• Types of Economic Activities</li> <li>• Organisation of Economic Activities</li> <li>• Circular Flow of Economic Activities</li> <li>• Evolution of the Present Economic System</li> </ul>	5
<b>Practicum:</b> 1. Group Discussions on Choice Problem 2. Assignment on Types of Economic Systems	
<b>Unit – 2 Demand, Supply and Markets:</b>	14
<b>Chapter No. 4. Firms and Households:</b> <ul style="list-style-type: none"> <li>• Meaning of Firms and Household</li> <li>• Relationship Between Firms and Household</li> <li>• Input Markets</li> <li>• Output Markets</li> </ul>	4
<b>Chapter No. 5. Demand and Supply:</b> <ul style="list-style-type: none"> <li>• Individual Demand</li> <li>• Market Demand</li> <li>• Demand Determinants</li> <li>• Supply and its Determinants</li> <li>• Market Equilibrium</li> </ul>	5

<p><b>Chapter No. 6. Elasticity and its Measurement:</b></p> <ul style="list-style-type: none"> <li>• Types of Elasticity of Demand</li> <li>• Price, Income and Cross Elasticities</li> <li>• Measurement of Elasticity of Demand</li> <li>• Determinants of Elasticity of Demand</li> </ul> <p><b>Practicum:</b> 1. Estimation of Demand and Supply Elasticities 2. Solving an Equilibrium Problem</p>	5
<p><b>Unit – 3 Cost and Market Structures:</b></p>	14
<p><b>Chapter No. 7 Production and Production Function:</b></p> <ul style="list-style-type: none"> <li>• Meaning and features of production</li> <li>• Production function: Cobb-Douglas Production function</li> <li>• Total Product</li> <li>• Average Product</li> <li>• Marginal Product</li> </ul>	4
<p><b>Chapter No. 8. Production Cost and Revenue:</b></p> <ul style="list-style-type: none"> <li>• TC, AC and MC</li> <li>• Cost in the Short-run</li> <li>• Fixed Costs and Variable Costs</li> <li>• Long run AC and MC</li> <li>• TR, MR and AR</li> </ul>	5

## Semester I

<b>Course Title: DSC 1.2: Contemporary Indian Economy:</b>	
Total Contact Hours: 42	Course Credits: 3
Formative Assessment Marks:40	Duration of ESA/Exam: 2½ hrs
Model Syllabus Authors:	Summative Assessment Marks: 60

### Course Pre-requisite(s):

### Course Outcomes (COs):

At the end of the course the student should be able to:

- i. Understand the current problems of Indian Economy
- ii. Identify the factors contributing to the recent growth of the Indian Economy
- iii. Evaluate impact of LPG policies on economic growth in India
- iv. Analyze the sector specific policies adopted for achieving the as rational goals
- v. Review various economic policies adopted

<b>Content of Course 1</b>	<b>42 Hrs</b>
<b>Unit – 1 LPG POLICIES, ECONOMIC REFORMS AND AGRICULTURE:</b>	14
<b>Chapter No. 1 Recent Issues:</b> <ul style="list-style-type: none"> <li>• Genesis and Impact of LPG</li> <li>• India’s population policy</li> <li>• Demographic Dividend</li> <li>• India’s human development in global perspective</li> </ul>	4
<b>Chapter No. 2 Urbanization and governance:</b> <ul style="list-style-type: none"> <li>• Urbanization and Smart City Mission</li> <li>• Impact of COVID-19 Pandemic</li> <li>• Atma Nirbhara Bharat Abhiyan</li> <li>• Non-farm Sector</li> </ul>	4
<b>Chapter No. 3 Economic Reforms and Agriculture:</b> <ul style="list-style-type: none"> <li>• Agriculture and WTO</li> <li>• Commercialization and Diversification</li> <li>• Price Policy and Subsidies</li> <li>• Public Distribution System : TPDS</li> <li>• Impact of Public Expenditure on Agricultural Growth (1991 onwards)</li> <li>• Doubling Farm Incomes -MGNREGS (brief introduction)</li> </ul>	6
<b>Practicum</b> <ol style="list-style-type: none"> <li>1. Mini-project to ascertain the impact of pandemic on lives of different sections of population</li> <li>2. Field visits to understand the agrarian situation</li> </ol>	
<b>Unit – 2 INDUSTRY, BUSINESS, FISCAL POLICY:</b>	14
<b>Chapter No. 4. Industrial Policy:</b> <ul style="list-style-type: none"> <li>• New Industrial Policy and Changes</li> <li>• Public Sector Reforms</li> <li>• Privatisation and Disinvestment</li> </ul>	4

<ul style="list-style-type: none"> <li>• Competition Policy</li> </ul>	
<p><b>Chapter No. 5. Business:</b></p> <ul style="list-style-type: none"> <li>• Ease of Doing Business</li> <li>• Performance of MSMEs</li> <li>• Role of MNC's in Industrial Development</li> <li>• Make in India, Infrastructure Development : Health, Education, Transportation and Power (in brief)</li> <li>• National Monetization Pipeline</li> </ul> <p>(The teacher should include the latest policy of the government)</p> <p><b>Chapter No. 6. Fiscal Policy:</b></p> <ul style="list-style-type: none"> <li>• Tax, Expenditure, Budgetary Deficits</li> <li>• Fiscal Reforms - Public Debt Management</li> <li>• Fiscal Responsibility and Budget Management (FRBM) Act</li> <li>• GST (meaning and features), Fiscal Federalism and Fiscal Consolidation (in brief)</li> </ul> <ul style="list-style-type: none"> <li>• Recommendations of the Current Finance Commission</li> </ul> <p><b>Practicum:</b> Mini-projects to assess the business climate</p>	5
<p><b>Unit – 3 MONETARY POLICY, FOREIGN TRADE AND INVESTMENT:</b></p>	14
<p><b>Chapter No. 7 Monetary Policy:</b></p> <ul style="list-style-type: none"> <li>• Organisation of India's Money Market</li> <li>• Financial Sector Reforms</li> <li>• Review of Monetary Policy of RBI</li> </ul>	3
<p><b>Chapter No. 8. Money and Capital Markets:</b></p> <ul style="list-style-type: none"> <li>• Working of SEBI in India</li> <li>• Changing roles of the Reserve Bank of India</li> <li>• Commercial banks : Credit Creation</li> <li>• Foreign Banks and Non-Banking Financial Institutions</li> <li>• Demonetization and its impact</li> </ul>	5
<p><b>Chapter No. 9. Foreign Trade and Investment:</b></p> <ul style="list-style-type: none"> <li>• Direction of India's foreign trade</li> <li>• Balance of payments since 1991 (trends)</li> <li>• New Exchange Rate Regime: Partial and full convertibility</li> <li>• Capital account convertibility</li> <li>• FDI – Trends and Patterns</li> <li>• New EXIM policy</li> <li>• Bilateral and Multilateral Trade Agreements (in brief)</li> </ul> <p><b>Practicum:</b></p> <ol style="list-style-type: none"> <li>1. Computation and analysis of Wholesale Price Index, Consumer Price Index: components and trends.</li> <li>2. ## Semester I

<b>Course Title: OEC 1.3.1: Kautilya's Arthashastra (OEC):</b>	
Total Contact Hours: 42	Course Credits: 3
Formative Assessment Marks:40	Duration of ESA/Exam: 2½ hrs
Model Syllabus Authors:	Summative Assessment Marks: 60

**Course Pre-requisite(s):** 12<sup>th</sup> Standard Pass

**Course Outcomes (COs):**

At the end of the course the student should be able to:

1. This course will enlighten the students about the ancient fundamentals about political and economic constituents, which will frame out a basic land of understanding the modern trends. This will help them to understand the upcoming needs in the area of policy making for states at national and international level.
2. This treatise deals with the science of Governance, so it projects out all the dimensions needed to be understood by students about the present socio-economic and political rules and regulations of the state.

Unit	Description	Hours
I	<b>Chapter 1:</b> Introduction to Arthashastra <b>Chapter 2:</b> Various disciplines of Indian Education System <b>Chapter 3:</b> Place of Kautilya's Arthashastra among them	2 2 2
II	<b>Chapter 4:</b> Importance of science dealing with governance - Introduction to Tantrayuktis – The methods of preparing a compendium, tools and techniques of writing a compendium. <b>Chapter 5:</b> Governance Procedure- Appointment of the ministers, duties of Government superintendents, treasury, spies, royal writ, punishment- Vakparushya and Dandaparushya; <b>Chapter 6:</b> Laws of Inheritance – Determination of forms of Agreements, determination of legal disputes, Division of inheritance, Special shares in inheritance, Distinction between sons	5 5 5
III	<b>Chapter 7:</b> Economic Dimension- Body of income of the state, collection of revenue, duties of a Chamberlin (Koshadhyksha), Forty ways of embezzlement of the revenue, Punishment for the embezzlement of revenue, Expenditure, Loss and Profit, Keeping up the Accounts, Recovery of Debts, Deposits of the state, Resumption of the gifts, Remission of Taxes <b>Chapter 8:</b> Political Dimension- Six-fold Policy- War, Combination of Powers, Agreement of Peace with or without definite terms, Double Policy, Circle of States, Conduct of Corporations, Secret means, Plan of treatise,	9 9 3
<b>Suggested readings:</b> 1. Arthashastra of Kautilya by T. Ganapati Shastri, Chaukhambha Surbharti Prakashana, Varanasi,		

India, 2005.

2. Arthashastra of Kautilya by Sri. Vacaspati Gairola, Chaukhambha Vidyabahavan, Varanasi, India, 2013.

3. Kautilya, The Arthashastra by L.N. Rangarajan, Penguin Books Ltd, London.

4. Kautilya's Arthashastra: The Way of Financial Management and Economic Governance, Jaico Publishing House, Mumbai, India.

## Semester 1

<b>Course Title: OEC 1.3.2: Pre-Reforms Indian Economy (OEC)</b>	
Total Contact Hours: 42	Course Credits: 3
Formative Assessment Marks:40	Duration of ESA/Exam: 2½ hrs
Model Syllabus Authors:	Summative Assessment Marks: 60

**Course Pre-requisite(s):** 12<sup>th</sup> Standard Pass

**Course Outcomes (COs):**

At the end of the course the student should be able to:

- i. Trace the evolution of Indian Economy
- ii. Identify the structural features and constraints of the Indian Economy
- iii. Evaluate planning models and strategy adopted in India
- iv. Analyze the sector specific problems and contributions towards overall economic growth
- v. Review various economic policies adopted

Unit	Description	Hours
<b>Unit-I</b>	<b>Features and problems of Indian Economy:</b>	<b>15</b>
	<b>Chapter 1: Features of Indian Economy:</b> <ul style="list-style-type: none"> <li>• India as a Developing Economy</li> <li>• Demographic Features</li> <li>• Human Development Index(HDI),</li> <li>• Problems of Poverty: Unemployment and Income Inequality</li> </ul>	4
	<b>Chapter 2: Issues in Agriculture sector in India:</b> <ul style="list-style-type: none"> <li>• Land reforms (in brief)</li> <li>• Green Revolution</li> <li>• Agriculture Marketing in India</li> <li>• Agricultural Price Policy</li> </ul>	6
	<b>Chapter 3: Industrial and Service Sectors:</b> <ul style="list-style-type: none"> <li>• Industrial Policy</li> <li>• Industrial Development</li> <li>• Micro, Small and Medium Enterprises</li> <li>• Performance of Public Sector in India</li> <li>• Service Sector in India.</li> </ul>	5
	<b>Practicum:</b> 1. Identifying economic problems and their causes; 2. Mini-project on any aspect of Indian Agriculture, Industry, Service and Public Sectors	
<b>Unit-II</b>	<b>Economic Policies:</b>	<b>13</b>
	<b>Chapter 4: Planning:</b> <ul style="list-style-type: none"> <li>• Mixed Economy</li> <li>• Bombay Plan</li> <li>• Gandhian Model</li> <li>• Nehru-Mahalanobis Model</li> <li>• Objectives and Achievements Of Economic Planning in India (before 1991)</li> </ul>	5
	<b>Chapter 5: Monetary policy in India</b> <ul style="list-style-type: none"> <li>• Instruments of Monetary Policy</li> </ul>	2

	<ul style="list-style-type: none"> <li>• Black money in India – Magnitude and Impact</li> </ul> <p><b>Chapter-6: Fiscal Policy in India:</b></p> <ul style="list-style-type: none"> <li>• Tax Revenue</li> <li>• Public Expenditure</li> <li>• Budgetary Deficits</li> <li>• Fiscal Reforms</li> <li>• Public Debt Management and Reforms</li> <li>• Centre State Finance Relations (before 1991)</li> </ul> <p><b>Practicum:</b> Assignment on successes and failures of India’s planning; Monetary and Fiscal Policy instruments</p>	6
<b>III</b>	<b>External sector and Nature of Reforms in India</b>	<b>14</b>
	<p><b>Chapter-7: India’s Foreign Trade:</b></p> <ul style="list-style-type: none"> <li>• Salient Features</li> <li>• Volume, Composition And Direction of Trade</li> <li>• Balance of Payments</li> <li>• Import Substitution and Protection</li> </ul> <p><b>Chapter-8: Pre-reforms Strategies:</b></p> <ul style="list-style-type: none"> <li>• Stabilization Strategies/Measures in all the three sectors of the economy</li> <li>• Tariff Policy: Types and Impact</li> <li>• Exchange Rate Dynamics</li> </ul> <p><b>Chapter 9: Planning Commission:</b></p> <ul style="list-style-type: none"> <li>• Organization and Objectives</li> <li>• Functions</li> </ul> <p><b>Practicum:</b> Calculation of BoP and evaluating trade policies; Assignment and group discussion on the planning commission.</p>	6  6  2

## Semester I

<b>Course Title: OEC 1.3.3: Development Studies (OEC)</b>	
Total Contact Hours: 42	Course Credits: 3
Formative Assessment Marks:40	Duration of ESA/Exam: 2½ hrs
Model Syllabus Authors:	Summative Assessment Marks: 60

**Course Pre-requisite(s):** 12<sup>th</sup> Standard Pass

**Course Outcomes (COs):**

At the end of the course the student should be able to:

- i. Graduates will be able to excel in higher studies and/or to succeed in profession.
- ii. Graduates will get a solid foundation of fundamentals required to solve socioeconomic problems and also to pursue higher studies.
- iii. Graduates will demonstrate knowledge to appreciate of the dimensions of contemporary development issues, to generate sensitivity to problems concerning ethics and human values to develop orientation towards effective communication and critical analysis, and to appreciate the interrelationships among disciplines as they relate to everyday realities.
- iv. Graduates will cultivate professional and ethical attitude, effective Communication skills, teamwork skills, multidisciplinary approach, and to facilitate an advanced understanding and appreciation of the principles, methodologies, value systems, and thought processes employed in human inquiries.

Unit	Description	Hrs
I	<b>Development: Meaning and Current Challenges</b>	<b>9</b>
	<b>Chapter-1: Meaning of Development:</b>	3
	<ul style="list-style-type: none"> <li>• The Concept of Development,</li> <li>• Growth and Development</li> <li>• Transition from quantitative to qualitative indices</li> </ul>

## Semester II

<b>Course Title: OEC 2.3. 3: Business Environment:</b>	
Total Contact Hours: 42	Course Credits: 3
Formative Assessment Marks:40	Duration of ESA/Exam: 2½ hrs
Model Syllabus Authors:	Summative Assessment Marks: 60

**Course Pre-requisite(s):**

**Course Outcomes (COs):**

At the end of the course the student should be able to:

- i. Explain the elements of Business Environment.
- ii. Identify the environmental constraints in the growth of a business firm.
- iii. Analyze the ways to utilize the current environmental conditions to achieve higher business growth.

Unit	Content of Course:	42 Hrs
<b>I</b>	<b>Introduction to Business Environment:</b>	12
	<b>Chapter-1: Introduction:</b> <ul style="list-style-type: none"> <li>• Definition, Objectives, Importance of Business Environment.</li> <li>• Strategies of Business Environment</li> <li>• Business Environment Determinants</li> <li>• The Micro Environment of Business and The Macro Environment of Business.</li> </ul>	3
	<b>Chapter-2: Economic Environment:</b> <ul style="list-style-type: none"> <li>• Meaning of Economic Environment</li> <li>• Impact of Liberalization Privatization &amp; Globalization (LPG) on Indian Business Environment.</li> <li>• Monetary policy – Meaning and Objectives</li> <li>• Fiscal policy – Meaning and Objectives</li> <li>• EXIM policy – Meaning and Objectives</li> <li>• Industrial policy – Meaning and Objectives (Latest Policy Measures).</li> </ul>	6
	<b>Chapter-3: Global Business Environment:</b> <ul style="list-style-type: none"> <li>• Meaning</li> <li>• Globalization: Nature and Impact of Globalization</li> <li>• Challenges of International Business</li> <li>• WTO and its Implications on Indian Economy.</li> </ul>	3
	<b>Practicum</b> <ol style="list-style-type: none"> <li>1. Group discussion on WTO and its impact on Indian business</li> </ol>	
<b>II</b>	<b>Non-Economic Environment:</b>	10
	<b>Chapter-4: Social and Cultural Environment:</b> <ul style="list-style-type: none"> <li>• Business and Society</li> <li>• Social Objectives of Business</li> <li>• Corporate Social Responsibility</li> <li>• Consumer Rights &amp; Corporate Governance</li> <li>• Business Ethics</li> </ul>	4
	<b>Chapter-5: Technological Environment:</b> <ul style="list-style-type: none"> <li>• Meaning</li> </ul>	2

	<ul style="list-style-type: none"> <li>• Technological Changes – R &amp; D in India</li> <li>• Public and Private Investment in R and D.</li> </ul> <p><b>Chapter-6: Financial Environment:</b></p> <ul style="list-style-type: none"> <li>• Introduction and Meaning</li> <li>• An Overview of Indian Financial System</li> <li>• Financial Institutions and their Roles</li> <li>• Role of Foreign Direct Investment and its impact on Indian Business</li> </ul> <p><b>Practicum:</b> Students are expected to analyze the major economic and financial indicators such as GDP/BSE/NSE and submit the report .</p>	4
<b>III</b>	<b>Governance and Business in India:</b>	22
	<p><b>Chapter-7: Political Environment:</b></p> <ul style="list-style-type: none"> <li>• Introduction and Meaning</li> <li>• Political Environment and the Economic System</li> <li>• Provisions of Indian Constitution for Business</li> </ul> <p><b>Chapter-8: Legal Environment of Business:</b></p> <ul style="list-style-type: none"> <li>• Indian Company Law</li> <li>• Competition policy and law</li> <li>• Patents &amp; Trademarks</li> <li>• Industrial Policy- an overview</li> <li>• Labour Laws &amp; Social Security,</li> <li>• Environmental Laws.</li> </ul> <p><b>Chapter-9: Current Issues in Environmental Business:</b></p> <ul style="list-style-type: none"> <li>• Ease of Doing Business</li> <li>• Performance of MSMEs</li> <li>• Make in India</li> <li>• Development of Economic and Social Infrastructure</li> <li>• National Monetization Pipeline</li> </ul> <p>(The teacher should include the latest policy of the government)</p> <p><b>Practicum:</b> Students are expected to give a report on how the economic environment has affected the performance of any one of the large Indian Business Houses.</p>	4  8  10
	<p><b>REFERENCES:</b> Francis Cherunilam: Business Environment, Himalaya Publishing House, Mumbai. K. V. Sivayya and VBM Das: Indian Industrial Economy, Sulthan Chand Publications, Delhi. M. Adhikari: Economic Environment of Business, Sulthan Chand and Sons, New Delhi. Raj Agarwal: Business Environment, Excel Publications, New Delhi.</p>	

**Government of Karnataka**

**Model Curriculum**

Program Name	<b>BA in Economics</b>	Semester	<b>Third Semester</b>
Course Title	<b>Microeconomics</b>		
Course Code:	<b>DSC-3.1</b>	No. of Credits	<b>3</b>
Contact hours	<b>42 Hours</b>	Duration of SEA/Exam	<b>2 hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

<p><b>Course Outcomes (COs):</b> After the successful completion of the course, the student will be able to:</p> <p>CO1. Understand introductory economic concepts.          CO2. Recognize basic supply and demand analysis.          CO3. Recognize the structure and the role of costs in the economy.          CO4. Describe, using graphs, the various market models: perfect competition, monopoly, monopolistic competition, and oligopoly.          CO5. Explain how equilibrium is achieved in the various market models.          CO6. Identify problem areas in the economy, and possible solutions, using the analytical tools developed in the course.</p>	
<b>Contents</b>	<b>42 Hrs</b>
<b>Unit-1: Basics of Microeconomics</b>	
<p><b>Chapter:1 Exploring Microeconomics:</b> Nature and scope of economics – opportunity cost, scarcity, production possibility frontier - Market system as a way to organise economic activities, welfare state</p>	3
<p><b>Chapter:2 Supply and Demand:</b> Determinants of demand and supply; demand and supply schedules and; individual and market demand and supply; shifts in the demand and supply curves; Interaction of demand and supply; Equilibrium price and quantity</p>	3
<p><b>Practicum:</b></p> <ul style="list-style-type: none"> <li>➤ Reading and working with graphs</li> <li>➤ Estimation of elasticity and discussing its applications; solving problems to estimate the equilibrium price and quantity</li> </ul>	
<b>Unit -2: Consumption Decisions</b>	
<p><b>Chapter 3</b></p> <p><b>The Households:</b> Diminishing Marginal Utility; Indifference curves – Meaning and Properties; budget constraint; Satisfaction Maximization; income and substitution effects; choice between leisure and consumption.</p>	5
<p><b>Practicum:</b> Conducting a consumer survey to understand their tastes and preferences</p>	
<b>Unit -3: Production and Costs</b>	
<p><b>Chapter 4: The Firms:</b> Concept of firm and Industry; Production Function; Law of Variable Proportions; isoquant and isocost lines, cost minimizing equilibrium condition; Returns to Scale; Features of Cobb-Douglas Production Function</p>	5
<p><b>Chapter 5: Cost of Production:</b> Short run and long run costs; Returns to Scale.</p>	3
<p><b>Practicum:</b></p> <ul style="list-style-type: none"> <li>➤ Analysing reasons for diminishing marginal returns</li> </ul>	

➤ Examining the relationship between cost and output/ Deriving cost functions from output functions	
<b>Unit -4: Pricing</b>	
<b>Chapter 6: The Markets:</b> Meaning of Market Structure and Types; Pricing under perfect competition; Monopoly pricing and price discrimination; Monopolistic Competition – Features and Pricing; Oligopoly – Interdependence, Collusive and non-collusive oligopoly; Elements of Game theory	7
<b>Chapter 7: The Inputs (Factors):</b> Functional and Personal Income; Demand for and supply of factors; Marginal Productivity Theory of Distribution; Meaning and determinants of Rent, Wages, Interest and Profits	6
<b>Practicum:</b>	
<ul style="list-style-type: none"> <li>➤ Conducting Market Survey to identify the nature and features of markets for different goods/services</li> <li>➤ Understanding distribution of national income as factor incomes</li> </ul>	
<b>Unit -5: Welfare Economics</b>	
<b>Chapter 8: Welfare Economics:</b> Meaning of Welfare; Pigou’s Welfare Economics; Compensation principle; Impediments to attain Maximum Social Welfare; Externalities, Market Failure	6
<b>Practicum:</b> Examining day to day externalities and proposing solutions to them	
<b>Unit -6: Economics in Action</b>	
<b>Chapter 9: Economic Theory and Policy:</b> Pricing Practices; Basics of Monetary and Fiscal Policies; Controls and Regulations; Incentives and Penalties; Labour policies	4
<b>Practicum:</b> Analysis of latest budget of the Central Government; Review of terminology used in the latest Monetary Policy of the RBI

**Model Curriculum**

Program Name	<b>BA in Economics</b>	Semester	<b>Third Semester</b>
Course Title	<b>Mathematics for Economics</b>		
Course Code:	<b>DSC-3.2</b>	No. of Credits	<b>3</b>
Contact hours	<b>42 Hours</b>	Duration of SEA/Exam	<b>2 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

<b>Course Outcomes (COs):</b> After the successful completion of the course, the student will be able to:	
CO1.	Perform basic operations in Sets and functions and Matrix algebra.
CO2.	Calculate limits, derivatives of Economic functions and identify the nature of relationship.
CO3.	Calculate maxima and minima of function
<b>Contents</b>	
<b>Unit-1: Preliminaries</b>	
<b>Chapter:1 - Introduction to Mathematical Economics:</b> Nature and scope of mathematical economics- Role of mathematics in economic theory	4
<b>Chapter:2 - Number system and Set theory:</b> Types of Numbers: Natural Number, Real number, integers, Irrational Number, Complex Number. Concepts of sets- meaning –types- union of sets – interaction of sets.	4
<b>Chapter:3 - Functions:</b> Meaning of function- Types of functions: Linear and Non-linear Functions; Quadratic, Polynomial, Logarithmic and Exponential functions-	4
<b>Unit -2: Economic Functions, their Application and Matrices</b>	
<b>Chapter 4 Economic Functions:</b> Demand Function, Supply function, Production function, Cost, Revenue and Profit function, Consumption function	4
<b>Chapter-5: Applications of Functions:</b> Graph of Economic Functions, Market equilibrium; Equilibrium price and Quantity, Impact of specific tax and subsidy on market equilibrium	5
<b>Chapter-6: Matrices:</b> Definition and Types of Matrices- Matrix Operations: Addition, Subtraction and Multiplication, Transpose of a Matrix, Determinants of Matrix- Cramer’s Rule	5
<b>Unit -3: Differential Calculus and Its Applications</b>	
<b>Chapter 7- Limits:</b> Limits of functions, differentiation, rules of differentiation.	4
<b>Chapter 8 Derivatives of Economic functions:</b> Derivation of Marginal functions from total function-Marginal Production, Marginal cost, Marginal Revenue, Marginal Profit.	6
<b>Chapter 9 - Applications of Derivatives and Higher order derivatives:</b> Elasticity of Demand- Second order derivatives- Maxima and Minima of Economic function.	6

Program Name	<b>BA in Economics</b>	Semester	<b>Third Semester</b>
Course Title	<b>Rural Economics</b>		
Course Code:	<b>OE-3.1</b>	No. of Credits	<b>3</b>
Contact hours	<b>42 Hours</b>	Duration of SEA/Exam	<b>2 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

<b>Course Outcomes (COs):</b> After the successful completion of the course, the student will be able to:	
CO1. To Understand the basics of rural development,	
CO2. To study the characteristics, problems, and programmes of rural redevelopment	
CO3. To study the trends and patterns of economic activities in rural areas	
CO4. To study the role of infrastructural facilities and governance in rural development	
CO5. To enable the students to know about significance of rural enterprises and agricultural allied activities.	
<b>Contents</b>	<b>42 Hrs</b>
<b>Unit-1:</b>	<b>12 Hrs</b>
<b>Chapter:1 - Introduction to Rural Economy</b> Meaning and Objectives of Rural economy Characteristics of Rural Economy Indicators of Rural Development Concepts of inclusive and sustainable development	5
<b>Chapter:2 - Approaches to Rural Development</b> Gandhian Model Community Development Approach, Minimum Needs Approach, Integrated Rural Development and Inclusive Growth Approach.	4
<b>Chapter:3 - Poverty and Unemployment in Rural India</b> Meaning and Measurement of Poverty Causes of Poverty Farm and Non-farm employment Measurement and Types employment Review of Poverty Alleviation and Employment Generation Programmes in India.	5
<b>Practicum:</b>	
<ul style="list-style-type: none"> <li>• Field visit to nearby village and study the poverty situation</li> <li>• Field visit to village and study the employment pattern</li> <li>• Undertake evaluation study on employment generation programmes and prepare an assignment.</li> </ul>	
<b>Unit -2:</b>	<b>14 Hrs</b>
<b>Chapter 4- Rural Enterprises</b> Meaning and Importance, Classification of MSME Progress and Problems of MSME Khadi and Village Industries	5
<b>Chapter-5: Rural Banking and Finance</b> Credit Co-operative Societies Regional Rural Banks Role of NABARD Microfinance Institutions	4
<b>Chapter-6: Rural Infrastructure</b>	5

Educational and Health Infrastructure Housing and Sanitation Drinking Water Supply Rural Transport and Communication Rural Electrification	
<b>Practicum:</b>	
<ul style="list-style-type: none"> <li>• Write an assignment on Rural infrastructure</li> <li>• Write a small report on Rural Industry</li> </ul>	
<b>Unit -3:</b>	<b>14 Hrs</b>
<b>Chapter 7- Rural Development Programmes</b> Wage Employment Programmes Self-employment and Entrepreneurship Development Programmes Rural Housing Programmes Rural Sanitation Programmes	4
<b>Chapter 8 - Rural Markets</b> Meaning and Types of Rural Markets Defects and Government Measures for Removal of Defects in rural markets Co-operative Marketing Societies Meaning and Importance of Regulated Markets Digital Marketing(e-NAM)	5
<b>Chapter 9 - Rural Governance</b> Legislations powers, Functions, and sources of revenue of Panchayat Raj Institutions Role of NGOs in rural development People's participation in rural development	5
<b>Practicum:</b>	
<ul style="list-style-type: none"> <li>• Group Discussion on Rural Governance</li> <li>• Interview Gram Panchayat members and prepare brief note on their participation in rural development.</li> <li>• Undertake evaluation study on rural development programmes and prepare an assignment.</li> </ul>

Program Name	<b>BA in Economics</b>	Semester	<b>Third Semester</b>
Course Title	<b>Economics of Insurance</b>		
Course Code:	<b>OE-3.2</b>	No. of Credits	<b>3</b>
Contact hours	<b>42 Hours</b>	Duration of SEA/Exam	<b>2 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

<b>Course Outcomes (COs):</b> After the successful completion of the course, the student will be able to: CO1. Gain knowledge relating to the importance of the insurance in the life of human beings.	
<b>Contents</b>	<b>42 Hrs</b>
<b>Unit-1: Introduction to Economics of Insurance</b>	
<b>Chapter:1 - Fundamentals of Economics of insurance</b>	
<ul style="list-style-type: none"> <li>➤ Definition of insurance</li> <li>➤ Scope of economic of insurance</li> <li>➤ Importance of insurance</li> </ul>	
<b>Chapter:2 - The conceptual framework</b>	
<ul style="list-style-type: none"> <li>➤ Brief history of insurance</li> <li>➤ Perils and risks in insurance, Classification of risks hazards</li> <li>➤ How insurance works</li> <li>➤ Classes of insurance and assumptions</li> </ul>	
<b>Chapter:3 - Type of Insurance</b>	
<ul style="list-style-type: none"> <li>➤ Risk pooling and risk transfer in insurance</li> <li>➤ Social vs private insurance</li> <li>➤ Life vs non-life insurance</li> </ul>	
<b>Unit -2: Insurance Planning</b>	
<b>Chapter 4- Types of Insurance Planning</b>	
<ul style="list-style-type: none"> <li>➤ Wealth accumulation plan lifecycle planning</li> <li>➤ Planning for wealth accumulation</li> <li>➤ Tax advantage and tax non-advantage</li> </ul>	
<b>Chapter-5: Retirement Planning</b>	
<ul style="list-style-type: none"> <li>➤ Essential of individual retirement planning</li> <li>➤ Investing pension plan, basic principles of pension plans</li> <li>➤ Pension plans in India</li> </ul>	
<b>Chapter-6: General Insurance Structure</b>	
<ul style="list-style-type: none"> <li>➤ General Insurance, concept of General Insurance</li> <li>➤ Types of General Insurance, Marine Insurance, Motors Insurance, Agricultural Insurance</li> <li>➤ Fire Insurance, Personal Accident Insurance</li> </ul>	
<b>Unit -3: personal insurance / Health Insurance</b>	
<b>Chapter 7- Essential of Life and Health Insurance</b>	
<ul style="list-style-type: none"> <li>➤ Fundamentals of Life and Health Insurance, functions of Life and Health Insurance</li> <li>➤ Health Insurance and Economic Development, Insurance and Farmer Security</li> </ul>	
<b>Chapter 8 - Insurance Documentation</b>	
<ul style="list-style-type: none"> <li>➤ Health Insurance products, Health Insurance underwriting</li> <li>➤ Health Insurance claims</li> </ul>	
<b>Chapter 9 - Insurance Legislation</b>	
<ul style="list-style-type: none"> <li>➤ The insurance act, 1938- Registration- Accounts and Returns</li> </ul>	

- Investments -Limitation on expense of Management
- Regulation of Insurance, Insurance regulation in India, role and need of regulation, history of insurance regulation in India
- Insurance Reforms Development Authority (IRDA), performance of IRDA
- Indian Insurance in global platform, future potential in Indian Insurance Business

**Model Curriculum**

Program Name	<b>BA in Economics</b>	Semester	<b>Fourth Semester</b>
Course Title	<b>Macroeconomics</b>		
Course Code:	<b>DSC-4.1</b>	No. of Credits	<b>3</b>
Contact hours	<b>42 Hours</b>	Duration of SEA/Exam	<b>2 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

<b>Course Outcomes (COs):</b> After the successful completion of the course, the student will be able to:	
CO1.	Understand the Theories of National Income Accounting
CO2.	Explain the process of Consumption and Investment Functions
CO3.	Evaluate the Concept of Multiplier and Inflation
<b>Content of Theory</b>	
<b>42 Hrs</b>	
<b>Unit-1: Theory of National Income Determination</b>	
<b>14 Hrs</b>	
<b>Chapter:1 Classical Framework:</b>	
1. Typical Features of classical theory of employment; Assumptions	
2. Basis of Classical theory:	
➤ Say’s Law	
➤ Pigou’s wage price flexibility	
➤ Fisher’s Quantity theory of money	
➤ Knut Wicksell’s loanable funds theory	
➤ Classical dichotomy and neutrality of money	
3. Criticism of classical theory	
<b>7</b>	
<b>Chapter-2: The Keynesian Framework</b>	
1. Introductory: connecting growth of national income to development; why incomes of all fall or rise? Are income, output, and employment related?	
2. Some Basic concepts: The idea of equilibrium and identity; ex- ante and ex-post concepts.	
3. Aggregate Demand and its components	
<b>a.</b> Consumption function: Algebraic and Graphical explanation; Marginal and Average propensity to consume	
<b>b.</b> Investment function; savings and investment relationship.	
4. Aggregate Supply: Meaning and graphical explanation; Effective demand	
5. Determination of national income in Keynes’ two sector economy with Aggregate Demand and Aggregate Supply with fixed prices: Analytical /Graphical and algebraic explanation; numerical problems	
6. Determination of national income in Keynes’ two sector economy with investment and savings with fixed prices: Analytical / Graphical and algebraic explanation; numerical problems	
<b>7</b>	
<b>Unit -2: Aggregate Consumption and Investment</b>	
<b>15Hrs</b>	
<b>Chapter-3: Theories of Determinants of Consumption:</b>	
<b>5</b>	
1. Keynesian Psychological Law of consumption; determinants	
2. Permanent Income hypothesis of Milton Friedman	
<b>Chapter-4: Investment:</b>	
<b>5</b>	
1. Types of investment	
2. Determinants of investment:	
<b>a.</b> rate of interest	

<b>b.</b> marginal efficiency of capital: meaning and determinants;	
<b>Chapter-5: Concepts of Multiplier and Accelerator</b>	5
1. Investment Multiplier: Meaning and assumptions.	
2. multiplier; leakages;	
<b>Unit -3: Monetary Economics</b>	<b>13 Hrs</b>
<b>Chapter-6: Money Supply:</b>	5
1. Concept of Money Supply; recent measures of money supply as suggested by RBI	
2. Determinants of money supply:	
<b>a.</b> High powered money	
<b>b.</b> Money multiplier	
3. The reserve ratio and deposit multiplier	
<b>Chapter-7: Money demand:</b>	4
1. Cash transactions approach (only meaning) and	
2. Cambridge approach (Only Marshall's equation)	
3. The liquidity preference approach of Keynes	
<b>Chapter-8: Inflation and Unemployment:</b>	4
1. Phillips Curve	
2. Wage cut theory and employment

**Model Curriculum**

Program Name	<b>BA in Economics</b>	Semester	<b>Fourth Semester</b>
Course Title	<b>Statistics for Economics</b>		
Course Code:	<b>DSC-4.2</b>	No. of Credits	<b>3</b>
Contact hours	<b>42 Hours</b>	Duration of SEA/Exam	<b>2 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

<b>Course Outcomes (COs):</b> After the successful completion of the course, the student will be able to:	
CO1.	Understand the nature of Data and their presentation
CO2.	Calculate Descriptive statistics like measures of central tendency and dispersion
CO3.	Apply statistical techniques like correlation and regression in Economic analysis
<b>Content of Theory</b>	
	<b>42 Hrs</b>
<b>Unit-1: Preliminaries</b>	
	<b>12 Hrs</b>
<b>Chapter:1 Introduction to Statistics:</b> Meaning and Importance of Statistics, Functions of Statistics, Types of Statistics: Descriptive Statistics and Inferential Statistics-Variables; Qualitative Variable and Quantitative Variable	4
<b>Chapter-2:</b> Datatypes, Sources and Collection of Data: Qualitative and Quantitative Data - Cross Section Data, Time Series Data and Panel Data - Primary and Secondary sources of Data – Methods of Collecting Primary Data	4
<b>Chapter-3:</b> Tabulation and Presentation of Data: Classification and tabulation of data - Frequency distributions – Continuous and Discrete frequency distribution. Graphical presentation- Histogram- frequency polygon - Ogive Curves -Bar Diagram, Pie Chart	4
<b>Unit -2: Measures of Central Tendency and Dispersion</b>	
	<b>14 Hrs</b>
<b>Chapter-4: Arithmetic Average:</b> Definition of Central Tendency, Types of Central Tendency: Arithmetic Mean: Meaning and Properties of Arithmetic Mean – Computation of Arithmetic Mean	5
<b>Chapter-5: Positional Averages-Median and Mode:</b> Definition and importance of Median- Calculation of Median- Definition and importance of Mode - Calculation of Mode.	4
<b>Chapter-6: Dispersion:</b> Meaning of Dispersion- Measures of Dispersion- Range- Quartile deviation- mean deviation - Standard deviation - Coefficient of Variation and Their Computation	5
<b>Unit -3: Correlation, Regression and Time Series Analysis</b>	
	<b>16 Hrs</b>
<b>Chapter-7: Correlation:</b> Meaning of Correlation - Types of correlation - Methods of measuring Correlation- Karl Pearson’s correlation coefficients	5
<b>Chapter-8: Regression:</b> Meaning and Importance of Regression - Regression Equation - Estimation of regression equation - Applications of regression equation in Economics	6
<b>Chapter-9: Time Series Analysis:</b> Definition of Time Series – Components of Time Series – Estimation and Forecasting of Trend	5

Course Title	<b>Karnataka Economy</b>		
Course Code:	<b>OE 4.1</b>	No. of Credits	<b>3</b>
Contact hours	<b>42 Hours</b>	Duration of SEA/Exam	<b>2 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

<b>Course Outcomes (COs):</b> After the successful completion of the course, the student will be able to:	
CO1.	Understand the nature of economic growth and problems of Karnataka state.
CO2.	Explain the process of structural growth in Karnataka Economy
CO3.	Evaluate the policies and programmes undertaken by the Govt. of Karnataka for bringing about socio-economic development
<b>Contents</b>	
<b>42 Hrs</b>	
<b>Unit-1: Karnataka Economy – An overview</b>	
<b>12 Hrs</b>	
<b>Chapter:1 Characteristics of Karnataka Economy</b>	
<ul style="list-style-type: none"> <li>○ Features of Karnataka Economy</li> <li>○ Trends and sectoral distribution of State Domestic Product and Per Capita Income</li> <li>○ Measures to redress regional imbalances – Dr. Nanjundappa Committee Report, Article 371J</li> </ul>	5
<b>Chapter-2: Human Resources</b>	
<ul style="list-style-type: none"> <li>○ Human Resources: importance, Size and Health indicators</li> <li>○ Human Development Index</li> <li>○ Poverty and Unemployment– Eradication Programmes</li> </ul>	4
<b>Chapter-3: Natural Resources Management</b>	
<ul style="list-style-type: none"> <li>○ Natural Resources: Importance and volume of different natural resources</li> <li>○ Karnataka Environmental Policy</li> </ul>	3
<b>Practicum:</b> conduct field visit to Forest/Reservoir/Mining and prepare the report	
<b>Unit -2: Agriculture, Rural development, and Industries in Karnataka</b>	
<b>18 Hrs</b>	
<b>Chapter-4: Agriculture</b>	
<ul style="list-style-type: none"> <li>○ Problems in Agriculture</li> <li>○ Land Reforms</li> <li>○ Cropping Pattern</li> <li>○ Irrigation: importance, important irrigation projects and watershed development projects.</li> <li>○ Farmers Suicide – Causes and Solutions</li> </ul>	7

<b>Chapter-5: Rural Development</b> <ul style="list-style-type: none"> <li>○ Public Distribution System</li> <li>○ Rural Development Programmes (brief)</li> <li>○ Government Schemes for Rural Women</li> </ul>	4
<b>Chapter-6: Industries in Karnataka</b> <ul style="list-style-type: none"> <li>○ Major Industries in Karnataka - Problems and Prospects</li> <li>○ MSMEs - Problems and Measures</li> <li>○ IT Industries in Karnataka</li> <li>○ Industrial Finance in Karnataka</li> <li>○ Industrial Policy of Karnataka</li> </ul>	7
<b>Practicum:</b> visit to industrial units in local area and prepare the report/Trace-out the impact of Prof. D. M. Nanjundappa Committee report	
<b>Unit -3: Infrastructure and Finance in Karnataka</b>	<b>12 Hrs</b>
<b>Chapter-7: Economic Infrastructure</b> <ul style="list-style-type: none"> <li>○ Transportation: Road, Rail, Water and Air Transport</li> <li>○ Information and Communication Technology Facilities</li> </ul>	3
<b>Chapter-8: Social Infrastructure</b> <ul style="list-style-type: none"> <li>○ Drinking Water</li> <li>○ Housing and Sanitation</li> <li>○ Health and Education</li> <li>○ Rural Electrification</li> </ul>	4
<b>Chapter-9: State Finance</b> <ul style="list-style-type: none"> <li>○ Sources of Revenue: Direct and Indirect Taxes</li> <li>○ Impact of GST on Karnataka economy</li> <li>○ State Expenditure</li> <li>○ State Finance Commission</li> <li>○ Current State Budget (Brief)</li> </ul>	5
<b>Practicum:</b> Discussion on State budget

CBCS Question Paper Pattern for UG Semester

**DSC, DSEC & OEC**

Paper Code:		Paper Title:	
Duration of Exam	<b>2-30 Hours</b>	Max Marks	<b>60 Marks</b>
Instruction:	<b>Answer all the sections</b>		

**Part-A**

1. Answer <b><u>ALL</u></b> the following sub-questions, each sub-question carries <b>ONE</b> mark	(10X1=10)
A. B. C. D. . . J.	
<i>Note for Section-A: Three sub-questions from each unit and remaining one sub-question (J) from unit I to III.</i>	

**Part-B**

Answer any <b><u>FOUR</u></b> of the following questions, each question carries <b>FIVE</b> marks	(4X5=20)
2. 3. 4. 5. 6. 7.	
<i>Note for Section-B: Minimum Two question from each unit (Q No 2 to 6)</i>	

**Part-C**

Answer any <b><u>THREE</u></b> of the following questions, each question carries <b>TEN</b> marks	(3X10=30)
---	-----------

8.

9.

10.

11.

12.

**Note for Section-C: Minimum Two question from each unit (Q No 8 to 12) Sub-questions such as 'a' and 'b' may be given for a question in section-C only.**

## **Scheme of assessment for B.A Economics under CBCS-2019-2020**

### **Core and Discipline Specific Elective(DSE)** **Courses in Economics**

Semester I	Semester II
Core Economics I: Principles of Microeconomics-I	Core Economics II: Principles of Microeconomics-II
Semester III	Semester IV
Core Economics III: Principles of Macroeconomics-I	Core Economics IV: Principles of Macroeconomics-II
Semester V	Semester VI
Discipline Specific Elective I	Discipline Specific Elective II

One of the following:	One of the following:
i. DSE-1A : Economics of Development ii. DSE-1B : Money and Banking iii. DSE-1C :Environmental Economics	iv. DSE-1A: Indian Economy v. DSE -1B: Economic History of India 1857-1947 vi. DSE- 1C: Public Finance

### Generic Electives

Semester	Course Title	Remarks
V	GE-I Introduction to Economics	Benefits those students interested to study <i>Basic Economics</i> and <i>Indian Economy</i> irrespective of his / her programme
VI	GE-II Indian Economy	

### TEMPLATE Subject: ECONOMICS

Sem	Core			DSE			GE

## **Programme Outcome**

### **After completing the graduation in B A(HEG) the students are able to:**

- PO1. Critically recognizes the social, political, economic and cultural aspects of History.
- PO2. Demonstrate thinking skills by analyzing, synthesizing, and evaluating them in relation to their cultural and historical context.
- PO3. Correctly extracts evidence from primary sources by analyzing and evaluating them in relation to their cultural and historical context.
- PO4. Develop an informed familiarity with multiple cultures.
- PO5. Demonstrate critical reading, writing and thinking skills.
- PO6. Explain, graph, and analyze key economics models.
- PO7. Understand current events and evaluate specific policy proposals.
- PO8. To address problem that do not have clear economic solutions.
- PO9. Develop critical and quantitative thinking skills.
- PO10. Communicate effectively in written, oral and graphical form about specific issues.
- PO11. Apply economic analysis to everyday problems in real world situations.
- PO12. Understand and appreciate relationship between man and Environment
- PO13. Read, interpret, and generate maps and other geographic representations
- PO14. To extract, analyze, and present information from a spatial perspective
- PO15. Understand physical-geographic processes, global distribution of landforms and ecosystems
- PO16. The role of physical environment on human population
- PO17. Develop the ethical aptitudes and dispositions necessary to acquire and hold leadership positions in industry, government, and professional organizations.

### **Programme Specific Outcomes**

#### **On Completion of BA (HEG) students will:**

- PSO1. This Programme exerts its influence on life and destiny of Human beings.
- PSO2. It is a stepping stone for one's success in competitive examinations.
- PSO3. Understand the background of our religion, customs and Institutions and so on.
- PSO4. Understand the present Social, political, religious and economic conditions of the people.
- PSO5. Understand theoretical and practical aspects of Economics and Geography
- PSO6. Evaluate Economic behavior inconsonance with Geographical factors
- PSO7. Suggest the policy makers about desirable changes to be made in Micro and Macro Economic

issues based on geographical factors

PSO8. Gain ability to understand the economic problems in Geographical indicators

PSO9. Able to offer palatable solutions for economic and geographical challenges

PSO10. Attain Proficiency to analyze the economic decision of Government and non-Govt. entities that correlate with Geographical factors

PSO11. Gain requisite knowledge to evaluate land use pattern and demographical profile

PSO12. Apply GIS for understanding Market situation, Transport problem change in Weather Condition, Cropping Pattern, and Natural Calamities and so on

### **Programme Outcome**

#### **After completing the graduation in B A(HEP) the students are able to:**

PO1. Critically recognizes the social, political, economic and cultural aspects of History.

PO2. Demonstrate thinking skills by analyzing, synthesizing, and evaluating them in relation to their cultural and historical context.

PO3. Correctly extracts evidence from primary sources by analyzing and evaluating them in relation to their cultural and historical context.

PO4. Develop an informed familiarity with multiple cultures.

PO5. Demonstrate critical reading, writing and thinking skills.

PO6. Explain, graph, and analyze key economics models.

PO7. Understand current events and evaluate specific policy proposals.

PO8. To address problem that do not have clear economic solutions.

PO9. Develop critical and quantitative thinking skills.

PO10. Apply economic analysis to everyday problems in real world situations.

PO11. To extract, analyze, and present information from a spatial perspective.

PO12. Spread the messages of equality, nationality, social harmony and other human values.

PO13. Comprehend the basic structures and processes of government systems and/or theoretical underpinnings.

PO14. Analyze political problems, arguments, information, and/or theories.

PO15. Apply methods appropriate for accumulating and interpreting data applicable to the discipline of Political Science.

### **Programme Specific Outcomes**

#### **On Completion of BA (HEP) students will:**

PSO1. Critically recognize the social, political, economic and cultural aspects of History.

PSO2. Demonstrate thinking skills by analyzing, synthesizing, and evaluating historical information from multiple sources.

PSO3. Correctly extract evidence from primary sources by analyzing and evaluating them in relation to their cultural and historical context.

PSO4. Develop an informed familiarity with multiple cultures.

PSO5. Demonstrate critical reading, writing, and thinking skills.

PSO6. Explain, graph, and analyze key economics models.

PSO7. Understand current events and evaluate specific policy proposals.

PSO8. To address problem that do not have clear economic solutions.

PSO9. Develop critical and quantitative thinking skills.

PSO10. Communicate effectively in written, oral and graphical form about specific issues.

PSO11. Apply economic analysis to everyday problems in real world situations.

PSO12. Develop the ethical aptitudes and dispositions necessary to acquire and hold leadership positions in industry, government, and professional organizations.

## **Programme Outcome**

### **After completing the graduation in B A(KEP) the students are able to:**

PO1. Develop human values and a sense of social service

PO2. Become a responsible and dutiful citizen.

PO3. Able to enhance critical temper and creative ability

PO4. Apply economic analysis to everyday problems in real world situations.

PO5. Explain, graph, and analyze key economics models.

PO6. Understand current events and evaluate specific policy proposals.

PO7. To address problem that do not have clear economic solutions.

PO8. Develop critical and quantitative thinking skills.

PO9. Apply economic analysis to everyday problems in real world situations.

PO10. To extract, analyze, and present information from a spatial perspective.

PO11. Spread the messages of equality, nationality, social harmony and other human values.

PO12. Comprehend the basic structures and processes of government systems and/or theoretical underpinnings.

PO13. Analyze political problems, arguments, information, and/or theories.

PO14. Apply methods appropriate for accumulating and interpreting data applicable to the discipline of Political Science.

## **Programme Specific Outcomes**

### **On Completion of BA (KEP) students will:**

PSO 1: Know more specific terminologies along with its etymology.

PSO2: Know the changes in the differences in formation of society and their culture

PSO3: Help to understand different races, Society, and culture.

PSO4. Understand theoretical and practical aspects of Economics and Geography

PSO5. Evaluate Economic behavior inconsonance with Geographical factors

PSO6. Suggest the policy makers about desirable changes to be made in Micro and Macro Economic issues based on geographical factors

PSO7. Act as a stepping stone for one's success in competitive examinations

PSO8. Create appropriate and efficient Historians, Political Leaders, administrators and

man

State's

PSO9. Educate about patriotism toleration and National Integration.

### **Programme Outcome**

### **After completing the graduation in B A(KEG) the students are able to:**

PO1. Develop human values and a sense of social service

PO2. Become a responsible and dutiful citizen.

PO3. Able to enhance critical temper and creative ability

PO4. Apply economic analysis to everyday problems in real world situations.

PO5. Explain, graph, and analyze key economics models.

PO6. Understand current events and evaluate specific policy proposals.

PO7. To address problem that do not have clear economic solutions.

PO8. Develop critical and quantitative thinking skills.

PO9. Apply economic analysis to everyday problems in real world situations.

PO12. Understand and appreciate relationship between man and Environment

PO13. Read, interpret, and generate maps and other geographic representations

PO14. To extract, analyze, and present information from a spatial perspective

PO15. Understand physical-geographic processes, global distribution of landforms and ecosystems

PO16. The role of physical environment on human population.

### **Programme Specific Outcomes**

### **On Completion of BA (KEG) students will:**

PSO 1: Know more specific terminologies along with its etymology.

PSO2: Know the changes in the differences in formation of society and their culture

PSO3: Help to understand different races, Society, and culture.

PSO4. Understand theoretical and practical aspects of Economics and Geography.

PSO5. Evaluate Economic behavior inconsonance with Geographical factors.

PSO6. Suggest the policy makers about desirable changes to be made in Micro and Macro Economic issues based on geographical factors.

PSO7. Act as a stepping stone for one's success in competitive examinations.

PSO8. Gain ability to understand the economic problems in Geographical indicators.

PSO9. Able to offer palatable solutions for economic and geographical challenges.

PSO10. Attain Proficiency to analyze the economic decision of Government and non- Govt. entities that correlate with Geographical factors.

PSO11. Gain requisite knowledge to evaluate land use pattern and demographical profile.

PSO12. Apply GIS for understanding Market situation, Transport problem change in Weather Condition, Cropping Pattern, and Natural Calamities and so on.

## **Programme Outcome**

### **After completing the graduation in B A(HEE) the students are able to:**

PO1. Critically recognize the social, political, economic and cultural aspects of History.

PO2. Demonstrate thinking skills by analyzing, synthesizing, and evaluating historical information from multiple sources.

PO3. Correctly extract evidence from primary sources by analyzing and evaluating them in relation to their cultural and historical context.

PO4. Develop an informed familiarity with multiple cultures.

PO5. Demonstrate critical reading, writing, and thinking skills.

PO6. Explain, graph, and analyze key economics models

PO7. Understand current events and evaluate specific policy proposals

PO8. To address problem that do not have clear economic solutions

PO9. Develop critical and quantitative thinking skills

PO10. Communicate effectively in written, oral and graphical form about specific issues

PO11. Apply economic analysis to everyday problems in real world situations

PO12. Write focused, organized, well-developed, and text-based essays using effective paragraphs.

PO13. Support a clear thesis statement, and demonstrate competence in Standard English Language and usage.

PO14. Write articles, novels, stories to spread the messages of equality, nationality, social harmony and other human values.

PO15. Acquire the ability to engage in independent and life-long learning in a broader context about socio-technological and demographic changes.

PO16. Develop and carry out research projects, and locate, evaluate, organize, and incorporate information effectively.

### **Programme Specific Outcomes**

#### **On Completion of BA (HEE) students will:**

PSO1. Demonstrate thinking skills by analyzing, synthesizing, and evaluating historical information from multiple sources.

PSO2. Correctly extract evidence from primary sources by analyzing and evaluating them in relation

to their cultural and historical context.

PSO3. Develop an informed familiarity with multiple cultures.

PSO4. Demonstrate critical reading, writing, and thinking skills.

PSO5. Explain, graph, and analyze key economics models.

PSO6. Understand current events and evaluate specific policy proposals.

PSO7. To address problem that do not have clear economic solutions.

PSO8. Develop critical and quantitative thinking skills.

PSO9. Communicate effectively in written, oral and graphical form about specific issues.

PSO10. Apply economic analysis to everyday problems in real world situations

PSO11. Write and edit clear, graceful, grammatically correct prose.

PSO12. Analyse numerical data and utilize database for multi-layered storytelling.

PSO13. Demonstrate preparation for an entry-level position in the profession through a portfolio exhibiting their work.

**ELE21021/22/26/23/24**

**V Semester**  
**DSE-1A: Economics of Development**

**Course outcomes**

On completion of the Course, students will:

CO1. Learn in depth Understand the concept of Economic development and factors affect Development.

CO2. Deliberate in details with examples Differentiate Economic development and growth.

CO3. Identify the characteristics of Demographic Trends.

CO4. Specify in depth Harrod -Domar Growth Model.

CO5. Understand the classification and characteristics of Endogenous Growth theory.

CO6. Identify the details of Poverty Eradication Measures.

CO7. Deliberate in depth Amartya Sen and Bhagavathi Debate.

**Course Description:**

This course reviews major trends in aggregate economic indicators of economic development, factors in economic development and theories of economic development and growth

**I Economic Development:**

**18**

Economic Development –Meaning-definition- Concept of Sustainable Development and

Inclusive Development-Economic Growth and Development-Factors affecting Development-Indicators of Economic Development-National Income, Per capita Income, Basic needs approach- PQLI-HDI-GEM-MDPI-Happiness Index.

- II Factors in Economic Development: 12**  
Capital Formation: Meaning and Importance-Capital Output Ratio- Physical Capital – Technology-Human Capital-Demographic Transition-Institutional factors.
- III. General Theories of Economic Growth 15**  
Adam Smith, Karl Marx and Schumpeter’s Theories of Economic Development. Harrod-Domor Growth Model-Rastow’s Growth Theory.
- IV. Partial Theories of Economic Growth and Development: 12**  
Arthur Lewis- Labour Surplus Model. Big push Theory-Theories of Dualistic Development-Balanced v/s Unbalanced Theories- Endogenous Growth Theory.
- V. Economic Growth and Distributive Justice: 18**  
Economic Growth and Social Justice: Poverty- Meaning, Types, Causes and Measures. Poverty Eradication Measures-Unemployment- Meaning, Types, Causes and Measures. Measures to reduce Unemployment. Occupational Structure-Organized and Unorganized Sector (with reference to India) Amartya Sen- Bhagavathi Debate.

**ELE21121/22/26/23/24**

**V Semester**  
**DSE-1B: Money and Banking**

**Course outcomes**

On completion of the Course, students will:

- CO1. Understand the characteristics of Demand for Money.
- CO2. Specify the classification and characteristics of Capital Market.
- CO3. Deliberate the details of Theories of Interest.
- CO4. Learn the classification and characteristics of Functions of Commercial bank.
- CO5. Understand the characteristics of Indian Banking System.
- CO6. Learn the characteristics of Evaluation and Functions of Central bank.
- CO7. Deliberate the details of Monetary Policy.

**Course Description:**

This course exposes students to the theory and functioning of the monetary and financial sectors of the economy. It highlights the organization, structure and role of financial markets and institutions. It also discusses interest rates, monetary management and instruments of monetary control, financial and banking sector reforms and monetary system with special reference to India.

- I. Money :** **12**  
Concept, Meaning and Definitions, Classifications of Money Functions and its Classification- Importance of Money. Demand for Money and determinants. Supply of money and determinants. Theories of Value of Money- Fisher's and Quantity Theory of Money.
- II. Money Market and Capital Market:** **15**  
Money Market-Meaning-Structure and Instruments-Characteristics of a Good Money Market. Capital Market- Meaning-Structure and Instruments. Difference between Money Market and Capital Market.
- III. Interest Rates:** **14**  
Rate of Interest-Meaning-Structure-Functions-short term and Long Term Interest. Theories of Interest rate Determination-Liquidity Theory of Interest- Don Pankin Theory-Interest rate in India.
- IV Commercial Banks & NBFCs:** **16**  
a) Commercial Banks-Functions-Role-Balance Sheet-*Credit Creation*.  
b) Indian Banking System-NBFCs: Concept-Structure-Functions-Banking sector reforms, Changing role and structure.
- v. Central Banking and Monetary Policy:** **18**  
a) Central Bank-Evolution and Functions of Central Bank.  
b) RBI and its role in the Development of Banking System in India- RBI and Monetary Policy. Credit control Instruments.

### **V Semester**

### **DSE-1C: Environmental Economics**

#### **Course outcomes**

On completion of the Course, students will:

- CO1. Deliberate in details with examples Pareto Optimality.
- CO2. Understand the details of Market failure and Externalities.
- CO3. Understand in details with examples Implementation of Environmental Policy
- CO4. Identify in details with examples Economics of climate change
- CO5. Specify the details of Cost- benefit analysis of Environmental policies.
- CO6. Deliberate the characteristics of Sustainable Development.
- CO7. Identify the details of Environmental Valuation Methods and Application.
- CO8. Specify in depth Perspectives from Indian experience.

#### **Course Description:**

This course introduces students to concepts, methods and policy options in managing the environment using tools of economic analysis. Since several environmental problems are caused by economic activity, for instance, carbon emissions, over-harvesting of renewable resources and air and water pollution as a by-product of industrial activity. This course examines different approaches to adjusting behavior through economic institution such as markets and incentives.

#### **I. Introduction:**

**15**

Key environmental issues and problems, economic way of thinking about these problem, basic concepts from economics; Pareto optimality and market failure in the presence of externalities; property rights and other approaches.

#### **II. Economics of Natural Resources:**

**14**

Economics of Natural Resources: Types-Importance: Traditional-Natural Resources-Renewable and Non-Renewable Resources: Property Resources; Economics of Climate Change-Meaning-Causes and Effects.

- III. The Design and Implementation of Environmental Policy: 16**  
 Overview, Pigouvian taxes and effluent fees, tradable permits, implementation of environmental policies in India and international experience; trans-boundary environmental problems:
- IV. Environmental Valuation Methods and Applications: 14**  
 Valuation of Environmental goods and services-theory and practice; measurement methods; Direct and Indirect Application: Travel Cost Method-Cost-benefit analysis: Contingent Method.
- V. Sustainable Development: 14**  
 Concepts: measurement; Agriculture Sustainable Development; Industrial Sustainable Development: Rural Sustainable Development; Perspectives from Indian experience.

**ELE21321/22/26/23/24**

**V Semester**  
**GE-I Introduction to Economics**

**Course outcomes**

On completion of the Course, students will:

CO1. Analyze Micro Economic issues and Scarcity, Choice & Production Possibility Curve.

CO2. Understand Law of demand, determinants of demand.

CO3. Gain knowledge about Law of Supply, determinants of Supply and Equilibrium of demand & supply.

CO4. Have insight into Production function: Law of variable proportion.

CO5. Clarify the meaning & Types of various Cost Concepts and Revenue Concepts.

CO6. Understand to various classification of Market.

- I. Introduction: 08**

Economics-Meaning, Definitions-Need for the study: Micro and Macro Economics-Meaning-Importance and Limitations: Basic Problems of an Economy: Problem of Choice: Production Possibility Curve.

- II. Theories of Demand and Supply: 07**  
Demand: Meaning-Law of Demand: Exception of the Law of Demand: Factors determining Demand, Supply-Meaning-Law of Supply, Factors determining Supply.
- III. Production, Cost and Revenue Analysis: 08**  
Production Function-returns to scale-Law of Variable Proportions; Cost Concepts-Short run and Long run Cost Curves; Revenue Concept-TR,AR and MR.
- IV. Market Structure: 07**  
Market-Meaning and Types of Market: Perfect Competition Market-Meaning-Features, Monopoly and Oligopoly-Features.

**ELF21021/22/26/23/24**

**VI Semester**  
**DSE-1A : Indian Economy**

**Course outcomes**

On completion of the Course, students will:

- CO1. Understand the characteristics of Indian Agricultural policies.
- CO2. Identify the classification and characteristics of Regional variation.
- CO3. Write down the classification and characteristics of New Industrial Policy.
- CO4. Specify in depth Public and Private Sector.
- CO5. Identify in depth Monetary Policy.
- CO6. Understand in depth FDI and WTO.
- CO7. Learn in details with examples Public Debt.
- CO8. Identify the details of Effects of Parallel Economy.

**Course Description:**

This course examines sector-specific trends in key indicators and their implications in the post-Independence period.

- I. Indian Agriculture: Policies and Performance 14**

Introduction to Indian Economy-Role of Agriculture in India-Agriculture development-Agriculture-Production and Productivity-Agriculture Credit-Agriculture Labour-Agriculture Pricing and Marketing-Land Reforms-Regional Variation. National Agricultural Policy.

- II. Indian Industries: Policies and Performance** **15**  
Role of Industries in India-Importance and Problems of Large Scale and MSMEs in India. Private Sector and Public Sector Industries-Disinvestment Policy. New Industrial Policy. Development of IT Industries.
- III. Development of Service Sector In India** **16**  
a) Growth of Service Sector in India: Trends and Issues. Health and Education .  
b)Role of commercial banks in Indian economy; Reserve Bank of India and Monetary policy; Reforms in the Banking sector(Narasimmam committee only)
- IV. India's Foreign Trade: Trends and Policies** **13**  
Composition, directions, Trends in India's Foreign Trade. FDI and MNCs. WTO and India's Foreign Trade. Balance of Trade, Balance of Payments. Trade Liberalization. EXIM Policy
- V. Indian Public Finance** **17**  
Revenue and expenditure of central and state governments; India's public debt; deficit financing; financial relations between central and state; parallel economy-meaning, causes, extent and consequences; measures to control it. Concept of Demonetisation.GST-Current Year Union Budget

**DSE-1B: Economic History of India 1857-1947**

**Course outcomes**

On completion of the Course, students will:

CO1. Learn in depth Indian Economy in the pre -British period.

CO2. Specify in depth Estimation of National Income in India.

CO3. Identify the characteristics of Agriculture markets and Institutions- credit.

CO4. Understand in details with examples Evaluation of Entrepreneurial and Industrial Structure.

CO5. Learn the details of Government and Fiscal policy.

**Course Description:**

This course analyses key aspects of Indian economic development during second half of British rule and investigates the place of Indian economy in the wider colonial context. This course links directly to the course on India's development after independent in 1947.

- I. Introduction: Colonial India: Background and Introduction** **15**  
Overview of colonial Economy: Meaning of Colonialism: British Rule and Exploitation of India-The British Rule and India's Underdevelopment-State Policies and Economic Underdevelopment: Colonial Exploitation: forms and Consequences: Colonialism and Modernization: Nature of Indian Economy.
- II. Macro Trends:** **16**  
National Income: Estimates in India-Trends, Limitations. Population: Size and Growth Rate: Demographic Transition: Causes and Measurement of Rapid Growth of Population Occupational Structure: Occupational distribution of Labour Force in India: Historical Experience of Structural Change.
- III. Agriculture:** **17**  
Agrarian structure: Productivity and Efficiency: land relations; Cropping Patten-Irrigation: Agricultural markets and institutions-Credit. Commerce and technology; trends in performance and productivity; famines.
- IV. Railway and Industry:** **13**  
Railways; the de-industrialization debate; evolution of entrepreneurial and industrial structure; Nature of industrialization in the interwar period; constraints to industrial breakthrough; labor relations.
- v. Economy and State in the Imperial Context:** **14**  
The imperial priorities and the Indian economy; drain of wealth; international trade, Capital, flows and the colonial economy- changes and continuities; government and fiscal policy.

| b) Public Expenditure-Principles of Public Expenditure and Wagner's Law of Increasing state Activities.  |           |
| c) Public Debt-Meaning-Causes-Burden and Redemption.   |           |
| <b>IV. Issues In Indian Public Finance:</b>  | <b>16</b> |
| a) Working of monetary and fiscal policies   |           |
| b) Current Issues of Indian Tax System.  |           |

- c) Central and State financial Relations.
- d) State and Local Finance.

**V. Budget:**

**14**

Classification of Budgets: Programme performance budget; Budgetary deficits-Revenue and fiscal deficits; Zero based budgeting; Fiscal policy-meaning, objectives and Instruments

**ELF21422/22/26/23/24**

**VI Semester**  
**GE-II Indian Economy**

**Course outcomes**

On completion of the Course, students will:

- CO1. Identify in details with examples Human Resource.
- CO2. Learn the characteristics of Population policy.
- CO3. Identify the details of Role of Agriculture.
- CO4. Understand the details of Rural Development.
- CO5. Understand in depth Disinvestment.
- CO6. Deliberate the classification and characteristics of Foreign Trade.

**I. Introduction :**

**10**

Features of Indian Economy; Concepts of National Income -GNP-NNP-GDP-NDP- Percapita Income-Disposable Income- Green GDP; of Population Explosion: India's Population Policy; Poverty: Definition; Poverty and Inequality; Poverty Alleviation Schemes; Unemployment: Definition and Types: Employment Guarantee Schemes(MGNREGA).

**II. Agriculture Sector:**

**08**

Role of Agriculture; Cropping Pattern-Land Reforms-Green Revolution- Food Security; Sources of Agricultural Credit-Co-Operatives Banks, Regional Rural Banks, NABARD, Commercial

Banks; Agricultural Marketing-Problems and remedies; Agriculture and WTO.

**III. Industry and Tertiary Sector:**

**12**

Role of Industries; Industrial Policy since 1991; MSMEs-Role and Problems; Large Scale Industries; Disinvestment in Public Sector undertakings: Emergence of IT Industry.

Role of Commercial Banks in Indian Economy; Reserve Bank of India: Functions and Credit Control Methods: Reforms in the Banking Sector (Narasimham Committee only): Foreign Trade- Trends, Composition, directions of Trade-India's Balance of Payments; Foreign Exchange Rate.

## **Bachelor of Science with Electronics as one of the optional subject**

### **Eligibility Criteria:**

A candidate who has passed the two year Pre-University Examination with Science Subjects conducted by the Pre-University Board of Education, Government of Karnataka or any other examination considered equivalent by the University is eligible for admission to the first Semester of the UG program

### **Programme Outcome (Under NEP)**

After completing the graduation in the Bachelor of Science the students are able to:

PO1	Acquire the knowledge of Basic and Advanced topics related to the field of Electronics
PO2	Apply the knowledge of Logic thinking and basic Science for solving Electronics related problems.
PO3	Ability to perform Electronics Experiments and analyse and interpret data.
PO4	Ability to design and manage Electronic Systems or Processes that conforms to a given specification within ethical and economic constraints.
PO5	Ability to identify, formulate, solve and analyse the problems in various sub disciplines of Electronics.
PO6	Ability to use Modern Tools/Techniques in solving problems in the field of Electronics..

### **Programme Specific Outcome (Under NEP)**

## **Bachelor of Science with Electronics as one of the optional subject**

PSO1	Find career opportunities.
PSO2	Develop competence to write competitive examinations.
PSO3	Develop proficiency in the analysis of complex physical problems.
PSO4	Create a hypothesis and appreciate how it relates to broader theories.
PSO5	Demonstrate skills in the use of Computers for control, data acquisition, and data analysis in experimental investigations.
PSO6	Apply appropriate troubleshooting techniques to Electronic circuits / systems and perform test procedures

## **Programme Outcome (Under CBCS)**

### **Bachelor of Science in Physics, Mathematics, Electronics**

PO1	Apply mathematical problems and solutions in aspects of science and technology.
PO2	Gain experience to investigate the real world problems.
PO3	Apply mathematical ideas and models to problems.
PO4	Apply appropriate troubleshooting techniques to electronic circuits / systems and perform test procedures.
PO5	Assist, Assemble, modify and test electronic circuits in accordance with job requirements.
PO6	Communicate effectively in technical and non-technical environments.

## **Programme Specific Outcome (Under NEP)**

### **Bachelor of Science in Physics, Mathematics, Electronics**

PSO1	Use mathematical or other appropriate techniques to solve complex physical problems
PSO2	Demonstrate skills in the use of Computers for control, data acquisition, and data analysis in experimental investigations.
PSO3	PSO7: Apply knowledge of Physics, Mathematics and Electronics fundamentals to the solve problems in Electronic circuits & communication systems.
PSO4	PSO8: Apply appropriate troubleshooting techniques to Electronic circuits / systems and perform test procedures

### Scheme of Evaluation:

- **The evaluation weightage for theory papers in DSC, DSE and OE courses**

Course	Theory			Total
	C1	C2	C3	
DSC	20	20	60	100
DSE	20	20	60	100
OE	20	20	60	100

- **Scheme for C1 and C2 Evaluation for Theory component of DSC/DSE/OE**

Sl. No.	Activity	C1	C 2
1	Test	10 marks	10 marks
2	Seminar/Book Review/Report on Data Sheets of Electronic Components, etc.		10 marks
3	Assignment/Mini Project Work/Case Study/ Report on Industry Visit, etc.,	10 marks	
<b>Total</b>		<b>20 marks</b>	<b>20 marks</b>

### **Scheme of Evaluation for Practicals**

- The evaluation weightage for Practicals in DSC, DSE courses:

Course	Practicals				Total
	C1	C2	Record	C3	
DSC	10	10	05	25	50
DSE	10	10	05	25	50

- The student will be evaluated on the basis of skill, comprehension, and recording the results
- The student has to compulsorily submit the practical record for evaluation during C1, C2, and C3.
- A candidate appearing for the first time should submit a duly signed and certified practical record.

- **Scheme of assessment of C3 component in Practical Examination**

Division	Marks
Experiment	17
Viva	03

**Scheme for Experiment Part assessment in Practical Examination**

Division	Marks
Write up of the experiment - Circuit diagram , Tabular column, formula & Nature of Graph	05
Circuit connections	05
Taking and Recording Readings	04
Calculations and Plotting of Graph	02
Accuracy of Result	01
<b>TOTAL</b>	<b>17</b>

## Scheme for Examination and Assessment

Course type	IA C1		IA C2		SEE C3		Exam duration	
	Th	Pr	Th	Pr	Th	Pr	Th	Pr
DSE	15	7.5	15	7.5	70	35	3h	3h
SEC	7.5	-	7.5	-	50	-	2h	

### **SCHEME OF VALUATION FOR PRACTICAL EXAMINATION**

- A candidate appearing for the first time should submit a duly signed and certified practical record
- Each candidate has to perform one experiment in the specified duration of two hours for **THIRY FIVE marks**
- Practical record has to be valued for **FIVE marks** by examiners at the time of examination
- IA for **FIFTEEN marks** in practical is awarded by two tests in the lab

Sl no	Component	Marks
1	Program Writing	10
2	Entering /Coding	10
3	Execution	05
4	Practical record	05
5	Viva	05
<b>TOTAL</b>		<b>35</b>

**JSS COLLEGE OF ARTS, COMMERCE & SCIENCE, MYSURU**

**Pattern of Question Paper for DSC/DSE/OE**

Time: 2.30 Hours

Max. Marks: 60

1. Answer any **TEN** of the following.

10 x 2 = 20

- a)
- b)
- c)
- d)
- e)
- f)
- g)
- h)
- i)
- j)
- k)
- l) .

6 + 4 = 10

2. a) Long answer type question for 6 marks  
b) Short answer type question or Numericals for 4 marks

**OR**

- 3 a) Long answer type question for 6 marks  
b) Short answer type question or Numericals for 4 marks

6 + 4 = 10

- 4 a) Long answer type question for 6 marks  
b) Short answer type question or Numericals for 4 marks

**OR**

- 5 a) Long answer type question for 6 marks  
b) Short answer type question or Numericals for 4 marks

6 + 4 = 10

- 6 a) Long answer type question for 6 marks  
b) Short answer type question or Numericals for 4 marks

**OR**

- 7 a) Long answer type question for 6 marks  
b) Short answer type question or numerical for 4 marks

6 + 4 = 10

- 8 a) Long answer type question for 6 marks  
b) Short answer type question or Numericals for 4 marks

**OR**

- 9 a) Long answer type question for 6 marks  
b) Short answer type question or Numericals for 4 marks

6+4 =10

## Curriculum Contents

### Semester- I - Electronic Devices and Circuits

Program Name	<b>BSc in Electronics</b>	Semester	<b>First Semester</b>
Course Title	<b>Electronic Devices &amp; Circuits (Theory)</b>		
Course Code:	<b>FSA 440</b>	No. of Credits	<b>4</b>
Contact hours	<b>60</b>	Duration of SEA/Exam	<b>2.30hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

#### Course Objectives:

The objectives of the Course are to enable the student to understand

1. Principle of operation of passive components
2. Basics principles of network theorems
3. Analysis of Electronic circuits
4. Construction, operation and applications of semiconductor diode, BJT and special Purpose devices
5. Number systems, Boolean laws and methods of simplifications of Boolean expressions

#### Course Outcomes:

At the end of this course, students will be able to-

1. Explain the principles and behaviour of basic semiconductor devices.
2. Analyse basic networks using network theorems.
3. Apply the concepts to realize the circuits. As per the requirement
4. Build simple electronic circuits used in various applications
5. Evaluate the critical internal parameters of semiconductor devices for the given standard device models.
6. Demonstrate the working of analog and digital circuits as per the specifications

#### Unit - 1

**Electronic Components:** Passive components – R, L, and C, and their properties, V-I relation, mutual and self-inductance, Transformer and its working, Definition and list of Active components, Concept of Voltage and Current Sources, Electric Energy and Power. (Qualitative only).

**Network Theorems:** KCL, KVL and node analysis of circuits, Superposition, Thevenin's, Norton's, Maximum Power Transfer, and Reciprocity Theorems, inter-conversion between Thevenin's and Norton equivalent circuits, (For Circuits with DC Source)

**Network Analysis:** DC and AC analysis of RC and RL circuits, RLC Series and Parallel Resonant Circuits.

**PN-junction Diode:** Ideal and practical diodes, Formation of Depletion Layer, mention of diode equation, I-V characteristics, DC load line, Static and Dynamic resistance, Zener diode and its IV Characteristics, Reverse saturation current, Zener and avalanche breakdown.

**Rectifiers:** Half-wave and Full-wave centre-tap and bridge rectifiers, expressions for output voltage, PIV, ripple factor and efficiency, Operation with and without shunt capacitor filter. (Relevant Numericals wherever applicable). **15 Hours**

## Unit - 2

**Applications of Diode:** Clippers, Clampers and Voltage Multipliers (Qualitative analysis only)

**Voltage Regulator:** Block diagram of regulated power supply, Zener diode as voltage regulator – circuit diagram, load and line regulation, Fixed and Variable IC Voltage Regulators (78xx, 79xx, LM317).

**Special Semiconductor Devices:** Construction, working principle, characteristics, symbol and applications of Varactor diode, Schottky diode, and Tunnel diode, Solar Cell.

**Display Devices:** Construction, working principles, characteristics, symbol, and applications of LED and LCD, operation of 7-segment display, common anode and common cathode type 7-segment display. ( Relevant Numericals wherever applicable) **15 Hours**

## Unit - 3

**Bipolar Junction Transistor:** Construction and working of NPN transistor, CE, CB and CC configurations (mention only), Input and Output characteristics of a transistor in CE mode - Regions of operation of BJT (active, cut off and saturation), leakage currents (mention only), Current gains  $\alpha$ ,  $\beta$  and their inter-relations, dc load line and Q point.

**Applications of Transistor:** Circuit and working principles of Transistor as an amplifier and switch.

**Transistor Biasing:** Fixed and Voltage Divider Bias. Thermal runaway, mention of stability and stability factor, Transistor as a two-port network, h-parameter equivalent circuit for CE configuration.

**Amplifier:** Small signal analysis of single-stage CE amplifier using h-parameters, Frequency Response, Input and Output impedances, Current and Voltage gain.

**Multi-stage Amplifiers:** Types of coupling of amplifiers, Two-stage RC Coupled Amplifier – circuit, working and its Frequency Response, loading effect, GBW product.

**Power Amplifiers:** Class A, B and C Power Amplifiers (qualitative). ( Relevant Numericals wherever applicable) **15 Hours**

## Unit - 4

**Number System:** Decimal, Binary, Octal and Hexadecimal number systems, base conversions. Representation of signed and unsigned binary numbers, Binary arithmetic - addition, subtraction by 1's and 2's complement method, BCD code (8421, 2421, Excess-3), Gray code - Gray to binary interconversion, parity error checking, single-bit error correction codes.

**Boolean Algebra:** Constants, variables, operators, SOP and POS form, canonical form, conversion form SOP to POS and Vice-versa, Boolean laws, Duality Theorem, De Morgan's Theorem.

**Logic gates:** AND, OR, NOT, Derived logic gates (NAND, NOR, XOR & XNOR). Universal property of NOR and NAND gates. Simplification and realization of Boolean expressions using gates. ( Relevant Numericals wherever applicable) **15 Hours**

## Electronic Devices and Circuits -Practicals

Program Name	<b>BSc in Electronics</b>	Semester	<b>First Semester</b>
Course Title	Electronic Devices & Circuits <b>(Practicals)</b>		
Course Code:	<b>FSA 443</b>	No. of Credits	<b>2</b>
Contact hours	<b>60</b>	Duration of SEA/Exam	<b>3 hours</b>
Formative Assessment Marks	<b>25</b>	Summative Assessment Marks	<b>25</b>

### PART - A

1. Verification of Thevenin's, Norton's, and Maximum Power Transfer Theorems
2. Study the I-V Characteristics of p-n junction and Zener diodes.
3. Study of Half and full wave rectifiers without and with shunt capacitor filter and to find the Ripple factor for different values of load resistance.
4. Study of Zener diode as a voltage regulator using bridge rectifier with shunt capacitor filter and to find the Load and Line regulation.
5. Study of clipping and clamping circuits.

### PART – B:

6. Study of Transistor characteristics in CE configuration – determination of h-parameters.
7. Study of Voltage divider bias circuits.
8. Study of single stage CE amplifier and to draw its frequency response and to determine the input and output impedances in mid-band.
9. Study of Series and Parallel Resonance circuits.
10. Verification of truth tables of OR, AND, NOT, NAND, NOR, XOR and XNOR gates using Respective ICs and Realization of basic gates using universal gates.
11. Binary to Gray and Gray to Binary code conversion and parity checker using XOR IC 7486.

## Open Electives Course – 1.1

### Fundamentals of Electronics and Domestic Wiring

Program Name	<b>BSc in Electronics</b>	Semester	<b>First Semester</b>
Course Title	Fundamentals of Electronics and Domestic Wiring		
Course Code:	<b>FSA 860</b>	No. of Credits	<b>3</b>
Contact hours	<b>48</b>	Duration of SEA/Exam	<b>3 hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

#### Course Objectives

The objectives of the Course are to enable the student to understand

1. Ability to gain the knowledge of basic electronics and electronic components.
2. Ability to analyse various components behaviour in AC and DC circuits.
3. Ability to get the knowledge of electrical wiring and safety precautions.
4. Provide students with learning experiences that develop broad knowledge and understanding of key concepts of electrical and electronics.
5. Provide students with skills that enable them to get employment in various organisations, industries, and turn as entrepreneurs.

#### Unit – 1:

**12 Hours**

**Introduction to Electronics:** Evolution of Electronics, Definition and expression for of Charge, Current, Voltage, Potential Difference, Power, Energy. Coulombs Law, Ohm's Law.

**Electronic Components:** Definition and list of passive and active components.

**Resistors:** Definition, application, and mention of types of resistors, colour coding of resistors, series and parallel combinations.

**Capacitors:** Definition, application and mention of types capacitors, series and parallel combinations, factors affecting capacitance, colour coding of capacitors.

**Inductors:** Definition, application, and mention of types of inductors, series and parallel combinations. Self and mutual inductance, factors affecting inductance.

#### Unit – 2:

**12 Hours**

**Kirchhoff's laws:** KCL and KVL, voltage divider rule and current divider rule, open and short circuits.

**Network Theorems (DC analysis only):** Thevenin's theorem, Norton's theorem and maximum

Power transfer theorem, Superposition Theorem (Qualitative Approach with statements and steps involved in solving) as applied to simple T-network.

**DC power supplies:** Block diagram and working, Applications.

**Cells and Batteries:** Primary and Secondary cells, Mention of types of batteries, series and parallel combination of batteries.

**Lead Acid Battery:** Construction, Internal resistance, Efficiency and capacity of a battery, condition of a fully charged and discharged lead acid battery.

### **Unit – 3:**

**12 Hours**

**A. C. Fundamentals:** Definition and waveform of ac signal. Definition of Amplitude, Frequency, Time period, RMS value, average value, Phase and phase angle difference of sinusoidal signal. Sinusoidal signal applied to resistor, capacitor and Inductor, waveforms and phasor diagram for each. Expression for capacitive and inductive reactance. Circuit diagram and working of series and parallel resonance circuits, expression for resonance frequency.

**Transformers:** Definition, construction, working principle and application, step-up and step-down transformers.

### **Unit – 4:**

**12 Hours**

**Domestic Wiring:** Introduction, Types of Domestic Wiring, Cleat Wiring, Wooden/PVC Casing and Capping Wiring, Toughened Rubber Sheath (TRS or CTS) or Batten Wiring, Conduit Wiring, Specifications of Wires, Size of Conductor, Distribution Board, Types of Cables, Lighting Control Circuits, Earthing System, Fuses and HRC Fuses, Calculation of Fuse Rating.

**Switches:** Definition and application of switch, Brief note on SPST, SPDT, DPST and DPDT, electromagnetic relay, MCB, ELCB, RCCB, Toggle switch, push button, joystick, selector, limit, proximity switches.

### **Reference Books:**

1. C L Wadhwa, "Basic Electrical Engineering," 4th Edition, New Age International Publisher, 2007.
2. Robert Boylestad, "Introductory circuit analysis," 5th edition, PHI, 2010.  
Robert Boylestad and Louis Nashelsky, "Electronic Devices and circuit theory," 9th Edition, PHI, 2013.
3. B. L. Theraja and A. K. Theraja, "ABC of Electrical Engineering," S Chand Publishers, New Delhi, 2014.
4. S. K. Bhattacharya, "Basic Electrical and Electronics Engineering," Pearson Education India, 2012.

## Open Electives Course -1.2

### Domestic Equipment Maintenance

Program Name	BSc in Electronics	Semester	First Semester
Course Title	Domestic Equipment Maintenance		
Course Code:	FSA 870	No. of Credits	3
Contact hours	48 Hours	Duration of Exam	2 ½ Hours
Formative Assessment Marks	40	Summative Assessment Marks	60

*Note: This Course is for candidates who have not opted Electronics as one of the Core Courses.*

#### Course Objectives:

The objectives of the course are

1. To enable the students to understand the working principle of domestic equipments.
2. Identify the common faults that occur in the domestic equipment.
3. Able to carry out minor repairs in the equipments.
4. Understand the technical specifications of the equipments.

#### Unit 1

12 Hrs

##### Unit-1

**Microwave Oven:** Working, parts, Common faults and their troubleshooting: Microwave does not heat, runs then stops, buttons do not work, plate do not spin, bulb does not turn ON during operation, sparking inside, shuts OFF after few seconds. Demonstrate the working of microwave oven.

**Geyser:** Construction and working, parts and types. Common faults and their trouble shooting: Dripping geyser overflow, overheating, steam or hot water escaping from overflow, water leaking through the ceiling, no hot water, water not hot enough, poor hot water pressure. Demonstrate the working of Geyer.

#### Unit 2

12 Hrs

**Induction Cooker:** Construction and working, parts and types. Common faults and their trouble shooting: Cooker fuse blown, cooker buttons not working, cook top shuts off while cooking, food not get cooked or heated properly, overheating and uneven heating, display keep flashing, weird noises, crackling, fan noise, humming sound, clicking. Demonstrate the working of induction cooker.

#### Unit 3

12 Hrs

**Refrigerator:** Working, electrical wiring diagram, types of refrigerator. Common faults and their troubleshooting: Fridge not cooling, fridge not defrosting, leaking water, freezing food light not working, freezer is cooled but fridge stays warm, dead refrigerator, not enough cooling, keeps running, leakage, makes noise. Replacement procedure for: seal (gasket), evaporator fanmotor, PTC relay, thermostat, compressor, bulb. Demonstrate the working of refrigerator.

**Unit 4**

12 Hrs

**Air Conditioner:** Working, electrical wiring diagram, types. Common Faults and their troubleshooting: Faults in following parts of AC: Filter, thermostat, refrigerant leaks, breakers, capacitors, compressor, evaporator coils, condenser coils, warm contactor. General faults : AC unit has an odour, shuts ON and OFF repeatedly, does not blow cold air, repeatedly tripping a circuit breaker, indoor unit is leaking water inside the room, outdoor unit is making an unusually loud sound, room is not getting cold enough, AC not turning ON. Demonstrate the working of air conditioner.

## Semester- II - Analog and Digital Electronics

Program Name	<b>BSc in Electronics</b>	Semester	<b>Second Semester</b>
Course Title	Analog and Digital Electronics ( <b>Theory</b> )		
Course Code:	<b>FSB440</b>	No. of Credits	<b>4</b>
Contact hours	<b>60</b>	Duration of SEA/Exam	<b>2.30hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

### Course Objectives:

The objectives of the Course are to enable the student to understand

1. Principle of operation active devices like, BJT, FET, Op-Amp, UTJ, SCR, etc.,
2. Understand different applications of op-amp.
3. Analysis of Electronic circuits.
4. Construction, operation and applications oscillators.
5. Digital Logic Families and their comparison.
6. Understand, analyse and simply combinational and sequential digital logic circuits.

### Course Outcomes

At the end of this course, students will be able to

1. Explain the working principles of semiconductor devices like JFET, MOSFET, UJT, SCR, Diac and Triac.
2. Design and build the circuits to understand the applications of op-amp.
3. Demonstrate and understand the working of combinational and sequential logic circuits

### Unit – 1:

**15 Hours**

**JFET:** Construction, working, Symbol, and I-V characteristics of p-channel and n-channel JFET, mention of different parameters and their relation in JFET, Comparison of BJT and JFET.

**MOSFET:** Construction, working, Symbol, drain and transfer characteristics of E-MOSFET, D-MOSFET, VMOS, UMOS. MOS Logic and its switching action, NMOS Inverter, CMOS and its characteristics, CMOS logic, Circuit and working of CMOS inverter, Construction and working of IGBT. Comparison of MOSFET, CMOS, and IGBT.

**UJT:** Construction, working, Symbol, I-V characteristics, equivalent circuit and parameters of UJT. Mention of equivalent circuit and I-V characteristics, working principles of UJT based Relaxation Oscillator.

**SCR:** Construction, working, Symbol, I-V characteristics, and two-transistor equivalent circuit of SCR, working principles of half-wave and full-wave controlled rectifiers.

**Diac and Triac:** Construction, working, Symbol, I-V characteristics and applications of Diac and Triac. Working principle of Triac as an AC-voltage controller.

(Relevant Numericals wherever applicable)

## Unit – 2

15 Hours

**Operational Amplifier:** Basics of Differential Amplifier, Block diagram of Op-Amp, Characteristics of an Ideal and Practical Op-Amp, Open and closed loop inverting and non-inverting amplifiers, concept of virtual ground, Derivation for voltage gain, definition and expression for op-amp parameters – input/output impedance, offset voltage, CMRR, Slew Rate, Frequency Response.

**Applications of Op-amp:** Concept of feedback, negative and positive feedback, advantages of negative feedback (Qualitative Study). Inverting and non-inverting amplifiers, Summing and Difference Amplifier, Differentiator, Integrator, Comparator, and Zero-crossing detector.

**Filters:** Definition and types of filter, active versus passive filters, First and Second order active low pass, high pass and band pass Butterworth filters.

**Oscillators:** Definition and working principle of oscillator, concept of negative feedback, Barkhausen criterion for sustained oscillations, Colpitt's and crystal oscillators, RC-Phase Shift and Wien-bridge oscillator (no derivation for each)

**IC 555 Timer:** Introduction, Block diagram, Circuit diagram and working of Astable and Monostable multivibrator circuits. (Relevant Numericals wherever applicable)

## Unit – 3

15 Hours

**Logic Families:** Pulse characteristics, Logic Families- classification of digital ICs. Characteristics of logic families, circuit description of TTL NAND gate with totem pole and open collector. TTL IC terminology, CMOS NAND Logic, comparison of TTL and CMOS families.

**Combinational Logic Circuits:** Minimisation techniques using K-maps - SOP and POS, Minterm, Maxterm, SSOP, SPOS, Simplification of Boolean expressions, K-Map for 3 and 4 variables.

**Arithmetic Logic Circuits:** Half Adder, Full Adder, Half Subtractor, Full Subtractor, 4 – bit parallel binary adder, 2 – bit and 4 – bit magnitude comparator.

**Encoder and Decoder:** Decimal to BCD priority encoder. Decoders: - 2:4 decoder using AND gates, 3:8 decoder using NAND gates, BCD to decimal decoder, BCD to 7-Segment decoder.

**Multiplexer and Demultiplexer:** 4:1 and 8:1 multiplexer, 1:4 and 1:8 demultiplexer, Realization of Full adder and Full Subtractor using Multiplexer and Decoder.

**DAC and ADC:** DAC with binary weighted resistor and R-2R resistor ladder network, Successive approximation based ADC and the mention of their performance characteristics.

(Relevant Numericals wherever applicable)

#### **Unit – 4**

**15Hours**

**Sequential Logic Circuits:** SR Latch, RS, D and JK Flip-Flops. Clocked (Level and Edge Triggered) Flip-Flops. Pre-set and Clear operations. Race-around conditions in JK Flip-Flop. Master- Slave JK and T Flip-Flops. Applications of Flip-Flops in semiconductor memories, RAM, ROM and types.

**Shift Registers and Counters:** Types of Shift Registers - Serial-in-Serial-out, Serial-in-Parallel-out, Parallel-in-Serial-out and Parallel-in-Parallel-out Shift Registers (4-bits only), Synchronous verses asynchronous counters, Ring and Johnson counters, 4-bit ripple counter, modulo-n counters, 4-bit Up-Down counter, 4-bit Synchronous counter, design of Mod 3, Mod 5 and decade Counters using K-maps.

## Analog and Digital Electronics –Practicals

Program Name	<b>BSc in Electronics</b>	Semester	<b>Second Semester</b>
Course Title	Analog and Digital Electronics ( <b>Practicals</b> )		
Course Code:	<b>FSB 443</b>	No. of Credits	<b>2</b>
Contact hours	<b>60</b>	Duration of SEA/Exam	<b>3 hours</b>
Formative Assessment Marks	<b>25</b>	Summative Assessment Marks	<b>25</b>

### **PART- A**

1. Study the JFET characteristics and obtain the frequency response and calculate band width of single stage JFET amplifier.
2. Study of inverting and non-inverting amplifier, adder, Subtractor, and averaging amplifier using Op-amp
3. Study of differentiator and integrator using op-amp for different input waveforms.
4. Design and study Colpitt's and RC phase shift oscillator using op-amp.
5. Obtain the frequency response of first order low-pass and high-pass filters using op-amp.
6. Study of Astable and Monostable multivibrators using IC 555 timer.

### **PART- B**

1. Study of Half and Full Adder, half and full Subtractor using NAND gates.
2. Study of 4 - bit parallel binary adder and Subtractor using IC.
3. Study of Clocked RS, D and JK Flip-Flops using NAND gates.
4. Study of BCD to decimal decoder using IC, Encoders and priority encoders.
5. Study of Multiplexer and Demultiplexer using ICs.
6. Study of 4-bit asynchronous counter using JK Flip-Flop.
7. Study of 4-bit Shift Register – SISO, modification to ring counter using IC.
8. Study of Digital to Analog Converter using binary weighted resistor method

## Open Electives Course -2.1

### Fundamentals of Semiconductor Devices

Program Name	<b>BSc in Electronics</b>	Semester	<b>Second Semester</b>
Course Title	Fundamentals of Semiconductor Devices		
Course Code:	<b>FSB 860</b>	No. of Credits	<b>3</b>
Contact hours	<b>48</b>	Duration of SEA/Exam	<b>2.30 hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

#### Course Objectives:

The objectives of the Course are to enable the student to understand

1. Ability to gain the knowledge of Semiconductors devices.
2. Ability to get the applications of semiconductor devices.
3. Provide students with learning experiences that develop broad knowledge and understanding of semiconductor devices and its applications.

#### Unit – 1

**12 Hours**

**Introduction to Semiconductors:** Structure of a matter, conductors, insulators and semiconductors with examples to each, Energy band diagrams, intrinsic and extrinsic semiconductors. Definition of doping, dopant, donor, and acceptor, p-type and n-type semiconductors and their comparisons.

**Diode:** Construction, working, symbol, I-V characteristics and mention of application of pn junction diode. Ideal versus practical diodes, mention of different types of diodes and their symbolic representations.

**Zener Diode:** Construction, working, symbol, I-V characteristics and mention of application of zener diode, Zener and avalanche breakdown.

**LED:** Construction, working, symbol, and mention of application of LED, seven segment display and its applications.

#### Unit – 2

**12 Hours**

**Rectifiers:** Circuit diagrams, working and waveforms of half wave, full wave center tap and bridge rectifiers. Mention of ripple factor and efficiency to each.

**Filters:** Definition of filter, circuit diagram and working of rectifiers with and without shunt capacitor filter. Mention of ripple factor with and without filter.

**Voltage Regulator:** Definition and applications, Circuit diagram and working of zener diode, voltage regulator, load and line regulation. Block diagram of regulator power supply and its applications.

**Wave-shaping Circuits:** circuit diagram and working of positive, negative clippers and clampers.

### **Unit – 3:**

**12 Hours**

**BJT:** Construction, working principle, symbol of NPN bipolar junction transistor, Mention of CE, CB, CC configurations, Definition of  $\alpha$ ,  $\beta$  and their interrelations, Characteristics of a transistor in CE mode. Circuit diagram and working principle of transistor as a switch.

**JFET:** Construction, working principle, symbol of N channel FET, Difference between P and N channel FET, comparison of FET with BJT.

**MOSFET:** Construction, working and symbol of depletion type and enhancement type MOSFET.

### **Unit – 4**

**12 Hours**

**Transistor Biasing:** Need for biasing, DC load line, operating point. Circuit diagram and working of Voltage divider bias circuit.

**Amplifier:** Circuit diagram and working of single stage CE amplifier, frequency response, definition of gain, bandwidth, lower and higher cut-off frequency, application of amplifiers. Block diagram and working of Multistage amplifier and expression for gain.

**Oscillator:** Definition and concept of positive and negative feedback, Barkhausen's criterion for sustained oscillation, Circuit diagram and working of RC phase shift oscillator using transistor.

### **Reference Books:**

1. Robert Boylestad, "Introductory circuit analysis," 5th edition, PHI, 2010.
2. Robert Boylestad and Louis Nashelsky, "Electronic Devices and circuit theory," 9<sup>th</sup> Edition, PHI, 2013.
3. B. L. Theraja and A. K. Theraja, "ABC of Electrical Engineering," S Chand Publishers, New Delhi, 2014.
4. R.S. Sedha, "A Text book of Electronics," S Chand and Co., Multicolour, 3<sup>rd</sup> edition, 2012.

## Open Elective Course -2.2

### Renewable Energy and Energy Harvesting

Program Name	<b>BSc in Electronics</b>	Semester	<b>Second Semester</b>
Course Title	Renewable Energy and Energy Harvesting		
Course Code:	<b>FSB 870</b>	No. of Credits	<b>3</b>
Contact hours	<b>48</b>	Duration of SEA/Exam	<b>2.30 hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

#### Course Objectives

The objectives of the course are

1. To enable the students to understand the importance of non-conventional energy systems
2. Understand the method of energy harvesting using solar energy, wind energy, hydroenergy, etc.
3. Know the principle of operation of piezoelectric effect and its use in energy harvesting
4. Get the knowledge on electromagnetic energy harvesting methods

#### Unit-1

**Fossil fuels and Alternate Sources of energy:** Fossil fuels and nuclear energy, their limitation, need of renewable energy, non-conventional energy sources. An overview of developments in Offshore Wind Energy, Tidal Energy, Wave energy systems, Ocean Thermal Energy Conversion, solar energy, biomass, biochemical conversion, biogas generation, geothermal energy tidal energy, Hydroelectricity. **(12 Hours)**

#### Unit-2

**Solar energy:** Solar energy, its importance, storage of solar energy, solar pond, non-convective solar pond, applications of solar pond and solar energy, solar water heater, flat plate collector, solar distillation, solar cooker, solar green houses, solar cell, absorption air conditioning. Need and characteristics of photovoltaic (PV) systems, PV models, equivalent circuits, and sun tracking systems. **(12 Hours)**

#### Unit-3

**Wind Energy harvesting:** Fundamentals of Wind energy, Wind Turbines and different electrical machines in wind turbines, Power electronic interfaces, and grid interconnection topologies.

**Ocean Energy:** Ocean Energy Potential against Wind and Solar, Wave Characteristics, and Statistics, Wave Energy Devices. Tide characteristics and Statistics, Tide Energy Technologies,

Ocean Thermal Energy, Osmotic Power, Ocean Bio-mass.

**Geothermal Energy:** Geothermal Resources, Geothermal Technologies. (12 Hours)

#### **Unit-4**

**Hydro Energy:**Hydropower resources, hydropower technologies, environmental impact of hydro power sources.

**Piezoelectric Energy harvesting:**Introduction, Physics and characteristics of piezoelectric effect, materials and mathematical description of piezoelectricity, Piezoelectric parameters and modelling piezoelectric generators, Piezoelectric energy harvesting applications.

**Electromagnetic Energy Harvesting:**Linear generators, physics mathematical models, recent applications.(12 Hours)

#### **Reference Books:**

## Open Elective Course -2.3

### PCB Design and Fabrication

Program Name	BSc in Electronics	Semester	Second Semester
Course Title	PCB Design and Fabrication		
Course Code:	FSB 865	No. of Credits	3
Contact hours	48 Hours	Duration of Exam	2.30 Hours
Formative Assessment Marks	40	Summative Assessment Marks	60

**Note: This Course is for candidates who have not opted Electronics as one of the Core Courses.**

#### Course Objectives:

1. The obj Understand basics of PCB designing.
2. Apply advance techniques, skills and modern tools for designing and fabrication of PCBs.
3. Apply the knowledge and techniques to fabricate Multilayer, SMT and HDI PCB.
4. Understand concepts of Packaging.

#### Unit 1

12 Hrs

**Introduction to Printed circuit board:** Fundamental of electronic components, basic electronic circuits, Basics of printed circuit board designing: Layout planning, general rule sand parameters, ground conductor considerations, thermal issues, check and inspection of artwork.

**Design rules for PCB:** Design rules for Digital circuit PCBs, Analog circuit PCBs, high frequency and fast pulse applications, Power electronic applications, Microwave applications..

#### Unit 2

12 Hrs

**Introduction to Electronic design automation (EDA) tools for PCB designing:** Brief Introduction of various simulators, SPICE and PSPICE Environment, Selecting the Components Footprints as per design, Making New Footprints, Assigning Footprint to components, Net listing, PCB Layout Designing, Auto routing and manual routing. Assigning specific text (silkscreen) to design, creating report of design, creating manufacturing data (GERBER) for design.

#### Unit 3

12 Hrs

**Introduction to printed circuit board production techniques:** Photo printing, film- master production, reprographic camera, basic process for double sided PCBs photo resists, Screen printing process, plating, relative performance and quality control, Etching machines, Solders alloys, fluxes, soldering techniques, Mechanical operations

<b>Unit 4</b>	12 Hrs
<p><b>PCB design for EMI/EMC:</b> Subsystem/PCB Placement in an enclosure, Filtering circuit placement, decoupling and bypassing, Electronic discharge protection, Electronic waste; Printed circuit boards Recycling techniques, Introduction to Integrated Circuit Packaging and footprints, NEMA and IPC standards,</p> <p><b>PCB Technology Trends:</b> Multilayer PCBs. Multi wire PCB, Flexible PCBs, Surface mount PCBs, Reflow soldering, Introduction to High-Density Interconnection (HDI) Technology</p>

## Semester – III - Programming in C and Digital Design using Verilog

Program Name	BSc in Electronics	Semester	Third Semester
Course Title	Programming in C and Digital Design using Verilog( <b>Theory</b> )		
Course Code:	FSC440	No. of Credits	4
Contact hours	60	Duration of SEA/Exam	2.30hours
Formative Assessment Marks	40	Summative Assessment Marks	60

### Course objectives:

After completing the course, students will be able to:

- Familiarize the difference constructs of Verilog HDL.
- Understand Verilog tasks and directives.
- Impart the concepts of Verilog HDL, Dataflow and behavioural models for the design of digital systems.
- Learn C language features and realize its importance with Verilog HDL.

### Unit I

**15 Hours**

**Over view of Digital design with Verilog HDL:** Evolution of CAD, emergence of HDLs, typical HDL-flow, Need of Verilog HDL, trends in HDLS.

**Hierarchical Modeling Concepts:** Top-down and bottom-up design methodology, Differences between modules and module instances, parts of a simulation, design block, Stimulus block.

**Basic concepts:** Lexical Conventions, data types, system tasks and Compiler Directives.

**Modules and Ports:** Module definition, port declaration, connecting the ports, hierarchical name referencing

### Unit II

**15 Hours**

**Gate level modeling:** Modeling using basic Verilog gate primitives, Description of OR, AND and NOT basic gates, rise, fall and turn- off delays, min, max and typical delays.

**Data flow modeling:** Continuous assignments, delay specifications, expressions, operators, operands, operator types.

**Behavioral Modeling:** Structured procedures, initial and always, blocking and delay control, event control, conditional statements, multi way branching, loops. non-blocking statements, delay control, event control, conditional statements, multi way branching, loops

### Unit - III

**15 Hours**

#### Basics of C Programming

**Overview of C:** Developing programs in C, Parts of simple C program (Sample C programs), structure of a C program, Programming Style, character Set, C tokens , keywords & Identifiers, constants, variables , data types.

**Operators and Expressions:** Arithmetic, relational, logical, assignment, increment & decrement, conditional, bitwise special operators, Arithmetic expressions, Expression evaluation-Precedence and associativity, type conversions.

**Input–Output:** Non-formatted and formatted inputs and out-put function and library functions

#### **Unit - IV**

**15 Hours**

**Decision making, branching & looping:** if, if-else, nested if, nested if-else, switch, while, for, do-while, special control statement-goto, break, continue, return and exit.

**Arrays and Strings:** Array declaration, initialization & types of arrays (one-dimensional & two-dimensional), declaring and initializing string variables, Reading strings from terminal, Writing strings to screen, Arithmetic operations on characters, Putting strings together, comparison of two strings, String-handling functions, Table of strings.

#### **Course outcomes**

At the end of the course the students will be able to:

- Understand the importance of digital design using Verilog.
- Understand the designing of digital circuits using various modelling concepts.
- Understand the basic concepts of C language and write C programs for various mathematical operations.

#### **Text Books:**

1. Samir Palnitkar, “Verilog HDL: A guide to digital design and synthesis”, Pearson Education, second edition.
2. Nazeish M Botros, “HDL Programming Fundamental: VHDL and Verilog”. 2009 reprint, Dream tech press.
3. E. Balaguruswamy, “Computing Fundamentals, and C Programming”, 2<sup>nd</sup> Edition.

#### **Reference Books:**

1. Donald E. Thomas, Philip R. Moorby, “The Verilog Hardware Description Language”, Springer Science+Business Media, LLC, Fifth edition.
2. Michael D Ciletti, “Advanced Digital Design with the Verilog HDL”, person (prentice Hall), second edition.
3. Padmanabhan, Tripura Sundari, “Design through Verilog HDL.” Wiley, 2016 or earlier.
4. Cyril P.R., “Fundamentals of HDL”, Pearson/Sanguine 2010.
5. Yashavant Kanetkar, “Let us C”, 18<sup>th</sup> edition Authentic guide to “C” programming language

## Semester – III Programming in C and Digital Design using Verilog-Practicals

ProgramName	<b>BScin Electronics</b>	Semester	<b>Third Semester</b>
CourseTitle	<b>Programming in C and Digital Design using Verilog (Practical)</b>		
CourseCode:	<b>FSC443</b>	No. of Credits	<b>2</b>
Formative Assessment Marks	<b>25</b>	Summative Assessment Marks	<b>25</b>
<b>Note: Minimum of 5 programmes to be written and executed in each section</b>			

### Section –A:DigitalDesign Using Verilog

- 1) Realization of gates using verilog.
- 2) Simplification of Boolean expressions and realization using verilog.
- 3) Realize Adder/Subtractor (Full/Half) circuits using Verilog dataflow description.
- 4) Realize the following code converters using verilog.
  - a) Gray to Binary and vice-versa.
  - b) Binary to excess 3andvice-versa.
- 5) To realize 4-bit ALU using verilog.
- 6) To realize using verilog description: 8:1 multiplexer, 8:3encoder.
- 7) To realize using Verilog description: 1:8 Demultiplexer, 3:8decoder.
- 8) To realize using Verilog description flip flops:
  - a) JK-type (b)SR type(c) T-type(d)D-type.
- 9) To realize counters: Up/down (BCD & Binary )using Verilog description.
- 10) Modeling of Universal shift registers.

### Section-B:Listof C–Programs

- 1) Programme to perform arithmetic operation (Addition orsubtraction).
- 2) Programme to read radius of a circle and find area and circumference of circle.
- 3) Programme to read three numbers and find the biggest of three (using nested-if).
- 4) Programme to calculate factorial of a given number.
- 5) Programme to read percentage of marks and to display appropriate message.
- 6) Programme to check for prime number.
- 7) Programme to generate n-primes.
- 8) Programme to find roots of quadratic equation (Demonstration of switch case statement).
- 9) Programme to read and display matrix elements.
- 10) Programme to read and display array elements.
- 11) Find the gross salary of an employee
- 12) Remove all vowels from a string

## Open Elective Course -3.1

### Fundamentals of Electronics

Program Name	BSc in Electronics	Semester	Third Semester
Course Title	Fundamentals of Electronics		
Course Code:	FSC 860	No. of Credits	3
Contact hours	48 Hours	Duration of Exam	2 ½ Hours
Formative Assessment Marks	40	Summative Assessment Marks	60

*Note: This Course is for candidates who have not opted Electronics as one of the Core Courses.*

#### Course Objectives:

After completing the course, students will be able to:

- Identify the basic electronic components and their applications
- Design simple electronic circuits

#### Unit 1

16Hrs

**Passive Components:** Overview of passive components-Fabrication, Types, colour coding, and applications. **Transformer:** Principle, construction and working, turn ratio, Types of transformers (Step up and Step down)

**Semiconductors :** Intrinsic and extrinsic semiconductors.

**Diodes:** P-N Junction theory, V-I Characteristics, Rectifiers, Clippers, and Clampers (Qualitative analysis only).

**Special diodes:** Zener diode, LED and LDR; Construction, working and applications.

#### Unit 2

16 Hrs

**Bipolar Junction Transistor (BJT):** Physical structures, modes of operations, characteristics. Transistor as an amplifier, RC-Coupled amplifier, Darlington pairs, Transistor as a switch.

**Field Effect Transistor (FET):** Physical structures and modes of operations, Characteristics.

**Electronic Instruments:** Ammeter, Voltmeter- design and construction, analog millimeter, Digital millimeter, function generator (Qualitative analysis only). Cathode Ray Tube (CRT), Cathode Ray Oscilloscope (CRO)-Block diagram.

**Digital fundamentals:** Binary numbers, signed binary numbers, binary to decimal and Decimal to Binary conversion, Binary additions, and Subtractions,

**Logic gates:** AND, OR and NOT gates.

#### Unit 3

16Hrs

### Component and Device Applications:

To design and Construct at least Ten of the following circuits.

1. V-I characteristics of semiconductor diode.
2. V-I characteristics of Zener diode. Determination of breakdown voltage.
3. V-I characteristics of LED. Determination of Cut-in voltage.
4. Characteristics of LDR.
5. Half wave rectifier; with and without filter. Determination of ripple factor.
6. Full wave rectifier (Centre tap/Bridge); with and without filter, determination of ripple factor.
7. Zener diode voltage regulator; determination of line and load regulation
8. Clipping circuits; Positive clipper, Negative Clipper, Biased positive and negative clippers. Trace the input and output waveforms.
9. Clamper circuits: Positive clamper, Negative Clamper. Trace the input and output waveforms.
10. Input and output characteristics of a transistor in Common Emitter configuration, determine the current gain  $\beta$ .
11. Input and output characteristics of a transistor in common base configuration, determine the current gain  $\alpha$ .
12. Transistor as a switch.
13. Construct RC coupled amplifier. Plot the frequency response curve and determine the bandwidth.
14. V-I Characteristics of Common Source (CS) configuration of FET. Determine the current gain.
15. Construct an ammeter to read (0-1mA) of current.
16. Construct a voltmeter to read (0-1 volt).
17. Measure  $V_p$ ,  $V_{pp}$  and Time period of Sine and Square waves using CRO.
18. Construct OR, AND and NOT gates using diodes and transistors. Verify the truth tables.
19. Verify the truth tables OR, AND and NOT gates using Integrated Chips (ICs).
20. Construct four-bit binary adder.

### Reference Books

1	Biomedical Instrumentation and measurements - L Cromwell, F J Weibell and Eapfeiffer, PHI Publications.
---	---

## Open Elective Course - 3.3

### Medical Electronics

Program Name	<b>BScin Electronics</b>	Semester	<b>Third Semester</b>
Course Title	<b>Medical Electronics(Theory)</b>	No. of Credits	<b>3</b>
Course Code:	<b>FSC865</b>	Contact hours	<b>48Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>
<b>OE Paper is to be offered for the Students othert han Electronics stream</b>			

#### Course Objective:

The objective of the course is

- To understand, test and analyze electronic circuits.
- To Study basics of medical instruments
- To understand the Principle of medical imaging and Biomedical signal processing

#### Course Outcome:

- Students get awareness about different medical electronic equipments, medical imaging and Biomedical signal processing

#### Unit-I

**12Hours**

**Fundamental Electronics:** Amplifiers, Frequency response, signal generation. Different types of transducers & their selection for biomedical applications. Electrode theory, selection criteria of electrodes & different types of electrodes Bioelectric amplifiers-instrumentation amplifiers isolation amplifiers-chopper stabilized amplifiers.

#### Unit-II

**12Hours**

**Introduction to Bio-medical instruments:** Origin of bio-electric signals, active & passive transducer for medical application—Electrocardiography-waveform-standard leads systems, typical ECG amplifier, EEG electrode—frequency bands— recording systems ,EMG basic principle-block diagram of are corder.

#### Unit-III

**12Hours**

**Medical Imaging:** Nature and production of X-rays, Improving X-ray images, Computerized axial tomography, Using ultrasound in medicine, Ultrasound scanning, Magnetic resonance imaging PET and SPECT Imaging

#### Unit-IV

**12Hours**

**Biomedical Signal Processing:** Fundamentals of signal processing, digital image, transforming image, image enhancement, image Segmentation, image compression, image restoration and reconstruction of medical images. Demonstration using MATLAB

#### Reference Book

1. Bio medical Instrumentation and measurements –L cromwell ,FJ Weibell and Eapfeiffer, PHI Publications.

## Semester – IV Electronic Communication-I

Program Name	BScin Electronics	Semester	Fourth Semester
Course Title	<b>Electronic Communication-I(Theory)</b>		
Course Code:	<b>FSD 440</b>	No. of Credits	<b>4</b>
Contact hours	<b>60Hours</b>	Duration of SEA/Exam	<b>2.30hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

### Course Objectives:

On completion of the course, Student will be able:

- To understand principle and working of communication system.
- To understand the principle and working of different modulation and demodulation techniques.
- To understand the Principle and working of Antenna, Waveguides, Transmission lines and RADAR
- To understand the basics of Satellite and Optical Fiber communication

### Course outcomes:

After studying this course, students will:

- Understand the basic principle and techniques of Analog Communication.
- Understand the Various modulation techniques and its importance in radio communication
- Understand and Analyze various analog continuous wave modulation and demodulation techniques
- Understand various radio wave propagation mechanisms and its applications
- Acquire Basic knowledge about Satellite Communication.
- Understand and characterize different components of an optical fiber communication system.
- Define optical sources and detectors. Describe LED, laser diodes, PIN diodes and photo diodes.
- Understand knowledge about Radar and Radar equations.

### **Unit I**

**15Hours**

**Introduction:** Brief idea of frequency allocation for radio communication system. Electromagnetic communication spectrum, EM band designation and usage. Block diagram of an electronic communication system.

**Propagation of EM waves:** Introduction, Ground Wave propagation, Sky-wave propagation Space-wave propagation.

**Transmission lines:** Basic principles, characteristic impedance, losses in transmission lines, standing waves.

**Noise:** Introduction, Internal noises–Thermal agitation Noise, Shot Noise, Transit-time Noise, External noises-Atmospheric noise, Extra-terrestrial noise, Industrial noise, signal to noise ratio(S/N),noise figure

## Unit II

15Hours

**Modulation:** Introduction, need and types of modulation.

**AM:** Representation of AM, Theory of AM , frequency spectrum of AM wave, power and current calculation, modulation by several sine waves. AM generation using Modulated transistor amplifiers.

**SSB:** Introduction, suppression of carrier- Balanced modulator, suppression of unwanted sideband- Filter system,

**AM Receiver**– Block diagram and working of tuned radio frequency receiver and Super heterodyne receiver and Simple diode detector.

**FM and PM:** Theory of FM and PM , frequency spectrum of FM, bandwidth, phase modulation, comparison of AM,FM and PM. FM generation using Direct method.

**FM Receiver:** Block diagram and working of Super-heterodyne receiver, Single slope FM Detector.

## Unit III

15Hours

**Antennas:** Introduction, EM radiation, resonant and non-resonant antennas, antenna gain and effective radiated power, field intensity, antenna resistance, bandwidth, beam width, polarization, antenna with parabolic reflector. Geometry and properties of parabolic reflector.

**Waveguides:** Introduction, working principle of rectangular wave guide and circular waveguide.

**Satellite Communication:** Introduction, Kepler’ s Laws, Satellite Orbits, Geostationary Satellites, Attitude control, Station keeping, Antenna Look angles, Satellite classifications, Transponders(c-band). Earth station.

## Unit IV

15Hours

**Fiber Optic Communication:** Introduction, block diagram, fiber types, cable construction, Light propagation, Optical fiber configuration: Single mode, step index fiber, multi-mode step index fiber, multimode graded index fiber, comparison, acceptance angle and cone, Numerical Aperture,

**Fiber losses:** Signal degradation in optical fibers, attenuation, scattering losses, radiative losses, absorption losses, core and cladding losses. Construction, working principle and application of LEDs and Laser diodes, PIN diodes and Avalanche-photodiodes.

**RADAR:** Block diagram and operations, range equation, block diagram and working of CWRADAR. Applications and limitations of RADAR.

## Semester – IV Electronic Communication-I – Practical

Program Name	<b>BSc in Electronics</b>	Semester	<b>Fourth Semester</b>
Course Title	<b>Electronic Communication-I Practical)</b>		
Course Code:	<b>FSD 443</b>	No. of Credits	<b>2</b>
Formative Assessment Marks	<b>25</b>	Summative Assessment Marks	<b>25</b>
<b>Note:Minimum of 10 Experiments are to be performed using hardware and simulation.</b>			

### List of Experiments

1. Amplitude modulator – determination of modulation index.
2. Amplitude Demodulator - Diode detector- determination of signal frequency
3. RF amplifier - determination of the mid band gain and bandwidth
4. Frequency Modulator - determination of Modulation Index
5. AGC circuit for AM Detector
6. Frequency mixer - determination of output frequency for different input frequencies
7. Class C Tuned Amplifier – frequency response
8. Radiation pattern of LED
9. Frequency Multiplier
10. IF Amplifier–determination of IF from graph
11. FM transmitter and receiver
12. To Study the Pre-Emphasis and De-Emphasis Circuit
13. Study of intensity modulation in optical fiber
14. Frequency response of optical fiber
15. Measurement of Numerical aperture and losses in fibers
16. Gain characteristics of LED in optical fiber
17. Study of receiver characteristics.

## Open Elective Course -4.1

### Augmented and Virtual Reality

Program Name	<b>BSc in Electronics</b>	Semester	<b>Fourth Semester</b>
Course Title	<b>Augmented and Virtual Reality</b>		
Course Code:	<b>FSD 860</b>	No. of Credits	<b>3</b>
Contact hours	<b>48 Hours</b>	Duration of SEA/Exam	<b>2.30 Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

#### **Course Objectives:**

The students are able

- To understand the basics of virtual reality
- Clearly get the concept of various applications of virtual reality

#### **Course Outcomes (COs):**

The course outcome are:

- Identify the application concepts, human Physiology and Perception.
- Understanding visual perception outcomes

#### **Contents**

##### **Unit 1**

15Hrs

**Introduction to Virtual Reality:** Defining Virtual Reality, History of VR, Human Physiology and Perception, Key Elements of Virtual Reality Experience, Virtual Reality System, Interface to the Virtual World-Input & output- Visual, Aural & Haptic Displays, Applications of Virtual Reality.

**Augmented Reality:** Taxonomy, technology and features of augmented reality, difference between AR and VR.

##### **Unit 2**

15Hrs

**Augmented Reality:** Challenges with AR, AR systems and functionality, Augmented reality methods, visualization techniques for augmented reality.

**The Geometry of Virtual Worlds &The Physiology of Human Vision:** Geometric Models, Changing Position and Orientation, Axis-Angle Representations of Rotation, Viewing Transformations, Chaining the Transformations, Human Eye, eye movements & implications for VR. #Exemplar/ Case Studies Sweeping coverage of eye movements.

##### **Unit 3**

15Hrs

**Visual Perception & Rendering and Motion & Tracking:** Visual Perception - Perception of Depth, Perception of Motion, Perception of Color, Combining Sources of Information Visual Rendering -Ray Tracing and Shading Models, Rasterization, Correcting Optical Distortions, Improving Latency and Frame Rates #Exemplar/ Case Studies Automatic stitching of panoramas in Virtual Reality. Motion in Real and Virtual Worlds-Velocities and Accelerations, The Vestibular System, Physics in the Virtual World, Mismatched Motion and Vection Tracking- Tracking 2D & 3D Orientation, Tracking Position and Orientation, Tracking Attached Bodies.

### Reference Books

4	Let Us C - Yashavant P. Kanetkar, Fifth Edition, Sridhara Publication, India, 2008.

## Open Elective Course – 4.1

### IOT and Applications

Program Name	<b>BSc in Electronics</b>	Semester	<b>Fourth Semester</b>
CourseTitle	<b>IOT and Applications (Theory)</b>	No.of Credits	<b>3</b>
CourseCode:	<b>OE.ELE 4.1</b>	Contact hours	<b>48Hours</b>
Formative AssessmentMarks	<b>40</b>	Summative AssessmentMarks	<b>60</b>
<b>OE Paper is to be offered for the Students other than Electronics stream</b>			

#### Course objectives:

The objective of the course is:

- To become familiarize with IOT applications.
- To understand the wireless technology

#### **Course outcome:**

Students get awareness about an internet usage

#### **Unit-I**

**12hours**

Fundamentals of IoT: Introduction, History of IoT ,Definitions & Characteristics of IoT, IoT Architectures,Physical & Logical Design of IoT, Enabling Technologies in IoT, Components ofan IoT Solution, IoTframeworks, IoTand M2M,OpenSourceandCommercialExamples, CompetingStandards for IoT

#### **Unit-II**

**12hours**

Sensors Networks : Definition, Traditional Data Storage, Analog and Digital I/O Basics, Types of Sensors ,Types Of Actuators, Examples and Working, IoT Development Boards: Arduino IDEandBoardTypes,RaspberriPiDevelopment Kit, RFID Principles and components,Wireless Sensor Networks:History andContext,Thenode, Connectingnodes, NetworkingNodes, WSNandIoT.

#### **Unit-III**

**12hours**

Wireless Technologies for IoT: WPAN Technologies for IoT: IEEE 802.15.4, Zigbee, HART, NFC, Z-Wave,BLE, Bacnet, Modbus.IPBased Protocolsfor IoTIPv6, 6LowPAN, RPL, REST, AMPQ, CoAP, MQTT.Edgeconnectivityand protocols

#### **Unit-IV**

**12hours**

Data Handling& Analytics: Introduction, Bigdata, Types of data, Characteristics of Big data, Data handlingTechnologies,Flowof data,Dataacquisition, Data StorageApplicationsof IoT: HomeAutomation

## **ReferenceBooks**

1. InternetofThings -Vasudevan,Nagrajanandand Sundaram,WileyIndia.
2. InternetofThings -SrinivasaKG,CengageLearning,India2017.
3. IoT fundamentals:Networking Technologies, Protocols and uses cases for the Internet of things- DavidHanes, Gonzalo Salgueiro, Patrick Grosstete, Robert Barton, Jerome Henry, 1<sup>st</sup>Edition,PearsonEducation.
4. IoT Fundamentals-DavidHence etal,Ciscopress.

## Open Elective Course -4.2

### Application of Electronics – II

Program Name	<b>BSc in Electronics</b>	Semester	<b>Fourth Semester</b>
Course Title	<b>Application of Electronics – II</b>		
Course Code:	FSD870	No. of Credits	<b>3</b>
Contact hours	<b>48 Hours</b>	Duration of Exam	<b>2 ½ Hours</b>
Formative Assessment Marks	<b>40</b>	Summative Assessment Marks	<b>60</b>

**Note: This Course is for candidates who have not opted Electronics as one of the Core Courses.**

#### Course Objectives:

- Students familiarize with applications of electronics communication instruments.
- Able to understand the concept of EDUSAT, CCTV and ATM.
- Able to understand the functioning of EVMs.

#### Course Outcomes:

- Students become familiarized with applications of electronics communication instruments.
- Students are able to handle electronic gadgets like CCTV and ATM.
- Students understand the functioning of EVMs.

### **Contents**

#### **Unit 1**

12 Hrs

**Introduction to advanced communication: Radio:** Introduction, block diagram of radio and its working(transmitter and receiver) and applications of Radio,  
**TV-** Introduction, block diagram of TV and its working, types of TV and applications of TV.  
**OFC-** introduction, block diagram of OFC, principle of OFC transmission, applications  
 Embedded system - Smart card, SIM card.  
**Mobile-** introduction, Block diagram of mobile, working and applications.

#### **Unit 2**

12 Hrs

**Advanced Electronics:** CCTV camera- Introduction working principles of CCTV, types of CCTV, advantages, disadvantages and applications.  
**ATM-** Definition of ATM, block diagram working, features, advantages and disadvantages  
**Electronic voting Machine (EVM) –** Definition, history, block diagram of EVM, parts of EVM- CU, BU, VVPAT, Steps involved in casting of votes in EVM using VVPAT. Advantages And Disadvantages Of EVM

<b>Unit 3</b>	12 Hrs
<p><b>Applications of satellite and Internet:</b> Introduction, Types-remote sensing SAT, Communication SAT and EDUSAT. Advantages and disadvantages of satellite. <b>Internet:</b> Introduction -growth of internet, internet architecture, Modem, Wi-Fi, Blue tooth - principle of operation using block diagram, advantages and applications.</p>	
<b>Unit 4</b>	12 Hrs
<p><b>E-waste management-</b> Introduction, identification, sorting/separation/ dismantling/segregation in E-waste management. Extracting useful metals from E-waste, recycling. Common sources of E-waste, E-wastes produced by communication and Information Technology sector, collection and transportation of E-Waste, precautions for disposing the E-waste, responsibilities of a citizens in managing e-waste, effect of E-waste on environment, impacts of E-waste on human beings. E-waste certification.</p>

**SEMESTER V**  
**DIGITAL SIGNAL PROCESSING**

Credits: Theory – 04

Practical – 02

Theory: 60 Lectures

**COURSE OUTCOME:**

After completion of the course the student is able to

CO1: Identify the details of discrete/digital signals and systems

CO2: Understand the classification and characteristics of frequency domain analysis of discrete time signals.

CO3: Specify with examples DSP filters

**Unit-1**

**Discrete-Time Signals and Systems:**

Classification of Signals: Continuous-time and Discrete-Time signals, Analog and Digital signals, Periodic and Aperiodic Signals, Energy and Power Signals, Even and Odd Signals. Operations on Dependent and Independent Variables. Continuous- Time System and Discrete-Time Systems: Unit Step Response, Impulse Response and Ramp Response. Exponential signals, exponentially damped sinusoidal signals, pulse signals

Basic Discrete Time signals – Step function, Impulse function, Ramp function, Exponential function, Sinusoidal signals, Exponentially damped sinusoidal signals, Pulse signals

System Properties: Linearity, Causality; Time-Invariance, Memory, Stability and Invertibility.

Linear Time Invariant Systems- Convolution Sum. Convolution Integral, Representation for LTI System – two systems in Parallel, Two systems in Cascade. (15 Lectures)

**UNIT 2:**

**The Z-Transform:**

Introduction, Definition of Z – transform, Transform and ROC of Finite Duration Sequences – Right Sided Sequence, Left Sided Sequence, Double Sided Sequences.

Z – Transform and ROC of Infinite Duration Sequences- Positive Time Exponential Sequence, Negative Time Exponential Sequence, Double sided Exponential Sequence, ROC & Stability, Properties of ROC . Problems.

**Properties of Z-Transform**-Linearity, Time Shift or Translation, Multiplication by an Exponential, Multiplication by a Ramp, Convolution (Time-domain), Time-reversal, Convolution (Z-domain), Initial- value theorem, Final value theorem. Transforms of some useful Sequences.

**Inverse Z- transform**-Partial fraction expansion method, Inverse Z- transform by long division method.

### **UNIT 3:**

#### **Discrete-Time Fourier Transform:**

DFT - Introduction. Definition of DFT and IDFT- Lemma, Inverse DFT, Periodicity of  $X(k)$  and  $x(n)$ .

Matrix relation for computing DFT, Matrix relation for Computing IDFT, Using DFT to find IDFT, Concept circular shift and circular symmetry, Properties of DFT – Linearity, Circular time shift, Circular frequency shift.

Fast Fourier Transform (FFT) – Decimation-in-time FFT, Further reduction: Cooley-Turkey Algorithm, In-place computations, Decimation in frequency FFT. (15 Lectures)

### **UNIT 4:**

**Filter Concepts:** Linear-Phase Filter, Simple FIR Digital Filters, Simple IIR Digital Filters, All pass Filters

#### **Design of IIR Filters:**

Introduction, Analog Filter Specifications, Classification of Analog Filters, Butterworth Filters, Frequency transformations / Spectral Transformations, Design of Low pass Butterworth Filters, Digital filters, Backward difference method, Bilinear Transformations, Analog Design using Digital filters, Advantages and Disadvantages of IIR Filters. (15 Lectures)

#### **Reference Books:**

- Digital Signal Processing, Tarun Kumar Rawat, 2015, Oxford University Press, India.
- Digital Signal Processing, S. K. Mitra, McGraw Hill, India.
- Principles of Signal Processing and Linear Systems, B.P. Lathi, 2009, 1st Edn. Oxford University Press.
- Fundamentals of Digital Signal processing using MATLAB, R.J. Schilling and S.L.Harris, 2005, Cengage Learning.
- Fundamentals of signals and systems, P.D. Cha and J.I. Molinder, 2007, Cambridge University Press.
- Digital Signal Processing Principles Algorithm & Applications, J.G. Proakis and D.G.
- Manolakis, 2007, 4th Edn., Prentice Hall.

**PRACTICAL V**  
**DIGITAL SIGNAL PROCESSING**

1. Verification of properties of a system : linear and convolution
2. Finding DFT of a given sequence - direct method
3. Finding IDFT of a given sequence - direct method
4. Linear convolution using DFT
5. Circular convolution using DFT
6. Solution of simple difference equations
7. Verification of sampling theorem
8. Determination of impulse response of a given system
9. Determination of Frequency response of system to any arbitrary input
10. Design of simple IIR filters – Butterworth
11. DFT using FFT
12. IDFT using FFT

**( Note: Minimum of Eight experiments to be done).**

**ELECTRONIC INSTRUMENTATION**

Credits: Theory – 04

Practical – 02

Theory: 60 Lectures

**COURSE OUTCOME:**

After completion of the course a student is able to

CO1: Specify in detail, basic electronic measurement instruments.

CO2: Write down the classification and working of impedance measuring instruments.

CO3: Specify the details of power supply.

CO4: Understand the working and applications of transducers

**Unit 1:**

**Measurements**

Accuracy and precision. Significant figures. Error and uncertainty analysis. Shielding and grounding. Electromagnetic Interference.

**Basic Measurement Instruments:**

DC measurement-ammeter, voltmeter, ohm meter, AC measurement, Digital voltmeter systems (integrating and non-integrating). Digital Multimeter; Block diagram principle of measurement of I, V, C. Accuracy and resolution of measurement.

**Measurement of Impedance-**

A.C. bridges, Measurement of Self Inductance (Anderson's bridge), Measurement of Capacitance (De Sauty's bridge), Measurement of frequency (Wien's bridge).

(15 Lectures)

**Unit 2:**

**Power supply**

Block Diagram of a Power Supply, Qualitative idea of C and L Filters. IC Regulators (78XX and 79XX), Line and load regulation, Short circuit protection. Idea of switched mode power supply (SMPS) and uninterruptible power supply (UPS).

**Oscilloscope:**

Block Diagram, CRT, Vertical Deflection, Horizontal Deflection. Screens for CRT, Oscilloscope probes, measurement of voltage, frequency and phase by Oscilloscope. Digital Storage Oscilloscopes. LCD display for instruments.

(15 Lectures)

**Unit 3:**

**Lock-in-amplifier:**

Basic Principles of phase locked loop (PLL), Phase detector (XOR & edge triggered), Voltage Controlled Oscillator (Basics, varactor), lock and capture. Basic idea of PLL IC (565 or 4046). Lock-in-amplifier, Idea of techniques for sum and averaging of signals.

### **Signal Generators:**

Function generator, Pulse Generator, (Qualitative only).

### **Virtual Instrumentation:**

Introduction, Interfacing techniques (RS 232, GPIB, USB), Idea about Audrino microcontroller and interfacing software like lab View). (15 Lectures)

### **Unit 4:**

#### **Transducers:**

Classification of transducers, Basic requirement/characteristics of transducers, Active and Passive transducers, Resistive (Potentiometer- Theory, temperature compensation & applications), Capacitive (variable air gap type), Inductive (LVDT) & piezoelectric transducers. Measurement of temperature (RTD, semiconductor IC sensors), Light transducers (photo resistors & photovoltaic cells). (15 Lectures)

#### **Reference Books:**

- W.D. Cooper and A. D. Helfrick, Electronic Instrumentation and Measurement Techniques, Prentice Hall (2005).
- E.O. Doebelin, Measurement Systems: Application and Design, McGraw Hill Book - fifth Edition (2003).

- S. Rangan, G. R. Sarma and V. S. Mani, Instrumentation Devices and Systems, Tata Mcgraw Hill (1998).
- Introduction to measurements and instrumentation, 4th Edn., Ghosh, PHI Learning.

**PRACTICAL VI  
ELECTRONIC INSTRUMENTATION LAB**

1. Measurement of resistance by Wheatstone bridge and measurement of bridge sensitivity.
2. Measurement of Capacitance by De Sauty's bridge.
3. To determine the Characteristics of resistance transducer - Strain Gauge (Measurement of Strain using half and full bridge).
4. To determine the Characteristics of LVDT.
5. To determine the Characteristics of Thermistors and RTD.
6. Measurement of temperature by Thermocouples.
7. Design a regulated power supply of given rating (5 V or 9V).
8. To design and study the Sample and Hold Circuit.
9. To plot the frequency response of a microphone.

**(Note: Minimum of Eight experiments to be done).**

**SEMESTER VI  
VERILOG & VHDL**

Credits: Theory – 04,  
Practical – 02

Theory: 60 Lectures

**COURSE OUTCOME:**

After completion of the course the student is able to

CO1: Identify the details of Digital logic design flow.

CO2: Learn the characteristics and model the digital circuits using VHDL behavioural modelling

CO3: Deliberate in detail the dataflow and structural modelling in VHDL

CO4: Describe digital circuits utilizing various constructs of Verilog

**Unit-1**

**Digital logic design flow**

Review of combinational circuits. Combinational building blocks: multiplexers, demultiplexer, decoders, encoders and adder circuits. Review of sequential circuit elements: flip-flop, latch and register. Finite state machines: Mealy and Moore. Other sequential circuits: shift registers and counter (15 lectures)

**Unit-2**

**Verilog HDL:**

Introduction to HDL. Verilog primitive operators and structural Verilog. Behavioural Verilog. Design verification. Modelling of combinational and sequential circuits (including FSM and FSM D) with Verilog Design examples in Verilog. (15 lectures)

**Unit-3**

**VHDL: Basic Language elements**

Identifiers, Data Objects, Data types, Operators

**Behavioral Modelling**

Entity Declaration, Architecture Body, Process statement, Variable assignment statement, Signal Assignment, Wait statement, If statement, Case statement, Null statement, Loop statement, Exit statement, Next statement, Assertion statement, Report statement, More on Signal Assignment statement, other sequential statements. (15 Lectures)

## **Unit-4**

### **Dataflow Modelling**

Concurrent Signal Assignment, Concurrent versus Sequential Signal Assignment, Delta Delay Revisited, Multiple Drivers, Conditional Signal Assignment Statement, Selected Signal Assignment Statement, The UNAFFECTED value, Block Statement, Concurrent Assertion Statement, Value of signal.

### **Structural Modeling**

An example, Component Declaration, Component Instantiation, Other examples. Resolving Signal Values (15 lectures)

### **Reference Books:**

6. VLSI design, Debaprasad Das, 2nd Edition, 2015, Oxford University Press.
7. D.J. Laja and S. Sapatnekar, Designing Digital Computer Systems with

**PRACTICAL VII  
VERILOG AND VHDL LAB**

**Experiments using Verilog**

1. Write code to realize basic and derived logic gates.
2. Half adder, Full Adder using basic and derived gates.
3. Half Subtractor and Full Subtractor using basic and derived gates.
4. Design and simulation of a 4 bit Adder.
5. Multiplexer (4x1) and Demultiplexer using logic gates.
6. Decoder and Encoder using logic gates.
7. Clocked D, JK and T Flip flops (with Reset inputs).
8. 3-bit Ripple counter

**Experiments using VHDL**

1. Behavioral modeling and simulation of basic gates
2. Structural modeling and simulation of simple Boolean expression
3. Modeling and simulation of adders and subtractors
4. Modeling and simulation of magnitude comparators
5. Modeling and simulation of Flip-flops
6. Modeling and simulation of Shift registers
7. Modeling and simulation of Counters
8. Modeling and simulation of encoders and decoders
9. Modeling and simulation of multiplexers

**Note: At least 04 experiments - each from section A and B to be done.**

**SEMESTER VI**  
**PHOTONIC DEVICES AND POWER ELECTRONICS**

Credits: Theory – 04  
Practical – 02

Theory: 60 Lectures

**COURSE OUTCOME:**

After completion of the course the student is able to

CO1: Deliberate the Principles and operations of Photonic devices.

CO2: Deliberate the Principle of operation and characteristics of optical fibers

CO3: Understand the mode of signal propagation in optical fibres

CO4: Deliberate the characteristics and application of power devices

**UNIT 1:**

**Photonic Devices**

Classification of photonic devices. Interaction of radiation and matter, Radiative transition and optical absorption. Light Emitting Diodes- Construction, materials and operation. Semiconductor Laser- Condition for amplification, laser cavity, heterostructure and quantum well devices. Charge carrier and photon confinement, line shape function. Threshold current. Laser diode. Photodetectors: Photoconductor. Photodiodes (p-i-n, avalanche) and Photo transistors, quantum efficiency and responsivity. Photomultiplier tube. (15 Lectures)

**UNIT 2:**

**Solar Cell**

Construction, working and characteristics LCD Displays: Types of liquid crystals, Principle of Liquid Crystal Displays, applications, advantages over LED displays.

**Introduction to Fiber Optics:**

Evolution of fiber optic system- Element of an Optical Fiber Transmission link- Ray Optics-Optical Fiber Modes and Configurations –Mode theory of Circular Wave guides- Overview of Modes-Key Modal concepts- Linearly Polarized Modes -Single Mode Fibers-Graded Index fiber structure.

(15 Lectures)

**UNIT 3:**

**POWER ELECTRONICS**

**Power Devices:**

Need for semiconductor power devices, Power MOSFET (Qualitative). Introduction to family of thyristors. Silicon Controlled Rectifier (SCR)- structure, I-V characteristics, Turn-On and Turn-Off

characteristics, ratings, Gate-triggering circuits. Diac and Triac- Basic structure, working and V-I characteristics. Application of Diac as a triggering device for Triac. (15 Lectures)

#### **UNIT 4:**

##### **Insulated Gate Bipolar Transistors (IGBT):**

Basic structure, I-V Characteristics, switching characteristics, device limitations and safe operating area (SOA).

##### **Applications of SCR:**

Phase controlled rectification, AC voltage control using SCR and Triac as a switch. Power Invertors- Need for commutating circuits and their various types, dc link invertors, Parallel capacitor commutated invertors, Series Invertor, limitations and its improved versions, bridge invertors.

(15 Lectures)

##### **Reference Books:**

1. J. Wilson & J.F.B. Hawkes, Optoelectronics: An Introduction, Prentice Hall India (1996).
2. S.O. Kasap, Optoelectronics & Photonics, Pearson Education (2009).
3. AK Ghatak & K Thyagarajan, Introduction to fiber optics, Cambridge Univ. Press (1998).
4. Power Electronics, P.C. Sen, Tata McGraw Hill.
5. Power Electronics, M.D. Singh & K.B. Khanchandani, Tata McGraw Hill.
6. Power Electronics Circuits, Devices & Applications, 3rd Edn., M.H. Rashid, Pearson Education.
7. Optoelectronic Devices and Systems, Gupta, 2nd edn., PHI learning.
8. Electronic Devices and Circuits, David A. Bell, 2015, Oxford University Press.

**PRACTICAL VIII**  
**PHOTONIC DEVICES AND POWER ELECTRONICS**

1. To determine wavelength of sodium light using Michelson's Interferometer.
2. Diffraction experiments using a laser.
3. Study of Electro-optic Effect.
4. To determine characteristics of (a) LEDs, (b) Photo voltaic cell and (c) Photo diode.
5. To study the Characteristics of LDR and Photodiode with (i) Variable Illumination intensity, and (ii) Linear Displacement of source.
6. To measure the numerical aperture of an optical fiber.
7. Output and transfer characteristics of a power MOSFET.
8. Study of I-V characteristics of SCR.
9. SCR as a half wave and full wave rectifiers with R and RL loads.
10. AC voltage controller using TRIAC with UJT triggering.
11. Study of I-V characteristics of DIAC
12. Study of I-V characteristics of TRIAC.

**ELECTRICAL CIRCUITS AND NETWORK SKILLS**

Credits: 02

Theory: 30 Lectures

Course Outcome:

After completion of the course the student acquires skill to

CO1: Design and trouble shoot the electrical circuits and networks

CO2: Carry-out simple domestic wiring.

**UNIT 1:**

**Basic Electricity Principles:**

Discussion of Voltage ( AC & DC), Current( AC & DC), Resistance, and Power. Ohm's law. Series, parallel, Series and Parallel combinations of R, L and C. Response of inductors and capacitors with DC or AC sources. Impedance in of Inductor and Capacitor

**Electrical Circuits:**

**DC Circuits** - Basic electric circuit elements and their combination in DC circuits. Rules to analyze DC sourced electrical circuits. Current and voltage drop across the DC circuit elements.

**AC Circuits** - . Simple numericals on network theorms. Real, imaginary and complex power components of AC source. Power factor. Saving energy and money.

**Electrical Drawing and Symbols:**

Drawing symbols. Blueprints. Reading Schematics. Ladder diagrams. Electrical Schematics. Power circuits. Control circuits. Reading of circuit schematics. Tracking the connections of elements and identify current flow and voltage drop. (15 Lectures)

**UNIT 2:**

**Generators and Transformers:**

DC Power sources. AC/DC generators. Basic principle of operation, constructional features. Transformers – Principle of working, Construction and Operation of transformers.

**Electric Motors:**

Single-phase, three-phase & DC motors - Construction and Working. Speed & power of ac motor. Interfacing DC or AC sources/ Motors to control heaters

**Solid-State Devices:** Diodes, types of diodes –symbol and applications, Rectifiers - PN junction diode as rectifier ( Half wave and Full wave rectifier) construction and working

**Electrical Protection:**

Relays - Relay as protection device, Fuses and disconnect switches. Circuit breakers. Overload devices. Ground-fault protection. Grounding and isolating. Phase reversal. Surge protection.

**Electrical Wiring:**

Different types of conductors and cables. Basics of wiring-Star and delta connection. Voltage drop and losses across cables and conductors. Instruments to measure current, voltage, power in DC and AC circuits. Insulation. Solid and stranded cable. Conduit. Cable trays. Splices: wirenuts, crimps, terminal blocks, and solder. Preparation of extension board. (15 Lectures)

**Reference Books:**

1. Electrical Circuits, K.A. Smith and R.E. Alley, 2014, Cambridge University Press.
2. A text book in Electrical Technology - B L Theraja - S Chand & Co.
3. A text book of Electrical Technology - A K Theraja.
4. Performance and design of AC machines - M G Say ELBS Edn.

**COMPUTER NETWORKS**

Credits: 02

Theory: 30 Lectures

**COURSE OUTCOME:**

After completion of the course the student acquires skill to

CO1: Understand the concepts of network devices

CO2: Understand the terminology and concepts of the OSI model

**Unit 1:**

**Data communication, Components & Basic Concepts**

Line configuration- point-to-point, multipoint, Topology – Mesh, Star, Tree, Bus, Ring, and Hybrid Topologies Transmission modes – Simplex, Half Duplex, Full Duplex. Categories of networks – LAN, MAN, WAN, Internet

**Transmission Media**

Guided media – Twisted pair cable, Co-axial cable, Optical fiber

**Multiplexing:**

Many to one/one to many, types of multiplexing, Frequency division multiplexing, time division multiplexing, multiplexing applications

**Error detection**

Types of error, multiple bit error, Burst error, Detection – redundancy, Checksum Error correction – Single bit error correction, Hamming code (15 Lectures)

**Unit 2**

**The OSI Model**

Model – layered Architecture, Functions of layers- physical layer, Data link layer, Network layer, Transport layer, Session layer, Presentation Layer, Application layer

**Networking and internetworking devices**

Repeaters, Bridges- types of Bridges, Routers- Routing concepts, Gate ways

**World Wide Web:**

Uniform Resource Locator (URL), Browser Architect (15 Lectures)

**Text Book:**

Introduction to Data Communications & Networking by- BEHROUZ FOROUZAN

**Reference Book:**

Computer Networks by – ANDREW S TANENBAUM

**Model Question Paper for DSC/DSE**

**Time: 3 hours**

**Max. Marks: 70**

**Part -A**

**1. Answer all questions.**

**1 x 10 = 10m**

- (a)
- (b)
- (c)
- (d)
- (e)
- (f)
- (g)
- (h)
- (i)
- (j)

**Part - B**

**Answer any Four questions.**

**4 x 5 = 20**

- 2.**
- 3.**
- 4.**
- 5.**
- 6.**
- 7.**

**Part - C**

**Answer any Four questions**

**4 x 10 = 40**

- 8.**
- 9.**
- 10.**
- 11.**
- 12.**
- 13.**

**Pattern of theory Question Paper for SEC**

**Time: 2 hours**

**Max. Marks: 35**

**Credits: 2**

**Part –A**

**I. Answer all questions.**

**1 x 05 =05m**

- Five questions to be set from the two units of the syllabus.
- Minimum of two questions to be set from each unit.
- Questions can be simple problems also.

**Part –B**

**II. Answer any Three questions**

**3x 10 = 30m**

- Five questions to be set from the two units of the syllabus.
- Minimum Two questions/ Problems to be set from each unit.

**JSS COLLEGE OF ARTS, COMMERCE AND SCIENCE**

**(Autonomous)**

**B N ROAD, MYSURU – 570 025**

**DEPARTMENT OF ENGLISH (UG)**

**Syllabus under**

**NEP - 2020**

**Choice Based Credit System (CBCS)**

**2022 – 23 Onwards**

**And**

**2021-22 (III& IV SEM)**

**(Approved by BOS)**

**Hours: 02**

**Max. Marks: 60**

**Section – A**

I. Answer the following questions in a word or a phrase or a sentence:

8x1=8

- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8

**Section – B**

II. Annotate any three of the following:

3x4=12

- 1
- 2
- 3
- 4
- 5

**Section – C (Poetry)**

III Answer any Two of the following:

2x5=10

- 1
- 2
- 3
- 4

**Section – D (Prose)**

IV Answer any Two of the following:

2x5=10

- 1
- 2
- 3
- 4

**Section – E**

V Language Component

1. Punctuate the following:

5x1=5

2. Fill in the blanks with appropriate Articles

5x1=5

3. Fill in the blanks with appropriate Prepositions

5x1=5

4. Choose the correct form of the verb:

5x1=5

IV

1. Tenses (with focus on use of simple present tense and past tense) 5
2. Correction of Errors 5
3. Dialogue Writing: Common situations 5
4. Short speeches for welcoming, introducing, proposing vote of thanks and Independence Day and Republic Day 5

## SEMESTER V

Course code-

### Modern Literature DSE – V B

#### Course Outcome:

After completion of the course the student is able to

- CO1. Have better understanding of life.
- CO2. Develop analytical and critical quality.
- CO3. Be creative in his day to day life and face the problems
- CO4. Relation between literature and real life.
- CO5. Compare and contrast the historical and modern works

#### UNIT 1: Poetry

- |                |  |
|----------------|--|
| 1. G.M.Hopkins | Pied Beauty<br>Thou Art Indeed Just, Lord<br>Starlight Night |
| 2. W. B. Yeats | Easter 1916<br>A Prayer for My Daughter                      |
| 3. T.S.Eliot   | Geration<br>The Hippopotamus                                 |
| 4. W.H.Auden   | Unknown Citizen<br>Muse De Beaux Arts                        |

#### Prose

- |            |   |
|------------|---|
| M.K.Gandhi | My Experiments with Truth<br>(Autobiography) Part I |
|------------|---|

#### Criticism

- |                               |   |
|-------------------------------|---|
| T.S.Eliot                     | Tradition and Individual Talent                   |
| D.H.Lawrence                  | Why the Novel Matters?                            |
| Chinua Achebe                 | Novelist as a Teacher                             |
| History of English Literature | The Modern age                                    |
| Mathew Arnold                 | The Functions of Criticism at the<br>present time |

**BA VI Semester**  
**English Writing in Third World Countries**  
**DSE – V1 D**

**Course Outcome:**

**After completion of the course the student is able to**

- CO1. Understand the problems the of third world countries
- CO2. Know the rift between colonised and coloniser
- CO3. Understand the spirit of independence and limitations of freedom.
- CO4. Get the knowledge of pre and post independent socio-political and economic aspects of India.
- CO5. Develop critical and rational thinking.
- CO6. Understand the diversity and similarity in socio-cultural aspects of the third world countries.

**Unit- I- Poetry**

A.D.Hope	Song for St. Cecelia's Day
Rabindranath Tagore	Where the Mind is Without Fear
Peter Porter	Your Attention Please
Dennis Brutus	You Laughed, Laughed, and Laughed
Margaret Atwood	Journey to the Interior
Derek Walcott	A Far Cry From Africa
KishwarNaheed	I Am Not That Woman

**Unit-II-Novel**

Chinua Achebe	Things Fall Apart
---------------	-------------------

**Unit-III- Fiction**

V.S.Naipaul	A House for Mr. Biswas

## NATIONAL EDUCATION POLICY- 2020

### Universities of Karnataka State under NEP-2020 in ENVIRONMENTAL SCIENCE

#### AECC - ENVIRONMENTAL STUDIES SYLLABUS

Number of Theory Credits	Number of lecture hours	Number of field work hours
2	45	5

	Content of AECC – Environmental Studies	45 hours
Unit 1	Introduction to Environmental Studies	45HOURS
	Multidisciplinary nature of environmental studies Scope and importance; Concept of sustainability and sustainable development.	2
Unit 2	Ecosystems	6
	What is an ecosystem? Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. Case studies of the following ecosystems: a) Forest ecosystem, c) Desert ecosystem, Aquatic ecosystems (ponds, , lakes, rivers,)	
Unit 3	Natural Resources: Renewable	8

	<b>and Non-Renewable</b>	
	land-use change; Land degradation, soil erosion and desertification. Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations. Water: Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter-state). Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs, case studies.	
Unit 4	<b>Biodiversity and Conservation</b>	8
	biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value Levels of biological diversity: Genetic, species and ecosystem diversity; Biogeographic zones of India; Biodiversity patterns and global biodiversity hot spots. India as a mega-biodiversity nation; Endangered and endemic species of India. Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions; Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.	

Unit 5	Environmental Pollution	8
	Environmental pollution: types, causes, effects and controls; Air, water, soil and noise pollution, Nuclear hazards and human health risks Solid waste management, Control measures of urban and industrial waste	
Unit 6	Environmental Policies & Practices	7
	Climate change, global warming, ozone layer depletion, acid Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act. International agreements: Montreal and Kyoto protocols and Convention on Biological Diversity (CBD).	
Unit 7	Human Communities and the Environment	6
	Human population growth: Impacts on environment, human health and welfare. Resettlement and rehabilitation of project affected persons; case studies. Disaster management: floods, earthquake, cyclones and landslides. Environmental	

	<p>movements: Chipko, Silent valley,  Bishnois of Rajasthan  Environmental ethics: Role of  Indian and other religions and  cultures in environmental  conservation</p>	
Unit 8	Field work	5

B.A. / B.Sc. Geography Degree  
(Basic/Honours)

**2021 –2022**  
**2022 – 2023 onwards**

## **Syllabus & Regulations Governing the Choice-Based Credit System (CBCS)**

For the Four-Years (Eight Semesters) Bachelor of Arts / Bachelor of Science (B.A./B.Sc.) Geography Program

### **Eligibility for Admission:**

Candidates who have passed PUC in Science, Commerce, Arts in Karnataka State or any other States in India with equal qualifications are eligible for admission to the course, provided they have secured minimum of 50% marks in the qualifying examination (PUC/ +2 Level) (45% for SC / ST / Category-I Candidates).

The Candidates not studied Geography as an optional subject in PU/ 10+2 Level need to undergo one week bridge course programme conducted by the Geography department of the concerned Colleges.

### **Scheme and Duration of the Course:**

B.A./B.Sc. Geography Program consists of 8 semesters in four academic years.

### **Discipline Specific Core (DSC) Courses: (B-3 Model)**

First, second, third and fourth semesters will have one DSC course each. Every DSC course has 6 credits including practical component for 2 credits (4 credits for theory and 2 credits for practical).

Fifth and sixth semesters will have two Discipline Specific Core (DSC) courses in each semester for 5 credits including practical component for 2 credits (3 credits for theory and 2 credits for practical).

Seventh and eighth semesters will have three Discipline Specific Core (DSC) courses in each semester. In seventh semester, two DSC courses for 5 credits each including practical component for 2 credits (3 credits for theory and 2 credits for practical) and one DSC course has 3 credits without practical component. Whereas in eighth semester, one course will have a practical component for 2 credits apart from theory for 3 credits and the remaining two DSC courses for 3 credits each without practical component. Totally, the program has 14 DSC courses.

### **Open Elective (OE) Courses:**

Open Elective Course (OE) refers to Elective courses/papers in a non-core subject across all disciplines. First, second, third and fourth semesters will have one OE course in each semester. Every OE course has 3 credits with no practical component. OE courses are offered by the department for other disciplines and the candidates have to choose one OE from the pool in each semester. The OE courses enhance the geographical knowledge and help students in learning Geographical thinking and make them geographic literates. There are totally 4 OE courses in the program.

### **Vocational Courses:**

Fifth and Sixth semesters will have one vocational course for 3 credit in each semester. The candidates have to choose any one vocational course from the pool in each semester.

### **Internship:**

In sixth semester internship course for 2 credits is prescribed which is mandatory in nature. Each student is expected to prepare a report on Internship and shall make a presentation during the examination. The candidates are expected to complete this course between the Fifth and sixth semester under the supervision of a teaching faculty of the concerned department. These courses can enable students to obtain the required technical knowledge along with practical skill

### Discipline Specific Elective (DSE) Courses:

Fifth, Seventh and eighth semesters will have DSE courses. In Fifth semester one DSE course, in seventh semester two DSE courses and in Eighth semester two DSE course for credit of 3 each need to be studied by a student apart from the Research methodology course in seventh semester for 3 credits and Research project course for six credits in eighth semester. All the DSE courses have 3 credits with no practical component (100 marks).

### Research Methodology and Research Project:

The seventh semester will have research methodology course for 3 credits (60+40=100 marks) and in eighth semester students have to take up a research project course for 6 credits (100+100=200 marks). If a candidate is not interested to opt for the Research Project in the eighth semester such candidates can choose two more DSE course of 3 credits each from the given pool or can opt for Internship programme for 6 credits.

It is mandatory to select research project for six credits in Eighth semester and Research Methodology course in Seventh Semester for a candidate willing to pursue PhD program.

There shall be University examination at the end of each semester. The course pattern and the scheme of examinations are as follows:

### Duration of the Course:

The duration of the B.A./B.Sc. Geography Program shall extend over 8 semesters (Four academic years) of 16 weeks or more, each with a maximum of 90 actual working days of instruction in each semester.

### Course pattern:

The number of credits per semester may vary from 20 to 25, an average of 23 credits per semester and a total of around 186 credits for the program. The credits shall be based on the number of instructional hours per week, generally 1 credit per hour of instruction in theory and 1 credit for 2 hours of practical or project work or internship per week. The courses offered in the programme covers the Discipline Specific Core (DSC), Discipline Specific Elective (DSE), Open Elective (OE) Vocational courses and Internship.

### Medium of instruction:

The medium of instruction shall be English / Kannada.

### Attendance:

The course shall be treated as an independent unit for the purpose of attendance. A student shall attend a minimum of 75% of the total instruction hours in a course including assignments and seminars in each semester. The student who fails to secure 75% attendance in a course shall be required to repeat that semester.

### Internal Assessment:

Marks for internal assessment shall be awarded on the basis of Attendance, conducting internal Tests, assigning Case Studies and Assignments / Seminars and other activities. The internal assessment marks shall be notified on the department / college notice board for the information of the students and it shall be communicated to the Registrar (Evaluation) within a stipulated time prescribed by the university.

All DSC, DSE theory and Vocational courses shall have internal assessment for 40 Marks.

The practical, Internship and Skill Enhancement courses shall have internal assessment for 25 marks each, including the 10 marks for the practical record.

Research Project shall have internal assessment for 100 marks.

The outline for continuous assessment activities for C1 and C2 components of a course shall be as under

<b>Activities</b>	<b>C1 Component</b>	<b>C2 Component</b>	<b>Total Marks</b>
Session test	10 marks	10 marks	20
Seminars/ presentation/activities	10 marks		10
Case study/assignment/field work/project work etc.		10 marks	10
<b>Total</b>	<b>20</b>	<b>20</b>	<b>40 marks</b>

#### **Board of Examiners (BOE):**

Board of examiners constituted by the University shall consist of a Chairman, internal and external members out of which at least one shall be from the Department / College offering the course and at least two external members from other universities. The board shall scrutinize the question papers and shall forward for the approval of university.

#### **Results:**

A candidate should obtain a minimum of 40% marks in each course in the University examination including internal assessment marks. The candidates who have passed in all the semester examinations are eligible for the award of B.A./B.Sc. Honors Degree in Geography. If the candidates chooses Geography as major along with any social science stream subjects as minor, like Sociology, Political Science, History, Economics, etc, such candidates can be awarded B.A. Degree and for those studied geography as major with any science subjects as minor such candidates shall be awarded B.Sc. Honors in Geography.

#### **Carryover:**

A candidate who fails in a lower semester examination may go to the higher semester, however, the result of the candidates who have passed the VIII semester examination but not passed the lower semester examinations shall be declared as NCL (not completed lower semester examinations). Such candidates shall be eligible for the award of degree only after completion of all the lower semester examinations.

**Question Paper Pattern:**

The Theory exam shall be conducted for 60 Marks and it consists of 3 Sections namely Section A, Section B, Section C with internal choices. (Short, Medium and Long answer questions).

Section A - Each question carries 3 marks and student has to answer 4 out of 6 questions.

Section B - Each question carries 6 marks and student has to answer 3 out of 5 questions, and

Section C - Each question carries 10 marks and student has to answer 3 out of 4 questions.

## Model Curriculum

Name of the Degree Program:	B.A. / B.Sc. (Basic / Honours) Degree in Geography
Discipline Core:	Geography
Total Credits for the Program:	186
Starting year of implementation:	2021-2022

### Program Outcomes:

By the end of the program the students will be able to:

(Refer to literature on outcome based education (OBE) for details on Program Outcomes)

### PO1: Relating to Knowledge

By the end of the program the students will be able to:

- Give explanation of relevant terms and concept of geography including definitions.
- Give better explanation about relevant principles, theories and models in geography.
- Show clear knowledge relating to man and environmental process and factors.

### PO2: Understanding and application

By the end of the program the students will be able to:

- Identify the importance of spatial scale and time scale.
- Know the complex and interactive nature of physical and human environments.
- Identify the importance of the resemblances and variance between places, environments and people.
- Comprehend how processes bring changes in systems, distributions and environments.

### PO3: Students Skills

By the end of the program the students will be able to:

- Interpret a variety of types of geographical data and sources and recognise their limitations.
- Communicate geographical evidence, ideas and arguments.
- Use geographical data to identify trends and patterns.
- Use diagrams and sketch maps to demonstrate geographical aspects.
- Demonstrate skill of analysis and synthesis of geographical information

## **PO4: Students Evaluation**

By the end of the program the students will be able to:

Critically evaluate geographical principles, theories and models

Assess the effects of geographical processes and change on physical and human environments.

Assess how the viewpoints of different groups of people, potential conflicts of interest and other factors interact in the management of physical and human environments.

Evaluate the relative success or failure of initiatives.

## **Syllabus Aims:**

The aims of the syllabus describe the B.A. / B.Sc program in geography at 5th, 6th, 7th & 8th Level. These aims outline the educational context in which syllabus content should be viewed. Many of these aims may be delivered by the use of suitable case-studies, through application of geographical skills and practical field visits.

### **The BA./ B.Sc Geography syllabus aims to enable students to:**

- Know the significance of scale in studying geography
- Know the processes functioning at various scales within physical and human environments
- Improve a sense of space, place and location
- Develop consciousness of the relevance of geography to understanding and solving contemporary environmental problems
- Realisation of the main fundamentals of physical geography and human geography and the interconnectedness between them
- Explain the causes and effects of change over space and time on physical and human environments
- Develop an appreciation of the nature, value, limitations and importance of different approaches to analysis and explanation in geography
- Increase the knowledge of, and ability to use and apply, appropriate skills and techniques including fieldwork
- Improve a logical approach in order to present a structured, coherent and evidence-based argument
- Develop a concern for accuracy and objectivity in extracting, recording, processing, presenting, analysing and interpreting geographical data.

### Curriculum Structure for Undergraduate Program B.A. / B.Sc. Geography

Name of the Degree Program: B.A./B.Sc.	Total Credits for the Program: 186
Discipline/Subject: Geography	Starting year of implementation: 2021-2022

#### Program Articulation Matrix for Core Courses:

Semester	Title /Name of the course	Program outcomes that the course addresses	Pre-requisite course(s)	Pedagogy	Assessment
I	Principles of Geomorphology	PO-1, PO-2, PO-4	No Pre-requisite course(s)	Interactive Lectures, Case Studies	In-course & End Course Assessment
II	Introduction to Climatology	PO-1, PO-2, PO-4	No Pre-requisite course(s)	Interactive Lectures, Case Studies	In-course & End Course Assessment
III	Fundamentals of Human Geography	PO-1, PO-3, PO-4	No Pre-requisite course(s)	Interactive Lectures, Case Studies, Seminar	In-course & End Course Assessment
IV	India: Resources and Sustainability	PO-2, PO-3	No Pre-requisite course(s)	Interactive Lectures, Case Studies, Quiz	In-course & End Course Assessment
V	Population Resource & Dynamics	PO-1, PO-2, PO-4	No Pre-requisite course(s)	Inquiry-based learning, Interactive Lectures	In-course & End Course Assessment
	Fundamentals of Remote Sensing	PO-1, PO-3	Cartography & Spatial Statistics	Blended learning, Interactive Lectures, MOOCs	In-course & End Course Assessment
VI	Environmental Geography	PO-1, PO-2, PO-4	No Pre-requisite course(s)	Investigative Case-Based Learning, Seminar	In-course & End Course Assessment
	Fundamentals of Geographic Information System	PO-1, PO-3	Basics of Cartography	Blended learning, Interactive Lectures, MOOCs	In-course & End Course Assessment
VII	Advanced Geomorphology	PO-2, PO-4	Principles of Geomorphology	Blended learning, Interactive Lectures, MOOCs	In-course & End Course Assessment
	Advanced Climatology	PO-2, PO-4	Introduction to Climatology	Blended learning, Interactive Lectures, MOOCs	In-course & End Course Assessment
	Conceptual Development in Geography	PO-2, PO-3, PO-4	No Pre-requisite course(s)	Interactive Lectures, Group Activity	In-course & End Course Assessment
VIII	Sustainable Soil Resource Management	PO-1, PO-2, PO-4	Principles of Geomorphology	Cooperative Learning, Interactive Lectures, MOOCs	In-course & End Course Assessment
	Agriculture & Food Security	PO-1, PO-2, PO-4	No Pre-requisite course(s)	Blended learning, Interactive Lectures, MOOCs	In-course & End Course Assessment
	Principles of spatial models in Geography	PO-1, PO-2, PO-4	No Pre-requisite course(s)	Blended learning, Interactive Lectures, MOOCs	In-course & End Course Assessment
	Research Project / Internship (6)	PO-2, PO-3, PO-4	Research Methodology	Process-Oriented Guided Inquiry Learning (POGIL), Problem or Project Based	In-course & End Course Assessment, Final report

### Program Articulation Matrix for Open Elective (OE)

Semester	Title of the course	PO that the course addresses	Pre-requisite course(s)	Pedagogy	Assessment
I	Introduction Physical Geography	PO-1, PO-2, PO-3	No Pre-requisite course(s)	Interactive lectures, Blended learning	In-course & End Course Assessment

III	Fundamentals of Human Geography	1. Geography of India 2. Application of GIS & Remote Sensing	Nil	Nil	
IV	India: Resources and Sustainability	1. Geography of Karnataka 2. Population & Settlement Geography	Nil	Nil	
V	1.Population Resource & Dynamics	Nil	Nil	Nil	
VI	1.Environmental Geography	Nil	Nil	Nil	

## B.A/B.Sc Semester 1

### Title of the Course: Principles of Geomorphology

Code: GEOGDSC T1.1

Number of Theory Credits	Number of lecture hours/ semester	Number of practical Credits	Number of practical hours/ semesters
4	52 or 56	2	52 or 56
<p><b>Course Outcomes:</b></p> <ol style="list-style-type: none"> <li>1. After the completion of this course, students should be able to:</li> <li>2. Define the field of Geomorphology and to explain the essential principles of it.</li> <li>3. To outline the mechanism of dynamic nature of the Earth's surface and interior of the Earth.</li> <li>4. To illustrate and explain the forces affecting the crust of the earth and its effect on it.</li> <li>5. To understand the conceptual and dynamic aspects of landform development</li> </ol>			
<p><b>Course Objectives:</b></p> <p>This course aims to:</p> <ol style="list-style-type: none"> <li>1. To define the concepts in Geomorphology and Physical Geography</li> <li>2. To introduce various concept to understand cycles of the solid Earth surface</li> <li>3. To understand the dynamic nature of the Earth's surface, various processes, and landforms.</li> <li>4. To study the impact human on geomorphic system.</li> </ol>			

Content of Theory Course 1	52/56Hrs
<b>Unit – 1 Geomorphology</b>	13/14
Introduction to geography: physical and human geography Introduction to Geomorphology: meaning, nature, development, and scope Principles of Geomorphology Geological Time Scale Distribution of continents and oceans	
<b>Unit – 2 Systems and Cycles of the Solid Earth</b>	13/14
Internal structure of the earth Alfred Wegener's continental drift Theory of Isostasy: Views of Pratt and Airy Convectional current theory and concept of sea floor spreading Theory of Plate Tectonics: plate boundaries, subduction, Case Studies: Volcano, Earthquake: reporting of latest incidents Case Studies: Volcano, Earthquake: reporting of latest incidents	
<b>Unit – 3 The Dynamics of Earth</b>	13/14
Earth's Movements: Endogenetic and Exogenetic forces, Sudden and Diastrophic movements- Epeirogenetic and Orogenetic Movements-Process of folding and faulting Vulcanicity and earthquake Rocks: Characteristics, types, importance, and rock cycle Weathering: meaning, types and controlling factors Mass Movement: meaning, controlling factors, types-landslides, rock-falls	

<b>Unit – 4 Evolution of Landforms</b>	13/14
<p>Evolution of Landforms</p> <p>Landforms: meaning, types and factors controlling landforms development</p> <p>Slope development: concept and types</p> <p>Concept of Cycle of Erosion–W.M. Davis and W. Penck</p> <p>Agents of Denudation: river; drainage patterns, groundwater, Sea waves, Wind and Glaciers and resultant landforms.</p> <p>Application of geomorphology: in India and Karnataka (Regional planning, Urban planning and transportation, Mining, Hazard management, Agriculture and Environmental management).</p>

<b>Total</b>	<b>100%</b>

GEOGDSC P1.1 **Geomorphology Practical**

**CREDIT:02**

**Content of Practical Course 1:** List of Experiments to be conducted

**Exercise-1:** Identification of Rocks and Minerals. Mineral samples: Iron ore, Bauxite ore and Manganese. Rock Samples: Granite, Basalt, Lime Stones, Sandstone, quartzite, and marble.

**Exercise-2:** Extraction and interpretation of Geomorphic information from Topographical maps

**Exercise-3:** Preparation of contour map from toposheet, Construction of Relief Profiles-serial, Super imposed, Projected & Composite.

**Exercise-4:** Slope Analysis - Slope Maps (Wentworth method) Slope calculation and conversion (isotan and isosin) and aspect maps & Hypsometric curve and integral

**Exercise-5:** Drainage Morphometry: delineation of watershed, stream ordering and Morphometric analysis: mean stream length, drainage density and drainage frequency. **Field Work:** Measurement of channel cross-sections in the field, Geomorphic map of channel bed, Study of erosional and depositional features in the field.

**Case Study:** students must be taken to observe local land formation and degradation and write areport on their effectiveness.

## B.A. / BSc Semester 1

### Title of the Course: GEOG0E T1.1 - 1. Introduction to Physical Geography

Number of Theory Credits	Number of lecture hours/ semester	
3	42 - 45	
<b>Course Outcomes:</b> <ol style="list-style-type: none"><li>1. Students will be able to understand the fundamental concepts in Earth Sciences</li><li>2. Understands basic terminology used to describe physical processes and landscapeforms.</li><li>3. Describe elements of the atmosphere and the oceans</li></ol>		
<b>Course Objectives:</b> <p>This course aims to</p> <ol style="list-style-type: none"><li>1. Study basic principles of the Earth Sciences</li><li>2. Understand the landforms, atmospheric elements and structure and basics of oceanography</li></ol>		
Content of Theory Course 1		42/45Hrs
<b>Unit – 1</b>		11
Origin, Shape and Size of the Earth, Movement of the Earth- Rotation and Revolution, Effects of the movement of Earth,Coordinates -Latitude, Longitude and Time. Structure of the Earth,		
<b>Unit – 2</b>		11
Rocks - types,significance, Weathering – types. Agents of Denudation - River, Glacier, Wind and Under Ground water. Volcanicity, Earthquakes and Tsunamis		
<b>Unit – 3</b>		11
Structure and Composition of Atmosphere,Weather and Climate. Atmospheric Temperature, Heat Budget of the atmosphere Atmospheric Pressure, Winds and Precipitation		
<b>Unit – 4</b>		12
Distribution of Land and Sea, Submarine Relief of the Ocean, Temperature and Salinity of Sea Water. Ocean Tides, Waves and Deposits, Ocean currents - Atlantic, Pacific and IndianOceans. Marine Resources: Biotic, mineral and energy resources

### B.A. / BSc Semester 1

#### Title of the Course: OE 1.1.2 Fundamentals of Remote Sensing

Code: GEOGOE T1.1.2

Number of Theory Credits	Number of lecture hours/ semester
3	42 - 45
<b>Course Outcomes:</b> <ol style="list-style-type: none"><li>1. This course is to make understand the basic concepts of Remote Sensing and to impart necessary skills of remote sensing analysis, and image interpretation to the students. So that, students acquire employable skills in remote sensing.</li><li>2. Students will learn how to handle and process the satellite images for understanding of biophysical phenomena of the earth system.</li></ol>	
<b>Course Objectives:</b> <ol style="list-style-type: none"><li>1. To congregate the basic concepts and fundamentals of physical principles of remote sensing</li><li>2. To create a firm basis for successful integration of remote sensing in any field of application.</li><li>3. To study basics of digital image processing and image interpretation techniques.</li><li>4. To study the applications of the remote sensing to solve the real-world problems.</li></ol>	
<b>Content of Theory Course 1</b>	
<b>Unit – 1 Introduction</b>	11
Definition of Remote Sensing, developmental stages, Laws of Physics, electromagnetic waves, spectrum, regions, wavelength, frequencies, and applications. Types-Satellites, Sensors, Payloads, Orbits, telemetry of satellites.	
<b>Process and types of Remote Sensing</b>	11
Process of remote sensing, interaction of radiation with atmosphere and targets, atmospheric noises, attenuation in radiance, resolutions of remote sensing, optical remote sensing, visible region of the spectrum, thermal remote sensing, microwave remote sensing, Hyperspectral remote sensing, LiDAR, and other remote sensing Platforms.	

<b>Unit – 3 Image Classification and Interpretation</b>	11
Satellite products and its spectral characteristics, composite images, band ratios; Land use land cover classification schemes-Anderson and NRSC; Visual image interpretation, elements, stages of interpretation and interpretation keys. Image classification- supervised, unsupervised, and principal component analysis (PCA) and accuracy assessment.	
<b>Unit – 4 Applications of Remote Sensing</b>	12
Disaster Management, Meteorological Studies, Agricultural and Irrigation Studies, Forestry Studies, Hydrological Studies, Natural Resource, Oceanic and Coastal mapping, Soil resource mapping, Urban and Rural Mapping and Management.

### Title of the Course: Introduction to Climatology

**CODE:** GEOGDSC T2.1

Number of Theory Credits	Number of lecture hours/ semester	Number of practical Credits	Number of practical hours/ semesters
4	52 or 56	2	52 or 56
<p><b>Course Outcomes:</b></p> <p>After the completion of this course, students should be able to</p> <ol style="list-style-type: none"> <li>define the field of climatology and to understand the atmospheric composition and structure.</li> <li>to outline the mechanism and process of solar radiation transfer to earth surface and to explain the temperature distribution and variation according to time and space.</li> <li>to illustrate and explain the air pressure system, wind regulating forces and the formation of the Atmospheric Disturbance.</li> <li>to understand and compute the air humidity as well as to explain the process of Condensation and formation of precipitation and its types.</li> </ol>			
<p><b>Course Objectives:</b></p> <p>This course aims to:</p> <ol style="list-style-type: none"> <li>to define the field of climatology and components of the climate system</li> <li>to introduce various dimensions of climatology like structure and composition.</li> <li>to understand the global atmospheric pressure, temperature, and wind system.</li> <li>to study the concept of atmospheric moisture and its types</li> </ol>			
<b>Content of Theory Course 1</b>			<b>52/56Hrs</b>
<b>Unit – 1 Composition and Structure of the Atmosphere</b>			14
Nature and Scope of Climatology, Atmospheric Sciences; Climatology and Meteorology Origin and structure of the Atmosphere: Troposphere, Stratosphere, Mesosphere, Ionosphere, Exosphere and their characteristics. Composition of the atmosphere Weather and Climate			
<b>Unit – 2 Atmospheric Temperature</b>			14
Insolation: Definition, Mechanism, Solar Constant. Factors affecting the Insolation: Angle of incidence, length of the day, Sunspots, Distance between the earth and the sun, effect of the atmosphere. Heating and cooling process of the atmosphere-Radiation, Conduction, convection, and advection. Temperature: meaning and Influencing Factors on the Distribution of Temperature Distribution of the temperature: Vertical, Horizontal, and Inversion of temperature. Global Energy Budget: Incoming shortwave solar radiation, Outgoing Longwave Terrestrial radiation, Albedo. Net Radiation and Latitudinal Heat Balances.			
<b>Unit – 3 Atmospheric Pressure and Winds</b>			14

Atmospheric Pressure: Influencing factors on atmospheric pressure. Vertical and Horizontal Distribution of the atmospheric pressure and Pressure Belts, Pressure Gradient. Tri-cellular-Hadley, Ferrel's and Polar Cells. Winds: influencing factors, Types - planetary, seasonal, local wind Variable winds-Cyclones and anti-cyclones. Air-Masses and Fronts: Definition, Nature, Source Regions, Classification.	
<b>Unit – 4 Atmospheric Moisture</b>	14
Humidity: Sources, influencing factors and types-Absolute, Relative and Specific. Hydrological cycle: process of evaporation, condensation. Clouds and its types Precipitation and its forms. Climate Change: Causes and consequences, recent issues-floods, drought,

### GEOGDSC P2.1- Climatology Practical CREDITS: 2

**Content of Practical Course 1:** List of Experiments to be conducted

*Conduct all exercises with Goal, Procedure, devices, and findings.*

**Exercise 1:** Understanding Structure and functions of the Indian Meteorological Department (IMD).

**Exercise 2:** Collection of climatic data from IMD website.

<https://mausam.imd.gov.in/bengaluru/>

**Exercise 3:** Plotting of downloaded climatic data using graphical methods-

#### Elementary Instrumental Observation:

**Exercise 4:** Centigrade and Fahrenheit thermometer for measuring temperature.

**Exercise 5:** Mercurial Barometer and Aneroid Barometer for measuring atmospheric pressure

**Exercise 6:** Wind Vane and cup-anemometer.

**Exercise 7:** Wet and Dry bulb thermometer for measuring humidity

**Exercise 8:** Rain gauge- Dial type for measuring rainfall Exercise 3: Rainfall Trend Analysis.

**Exercise 9:** Interpretation of Indian Daily Weather charts.

**Exercise 10:** Deriving water balance chart, Actual and potential evapotranspiration

*Note: Students are expected to download weather charts of the four seasons.*

## B.A. / BSc Semester 2

### **Title of the Course: 1 Introduction to Human Geography**

**CODE: GEOGOE T2.1.1**

Number of Theory Credits	Number of lecture hours/ semester
3	42 - 45
<b>Course Outcomes:</b> <ol style="list-style-type: none"> <li>1. Students will learn how human, physical, and environmental components of the world interact.</li> <li>2. Students will be familiarized with economic processes such as globalization, trade and their impacts on economic, cultural and social activities.</li> <li>3. The student will describe what geography and human geography are.</li> <li>4. Understand population dynamics and migration.</li> </ol>	
<b>Course Objectives:</b> This course aims to <ol style="list-style-type: none"> <li>1. Understand the basic concepts of human geography</li> <li>2. Study population attributes and dynamic nature of it</li> <li>3. Introduce economic, cultural, and trade activities and their impact on the development of the region</li> </ol>	
<b>Content of Theory Course 1</b>	
<b>45Hrs</b>	
<b>Unit – 1 Introduction to Human Geography</b>	
11	
Nature and scope, Development Environmental Determinism and Possibilism, Neo determinism (stop and go determinism) Approaches to human geography: Exploration and Descriptive approach, regional analysis Approach, Areal Differentiation Approach, Spatial organization Approach. Modern approaches: Welfare or Humanistic Approach, Radical Approach, Behavioral Approach, Post Modernism in geography Fields and sub fields in Human geography	
<b>Unit – 2 Geographical Analysis of Population</b>	
11	
Distribution and Growth of Population Density of population: meaning and Types: Arithmetic Density and Physiological Density. Regional distribution of Density of Population. Population Movement: Migration, Ravenstein's Law of Migration, Factors of population Migration, Economic Push and Pull factors, Cultural Push and Pull Factors, Environmental Push and Pull Factors. Migration Types: Immigration and Emigration, Internal and International Migration	
<b>Unit – 3 Cultural Patterns and Processes</b>	
11	
Concept of Culture, Material and Non material culture Cultural Regions, cultural Traits and Complexes, cultural Hearths, cultural Diffusion. Languages of the World: Types, Classification and Distribution. Religions: Types and Classification. Distribution. Universalizing Religions: Christianity, Islam, Buddhism. Ethnic Religions: Hinduism, the Chinese religion, Shintoism, Judaism. The Major tribal population of the world.	

<b>Unit – 4 Human Economic Activities, Development and Settlements</b>	12
<p>Primary Economic Activities – Agriculture, Types: Primitive Subsistence, Intensive subsistence, Plantation Agriculture, Extensive Commercial grain cultivation, Mixed Farming, Dairy Farming</p> <p>Secondary Activities: Manufacturing, classification – based on size – Small Scale and Large scale. Based on Raw material – Argo-based, Mineral based, Chemical Based and Forest based. Industrial Regions of the world.</p> <p>Tertiary Activities: Types: Trade and commerce, Retail Trading services, Wholesale trading. Transport and communications: Factors, communication services – Telecommunication. Services: Informal and Non formal sector. Information technology and service.</p> <p>Human Settlements: Factors, Classification, Types and Patterns: Rural, Urban. Compact or Nucleated and Dispersed settlements. Rural settlement Patterns: linear, rectangular, circular, star shaped, T shaped.</p>

## B.A. / BSc Semester 2

### **Title of the Course: 2. Basics of Geographic Information Systems (GIS)**

**CODE: GEOGOE T2.1.2**

Number of Theory Credits	Number of lecture hours/ semester
<b>3</b>	<b>39 or 42</b>
<p><b>Course Outcomes:</b></p> <ol style="list-style-type: none"> <li>1. Students are trained to adapt the theoretical concepts in a practical way through the mathematical models of geography.</li> <li>2. Students will have the hands-on training on various modes of spatial and non-spatial data collection, data storage, data analytics, data interpretation and data display through the thematic maps.</li> <li>3. Students are exposed on spatial thinking to solve the geographical problems with range of proven mathematical and statistical models.</li> <li>4. Students can employ in various corporate and government organisation where they deal to solve geographical problems.</li> </ol>	
<p><b>Course Objectives:</b> This course aims to:</p> <ol style="list-style-type: none"> <li>1. Understand the concept and techniques of the Geographic Information Systems.</li> <li>2. Define the GIS data types and structures.</li> <li>3. Study geo processing and visualization concepts and techniques in GIS.</li> </ol>	
<b>Content of Theory Course 1</b>	
<b>52/56Hrs</b>	
<b>Unit – 1 Introduction</b>	
10	
Emergence of GI Science, Milestone and Developmental stages in GIS, Definition, scope, role of GIS in digital world; Components, functionalities, merits and demerits, global market, interdisciplinary domains, and its integration with GIS.	
<b>Unit – 2 Geodesy and Spatial Mathematics</b>	
10	
Cartesian coordinates, latitude, longitudes, formats of angular units, geographical coordinates, Datum: WGS84, vs NAD32. UTM, Aerial Distance measurement using Geographic and projected coordinates, Area, Perimeter, length by coordinates and various international measures.	
<b>Unit – 3 GIS Data and Scale</b>	
10	
Spatial Data and its structures; sources and types of data collection; data errors, topology of data and relationship. Large Scale vs Small Scale, generalization; precision and accuracy of data-logical consistency and non-spatial data integration	
<b>Unit – 4 Geoprocessing and Visualization</b>	
12	
Spatial and Non-Spatial Queries, proximity analysis, Preparation of Terrain and Surface models. Hotspot and density mapping. Types of maps, thematic maps and Its types, relief maps, flow maps and cartograms. Tabulations: Graphs and Pivot tables

## B.A. / B.Sc. honors Programme

### Semester III

**Title of the Course: Fundamentals of Human Geography**

**CODE: DSC T 3.1**

Number of Theory Credits	Number of lecture hours/semester
4	56
<p><b>Course Outcomes:</b></p> <ol style="list-style-type: none"> <li>1. Students will earn Basic concepts, approaches and development of Human Geography.</li> <li>2. Learn how human interact with environmental components of the world and also learn how human beings and environment mutually influences one another.</li> <li>3. Students will be familiarized with cultural and economic processes at different scales such as globalization, trade, cultural and social activities.</li> <li>4. The student will be able differentiate between geography and human geography.</li> <li>5. Understand population dynamics and human settlements.</li> </ol>	
<p><b>Course Objectives:</b></p> <p>This course aims to</p> <ol style="list-style-type: none"> <li>1. Understand the basics concepts and approaches of human geography</li> <li>2. Study the nature and distribution of cultural elements and their process and to appraise the mutual interaction between People and places.</li> <li>3. To examine the population attributes and dynamic nature of them.</li> <li>4. To study different types of economic activities and their adaptation with the environment and their impact on the development of the regions.</li> </ol>	
<p><b>Module –1: Introduction to Human Geography</b></p>	
	14
<p>Nature and scope, Development and Branches of Human Geography, Themes in Geography: Location, Place, Human-Environment Interaction, Movement and Region.</p> <p>Man- Environment Relation: Environmental Determinism and Possibilism, Neo-Determinism (stop and go determinism)</p> <p>Approaches to Human geography: Exploration and Descriptive Approach, Regional Approach, Areal Differentiation Approach, Spatial organization Approach. Modern Approaches: Welfare or Humanistic Approach, Radical Approach, Behavioral Approach, Post Modernism in geography.</p>	
<p><b>Module –2: Cultural patterns and Processes</b></p>	
	14
<p>Concept of culture, Material and Non-material Culture, Cultural traits and Cultural regions.</p> <p>Meaning and Definition of races, Classification of races, Main characteristics (traits) and Broad racial groups of the world and their distribution.</p> <p>Languages: Classification and Distribution of languages.</p> <p>Religion: Types, Classification, and Distribution of religions: Hinduism, Christianity, Islam and Buddhism.</p> <p><b>Assignment:</b> Each student is expected to prepare a brief report on the cultural composition of their own locality/ place/ village/ ward/town or neighborhoods through field investigation and also can use published data.</p>	

<b>Module –3: Population and Settlements</b>	14
<p>Distribution and Growth of Population; Factors affecting population Distribution.</p> <p>Density of Population: Meaning and Types; Arithmetic Density, Physiological Density and Agricultural density, Regional Distribution of Density of Population; Carrying capacity and Sustainability, Concept of Settlements, Origin and evolution of Human settlements, Factors of settlements, origin and distribution, types and pattern of settlements, Rural and Urban settlements, Trends and Patterns of World Urbanization.</p> <p><b>Field Activity:</b> Students should study and identify the factors influencing on the origin and growth of the settlement and each student is expected to identify patterns of settlements by visiting nearest settlement. The students are advised to carry topographical map of the place during field visit.</p>	
<b>Module–4: Economic Activities</b>	14
<p>Concept and Classification of Economic activities; Factors affecting Economic Activities.</p> <p>Primary Economic Activities – Agriculture, Types: Primitive Subsistence, Intensive Subsistence, Plantation Agriculture, Extensive Commercial grain Cultivation, Mixed Farming, Dairy Farming.</p> <p>Secondary Activities: Manufacturing, Classification – 1. Based on size – Small Scale and Large scale. 2. Based on Raw Material – Agro-based, Mineral based, Chemical Based and Forest based. Industrial Regions of the world.</p> <p>Tertiary Activities: Types: Trade and Commerce, Retail Trading Services, Wholesale Trading. Transport and communications: Factors, Communication Services – Telecommunication. Services: Informal and Non formal sector. Information technology and service.</p> <p><b>Case Study:</b> Students have to visit a village/a town nearby and observe the economic activities and understand different classes and identify the most dominant economic activities..</p>

## B.A./ B.Sc. honors Programme

### Semester III

**Title of the Course: Fundamental Techniques in Human Geography, CODE: DSC P 3.1**

Number of Theory Credits	Number of lecture hours / semester
2	56
<p><b>Course Outcomes:</b></p> <ol style="list-style-type: none"> <li>1. Students will learn the geographical concepts such as scale, map, projections, distance, direction, and learn how these features are used in map production and area visualization.</li> <li>2. Students will be familiarized with different methods of computing population growth, understanding the techniques of nearest neighbor analysis.</li> <li>3. The student will be able to understand the factors affecting settlement development and economic activities therein.</li> </ol>	
<p><b>Course Objectives:</b></p> <p>This course aims to</p> <ol style="list-style-type: none"> <li>1. Understand the application of the cartography in mapping of population</li> <li>2. Study population growth models</li> <li>3. Introduce how economic, cultural, and trade activities impact on the development of the settlement</li> </ol>	

Content of the Practical Course		
<b>Exercise 1</b>	<p><b>Maps:</b> Definition, Elements of map: scale, direction, map projection, conventional signs and symbols, legend,</p> <p>Types of map: <b>1. Based on scale:</b> A. large scale: cadastral maps, Topographic maps, B. Small scale: wall maps, atlas maps, maps</p> <p><b>2. Based on purpose and content:</b> Physical Maps, Political Maps, Thematic Maps. Uses of Maps.</p>	08
<b>Exercise 2</b>	<p><b>Map Scales:</b> Definition of Scale, Methods of representing Scales: Statement Method, Graphical Method, Ratio Method (R F).</p>	08
<b>Exercise 3</b>	<p><b>Conversion of Scale:</b> Verbal to RF, RF to Verbal, Verbal to Graphical.</p> <p>Exercises on Measuring Distances on Map and converting map distance to ground distance.</p>	08
<b>Exercise 4 and 5</b>	<p><b>Map Projections:</b> Meaning and Purpose, Latitudes and Longitudes, Classification of Map Projections and their general properties: Conical Projections, Cylindrical Projections, Zenithal Projections. UTM Projections. Choice of Map Projection.</p>	08
<b>Exercise 6</b>	<p>Drawing of conical projection with One Std. Parallel and Two Std. Parallels,</p>	08

<b>Exercise 7</b>	Drawing of Cylindrical Equal Area Projection.	06
<b>Exercise 8</b>	Drawing of Zenithal Polar Gnomonic Projection.	06
<b>Exercise 9</b>	Introduction to UTM Projection, uses and importance.	4

## B.A. /B.Sc. Honors Programme

### III Semester (Open Elective)

**Title of the Paper: Geography of India**

**Code:OE3.1**

<b>Number of Theory Credits</b>	<b>Number of lecture hours / semester</b>
<b>3</b>	<b>42</b>
<p><b>Course Outcomes:</b></p> <ol style="list-style-type: none"> <li>1. This is intended to ensure the Students of other discipline to gain geographical knowledge about India.</li> <li>2. Prepare them to think geographically about our nation and to enhance the pride of our Nation.</li> </ol>	
<p><b>Course Objectives:</b></p> <p>After the completion of this course the Students are expected to</p> <ol style="list-style-type: none"> <li>1. Have an understanding of the Physical, ecological, economic, demographic and cultural characteristics of our nation.</li> <li>2. By that they can apply geographical knowledge and skills in deeper understanding of the Core Subjects.</li> </ol>	

<b>Module</b>	<b>Content</b>	<b>Hours</b>
<b>Module -1 Physical Bases</b>		12
	Location, Size and Extent, Political Divisions Relief Features-Northern Mountains, Northern Great Plain, The Peninsular Plateau and Coastal Plain and Islands Climate: Seasons – Summer Season, South-West Monsoon, Retreating Monsoon Season, Winter Season, Drainage system- Rivers of North India, Rivers of South India, Vegetation - Types and Distribution- Afforestation programs	
<b>Module – 2 Irrigation and Agriculture</b>		10
	Irrigation: Need for Irrigation and Types Agriculture: Significance and Types- Intensive and Extensive Farming, Subsistence and Mixed Farming Major Crops- Production and Distribution : Rice, Wheat Cotton, Sugar cane and Tea Development of Agriculture- Green Revolution	
<b>Module - 3 Minerals, Power and Industries</b>		10
	Mineral and Power Resources-Types and Significance Production and Distribution: Iron Ore, Manganese Production and Distribution: Coal, Petroleum, Hydro Electricity Major industries- Iron and Steel, Cotton textile, Sugar. Major industrial regions of India Special Economic Zones	
<b>Module -4 Transport, Communication and Human Population</b>		10
	Roadways, Railways, Airways Waterways. Important Ports: Calcutta, Chennai, Mumbai and New Mangalore. Indian Space Programme. Growth of Population Distribution and Density of Population Population Composition – Sex Ratio, Literacy Problems of Population	
	<b>Total</b>	42

**B.A. /B.Sc. Honors Programme**

**III Semester (Open Elective)**

**Title of the course: Application of GIS and Remote sensing      OE.3.2 Credits: 3**

Number of Theory Credits	Number of lecture hours / semester	
<b>3</b>	<b>42</b>	
<b>Course Outcomes:</b>		
<ol style="list-style-type: none"> <li>1. This is intended to ensure the Students of other discipline should understand fundamentals of remote sensing and Geographical Information system.</li> <li>2. prepare them to think geographically and Apply this knowledge to their respective field of enquiry for spatial and other kinds of planning.</li> </ol>		
<b>Course Objectives:</b>		
<p>After the completion of this course the Students are expected to</p> <ol style="list-style-type: none"> <li>1. Have an understanding of the Geo-spatial tools and their significance and utilization.</li> <li>2. Utilize different tools and techniques of remote sensing and GIS for addressing various problems which are both natural and societal in nature.</li> <li>3. By that they can apply geographical knowledge and skills in deeper understanding of the Core Subjects.</li> </ol>		
Module	Content	Hours
Module - 1	Remote Sensing; Concept, Definition, Evolution of Remote Sensing, Process of Remote sensing, EMR; Wave length, Frequency, Electromagnetic Spectrum; Bands, Atmospheric window, Interaction of EMR with atmosphere and surface. Spectral signature.	12
Module - 2	Remote Sensing Platforms, Orbit, Active and Passive Remote Sensing, Indian remote sensing satellites and launch vehicle's,	10

	Application of Remote Sensing in Agriculture, Disaster management, Urban studies, Coastal management and EIA.	
Module - 3	Geographic information System; Definition, Development of GIS, Components of GIS, Data types; Spatial and Non-spatial data, Raster and Vector data models, Data Sources, errors, Data input methods; Manual and Automated.	10
Module 4	Data Analysis; Buffer Analysis and its applications, Overlay functions, Query, Network Analysis, GIS Applications in urban monitoring & planning, Disaster Mitigation, Forestry, Wetland monitoring.	10

## B.A./B.Sc. honors programme

### Semester IV

**Title of the Course: India- Resources and Sustainability**

**CODE: DSC 4.1**

<b>Number of Theory Credits</b>	<b>Number of lecture hours / semester</b>
<b>4</b>	<b>56</b>
<b>Course Outcomes:</b> <ol style="list-style-type: none"><li>1. Students will learn about the physical setting of India.</li><li>2. Students will be familiarized with the water and Agricultural Resources of India and they will understand the importance of these resources in the national development and prosperity.</li><li>3. The student will be able to understand the factors affecting, location and distribution of Industries and different modes of Transport.</li></ol>	
<b>Course Objectives:</b> <p>This course aims to</p> <ol style="list-style-type: none"><li>1. Understand the physical setting of India.</li><li>2. Study water and agricultural resources of India.</li><li>3. Study the nature of transport and communication, Industries and population growth.</li><li>4. Introduce how economic, cultural, and trade activities impact on the development</li></ol>	
<b>Module -1 Physical Setting:</b>	<b>14</b>
Location, Size and Extent. Major Physiographic Regions - Northern Mountains, Northern Great Plains, Peninsular Plateau and Coastal Plains and Islands) and their Characteristics; Climate: Seasonal Weather Characteristics, Climatic Zones. Mechanism and Characteristics of Indian Monsoons. Tropical Cyclones and Western Disturbances. Floods and Droughts Drainage System. Soil: Types, Erosion and Conservation. Vegetation: Types, Distribution, Afforestation programs, National Parks, Wildlife Sanctuaries, and Biosphere reserves.	
<b>Module -2 Water and Agricultural Resources:</b>	<b>14</b>
Water resources of India, Surface and Groundwater, Water Demand and Utilization. Irrigation: Sources, Types and Intensity. Issues and Challenges: Water Resources Scarcity, Water Conservation and Management. Watershed Management, Rainwater Harvesting, Recycle and Reuse of water. Interlinking of Rivers, National Water Policies, National Water Mission, Jalashakti	

	<p>Abhiyaan. Command Area Development and Water Management. Central Water Commission and Water Tribunal and their role.</p> <p>2.5 Agriculture: Land Use and Cropping Pattern – Meaning and Concepts, Land Use and Cropping Pattern in India, Agro-climatic Regions, Green Revolution – Causes and Effects, Hunger Index and Malnutrition; Food security and right to food to achieve Zero hunger and Good Health and Wellbeing..</p>	
<b>Module -3 Industries, Transportation and Communication:</b>		14
	<p>Locational factors of industries, Major Industrial Regions and their characteristics,</p> <p>Classification of Industries: Agro-based, Mineral-based, Forest-based and Animal-based industries.</p> <p>Special Economic Zones: Industrial / Economic Corridor.</p> <p>Transport &amp; Communication: Significance, Growth and Development – Road ways, Railways, Waterways, Airways and Pipeline Networks and their Complementary and Competition.</p> <p>Communication: Means of Communication and their Significance</p> <p><b>Assignment:</b> Selecting a region students have to study the locational factors nearby industry and prepare a report.</p>	
<b>Module -4 Human Resources:</b>		14
	<p>Growth, Distribution and Density of Population.</p> <p>Composition of Population: Age, Sex, Rural-Urban Population Composition.</p> <p>Migration: Meaning, Factors, Types, Causes and Consequences.</p> <p>Human Development in India: Measures, Levels of Development based on HDI</p> <p><b>Field Study:</b> Selecting a region / district students have to examine the levels of Human Development using HDI and prepare a report.</p>

## B.A./B.Sc. honors Programme

### Semester IV

**Title of the Course: Representation of Indian Geographical features and Resources.**

**Code: DSC P-4.1**

Number of Theory Credits	Number of lecture hours / semester
2	56
<b>Course Outcomes:</b>	
After the completion of this course, students should be able to	
<ol style="list-style-type: none"> <li>1. Understand holistically about the geography of India and plotting resources on Indian outline map.</li> <li>2. Interpret and apply the concepts on resource distribution of India and related economic activities</li> <li>3. Demonstrate the economic development through the connectivity of transport and communication.</li> </ol>	
<b>Course Objectives:</b>	
This course aims to	
<ol style="list-style-type: none"> <li>1. Understand the basics geographical setting of India</li> <li>2. Study physiographic divisions with drainage, soil and vegetation of India.</li> <li>3. Gets exact information regarding mechanism of monsoon and its impact.</li> </ol>	

Content of the Practical Course		
<b>Ex.No.1</b>	Mapping exercises on Indian outline Map: International Boundaries, Mountain peaks, Passes, Glaciers and important Physical Divisions of India, Rivers, National Biospheres and National Parks, Dams and Reservoirs, Lakes and Water Bodies, Islands, National Waterways, Ports and Harbours, National High ways, Important Airports, Industrial Corridors, Important Coastal Zones and Beaches, Ecologically Sensitive areas, Important industrial zones, Special Economic Zones, Resource centres and Mining, Cultural Regions, Tribal Areas.  <b>Note:</b> Each student is expected to complete at least 3 mapping exercises from the above topics which should cover brief description on: Location (Latitude and longitude, state, district, place,) geographic/environmental/ ecological/ political/ economic significance of the place/ location. Minimum 10 locations shall be involved in each exercise.	10
<b>Ex.no.2 and 3,</b>	Mapping Temperature and Rainfall Distribution of India / Karnataka using Isopleth method.	10
<b>Ex.no.4 and 5</b>	Mapping of Agro-climatic zones of India, Flood Prone and Drought Prone Areas,	8

<b>Ex. No.6 and 7</b>	Mapping of Cropping Pattern and Crop intensity of India/ Karnataka. Weaver's Method, Bhatia's Method. Calculation and mapping of Irrigation intensity.	10
<b>Ex.no.8</b>	Human Development Index: Concept, Calculation and Mapping	6
<b>Ex.no.9</b>	Gender Development Index: Concept, Calculation and Mapping	6
<b>Ex.no.10</b>	Human Poverty Index: Concept and Calculation and Mapping	6

## B.A. / B.Sc. Honors Programme Semester IV (Open Elective)

**Title of the Course : GEOGRAPHY OF KARNATAKA**

**Code: OE.4.1 Credits:3**

<b>Number of Theory Credits</b>	<b>Number of lecture hours / semester</b>
<b>3</b>	<b>42</b>
<p><b>Course Outcomes:</b> After the completion of this course, students should be able to</p> <ol style="list-style-type: none"> <li>1. Understand the physical, economic and socio-demographic aspects of Karnataka state in a broader sense.</li> <li>2. Understand the resource base of the state i.e., forests, soils, minerals, water and climate, and its impact on the socio-demographic and economic development of different regions of Karnataka in terms of agriculture, industries, transportation and other fields of human activities.</li> <li>3. Understand the development of irrigational projects and industrial projects and special Economic zones (SEZ's)</li> </ol>	
<p><b>Course Objectives:</b> This course aims to</p> <ol style="list-style-type: none"> <li>1. Understand the site and situation of Karnataka</li> <li>2. Intellectual connect to the resources and economic activities of Karnataka</li> <li>3. Assess demographic composition of Karnataka state</li> </ol>	

<b>Module</b>	<b>Content</b>	<b>Hours</b>
<b>Module -1</b>	<b>Physical Background</b>	12
	<p>Location, size and Administrative divisions.</p> <p>Physiographic Divisions: Coastal Regions, Malnad Regions and Maidan Regions.</p> <p>Weather and Climate: Seasons, Distribution of Rainfall and Temperature, Climatic regions, Drought prone areas in Karnataka.</p> <p>Drainage Systems: Major Drainage Systems in Karnataka. East flowing rivers and West flowing rivers.</p> <p>Natural Vegetation: Types of vegetation, Distribution of forests in Karnataka, Protection and Conservations. Reserve Forests and Protected Forests in Karnataka, National Parks and Bird Sanctuaries in Karnataka.</p>	
<b>Module -2</b>	<b>Soil, irrigation and Agriculture:</b>	10
	<p>Soil: Types and Distribution, Regional Issues of Soil Quality and Management.</p> <p>Water Resources: Distribution of Water Resources, Irrigation –Sources of irrigation, Multipurpose River Valley Projects.</p> <p>River Water Disputes with the neighbouring states.</p> <p>Agriculture regions of Karnataka. Major Food Crops – Paddy, Ragi, Maize, Pulses.</p> <p>Commercial Corps – Cotton, Sugarcane, Tobacco, Coffee, Spices, Livestock and Fishing.</p> <p><b>Assignment:</b> Students need to visit local fields and get to know how soil conservation plans are prepared and submit report</p>	
<b>Module - 3</b>	<b>Minerals, Energy and Manufacturing:</b>	10
	<p>Major Mineral resources of Karnataka and their Regionalization. Iron ore, Manganese, Gold, Bauxite</p> <p>Energy Resources: Types and their Distributions. Conventional and Non-Conventional Sources.</p> <p>Industries: Textile Industries, Iron and Steel Industries, Sugar Industries. Industrial Regions and Special Economic Zones of Karnataka.,</p>	
<b>Module – 4 Transport, Information &amp; Communication Technology and Population</b>		10
	<p>Transportation: Types of Transportation, Distribution of Transportation.</p> <p>Growth and Distribution of Information Technology in Karnataka.</p> <p><b>Population</b> Growth, Distribution and Density of Population. Population Composition – Sex Ratio, Literacy. Human Development in Karnataka (HDI)</p>

## BA/BSc Honors Programme

### Semester IV (Open Elective)

**Title of the course: Population and Settlement Geography**

**Code: OE.4.2 Credits: 3**

<b>Number of Theory Credits</b>	<b>Number of lecture hours / semester</b>	
<b>3</b>	<b>42</b>	
<b>Course Outcomes:</b>		
After the completion of this course, students should be able to		
<ol style="list-style-type: none"> <li>1. Understand the concepts of both Population and Settlement geography.</li> <li>2. Appreciate the man environment interplay which are expressed in different kinds and patterns in the distribution and density of population and Human settlements over space.</li> <li>3. Understand the Demographic dynamics like birth, Death and Migration of Population and its relation with settlement dynamics like settlement size, types and rural urban settlements and its issues.</li> </ol>		
<b>Course Objectives:</b>		
This course aims to		
<ol style="list-style-type: none"> <li>1. Introduce the basic concepts of Population Geography to the students.</li> <li>2. Introduce the basic concepts of Settlement Geography to the students.</li> <li>3. Bring the significance of Environment and society on Population dynamics and Mobility.</li> <li>4. Critically examine the nature of man-environment relation and interaction with reference to human settlement types and patterns.</li> </ol>		
<b>Module</b>	<b>Content</b>	<b>Hours</b>
Module -1	<b>Population Geography -</b>	12
	Meaning, Definitions, Scope and nature of population geography Global Population size and growth, Malthus Theory, Demographic Transition Theory Over, Under and Optimum Population Population Policies in the world – Social Well being, Quality of Life	

<b>Module -2</b>	<b>Population Dynamics</b>	10
	Fertility – Measures and Distribution Mortality – Measures and Distribution Migration – Types, Causes and Consequences	
<b>Module -3</b>	<b>Settlement Geography</b>	10
	Meaning, Definitions, nature and importance of settlement geography, Origin of settlement, influencing factors Site and situation of settlement – Stable and Unstable settlement	
<b>Module -4</b>	<b>Classification of Settlements- Rural and Urban Settlements</b>	10
	Rural Settlement – Types, Pattern, Functions Rural-Urban Continuum and Fringe Urban Settlement - Definition of urban place, Hierarchy, Functional classification of towns, Concept of Urban morphology. Primate City, Rank Size Rule

**DEPARTMENT OF GEOGRAPHY**

**MODEL QUESTION PAPER**

**B.A GEOGRAPHY**

**(For I, II, III, IV, V AND VI semesters)**

**Time: 2 Hours**

**Max. Marks: 60**

**Part-A**

**I. Answer any FOUR of the following questions**  
**4x3=12**

- 1).....
- 2).....
- 3).....
- 4).....
- 5).....
- 6).....

**Part-B**

**II. Answer any THREE of the following questions**  
**3x6=18**

- 7).....
- 8).....
- 9).....
- 10).....
- 11).....

**Part -C**

**III. Answer any THREE of the following questions**  
**3x10=30**

- 12).....
- 13).....
- 14).....
- 15).....

## **Programme Outcome**

### **After completing the graduation in B A (EG) the students are able to:**

- PO1. Explain, graph, and analyze key economics models
- PO2. Understand current events and evaluate specific policy proposals
- PO3. To address problem that do not have clear economic solutions
- PO4. Develop critical and quantitative thinking skills
- PO5. Communicate effectively in written, oral and graphical form about specific issues
- PO6. Apply economic analysis to everyday problems in real world situations
- PO7. Understand and appreciate relationship between man and Environment
- PO8. Read, interpret, and generate maps and other geographic representations
- PO9. To extract, analyze, and present information from a spatial perspective
- PO10. Understand physical-geographic processes, global distribution of  
Landforms and ecosystems
- PO11. The role of physical environment on human population
- PO12. Develop the ethical aptitudes and dispositions necessary to acquire and hold  
Leadership positions in industry, government, and professional organizations

## **Programme Outcome**

### **After completing the graduation in B A (KG) the students will:**

PO1. Develop human values and a sense of social service

PO2. Become a responsible and dutiful citizen.

PO3. Able to enhance critical temper and creative ability

PO4. Understand and appreciate relationship between man and Environment.

PO5. Read, interpret, and generate maps and other geographic representations

PO6. Understand physical- geographic processes, the global distribution of landforms and  
Ecosystems

PO7. Role of the physical environment on human populations

## **Programme Specific Outcome**

### **On Completion of BA (EG) students will:**

PSO1. Understand theoretical and practical aspects of Economics and Geography

PSO2. Evaluate Economic behavior inconsonance with Geographical factors

PSO3. Suggest the policy makers about desirable changes to be made in Micro and Macro

Economic issues based on geographical factors

PSO4. Gain ability to understand the economic problems in Geographical indicators

PSO5. Able to offer palatable solutions for economic and geographical challenges

PSO6. Attain Proficiency to analyze the economic decision of Government and non-Govt.

Entities that correlate with Geographical factors

PSO7. Gain requisite knowledge to evaluate land use pattern and demographical profile

PSO8. Apply GIS for understanding Market situation, Transport problem change in

Weather Condition, Cropping Pattern, and Natural Calamities and so on

## **Programme Specific Outcome**

### **On Completion of BA (KG) students will:**

PSO 1: Know more specific terminologies along with its etymology

PSO2: Know the changes in the differences in formation of society and their culture

PSO3: Help to understand different races, Society, and culture.

PSO4 Understand the relationship between man and environment

PSO6. Understand in simple language environmental problems their cause, Effect and Remedies.

PSO7. Help the students to pursue higher studies and even in research

PSO8 Helpful for competitive examinations

PSO9. Students may help to guide agricultural activities, fertility of soils, their characteristics,

Climatic condition, in regional language

DLE23011 (A) / DLE23013 (A)

**V – SEMSETER**  
**Geography V: GEOGRAPHY OF INDIA**

**Course outcome**

- CO 1. Deliberate in depth physical stunting of India
- CO 2. Write down in details with examples Irrigation system of India
- CO 3. Identify in depth population study of India
- CO 4. Learn in depth resources base study of India
- CO 5. Identify the characteristics of economic study of India

<b>UNIT</b>	<b>No. of Hours</b>
1. Location, size and extent of India – Relief features- Drainage system – Climate	15
2. Irrigation – Types, multipurpose river valley projects – DVC, Bhakra- Nangal, Alamatti	10
3. Population – Size and Growth since 1901, Population Density and Distribution, Literacy, Sex Ratio.	10
4. Resource Base –Livestock (cattle & fisheries),Power (Coal,& hydroelectricity) Minerals (iron ore and bauxite).	10
5. Economy – Agriculture (Rice, Wheat, Sugarcane, Tea, Cotton); Industries (Cotton Textile, Iron-Steel, Automobile), Transportation Modes (Road and Rail).	15

**V–SEMSTER**  
**GEOGRAPHY V: ECONOMIC GEOGRAPHY**

**Course outcome**

- CO 1. Identify the classification and characteristics of concepts of economic geography
- CO 2. Understand the characteristics of locational theories
- CO 3. Understand in depth study of primary activities
- CO 4. Learn the details of study of secondary activities
- CO 5. Write down in details with examples study of tertiary and quaternary activities

<b>UNIT</b>	<b>No. of Hours</b>
1. Definition, Approaches and Fundamental Concepts of Economic Geography; Patterns of Development.	12
2. Locational Theories – Agriculture (Von Thunen) and Industrial (Weber).	12
3. Primary Activities – Intensive Subsistence Farming, Commercial Grain Farming, Plantation, Commercial Dairy Farming, Commercial Fishing, and Mining (iron ore, coal and petroleum).	12
4. Secondary Activities – Cotton Textile Industry, Petro-Chemical Industry, Major Manufacturing Regions.	12
5. Tertiary and Quaternary Activities – Modes of Transportation, Patterns of International Trade, and Information and Communication Technology Industry.	12

**VI – Semester**  
**Geography VI: DISASTER MANAGEMENT**

**Course Outcome**

- CO 1. Identify in details with application, if applicable, hazards and disasters concepts
- CO 2. Specify the characteristics of flood, landslide, drought are in India
- CO 3. Write down in details with examples earthquake tsunami and cyclone are in India
- CO 4. Identify the classification and characteristics of human induced disasters
- CO 5. Learn in details with examples response and mitigation to disaster

<b>UNIT</b>	<b>No. of Hours</b>
1. Hazards, Risk, Vulnerability and Disasters: Definition and Concepts.	12
2. Disasters in India: (a) Causes, Impact, Distribution and Mapping: Flood, Landslide, Drought.	12
3. Disasters in India: (b) Causes, Impact, Distribution and Mapping: Earthquake, Tsunami and Cyclone.	12
4. Human induced disasters: Causes, Impact, Distribution and Mapping.	12
5. Response and Mitigation to Disasters: Mitigation and Preparedness, NDMA and NIDM; Indigenous Knowledge and Community-Based Disaster Management; Do's and Don'ts During Disasters	12

**Reading List**

3. Chang : Introduction to GIS, Tata McGraw Hill W, New Delhi.

**DLF23211 (A) / DLF23213 (A)**

**VI – SEMESTER**

**Geography VI: GIS BASED PROJECT REPORT**

**Course Outcome**

- CO 1. Identify the characteristics of study of GIS
- CO 2. Specify in depth GIS data structures
- CO 3. Write down in depth GIS data analysis
- CO 4. Deliberate in details with examples Application of GIS in Land use
- CO 5. Identify the classification and characteristics of Application of GIS in Urban and Forest monitoring

<b>UNIT</b>	<b>No. of Hours</b>
1. Geographical Information System (GIS): Definition and Components.	12
2. GIS Data Structures: Types (spatial and Non-spatial), Raster And Vector Data Structure.	12
3. GIS Data Analysis: Input; Geo-Referencing; Editing and Output; Overlays.	12
4. Application of GIS in Land Use/Land Cover Mapping.	12
5. Application of GIS in Urban Sprawl and Forests Monitoring	12

**Practical Record:** A project file consisting of 5 exercises on using any GIS Software on above mentioned themes.

**Reference:**

1. Bhatta, B. (2010) Analysis of Urban Growth and Sprawl from Remote Sensing, Springer, Berlin Heidelberg.41
2. Burrough, P.A., and McDonnell, R.A. (2000) Principles of Geographical Information System-Spatial Information System and Geo-statistics. Oxford University Press

**DLF23211 (B) / DLF23213 (B)**

**VI – SEMESTER**

**Geography VI: FIELD TECHNIQUES AND SURVEY BASED PROJECT  
REPORT**

**Course outcome**

- CO 1. Understand the characteristics of field techniques
- CO 2. Deliberate in details with application, if applicable, case study rural and urban
- CO 3. Specify in details with examples field work in Geographical studies
- CO 4. Understand in details with examples preparation of questionnaires
- CO 5. Learn the details of designing the field report

**UNIT**

**No. of Hours**

1. Field Work in Geographical Studies – Role, Value and Ethics of Field-Work  
10
2. Defining the Field and Identifying the Case Study – Rural /Urban /Physical /Human /  
Environmental.  
10
3. Field Techniques – Merits, Demerits and Selection of the Appropriate Technique;  
Observation (Participant / Non Participant).  
12
4. Questionnaires (Open/ Closed / Structured / Non-Structured); Interview with  
16  
Special Focus on Focused Group Discussions; Space Survey (Transects and  
Quadrants, Constructing a Sketch).
5. Designing the Field Report – Aims and Objectives, Methodology, Analysis,  
Interpretation and Writing the Report.  
12

**Practical Record**

1. Each student will prepare an individual report based on primary and secondary data collected during field work.
2. The duration of the field work should not exceed 10 days.
3. The word count of the report should be about **8000 to 12,000** excluding figures, tables, photographs, maps, references and appendices.
4. One copy of the report on A 4 size paper should be submitted in soft binding.

Programme: Bachelor of commerce  
Bachelor of Business Administration  
Bachelor of Computer Application

Programme outcome:

After the completion of the Graduation Student are able to:

- PO1-Motivated for their higher education
- PO2-Write resume, letter of application and business letters
- PO3- Improve Spoken and written communication

Programme: Bachelor of commerce  
Bachelor of Business Administration  
Bachelor of Computer Application

Programme specific outcome:

After the completion of the Graduation Student are able to:

- PSO1- Improve Spoken and written communication
- PSO2-Develop writing skills
- PSO-3- Avail job opportunity in translation

**Pattern of Question Paper**

1. Internal Assessment

Each paper will have an internal assessment component for 30 marks out of the maximum 100 Marks

2. **Theory Examination**

**Max Marks 70**

Theory question paper pattern

Theory question paper for I – IV semester will have Four Parts

**Question Paper Pattern**  
**Theory (6 Credits)**

Time: 3 Hours

Max. Marks: 70

### PART – A

This part consists of **two** questions of 15 marks each and the student will have to answer **one** question **15**  
**x 1 = 15**

### PART – B

**Part – B** consists of five questions of **ten** marks each and the students will have to answer **three** questions **10**  
**x 3 = 30**

### PART – C

This part will have **five** questions of **five** marks and the students will have to answer **three** questions **5 x**  
**3 = 15**

### PART – D

Map question will have **Ten** marks out of which Five marks will be awarded to locating Five places. **Five** marks for writing explanatory note on the places **5 +**  
**5 = 10**

The V & VI semester will have **Three parts** **Part – A** consists **01** question for **15** Marks. **Part – B** consists of **04** questions for **40** Marks and **Part – C** consists of **15** Marks for **03** questions.

## GENERIC ELECTIVES

### Pattern of Question Paper

1. Internal Assessment

Internal assessment component for 15 marks out of the maximum 50 Marks for C1&C2

2. **Theory Examination**

**Max**

**Marks:35**

Theory question paper pattern

Theory question paper for all the V – VI semester will have 3 Parts

### Question Paper Pattern

**Theory (2 Credits)**

**Time: 2.00 Hours**

Max. Marks: 35

### PART – A

This part consists of **five compulsory** questions of 2 marks each and the student will have to answer **one** question

**5 x 2 = 10**

### PART – B

**Part – B** consists of two questions of **Ten** marks each and the students will have to answer **one** question

$$10 \times 1 = 10$$

### **PART – C**

This part will have **Five** questions of Five marks and the students will have to answer **Three** questions

$$5 \times 3 = 15$$

**JSS COLLEGE OF ARTS, COMMERCE AND SCIENCE**  
**(Autonomous)**

**And**  
**III year BA Degree under CBCS**

**2022-2023**

## Syllabus for I & II Semester

EFFECTIVE FROM ACADEMIC YEAR 2021-22

SEPTEMBER 2021

### **BA HONOURS & MASTER'S PROGRAMME IN JOURNALISM AND MASS COMMUNICATION**

**Programme:** Five-year Integrated Master's Programme in Journalism and Mass Communication to be introduced under NEP.

#### Programme Objectives:

- Five-year Integrated Course in Journalism and Mass Communication would aim to facilitate students with all aspects of the field of Journalism. They become more proficient in both theory and practical skills of the media in general.
- The programme would prepare the students 'ready-to-be recruited by media, advertising & corporate houses'. The content of the programme is designed to be dynamic and responsive to rapid changes in most segments of the industry.

#### Learning Outcomes:

- The programme aims to create and reproduce media professionals who would contribute positively to the society.
- The programme aims to facilitate better career opportunities for all those students of this course and get them ready to tackle challenges in the professional setup.
- The programme aims to make a balance between the dynamic working environment and professional ethics in the field of Journalism and Mass Communication.

#### Need for Curriculum Enhancement:

NEP 2020 initiative is intended to facilitate a contribution to being ahead of industry among the students studying in different Universities/Institutions. The need for the curriculum development in Journalism and Mass Communication emerges due to the following reasons:

**Changing Media Resector:** The curriculum has been designed keeping with the industry requirements and include subjects such as Multimedia, Transmedia, Data Film Making, Copying, Blog and Vlogs, Mobile Journalism, Writing for Media, Producing News Content

for Radio and TV, Advertising and Corporate Communications, among several others. The rapid growth in media industry demands highly skilled human resources.

**Credit transfer:** Credit transfer is approved by the UAC and the Government that allows the students to transfer course from their existing university to a new UAC-approved university. The same number of credits in all the Universities in Karnataka is the first step towards the credit-transfer from University to University.

**Skill Enhancement:** The new curriculum focuses more on skills in teaching, research and thereby enhancing the skills of the students. It not only aims at producing responsible communicative professionals but also interacts with a business approach to day-to-day life. The popular like Writing for Media, Photography, Computer Applications for Media etc., further helps in skill development of students.

### **Efficiency**

The goal of *Journalism and Mass Communication* programme is offered with an objective to train and prepare professionally skilled media persons and communication experts. It leads students to a wide range of professionally based skills.

**Importance in Theory and Practice and its application:** The *Journalism and Mass Communication* curriculum focuses on innovative components in theory and practice, which in turn equips students to be skill-oriented media pros.

**Emphasis on NCTE:** The global media industry is in anticipation of ICT based communication experts. To enhance critical and creative thinking amongst students, NCTE tools are incorporated into the teaching methods which include research-led writing, via production through mass channels, and practical production.

**Research-based and research-led teaching:** The Research Projects are introduced in the curriculum to strengthen the research concepts among the budding researchers. The students are encouraged to explore fields of *Journalism and Mass Communication* research such as print, electronic and new media research, global, health and political communication research, folk media, inter-cultural communication and research on divergent issues and so on as per relevance to the relevance of the profession. The students will be required to do research project on a topic of their choice under the supervision of a research guide.

**Issue-Resolving Approaches:** Students will be involved in groups and individual discussions. This will help the students to develop and involve in the process of critical thinking and analyzing. It further helps them in decision-making and stress management and also boost self-confidence.

### **Exit Options and Credit Recommendations**

A Certificate / Diploma / Bachelor Degree or Bachelor Degree with Honours in Journalism and Mass Communication is awarded at the completion of every progressive year.

<b>Exit Option with</b>	<b>Certificate/Diploma/Bachelor Degree</b>
Successful completion of Two year (two semesters) of the first year multidisciplinary undergraduate Degree programme	Certificate in Journalism and Mass Communication
Successful completion of Second year (two semesters) of the first year multidisciplinary undergraduate Degree programme	Diploma in Journalism and Mass Communication
Successful completion of Three year (six semesters) of the first year multidisciplinary undergraduate Degree Programme	Bachelor of Arts Degree in Journalism and Mass Communication
Successful completion of Four year (eight semesters) of the four year multidisciplinary undergraduate Degree Programme	Bachelor of Arts Degree with Honours in Journalism and Mass Communication
Successful completion of Five year (Ten semesters) of the five year multidisciplinary degree programme	Master of Arts Degree With Honours in Journalism and Mass Communication

A student will be allowed to continue only after the exit semester and they can only add after each semester. No entry is given to lateral academic programmes based on the above mentioned career preferences and awards. The validity of the earned credit will be for a maximum period (year) as specified by the academic body of institute (ABC)

### **ACADEMIC COUNCIL OF INSTITUTIONS (ACI) RECOGNIZED**

UCC	Uttarakhand University Council
UVC	Uttar Pradesh University Council
UCC/NUV	Uttarakhand Council (UCC) Based Upon Board
UUC	Uttar Pradesh Council
UVC	Uttarakhand Council

### **Electronic Internal Evaluation and Transfer Fee Application:**

Final marks for each course shall be based on continuous assessment and term end examinations. As per the decision of the Karnataka State Higher Education Council, it is necessary to have written papers of Class Internal Assessment and Semester End examinations respectively, among all the Universities, their affiliated and autonomous colleges. The state level committee deliberated on the same and suggested the following pattern for the UG Marks. The BCU has also approved to follow the same pattern.

## BACC 1: INTRODUCTION TO JOURNALISM

<b>Course Title and Code</b>	BACC 1: Introduction to Journalism (With Foreword)		
<b>Programme Title</b>	Bachelor of Arts in Journalism and Mass Communication		
<b>Credits</b>	Theory - 04	Practical - 04	Total - 08
	Practical - 04		
<b>Course Type</b>	Core	Academic Year	2021-22

Philosophy Theory: 04/week

Practical: 04/week

Total: 8 credits

Theory Marks = 100 = 60 T + 40 IA

Practical Marks = 80 = 50 P + 30 PE

Total Marks = 180

### Course Objectives:

- To introduce the concept of journalism and mass communication
- To familiarize the students with different facets of journalism
- To educate the students about the role of journalism in the development of society

### Learning Outcomes:

At the end of the course, the students should be able to

7. Van Arnhem. (2004). *All about photography*. New Delhi: Central Publishing House.

## BACS 3: COMPUTER APPLICATIONS FOR MEDIA

Course Title and Code	BACS 3: Computer Applications for Media (With Honours)		
Programme Title	Bachelor of Arts in Journalism and Mass Communication		
Credits	Theory-04 Practical-02	Semester	03
Course Type	Core	Academic Year	2021-22

Prerequisite: Theory - 4 Semesters

Practical - 4 Semesters

Total 8 credits

Theory Marks- 100 = 50 T + 50 SA

Practical Marks 50 = 20 P + 30 PS

Total Marks = 150

Total Marks = 150

### Course Objectives:

- To introduce students to the basics of computers
- To familiarize the students to the applications of computers in print and electronic journalism
- To facilitate the students to learn the practical applications of computers at different levels in media

### Learning Outcomes:

- Students will be equipped with computer related media skills
- Students will get hands on experience on various computer applications
- Students will independently be able to create new media content

### Unit I:

Introduction to Computers, Basic Hardware, Computer and Noncomputer Production, Software for Noncomputer Production, Internet, IIT, PageMaker, Adobe InDesign, Barcode and QR.

### Unit II:

MS Office: Word, Power Point, Excel – Creating Charts, Graphs, Tables, Use of Computers in Reporting, Editing, Publication and Printing

### Unit III:

Web Animation, Technologies of Web Writing, Illustrations and Web Designing, Languages, Programming, Multimedia, Online Newspapers, Web Portal.

### Unit IV:

New Media – Definition and Characteristics, Types of New Media – Website, Blogs, Video, Email, Social Media Marketing & IIT Platforms, Types, Techniques & Software for Blogging & Vlogging, Cyber Crime, Web Cloning.

### Finalist Companies:

1. Eliza is fighting on a topic of your choice.
2. Compare and contrast your interpretation of your choice.
3. A review on any recent (ITT) content of your choice.
4. Present your personal take on either of Eliza's Critics.
5. Prepare a full journal of 2 pages (A2 size).

### Books for Reference:

1. Sussan, R., 2008. *Computers Today: Easy to Use, Easy to Learn*.
